At a glance

IBM Lotus Notes and Domino 7.0.3:

- Provides you with the expected maintenance updates
- Adds important product features
- Enhanced or updated hardware and operating system support
- Improved blog template documentation
- Improved instant messaging status capabilities

For ordering, contact:

Your IBM representative, an IBM Business Partner, or the Americas Call Centers at

800-IBM-CALL Reference: YE001

Overview

IBM Lotus Notes® and Domino® 7.0.3, a maintenance release, contains fixes to the Lotus Notes and Domino family of products, including IBM Lotus Enterprise Integrator™. This regularly scheduled update also contains a limited number of new product features. Some new features:

- Support for Microsoft™ Windows™ Vista
- Support for Red Hat Enterprise Linux™ 5
- Added Notes® client capability to utilize "In a meeting" Instant Messaging status
- Improved Blog Template documentation

For more detailed information about the 7.0.3 release, refer to the Release Notes for IBM Lotus Notes and Domino 7.0.3 software, which can be found either on the product CD-ROM (readme.nsf, readme.pdf) or online at the Lotus® Documentation Library Web site

<http://www.lotus.com/idd/doc>

This maintenance release, as it pertains to the Lotus Domino server, is available for IBM Lotus Domino 7 for z/OS®. To access the associated prerequisites, technical information, ordering information, and terms and conditions, refer to Software Announcement [205-198](#), dated August 30, 2005. IBM Lotus Domino 7 for z/OS.

Key prerequisites

For details, refer to the Hardware requirements and Software

requirements sections.

Planned availability dates

Electronic software delivery:

- October 16, 2007: English
- December 19, 2007: French, Spanish, Italian, German, Catalan, Portuguese-Brazilian, Japanese, Korean, Chinese-Traditional and Simplified,
- February 29, 2008: Portuguese, Russian, Hebrew, Arabic, Hungarian, Greek, Turkish, Czech, Polish, Danish, Swedish, Norwegian, Dutch, Finnish, Slovenian, Thai

Physical media and documentation:

- November 16, 2007: English
- January 11, 2008: French, Spanish, Italian, German, Catalan, Portuguese-Brazilian, Japanese, Korean, Chinese-Traditional and Simplified
- March 21, 2008: Portuguese, Russian, Hebrew, Arabic, Hungarian, Greek, Turkish, Czech, Polish, Danish, Swedish, Norwegian, Dutch, Finnish, Slovenian, Thai

Description

Lotus Notes and Domino 7.0.3 software delivers a complete, flexible, and open integrated collaborative environment that can help address the needs of executives, end users, IT groups, and developers. It brings together elements necessary to maximize collaboration and human interaction.

With Lotus Notes and Domino 7.0.3 software, you can focus on your top priority work, connect with various communities, leverage existing skills, and more. All this can help reduce total cost of ownership, while delivering security-rich capabilities, scalability, manageability, productivity, reusability, and flexibility.

The inclusion of the new server, client, and platform options in the Lotus Notes and Domino 7.0.3 release extends IBM's leadership in the messaging and collaboration platform. The Lotus Domino server now also supports Red Hat Enterprise Linux version 5.

Consistent with any maintenance release, IBM has taken strides to improve consistency with emerging market changes and standards. To that end, Lotus Notes, Lotus Domino Designer®, and Lotus Domino Administrator client 7.0.3 software supports the Microsoft Vista operating system.

Accessibility by people with disabilities

IBM strives to provide accessible solutions for customers with disabilities and where full accessibility is not met, customers are advised on workable alternatives, where possible, to meet their needs.

Section 508 of the U.S. Rehabilitation Act

IBM makes no representation about the Section 508 status of the third-party electronic and information technology product in this offering. Contact the vendor for specific, current information on the Section 508 status of this product.

IPLA and Subscription and Support considerations

IPLA licenses can be transferred from one machine to another within, but not limited to an enterprise. You may aggregate the capacity for all the processors the product is operated on to achieve a more economic price. This will result in a single Proof of Entitlement (PoE). It is your responsibility to manage the distribution of Value Units within the limits of the entitlement of the product license.

