IBM Lotus Domino 7 enhances: Lotus Sametime, Lotus Sametime Enterprise Meeting Server, Lotus Domino Document Manager, Lotus Workflow, and Lotus QuickPlace

Overview
The IBM Lotus® Domino™ extended family of products can enhance the value of your Lotus Domino investment or can be deployed on their own to increase organizational productivity and responsiveness through business-critical collaboration solutions.

Version 7 of the IBM Lotus Domino extended products offers numerous enhancements in features, reliability, availability, and serviceability.

The IBM Lotus Domino 7 extended family includes:
- IBM Lotus Sametime®
- IBM Lotus Sametime Enterprise Meeting Server
- IBM Lotus Domino Document Manager
- IBM Lotus QuickPlace™
- IBM Lotus Workflow™

This portfolio continues to add value to the overall IBM Lotus messaging and collaboration solutions, including instant messaging, Web conferencing, document management, and a sophisticated workflow solution. IBM offers a set of well integrated products based on the Lotus Domino platform. Take advantage of these enhancements to get the most from your Lotus Domino investment.

Key prerequisites
Refer to the Hardware requirements and Software requirements sections of this announcement.

Planned availability dates
- August 30, 2005: Electronic software delivery, English only
- October 7, 2005: Media and documentation

At a glance
IBM Lotus Sametime 7 combines instant messaging and Web conferencing capabilities with the security, scalability, and reliability demanded of mission-critical applications. Its robust features lower total cost of ownership that can be associated with an on-premise software deployment.

IBM Lotus Sametime Enterprise Meeting Server 7 can be added to Lotus Sametime to support high-volume Web conferencing environments, as well as to optimize load balancing and failover for enterprise-class deployments.

IBM Lotus QuickPlace 7 can instantly create a team workspace to seamlessly bring together geographically and organizationally dispersed team members. It increases team productivity, improves general responsiveness, and facilitates collective decision-making.

IBM Lotus Domino Document Manager 7 teams can effectively work together through collaborative document management. It allows organizations to find and deliver business documents rapidly.

IBM Lotus Workflow 7 enables organizations to standardize and streamline time-consuming, people-based activities. It helps improve response time and reduce costs.

For ordering, contact:
Your IBM representative or the Americas Call Centers at 800-IBM-CALL

Reference: YE001
IBM Lotus Domino 7 extended products offer numerous enhancements in features, reliability, availability, and serviceability. The IBM Lotus Domino family of products can enhance the value of a Lotus Domino investment or be deployed on their own to increase organizational productivity and responsiveness through business-critical collaboration solutions.

New features for Lotus Sametime, Lotus Web conferencing, Lotus Sametime Enterprise Meeting Server, Lotus Domino Document Manager, Lotus Workflow, and Lotus QuickPlace include:

- Enabled click-to-call and Web conferencing with integrated audio functionality through the optional integration of Lotus Sametime with leading third-party audio solutions
- Automated Web conference test capability to ensure proper PC configuration
- Enhanced diagnostics and status information for Lotus Sametime, Lotus Web Conferencing, and Lotus QuickPlace
- Enhanced Macintosh, FireFox support for Lotus Sametime and Lotus QuickPlace
- Deployment of Lotus Sametime and Lotus QuickPlace on the same server when using i5/OS (iSeries™), AIX®, or Solaris
- New Lotus QuickPlace folder-based navigation model
- Deployment of Lotus QuickPlace on locked-down desktops
- Refreshed User Interface for Lotus Sametime Enterprise Meeting Server

IBM Lotus Sametime 7 provides a combination of instant messaging and Web conferencing capabilities that will enable you to engage and respond to colleagues, customers, business partners, and suppliers in real time. Designed with the security features, scalability, and reliability demanded of mission-critical applications, Lotus Sametime combines robust features with the opportunity for lower total cost of ownership often associated with an on-premise software deployment.

IBM Lotus Sametime Enterprise Meeting Server 7 can be added to a Lotus Sametime deployment to support high volume Web conferencing environments, as well as to optimize load balancing and failover for enterprise-class deployments (Microsoft™ Windows™ only).

IBM Lotus Web Conferencing 7 combines the market-leading Web conferencing capabilities of Lotus Sametime with a concurrent user price point that makes it easy to begin Web conferencing and allows for both internal and external meeting participants.

IBM Lotus QuickPlace 7 lets users instantly create a team workspace to gain access to timely information and to seamlessly bring together geographically and organizationally dispersed team members. Lotus QuickPlace is designed to increase team productivity, improve general responsiveness, and facilitate collective decision-making.

