### At a glance

IBM® Rational® ClearCase® Integration Support for 64-bit Cadence Design Framework product allows customers to take advantage of 64-bit processors for large scale analog/mixed signal design projects. An innovative ClearCase MultiSite® Mastership solution (Synchronous Request for Mastership) significantly improves the productivity when organizations scale the SCM Solution for large distributed teams.

For ordering, contact your IBM representative, an IBM Business Partner, or IBM Americas Call Centers at 800-IBM-CALL (Reference: AE001).

### Overview

With the release of IBM Rational ClearCase - Cadence Integration V7.1.2.2, there is now support for 64-bit editions of Cadence Design Framework. This new support adds integration capabilities to provide a enterprise configuration and change management solution to analog, radio frequency, or mixed signal designers using Cadence Design Framework. Customers can advantage of core capabilities of IBM Rational ClearCase, without leaving their familiar design environment.

Cadence Integration now offers the following capabilities:

- New support for both 32- and 64-bit editions of Cadence Design Framework
- New support for synchronous ClearCase MultiSite Request for Mastership solution that significantly improves the productivity of individual developers/designers, when organizations deploy the integration solution for large globally distributed teams
- A rich set of integrated menus, toolbar, and a customized user interface for designer productivity
- Instant on Workspace support - Ability to instantly access any large sets of data through ClearCase workspace (Dynamic Views) without having to pre-populate information
- Ability to freeze workspace content
  - Ability to perform version control operations from within your design environment
  - Support for co-managed sets and Atomic Checkin operations
  - Ability to manage design input inside Cadence DFII from Open Access data objects to SKILL
- Circuit Design language (CDL), PSF, PSF XL, and others -- Ability to manage design outputs in ClearCase like Library, cell view and cell folder and file assets, including XML database, PSF, PSF XL, scripts, and other related assets

With these enhancements, organizations can now bring together their IT and systems development teams, and assets produced by these teams including software assets, digital design assets, analog, radio frequency, mixed signal design assets, under one roof, to promote individual, team, and organizational productivity for effective globally distributed development.

---

## Key prerequisites

---

The Integration is available to anyone who has a valid license of IBM Rational ClearCase V7.1.1.3 or above, at no additional cost.

---

## Planned availability date

---

March 29, 2011: Electronic availability

April 5, 2011: Media availability

---

## Section 508 of the U.S. Rehabilitation Act

---

Rational ClearCase and ClearCase MultiSite is capable as of April 5, 2011, when used in accordance with IBM's associated documentation, of satisfying the applicable requirements of Section 508 of the Rehabilitation Act, provided that any assistive technology used with the product properly interoperates with it. A U.S. Section 508 Voluntary Product Accessibility Template (VPAT), containing details on the products accessibility compliance, can be requested on the following website

### Cross-platform products

#### ***Cross-platform product for use on System z IFL engines***

Order the part numbers that follow when the product is intended to run on the Linux® operating system on System z® IFL engines. If the product is not intended to run on the Linux operating system on System z IFL engines, order from the other set of part numbers in this announcement. This set of part numbers provides the identical supply and authorization as the other set in this announcement.

## IBM Electronic Services

---

IBM has transformed its delivery of hardware and software support services to help you achieve higher system availability. Electronic Services is a Web-enabled solution that offers an exclusive, no-additional-charge enhancement to the service and support available for IBM servers. These services are designed to provide the opportunity for greater system availability with faster problem resolution and preemptive monitoring. Electronic Services comprises two separate, but

complementary, elements: Electronic Services news page and Electronic Services Agent.

The Electronic Services news page is a single Internet entry point that replaces the multiple entry points traditionally used to access IBM Internet services and support. The news page enables you to gain easier access to IBM resources for assistance in resolving technical problems.

The Electronic Service Agent™ is no-additional-charge software that resides on your server. It monitors events and transmits system inventory information to IBM on a periodic, client-defined timetable. The Electronic Service Agent automatically reports hardware problems to IBM. Early knowledge about potential problems enables IBM to deliver proactive service that may result in higher system availability and performance. In addition, information collected through the Service Agent is made available to IBM service support representatives when they help answer your questions or diagnose problems. Installation and use of IBM Electronic Service Agent for problem reporting enables IBM to provide better support and service for your IBM server.
