Overview

IBM® Remote Implementation Services assists you with the planning, implementing, configuring, testing, and basic skills instruction for selected IBM Server and Storage technology. A highly skilled IBM technical specialist will help you implement selected server and storage products remotely. The technical specialist will:

- Coordinate a physical planning and configuration session
- Assist with the implementation of the system components
- Assist with the configuration and verification testing
- Provide basic skills instruction for up to two of your designated technical personnel on key aspects of the implementation and product features

IBM Remote Migration Services utilizes a highly skilled IBM technical specialist will help you to migrate to selected IBM Server products efficiently while minimizing risk and data loss.

These implementation and migration services are delivered using methods that will access your system remotely, providing a less-intrusive and lower-cost method to perform the implementation or migration service. Scheduling the implementation or migration service can be more flexible and rapid since IBM uses a dedicated team who specialize in remote service delivery.

Planned availability date

February 23, 2010

Description

Accessibility by people with disabilities