IBM Lotus Domino Document Manager 7 manages the complete life cycle of office documents from collaborative authoring to archival. It allows teams to work together more effectively through collaborative document management. This new release delivers enhancements to usability, serviceability, single sign-on, performance, and additional platform support. With these enhancements, Lotus Domino Document Manager can help increase user productivity, potentially reducing hardware, and network bandwidth costs by making it easy to find, store, and manage important documents, including spreadsheets, presentations, drawings, instant messages, and e-mails.

IBM Lotus Workflow 7 works on top of IBM Lotus Domino and speeds the creation and deployment of workflow-oriented applications. It allows organizations to standardize and streamline time-consuming, people-based activities, and track their progress. When integrated with Lotus Domino Document Manager, Lotus Workflow can streamline the distribution and approval cycle of documents. Lotus Workflow 7 allows Workflow Web browser users to make changes to a document and any attachment checked out from the Document Manager. In the earlier versions of Workflow, the attachment was lost during check-in. Other new features include support for Lotus Workflow services as Web services, support attachments in the Lotus Domino Document Manager integration from the browser, opportunity for performance improvement on a name lookup in IBM Lotus Workflow Architect, install usability improvement for Lotus Workflow Viewer, and serviceability improvement.

Accessibility by people with disabilities
IBM strives to provide accessible solutions for customers with disabilities and where full compliancy is not met, customers are advised on workable alternatives, where possible, to meet their needs.

Statement of direction
For the last 20 years, Lotus software from IBM has been at the forefront of the computing revolution. In many ways, it has helped shape the world we all work in today. IBM Lotus software continues to deliver one of the most comprehensive portfolios of messaging and collaboration solutions available, designed to help maximize collaboration and human productivity.

Lotus solutions continue to offer high-performance, security-rich access, and robust tools that can help user communities to manage their messaging and collaboration needs, regardless of company size and industry focus.

All statements regarding IBM’s plans, directions, and intent are subject to change or withdrawal without notice.

Trademarks
Domino, QuickPlace, Lotus Workflow, and iSeries are trademarks of International Business Machines Corporation in the United States or other countries or both. Lotus, Sametime, and AIX are registered trademarks of IBM Corporation. Microsoft and Windows are trademarks of Microsoft Corporation. Other company, product, and service names may be trademarks or service marks of others.
Offering information

Product information is available via the Offering Information Web site
http://www.ibm.com/common/ssi
Also, visit the Passport Advantage® Web site
http://www.ibm.com/software/passportadvantage

Publications

No publications are shipped with these products.

The IBM Publications Center
http://www.ibm.com/shop/publications/order

The Publications Center is a worldwide central repository for IBM product publications and marketing material with a catalog of 70,000 items. Extensive search facilities are provided. Payment options for orders are via credit card (in the U.S.) or customer number for 50 countries. A large number of publications are available online in various file formats, and they can all be downloaded by all countries free of charge.

The IBM Publications Notification System (PNS)

http://service5.boulder.ibm.com/pnsrege.nsf/messages/welcome

PNS enables subscribers to set up profiles of interest by order number/product number. PNS subscribers automatically receive e-mail notifications of all new publications defined in their profiles. These may then be ordered/downloaded from the Publications Center.

The PNS site is available in English and Canadian French.

Technical information

Specified operating environment

Hardware requirements

IBM Lotus Workflow™
- Lotus Workflow Server — Refer to the hardware requirements for the Lotus Domino™ server on which Lotus Workflow is installed.
- Lotus Workflow Architect — Intel® Pentium® or compatible, 128 MB RAM minimum, 256 MB, or more recommended.

IBM Lotus® Sametime® Enterprise Meeting Server and J2EE computer requirements

Note: The system requirements of the EMS and J2EE components are shown below. This system should be dedicated to running only the EMS and J2EE components. Do not install a Lotus Sametime server or any other Lotus Sametime components on this computer.
- CPU — Pentium 4 1.8 GHz, or higher recommended
- Memory
  - Microsoft® Windows™ 2000 — 1 GB RAM recommended; 512 MB minimum
  - Microsoft Windows 2003 — 1 GB RAM recommended, 512 MB minimum
- Disk space — 500 MB of free disk space. 1 GB+ recommended
- Communication adapter support

The EMS computer should also:
- Be registered in the same DNS domain as the Lotus Sametime servers
- Have TCP/IP connectivity with the Lotus Sametime server computers on port 80 for HTTP connections