Subscription and Support must cover the same capacity as the product license entitlement. Subscription and Support will be available in the country in which the agreement is made.

Statement of direction

IBM continues to demonstrate their commitment to the growth of the Lotus Notes and Domino platform by leveraging IBM's technical innovations. We continue to provide additional business value to the Lotus Notes and Domino customer.

All statements regarding IBM's plans, directions, and intent are subject to change or withdrawal without notice.

Reference information

Refer to Software Announcement [206-338](#), dated December 19, 2006.

Trademarks

Lotus Enterprise Integrator is a trademark of International Business Machines Corporation in the United States or other countries or both.

Domino, Lotus Notes, Notes, Lotus, z/OS, and Domino Designer are registered trademarks of International Business Machines Corporation in the United States or other countries or both.

Microsoft and Windows are trademarks of Microsoft Corporation.

Linux is a trademark of Linus Torvalds in the United States, other countries or both.

Other company, product, and service names may be trademarks or service marks of others.

Education support

IBM training provides education to support many IBM offerings. Descriptions of courses for IT professionals and managers are on the IBM training Web site

http://www.ibm.com/services/learnin/ites.wss/tp/en?pageType=tp_search

Call IBM training at 800-IBM-TEACH (426-8322) for catalogs, schedules, and enrollments.

IBM Training is your source for learning on IBM software. For more information on training, conferences and other resources, visit the IBM Training Web site

<http://www.ibm.com/training>

Technical Skills Software Workshop

No-fee technical skills training workshops (English only) for this product are offered to customers and Business Partners to gain hands-on skills for installing, configuring, operating, and supporting this product. The workshops are ideal for customers and Business Partners who are in the process of evaluating, or have already purchased it. Workshops are modeled to be 50 to 70% hands-on labs and are continually updated to current product release.

Workshops are delivered in multiple formats, traditional classroom, self-paced (self-study), and instructor led e-learning. All formats have the same content.

Traditional classroom workshops are scheduled and delivered in-person worldwide at IBM and non-IBM locations throughout the year.

Self-paced/self-study workshops enable the student to view the workshop presentations and execute the labs on their own schedule with no travel required. The presentations have speaker notes and allow the student full control to navigate the information. Students reserve a one week period to run the labs on a remote, supported, live environment. Support is provided through a monitored forum.

Note: A fast Internet connection is required.

For more details on current workshop content, schedules, and to register for any workshop format, visit

<https://www.developer.ibm.com/isv/spc/events/>

Offering Information

Product information is available via the Offering Information Web site

<http://www.ibm.com/common/ssi>

Also, visit the Passport Advantage® Web site

TCP/IP IPv6	No	Yes	Yes
X. PC	No	No	No

- (1) Only Microsoft NetBEUI is supported. Starting with Windows XP, Microsoft has discontinued support of the NetBEUI.
- (2) Only Microsoft TCP/IP is supported.
- (3) Domino clusters and partitioned server configurations do not support the IPX/SPX protocol. At this time, Lotus does not plan to provide IPX/SPX network support for future releases of these features.

IBM Lotus Domino Web Access system requirements

Client requirements

- Recommended for better performance — Pentium IV 1 GHZ with 512 MB of memory (Windows and Linux clients)
- Minimum — Pentium III 400 MHz with 128 MB of memory (Windows client); Pentium III 500 MHz with 192 MB of memory (Linux client)

IBM Lotus Domino Access for Microsoft Outlook requirements

Client system memory

- Microsoft Windows 2000 Professional Edition and Windows XP Professional Edition with Service Pack 3: 128 MB RAM required; 256 MB or more recommended
- Windows Vista: 1 GB required

Client disk space

- Microsoft Windows operating system: 275 MB disk space

IBM Lotus Domino Offline Services (DOLS) system requirements

Client system requirements:

- Intel Pentium
- Minimum RAM, 128 MB; recommended RAM, 256 MB
- 500 MB free disk space recommended for basic operation
- Additional disk space for each subscription, depending on size

