## Preface

Welcome to the IBM Tivoli Identity Manager Lotus QuickPlace Adapter.

These Release Notes contain information for the following products that was not available when the IBM Tivoli Identity Manager manuals were printed:

- IBM Tivoli Identity Manager Lotus QuickPlace Adapter Installation and Configuration Guide

## Adapter Features and Purpose

The Lotus QuickPlace Adapter is designed to create and manage accounts on QuickPlace. The adapter runs in “agent” mode and must be installed on the QuickPlace server. ITIM communicates to the adapter using HTTP and the adapter communicates to QuickPlace using the XML-based command line interface (and Notes API for Domino updates).

A single copy of the adapter can handle multiple ITIM Services. The optimum deployment configuration is based, in part, on the topology of your network domain, but the primary factor is the planned structure of your Identity Manager Provisioning Policies and Approval Workflow process. Please refer to the Identity Manager Information Center for a discussion of these topics.

The Identity Manager Adapters are powerful tools that require administrator level authority. Adapters operate much like a human system administrator, creating accounts, permissions and home directories. Operations requested from the Identity Manager server will fail if the adapter is not given sufficient authority to perform the requested task. IBM recommends that this adapter run with administrative (root) permissions.

## Contents of this Release

### Adapter Version

Component	Version
Release Date	December 7, 2007
Adapter Version	5.0.1
Component Versions	Adapter Build: 5.0.1003 Profile 5.0.1000 ADK 5.07
Documentation	Lotus QuickPlace Adapter Installation and Configuration Guide SC23-6161-00

### New Features

Enhancement # (FITS)	Description
	<b>Items included in current release</b>
	Initial release for ITIM v5.0

### Closed Issues

CMVC#	APAR#	PMR# / Description
		<b>Items closed in current version</b>
		None

## Known Issues

CMVC#	APAR#	PMR# / Description
N/A	N/A	<p>Editing adapter profiles on UNIX or Linux.</p> <p>The adapter profile JAR file may contain ASCII files created using MS-DOS ASCII format (i.e. schema.dsml, CustomLabels.properties, and service.def). If you edit a MS-DOS ASCII file in Unix you will often see the characters ^M at the end of each line. This is the extra character 0x0d that is used to indicate a new line of text in MS-DOS. There are tools, such as dos2unix, that can be used to strip out the ^M character. In addition, there are text editors that will ignore the ^M character.</p> <p>If you are using the vi editor, you can strip out the ^M character as follow:</p> <p>From the vi's command mode:</p> <pre>:%s/^M//g</pre> <p>followed by pressing Enter. The ^M (or Ctrl-M) typed to show it here should actually be entered by pressing ^v^M in sequence. (The ^v preface tells vi to use the next keystroke literally instead of taking it as a command.)</p>
N/A	N/A	<p>Using the Upgrade Option:</p> <p>The Upgrade option is applicable only to 5.0.x maintenance upgrades. The upgrade option is not designed for v4.6 to v5.0 migrations. NOTE: After using "Update Installation" option with higher version of Adapter, an extra folder with name "_uninst2" is created. It can be ignored. To Uninstall the Adapter, use "_uninst" folder.</p>
N/A	N/A	<p>CertTool</p> <p>After using CertTool, an empty file with name &lt;AdapterName&gt;.dat gets created. This file can be safely removed or ignored.</p>
N/A	N/A	<p>Event Notification</p> <p>Account status (Active/Inactive) may not properly updated on Identity Manager after event notification.</p>
		<p>This adapter does not use an xforms.xml file.</p> <p>Errors in the adapter log concerning xforms may be safely ignored. Error message is: "Unable to load XML transformation buffer from..."</p>

## Installation and Configuration Notes

See the IBM Tivoli Identity Manager Adapter Installation Guide” for detailed instructions.

### ***Running v4.6 and v5.0 Adapters on the Same Server***

The Identity Manager version 5.0 adapters have enhanced capabilities that are not compatible with older version 4.6 adapters. It is highly recommended that all adapters hosted on an individual server are upgraded at the same time.

Adapters installed on the same server may share common components or run-time environments. The version 4.6 adapters may not be compatible with the version 5.0 component and may no longer operate as expected after installation of a version 5.0 adapter. On Windows servers all adapters must be upgraded simultaneously due to the sharing of DLLs. Check the adapter installation guide for additional information.

### ***Corrections to Installation Guide***

The following corrections to the Installation Guide apply to this release:

NOTE: The Adapter Installation and Configuration Guide lists Windows 2000 as a supported platform, however, Microsoft has recently ended mainstream support for this version. While there are no known issues associated with hosting the adapter on Windows 2000, if a problem does arise that is tracked to the OS, Tivoli Support will ask you to upgrade to the officially supported version, Windows 2003.

### ***Configuration Notes***

The following configuration notes apply to this release:

None.

## Customizing or Extending Adapter Features

The Identity Manager adapters can be customized and/or extended. The type and method of this customization may vary from adapter to adapter.

### ***Getting Started***

Customizing and extending adapters requires a number of additional skills. The developer must be familiar with the following concepts and skills prior to beginning the modifications:

- LDAP schema management
- Working knowledge of scripting language appropriate for the installation platform
- Working knowledge of LDAP object classes and attributes
- Working knowledge of XML document structure

**Note:** This adapter supports customization only through the use of pre-Exec and post-Exec scripting.

Tivoli Identity Manager Resources:

Check the “Learn” section of the [Tivoli Identity Manager Support web site](#) for links to training, publications, and demos.

### ***Support for Customized Adapters***

The integration to the Identity Manager server – the adapter framework – is supported. However, IBM does not support the customizations, scripts, or other modifications. If you experience a problem with a customized adapter, IBM Support may require the problem to be demonstrated on the GA version of the adapter before a PMR is opened.

## Supported Configurations

### ***Installation Platform***

The IBM Tivoli Identity Manager Adapter was built and tested on the following product versions.

Adapter Installation Platform:  
Windows 2003

Managed Resource:

QuickPlace Versions:	QuickPlace 3.01 on Domino Server 5.0.12 QuickPlace 6.5 on Domino Server 6.5 QuickPlace 7 on Domino Server 7
----------------------	---

External LDAP Directory:	SUN ONE 5.1 IDS 6.0
--------------------------	------------------------

External Domino Directory:	Domino Server 6.0 Domino Server 6.5 Domino Server 7
----------------------------	---

IBM Tivoli Identity Manager:  
Identity Manager v5.0

## Notices

This information was developed for products and services offered in the U.S.A. IBM may not offer the products, services, or features discussed in this document in other countries. Consult your local IBM representative for information on the products and services currently available in your area. Any reference to an IBM product, program, or service is not intended to state or imply that only that IBM product, program, or service may be used. Any functionally equivalent product, program, or service that does not infringe any IBM intellectual property right may be used instead. However, it is the user's responsibility to evaluate and verify the operation of any non-IBM product, program, or service. IBM may have patents or pending patent applications covering subject matter described in this document. The furnishing of this document does not give you any license to these patents. You can send license inquiries, in writing, to:

IBM Director of Licensing  
IBM Corporation  
North Castle Drive  
Armonk, NY 10504-1785 U.S.A.