IBM Lotus Sametime

Operating system: IBM @server® pSeries® (AIX®), V5.1 and V5.2
- Processor: Dual 475 MHz, or higher, IBM PowerPC® processor recommended; Dual 375 MHz PowerPC processor minimum
- RAM: 1 GB recommended; 512 MB minimum
- Disk space: 1 GB free disk space recommended to allow space for meetings; 500 MB minimum
- Disk swap space: 1.5 GB RAM recommended; 1 G minimum

Operating system: Sun Solaris operating environment, V8 and V9M
- Processor: UltraSPARC III 1 GHz processor, or higher, recommended; UltraSPARC III 550 MHz processor minimum
- RAM: 1 GB recommended; 512 MB minimum
- Disk space: 1 GB free disk space recommended to allow space for meetings; 500 MB minimum
- Disk swap space: 1.5 GB RAM recommended; 1 G minimum

- Processor: Intel Pentium II 400 MHz, or higher, recommended
- RAM: 1 GB recommended; 512 MB minimum

This announcement is provided for your information only. For additional information, contact your IBM representative, call 800-IBM-4YOU, or visit the IBM home page at: http://www.ibm.com.
• Disk space: 1 GB free disk space recommended to allow space for meetings; 500 MB minimum
• Disk swap space: 1.5 GB RAM recommended; 1 GB minimum

**Operating system: IBM i5/OS (iSeries™) V5R3**

• Processor:
  - IBM eServer® iSeries: all processor features for models 730 and 740, 800-264, or larger 8xx models
  - IBM i®: model 520, or larger
• RAM: 1 GB recommended; 512 MB minimum
• Disk space: 1 GB free disk space recommended to allow space for meetings; 500 MB minimum
• Disk drives: minimum of 4 drives

**IBM Lotus Domino Document Manager**

**AIX Server**

• IBM RISC System/6000® with Power PC processor
• Hard disk: 20 MB minimum for Document Manager, plus disk space for other applications and Domino users; 1 GB minimum (4 GB recommended) for Document Manager file cabinets

**Solaris Server**

• Sun UltraSPARC
• Disk space: 20 MB minimum for Document Manager, plus disk space for other applications and Domino users; 1 GB minimum (4 GB recommended) for Document Manager file cabinets

**Windows Server**

• A mapped drive from which the installation program can be run
• Disk space: 76 MB minimum for Document Manager, plus disk space for other applications and Domino users; 1 GB minimum (4 GB recommended) for Document Manager file cabinets

**i5/OS Server**

• IBM i or iSeries model capable of running i5/OS V5R3
• Disk space: 40 MB minimum for Document Manager, plus disk space for other applications and Domino users; 1 GB minimum (4 GB recommended) for Document Manager file cabinets

**Note:** For detailed information on Domino server requirements, refer to the Domino documentation.

**Windows Client**

• Pentium 333 MHz, or higher, with 256 MB RAM, or higher
• Disk space: 10 MB to install the Desktop Enabler, plus 50 MB disk space for downloading temporary files

**Macintosh Client**

• PowerPC G5 processor, with 128 MB RAM (256 MB RAM, or higher recommended)

**Software requirements**

**IBM Lotus QuickPlace™**

**Server requirements**

**Operating system:** IBM pSeries (AIX), V5.2 and V5.3
• Refer to the requirements for your Lotus Domino server.

**Operating system:** Sun Solaris operating environment, V9
• Refer to the requirements for your Lotus Domino server.

**Operating system:** Microsoft Windows 2000 Server, Microsoft Windows 2003 Server Service Pack 1, or Microsoft Windows 2000 Advanced Server or Microsoft 2003 Advanced Server Service Pack 1
• Refer to the requirements for your Lotus Domino server.

**Operating system:** IBM i5/OS (iSeries) V5R3
• Refer to the requirements for your Lotus Domino server.

**Client requirements:**

• Microsoft Windows 2000 Professional Service Pack 4
• Microsoft Windows XP Professional Service Pack 1
• Novell Linux™ Desktop 9.0
• Red Hat Enterprise Linux 3.0 Workstation
• Macintosh OS X 10.3.3 or 10.3.6

**IBM Lotus Workflow**

**Server platforms**

• Microsoft Windows 2003, Microsoft Windows 2000 Server
• AIX V5.2
• Sun Solaris 9
• SUSE LINUX Enterprise Server (SLES) 8
• IBM i5/OS (iSeries) V5R3
• z/OS V1.5
• United Linux 1.0 zSeries®

* Server platforms are tied to the version of Lotus Domino for that platform. Lotus Workflow 7 supports Lotus Domino Release 6.5.4 or later, Release 7.