Browser requirements:

- Internet Explorer 6.0, or later

IBM Lotus Enterprise Integrator™

Microsoft Windows 2000 and Windows NT™

- 60 MB available disk space
- 256 MB RAM (above Domino requirements) for data management activities only, 512 MB (above Domino requirements) for real time and data management activities

Sun Solaris, IBM AIX, and Linux

- 80 MB available disk space
- 256 MB RAM (above Domino requirements) for data management activities only, 512 MB (above Domino requirements) for real time and data management activities

Software requirements: IBM Lotus Notes Client

Platform	Microsoft Windows 2000	Microsoft Windows XP	Microsoft Windows Vista	Apple Mac OS X
Supported operating system versions	Microsoft Windows 2000 Professional	Microsoft Windows XP Professional	Microsoft Windows Vista Enterprise, Ultimate, and Business Editions	Apple Mac OS X 10.4.2, or later

Note: Refer to the "Microsoft Windows service pack requirements" Release Note for Service Pack information.

IBM Lotus Domino Administrator Client, IBM Lotus Domino Designer

Platform	Microsoft Windows 2000	Microsoft Windows XP	Microsoft Windows Vista
Supported operating system versions	Microsoft Windows 2000 Professional	Microsoft Windows XP Professional	Microsoft Windows Vista Enterprise, Ultimate, and Business Editions

- For additional information, refer to "i5/OS system requirements" Release Note.
- For Service Pack information, refer to "Domino for Linux on System z service pack requirements" Release

IBM Lotus Domino Web Access system requirements

Client operating systems

- Microsoft Windows 2000 Professional
- Microsoft Windows XP

Client Operating Systems for Mozilla

- Novell SUSE Linux Enterprise Server 8
- Novell SUSE Linux Enterprise Server 9

Supported browsers

- Win32 Internet Explorer 6.0, or later
- Mozilla 1.7.x (Linux clients only)
- Mozilla Firefox 1.0.x on Win32 and Linux (supported by the Lotus Domino Web Access7 mail template only; not supported by iNotes6 templates)

Any attempt to access Lotus Domino Web Access through an unsupported browser will result in the display of an unsupported browser notice. Netscape 4.x users may see hangs or crashes when encountering the Lotus Domino Web Access unsupported browser page. If you are a Netscape 4.x user and you encounter these problems, you should open your mail file using the WebMail user interface directly through the &ui=webmail switch. This is documented in the topic "Switching to WebMail" in the Lotus Domino Web Access help.

Note: Lotus Domino Web Access will not work if JavaScript is disabled or if session cookies are disabled.

Server Requirements

Refer to "IBM Lotus Notes and Domino 7 platforms and system requirements" in the Release Notes for a complete list of server operating systems and requirements.

Certified proxy servers

- IBM WebSphere® Edge Server V2.0.2 efix 49
- Tivoli® Access Manager V5.1

Adobe Acrobat

Adobe Acrobat Reader, Version 4.0, or later to print calendars.

IBM Lotus Domino Access for Microsoft Outlook requirements

IBM Lotus Domino Access for Microsoft Outlook allows Microsoft Outlook 2002 (XP), or 2003 users to connect to an IBM Lotus Domino Server running Domino 7. If you are upgrading from an earlier beta version, refer to the "Upgrade Instructions" before installing.

System and Outlook requirements

- Microsoft Windows operating system (Windows 2000 Professional; Windows XP Professional; Windows Vista Enterprise, Ultimate, and Business Editions)
- Microsoft Outlook XP with Service Pack 3, and Outlook 2003 with Service Pack 2
- Lotus Domino server running V6.5.1 through V6.5.6, V7.0 through V7.0.3
- Mail databases created using Mail7.NTF, Mail7ex.NTF, or Lotus Domino Web Access7.NTF

IBM Lotus Domino Offline Services system requirements

Lotus Domino Offline Services is supported on Win32 clients. Lotus Domino Offline Services is

supported on Win32, AIX, Solaris, and Linux servers.

