## 1. PREFACE

Welcome to the IBM Tivoli Identity Manager SAP UME Adapter.

### Note:

When viewing as text, set the font to monospace for better viewing of  
these Release Notes.

This file contains information that was not available when the IBM  
Tivoli Identity Manager manuals were printed for the following products:

IBM Tivoli Identity Manager SAP UME Adapter 5.0.0

## 2. NEW FEATURES

Marketing Requirement	Description
-----------------------	-------------

n/a	The adapter now deploys as a standard Netweaver application. The pre-deployment steps related to EAR file creation have been removed. The adapter is now packaged as a Netweaver JEE EAR.
-----	---

n/a	It is no longer necessary to configure and deploy a
-----	---

system alias property file. The adapter now retrieves the configured system alias names directly from Netweaver. By default, the web.xml configuration parameter has been commented out. If required, use of the system alias property file can be enabled by uncommenting the itim.adapter.systemalias.file init-param in the adapter web.xml.

### =====

### 3. CLOSED ISSUES

### =====

DevTrk	SPX#	PMR#	Description
-----	-----	-----	-----

### =====

### 4. KNOWN ISSUES

### =====

DevTrk	SPX#	PMR#	Description
-----	-----	-----	-----

n/a	n/a	n/a	During reconciliation the adapter supports only filter (erUId=<arbitrary_string>).
n/a	n/a	n/a	Event notification not supported.
n/a	n/a	n/a	Statistic on operation not supported.
n/a	n/a	n/a	The adapter cannot be configured to be single threaded. It's always multithreaded - it runs a servlet on the EP Application Server cluster.
n/a	n/a	n/a	Max Number of threads per operation type cannot be defined.
n/a	n/a	n/a	Group membership in SAP may become out of sync with the Group membership displayed in ITIM since SAP UME user accounts are assigned group membership in the following groups by default: - EVERYONE - AUTHENTICATED USERS If the group membership for a particular account becomes inconsistent between ITIM and SAP then an appropriate warning will be logged by the adapter. The data can be synchronized once again by using the adapter to perform a reconciliation.
n/a	n/a	n/a	FIPS is not supported in this release of the adapter.

### =====

### 5. INSTALLATION

### =====

See the IBM Tivoli Identity Manager SAP UME Adapter Installation Guide for detailed instructions.

### =====

### 6. SUPPORTED PLATFORMS

### =====

The IBM Tivoli Identity Manager Adapter is supported on the following

product versions.

Managed Resource:

SAP EP6 SP9

SAP Netweaver 04s Java SP9

ITIM Server:

5.0

=====

## 7. CONFIGURATION NOTES

=====

The adapter will perform logging during its operations.

See the IBM Tivoli Identity Manager SAP UME Adapter Installation Guide for detailed instructions on configuring logging.

To enable User Mapping for the Adapter, the System Aliases must be defined. See the IBM Tivoli Identity Manager SAP UME Adapter Installation Guide for detailed instructions on configuring and activating User Mapping.

=====

## 8. DEPLOYMENT TIPS

=====

The adapter is deployed using the SAP Deploy Tool. The instructions for the deployment process is included in the SAP UME Adapter Installation Guide.