**IBM Lotus Sametime Enterprise Meeting Server and J2EE computer requirements**

**Operating system:**

• Microsoft Windows 2000 Server or Advanced Server with Service Pack 4
• Microsoft Windows 2003

**IBM Lotus Sametime**

**Server operating systems:**

• IBM pSeries (AIX), V5.1 and V5.2
• Sun Solaris operating environment, V8 and V9
• IBM i5/OS (iSeries) V5R3
Client operating systems

Client OS (thick):
• Microsoft Windows XP Pro Service Pack 1
• Microsoft Windows 2000 Pro Service Pack 4

Client browsers:
• Internet Explorer 6.0 on Microsoft Windows XP Pro and Microsoft Windows 2000 Pro
• Mozilla 1.7.6 on REL 3.0 (except Doc Mgr)
• Mozilla 1.7.6 on Novell Linux Desktop (NLD) 9.0 (except Doc Mgr)

Client JDK/JRE:
• JDK: 1.4.2
• JRE: 1.4.2
• Sun JRE 1.4.2, or later for Linux

Java™ Connect for Mac desktop only:
• JVM 1.4.2 (for Mac OSX 10.3.4 and 10.4.x)

Client JDK/JRE:
• JDK: 1.4.2
• JRE: 1.4.2
• Sun JRE 1.4.2, or later for Linux

IBM Lotus Domino:
• Lotus Domino 7

IBM Lotus Domino Document Manager
IBM Lotus Domino Document Manager supports the server platforms listed below when paired with an appropriate Lotus Domino server. For detailed information on Lotus Domino requirements, refer to the Domino documentation.

AIX Server:
• IBM AIX V5.2 (with Lotus Domino V6.03, 6.5.1, 6.5.2, 6.5.3, or 7)
• IBM AIX V5.3 (with Lotus Domino 7)

Solaris Server:
• Sun Solaris 8 (with Lotus Domino V6.03, 6.5.1, 6.5.2, or 6.5.3)
• Sun Solaris 9 (with Lotus Domino V6.03, 6.5.1, 6.5.2, 6.5.3, or 7)

Windows Server:
• Microsoft Windows 2000 Advanced Server (with Lotus Domino V6.03, 6.5.1, 6.5.2, 6.5.3, or 7)
• Microsoft Windows 2003 Server (with Lotus Domino V6.03, 6.5.1, 6.5.2, 6.5.3, or 7)

i5/OS (iSeries) Server:
• IBM i5/OS V5.3 (with Lotus Domino V6.03, 6.5.1, 6.5.2, 6.5.3, or 7)

Planning information

Software Maintenance, previously referred to as Software Subscription and Technical Support, is included in the Passport Advantage Agreement. Installation and technical support is provided by the Software Maintenance offering of the IBM International Passport Advantage Agreement. This fee service enhances customer productivity, with voice and electronic access into IBM support organizations.
Packaging

**IBM Lotus Domino Document Manager 7** will be distributed via a media package and electronic software distribution (ESD). It is distributed in one package with the following:

- IBM Lotus Domino Document Manager 7 product CD.
- Softcopy product documentation including README files are included on the product CD.

The LI form number is L-GHUS-5XRRUS.

**IBM Lotus QuickPlace 7** will be distributed via a media package and ESD. It is distributed in one package with the following:

- IBM Lotus QuickPlace 7 product CDs.
- Prerequisite software CDs.
- Softcopy product documentation including README files are included on the product CDs.

The LI form number is L-GHUS-5Z7NQE.

**IBM Lotus Workflow 7** will be distributed via a media package and ESD. It is distributed in one package with the following:

- IBM Lotus Workflow 7 product CD.
- Softcopy product documentation including README files are included on the product CD.

The LI form number is L-GHUS-5Z7NLF.

**IBM Lotus Sametime 7** will be distributed via a media package and ESD. It is distributed in one package with the following:

- IBM Lotus Sametime 7 product CDs.
- Prerequisite software CDs.
- Softcopy product documentation, including README files, are included on the product CDs.

The LI form number is L-GHUS-5Z7NTN.

**IBM Lotus Sametime Enterprise Meeting Server 7** will be distributed via a media package and ESD. It is distributed in one package with the following:

- IBM Lotus Sametime Enterprise Meeting Server 7 product CDs.
- Prerequisite software CDs.
- Softcopy product documentation, including README files, are included on the product CDs.