IBM Lotus Enterprise Integrator system requirements

- Microsoft Windows 2000 Server and Advanced Server
- Microsoft Windows 2003 Server and Server Enterprise Edition
- Microsoft Windows Server 2003 x64 Edition
- AIX V5.2 and V5.3
- Sun Solaris 9.0
- Sun Solaris 10
- SUSE Linux Enterprise Server 8
- SUSE Linux Enterprise Server 9
- SUSE Linux Enterprise Server 10 (32 and 64 bit)
- Red Hat Enterprise Linux 4.0
- Red Hat Enterprise Linux 5.0
- IBM i5/OS V5R3
- IBM i5/OS V5R4

Planning information

Software Maintenance is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and technical support are provided by the Software Maintenance offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software and technical support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Maintenance with each program license acquired. The initial period of Software Maintenance can be extended by the purchase of a renewal option, if available.

Packaging: IBM Lotus Notes and Domino and Lotus Enterprise Integrator V7.0.3 will be distributed via a media package and electronic software distribution (ESD).

IBM Lotus Notes and Domino media is distributed in several specific packages based on license purchase and include the following:

- Lotus Notes and or Domino product CDs or electronic image files
- Softcopy product documentation, including README files, which is included on the product CDs or electronic image files

The License Information form numbers are:

- L-GHUS-6U8MKH for Lotus Domino
- L-GHUS-6U8H57 for Lotus Notes

IBM Lotus Enterprise Integrator media package is distributed in one package with the following:

- Lotus Enterprise Integrator product CD
- Softcopy product documentation, including README files, which is included on the product CD or electronic image files

The License Information form number is:

- L-GHUS-6YUKD4 for Lotus Enterprise Integrator

These programs, when downloaded from a Web site, contain the applicable IBM license agreement and License Information, if appropriate, which will be presented for acceptance at the time of installation of the program. The license and License Information will be stored in a directory such as LICENSE.TXT for future reference.

Security, auditability, and control

The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

Ordering information

This product is only available via Passport Advantage. It is not available as shrinkwrap.

Charge metrics definitions

Value Unit

A Value Unit is a pricing charge metric for program license entitlements which is based upon the quantity of a specific designated measurement used for a given program. Each program has a designated measurement. The most commonly used designated measurement is a processor core. However, for select programs, there are other designated measurements such as users, client devices, and messages. The number of Value Unit entitlements required for a program depends on how the program is deployed in your environment and must be obtained from a Value Unit table. You must obtain a PoE for the calculated number of Value Unit entitlements for your implementation. The Value Unit entitlements are specific to a program and may not be exchanged, interchanged, or aggregated with Value Unit entitlements of another program.

Processor (Value Unit)

A processor core is a functional unit within a computing device that interprets and executes instructions. A processor core consists of at least an instruction control unit and one or more arithmetic or logic unit. With multicore technology, each core is considered a processor. Not all processor cores require the same number of Value Unit entitlements. To calculate the number of Value Unit entitlements required, refer to the Value Unit table on the following Web site

http://www-142.ibm.com/software/sw-lotus/services/cwepassport.nsf/wdocs/pvu_table_for_customers

With full capacity licensing, a PoE must be acquired for the appropriate number of Value Units based on all activated processor cores available for use on the server.

Sub-capacity processor (Value Unit)

For programs eligible for sub-capacity licensing, a PoE must be acquired for the appropriate number of value units based on all activated processor cores available for use in each partition (utilizing eligible partitioning technologies) where the program runs. Refer to the International Passport Advantage Agreement Attachment for sub-capacity terms or the program's license information to determine applicable sub-capacity terms.

Authorized user

An authorized user is one and only one individual (named or unnamed) within or outside your enterprise. A PoE must be obtained for each individual user accessing the program in any manner. A program licensed under an authorized user PoE may be installed on a single computer or server, and accessed by multiple users, provided that a PoE has been obtained for each individual user accessing the program either directly or indirectly (via a multiplexing

program, device, or application server) through any means on behalf of the user.

Sub-capacity for selected middleware products

Sub-capacity licensing on a per processor or per Value Unit basis is available for selected middleware products. To offer sub-capacity licensing, IBM software products implement IBM Tivoli License Compliance Manager within their offerings so that you can monitor and report quarterly to IBM on the use of the programs on a continuous basis.

More information can be found on the Passport Advantage Web site

<http://www.ibm.com/software/passportadvantage>

Eligibility requirements for sub-capacity licensing

To be eligible for sub-capacity licensing terms on this product, you must agree to install and configure IBM Tivoli License Manager for IBM Software, in accordance with the IBM Tivoli License Manager publications, and to enable the collection of program use data on all eligible machines subject to sub-capacity terms.

For those machines running programs with sub-capacity licensing terms, you must use IBM Tivoli License Manager for IBM Software to monitor program use and submit to IBM an IBM Use Report each calendar quarter. Multiple copies of IBM Tivoli License Manager for IBM Software or IBM Tivoli License Manager are not required. You can use more copies if you need them to support your operational environment, but only one copy is required to monitor all your

sub-capacity licensed products.

Additionally, if this is the first product you have licensed under sub-capacity terms, you must agree to the terms of an attachment to your Passport Advantage or Passport Advantage Express contract and submit a new Passport Advantage enrollment form. First-time sub-capacity clients also have an opportunity to ensure a primary business contact is established for their contracts.

For more information on required and entitled license capacity, license requirements, and reporting, refer to Software Announcement [205-093](#), dated April 19, 2005.

If you order (this product) under sub-capacity terms, IBM Tivoli License Manager for IBM Software will be made available to you if you do not already have one. You must install and configure this tool for your sub-capacity products. Alternately, you can use Tivoli License Manager. Once the license manager software is installed, you will be required to register online (IBM may need to contact you in order to finalize the registration process.) You must monitor program use on a continuous basis with an IBM Tivoli License Manager for IBM Software and submit IBM Use Reports to IBM on a calendar quarterly basis.

IBM Tivoli License Manager for IBM Software is documented in the following customer publications, which are available from IBM Publications Center at

<http://www.elink.IBMLink.ibm.com/public/applications/publications/cgibin/pbi.cgi?>

Publication	Form
Planning, Installation, and Configuration	SC32-1431
Administration	SC32-1430
Problem Determination	SC32-9102
Data Dictionary	SC32-1432
Release Notes	SC32-1429

For IBM Tivoli License Manager configuration guidance and instructions for specific products (including this product) acquired with sub-capacity terms, refer to

<http://www.lotus.com/sub-capacity>

The Web site will give you information about how to set up the product for detection by IBM Tivoli License Manager, any required maintenance, and any required steps that are unique to this product.

Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

Licensing: IBM International Program License Agreement including the License Information document and PoE govern your use of the program. PoEs are required for all authorized use.

Part number products only, offered outside of Passport Advantage, where applicable, are license only and do not include Software Maintenance.

This software license includes Software Maintenance, previously referred to as Software Subscription and Technical Support.

IBM Lotus Enterprise Integrator	5724- L76	L- GHUS- 6YUKD4
IBM Lotus Notes/Domino	5724- E62	L- GHUS- 6U8H57, L- GHUS- 6U8MKH

The program's License Information will be available for review on the IBM Software License Agreement Web site

<http://www.ibm.com/software/sla/slabd.nsf>

Limited warranty applies: Yes

Warranty: IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known Program defects, defect corrections, restrictions, and bypasses at no additional charge. Consult the IBM Software Support Guide for further information at

<http://www.ibm.com/software/support>

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

Program technical support: Technical support of a program product will be available for a minimum of three years from the general availability date, as long as your Software Maintenance is in effect. This technical support allows you to obtain assistance (via telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Maintenance also provides you with access to updates, releases, and versions of the program. You will be notified, via announcement letter, of discontinuance of support with 12 months' notice. If you require additional technical support from IBM, including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

Money-back guarantee: If for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

For programs acquired under the IBM International Passport Advantage Agreement, this term applies only to your first acquisition of the program. For programs acquired under any of IBM's On/Off CoD software offerings, this term does not apply since these offerings apply to programs already acquired and in use by you.