The LI form number is L-GHUS-62APWR.

**Security, auditability, and control**

The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

Ordering information

This product is only available via Passport Advantage. It is not available as shrinkwrap.

### Charge metrics definitions

#### Processor

In Full Capacity charging — Proofs of Entitlement (PoEs) must be acquired for all activated “processors” (available for use) that are on the server where the Program or a component of the Program is run.

1. If there are Program Components included in the offering whose function is not to be included in the charge metric, these must be listed in the Program-unique Terms of the License Information.

2. IBM defines a physical processor in a computer as a functional unit that interprets and executes instructions. A physical processor consists of at least an instruction control unit and one or more arithmetic and logic units.

3. Multi-core technology allows two or more processors (commonly called ’cores’) to be active on a single silicon chip. Unless otherwise announced, with multi-core technology, IBM considers each ’core’ to be a physical processor. For example, in a dual-core chip, there are two (2) physical processors residing on the single silicon chip.

4. In the zSeries Integrated Facility for Linux (IFL) environment, each IFL engine is considered a single ’physical processor.”
5. Threading, a technique which makes a single processor seem to perform as two or more, does NOT affect the count of physical processors.

6. Where “blade” technology is employed, each “blade” is considered a separate server and charging is based upon the total number of processors on the blade on which the Program is run.

“Per Managed processor” charging under Full Capacity

“Per Managed processor”: Charges are based on the active processors on the machines in the computing environment affiliated with the Program rather than on the server where the program is run. The managed processors which require PoEs are defined both in the Charges section of the Announcement or the License Information’s Program-unique terms.

Notes:

1. IBM defines a physical processor in a computer as a functional unit that interprets and executes instructions. A physical processor consists of at least an instruction control unit and one or more arithmetic and logic units.

2. Multi-core technology allows two or more processors (commonly called ‘cores’) to be active on a single silicon chip. With multi-core technology, IBM considers each ‘core’ to be a physical processor. For example, in a dual-core chip, there are two (2) physical processors residing on the single silicon chip.

3. The Program may NOT RUN on SOME OR ALL of the processors for which PoEs are required by the Program’s valuation method.

4. In the zSeries’ Integrated Facility for Linux (IFL) environment, each IFL engine is considered a single “physical processor.”

5. Threading, a technique which makes a single processor seem to perform as two or more, does NOT affect the count of physical processors.

6. Where “blade” technology is employed, each “blade” is considered a separate server and charging is based upon the total number of processors on the blade(s) with which the Program is affiliated.

Concurrent User:

A Concurrent User (User) is one individual machine, program, access or device within or outside Your enterprise. A “Proof of Entitlement” (“PoE”) is evidence of Your authorization to use a Program and is required for each User accessing the Program or any component, either directly or indirectly, (an example of “indirect” access would be through a multiplexing program or an application server), through any means on behalf of the User. You must acquire PoEs to support the “high water mark” of concurrent users — the highest number of Users accessing the program at any given point of time.

Authorized User:

An Authorized User (User) is one and only one individual, machine, program or device with a specific identity (ID) within or outside Your enterprise.

A “Proof of Entitlement” (“PoE”) is evidence of Your authorization to use a Program and is required for each User accessing the Program or any component, application, feature, function and/or capability thereof, either directly or indirectly, through any means on behalf of the User in any manner.

The Program may be installed on one or more computers, and accessed by multiple Users provided that a User authorization has been obtained for each individual User.

1. Users have unique specific identity and IDs cannot be shared.

2. An ID may establish one or more connections and count as a single User.

3. An ID may only be reassigned for the long-term replacement of personnel, machine, program, or device.

**Terms and conditions**

This product is only available via Passport Advantage. It is not available as shrinkwrap.

**Licensing**

IBM International Program License Agreement. Proofs of Entitlement (PoE) are required for all authorized use.

Part number products only, offered outside of Passport Advantage, where applicable, are license only and do not include Software Maintenance.

This software license includes Software Maintenance, previously referred to as Software Subscription and Technical Support.

Limited warranty applies: Yes

Warranty: This program has warranty for a minimum of one year from acquisition from IBM or authorized IBM Business Partner. The warranty provided to the customer, for at least one year from acquisition, is access to databases (read Web sites) for program information and FAQs, including any known fixes to defects, which the customer can download or obtain otherwise and install at leisure.

Program technical support: Technical support of a program product will be available for a minimum of three years from the general availability date, as long as your Software Maintenance is in effect. This technical support allows you to obtain assistance (via telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Maintenance also provides you with access to updates, releases, and versions of the program. Customers will be notified, via announcement letter, of discontinuance of support with 12 months’ notice. If you require additional technical support from IBM, including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

Money-back guarantee: If for any reason you are dissatisfied with the Program and you are the original licensee, return it within 30 days from the invoice date, to the party (either IBM or its reseller) from whom you acquired it, for a refund.

- For Programs acquired under the IBM International Passport Advantage offering, this term applies only to your first acquisition of the Program.
- For Programs acquired under any of IBM’s On/Off Capacity on Demand (On/Off CoD) software offerings, this term does not apply since these offerings apply to Programs already acquired and in use by the customer.

Volume orders (IVO): No

Passport Advantage applies

Software maintenance applies: Yes

Software Maintenance, previously referred to as Software Subscription and Technical Support, is included in the Passport Advantage Agreement. Installation and technical support is provided by the Software Maintenance offering of the IBM International Passport Advantage Agreement. This fee service enhances customer productivity, with voice and electronic access into IBM support organizations.

IBM includes one year of Software Maintenance with the initial license acquisition of each program acquired. The initial period of Software Maintenance can be extended by the purchase of a renewal option that is available.

While your Software Maintenance is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions; and code-related questions. IBM provides assistance via telephone and, if available, electronic access, only to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, every day of the year. For additional details, consult your IBM Software Support Guide at [http://techsupport.services.ibm.com/guides/handbook.html](http://techsupport.services.ibm.com/guides/handbook.html)

Software Maintenance does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under this agreement.

For more information about the Passport Advantage Agreement, visit the Passport Advantage Web site at [http://www.ibm.com/software/passportadvantage](http://www.ibm.com/software/passportadvantage)

iSeries Software Maintenance applies: No

Educational allowance available: Not applicable

On/Off Capacity on Demand

To be eligible for On/Off CoD pricing, customers must be enabled for temporary capacity on the corresponding hardware, and the required contract — Z125-6907, Amendment for iSeries and pSeries Temporary Capacity On Demand — Software — must be signed prior to use.

IBM Electronic Services

IBM Global Services has transformed its delivery of hardware and software support services to put you on the road to higher systems availability. IBM Electronic Services is a Web-enabled solution that provides you with an exclusive, no-additional-charge enhancement to the service and support on the IBM eServer. You should benefit from greater system availability due to faster problem resolution and preemptive monitoring. IBM Electronic Services is comprised of two separate but complementary elements: IBM Electronic Services news page and IBM Electronic Service Agent™.
IBM Electronic Services news page provides you with a single Internet entry point that replaces the multiple entry points traditionally used by customers to access IBM Internet services and support. The news page enables you to gain easier access to IBM resources for assistance in resolving technical problems.

The IBM Electronic Service Agent is no-additional charge software that resides on your IBM eServer system. It is designed to proactively monitor events and transmit system inventory information to IBM on a periodic, customer-defined timetable. The IBM Electronic Service Agent tracks system inventory, hardware error logs, and performance information. If the server is under a current IBM maintenance service agreement or within the IBM warranty period, the Service Agent automatically reports hardware problems to IBM. Early knowledge about potential problems enables IBM to provide proactive service that maintains higher system availability and performance. In addition, information collected through the Service Agent will be made available to IBM service support representatives when they are helping answer your questions or diagnosing problems.

**Prices**

**Passport Advantage**

For Passport Advantage information and charges, contact your IBM representative or authorized IBM Business Partner. Additional information is also available at

http://www.ibm.com/software/passportadvantage

**IBM Global Financing**

IBM Global Financing offers competitive financing to credit-qualified customers to assist them in acquiring IT solutions. Offerings include financing for IT acquisition, including hardware, software, and services, both from IBM and other manufacturers or vendors. Offerings (for all customer segments: small, medium, and large enterprise), rates, terms, and availability can vary by country. Contact your local IBM Global Financing organization or visit

http://www.ibm.com/financing

IBM Global Financing offerings are provided through IBM Credit LLC in the United States and other IBM subsidiaries and divisions worldwide to qualified commercial and government customers. Rates are based on a customer’s credit rating, financing terms, offering type, equipment type, and options, and may vary by country. Other restrictions may apply. Rates and offerings are subject to change, extension, or withdrawal without notice.