Authorization for use on home/portable computer: The program may be stored on the primary machine and another machine, provided that the program is not in active use on both machines at the same time. You may not copy and use this program on another computer without paying additional license fees.

Product name

IBM Lotus Enterprise Integrator	Yes
IBM Lotus Notes/Domino	Yes

International Passport Agreement

Passport Advantage applies: Yes, and through the Passport Advantage Web site at

<http://www.ibm.com/software/passportadvantage>

This product is only available via Passport Advantage. It is not available as shrinkwrap.

Agreement for Acquisition of Software Maintenance: The following agreement applies for maintenance and does not require customer signatures:

IBM Agreement for Acquisition of Software Maintenance (Z125-6011)

Software Maintenance applies: Yes. Software Maintenance is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and technical support are provided by the Software Maintenance offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software and Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Maintenance with each program license acquired. The initial period of Software Maintenance can be extended by the purchase of a renewal option, if available.

While your Software Maintenance is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance via telephone and, if available, electronic access, to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, consult your IBM Software Support Guide at

<http://techsupport.services.ibm.com/guides/handbook.html>

Software Maintenance does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.

For additional information about the International Passport Advantage Agreement and the IBM International Passport Advantage Express Agreement, visit the Passport Advantage Web site at

Other terms

Volume orders (IVO): No

System i™ Software Maintenance applies: No

Educational allowance available: Not applicable.

On/Off CoD

To be eligible for On/Off CoD pricing, customers must be enabled for temporary capacity on the corresponding hardware, and the required contract — Z125-6907, Amendment for iSeries and pSeries® Temporary Capacity On Demand — Software — must be signed prior to use.

IBM has transformed its delivery of hardware and software support services to help you achieve higher system availability. Electronic Services is a Web-enabled solution that offers an exclusive, no-additional-charge enhancement to the service and support available for IBM servers. These services are designed to provide the opportunity for greater system availability with faster problem resolution and preemptive monitoring. Electronic Services comprises two separate, but complementary, elements: Electronic Services news page and Electronic Services Agent.

The Electronic Services news page is a single Internet entry point that replaces the multiple entry points traditionally used to access IBM Internet services and support. The news page enables you to gain easier access to IBM resources for assistance in resolving technical problems.

The Electronic Service Agent™ is no-additional-charge software that resides on your server. It monitors events and transmits system inventory information to IBM on a periodic, client-defined timetable. The Electronic Service Agent automatically reports hardware problems to IBM. Early knowledge about potential problems enables IBM to deliver proactive service that may result in higher system availability and performance. In addition, information collected through the Service Agent is made available to IBM service support representatives when they help answer your questions or diagnose problems. Installation and use of IBM Electronic Service Agent for problem reporting enables IBM to provide better support and service for your IBM server.

Prices

Passport Advantage

For Passport Advantage information and charges, contact your IBM representative or authorized IBM Business Partner. Additional information is also available at

<http://www.ibm.com/software/passportadvantage>

Business Partner information

If you are an IBM Business Partner — Distributor for Workstation Software acquiring products from IBM, you may link to Passport Advantage Online for resellers where you can obtain Business Partner pricing information. An IBM ID and password are required.

IBM Global Financing

IBM Global Financing offers competitive financing to credit-qualified customers to assist them in acquiring IT solutions. Offerings include financing for IT acquisition, including hardware, software, and services, both from IBM and other manufacturers or vendors. Offerings (for all customer segments: small, medium, and large enterprise), rates, terms, and availability can vary by country. Contact your local IBM Global Financing organization or visit

<http://www.ibm.com/financing>

IBM Global Financing offerings are provided through IBM Credit LLC in the United States, and other IBM subsidiaries and divisions worldwide to qualified commercial and government customers. Rates are based on a customer's credit rating, financing terms, offering type, equipment type, and options, and may vary by country. Other restrictions may apply. Rates and offerings are subject to change, extension, or withdrawal without notice.
