

IBM CICS Transaction Gateway for Multiplatforms

Version 8.1

Quick Start Guide

This guide is intended to get you started with a base configuration for IBM CICS Transaction Gateway for Multiplatforms Version 8.1.

National Language Version: To obtain the Quick Start Guide in a different language, print the relevant PDF file from the QuickStart folder on the product DVD. National language support is also available from the Quick Start Guide download image as well as the DVD.

Product Overview

IBM® CICS® Transaction Gateway for Multiplatforms delivers high-performing, security-rich and scalable standards-based access to CICS applications, enabling rapid deployment of CICS applications into a Service Oriented Architecture (SOA). Connectivity to CICS is provided from a wide range of application platforms including JEE certified application servers and Microsoft .NET framework applications.

1 Step 1: Prepare to download the product

This product offering includes:

- IBM CICS Transaction Gateway for Multiplatforms Version 8.1
- Quick Start Guide
- Documentation

If you download the product from Passport Advantage®, follow the directions in the download document:

<http://www.ibm.com/support/docview.wss?uid=swg24028180>

2 Step 2: Access your documentation

For complete documentation, including installation instructions, see the IBM CICS Transaction Gateway for Multiplatforms Version 8.1 information center at:

<http://publib.boulder.ibm.com/infocenter/cicstgmp/v8r1/index.jsp>

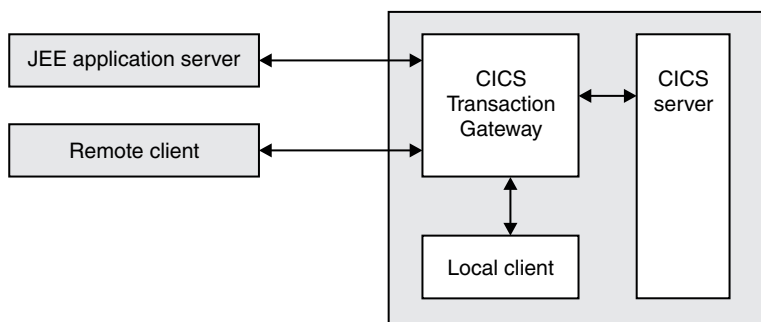

3 Step 3: Evaluate your hardware and system software

For information about system requirements see:

<http://www.ibm.com/support/docview.wss?uid=swg21239203>

4 Step 4: Review the base architecture

5 Step 5: Install and configure the product

To install the product, use the installation information provided in the product readme file on the DVD, or downloaded from IBM Passport Advantage.

The installation and configuration procedure will normally require you to:

1. Log onto the system as an administrator.
2. Install the product from the installation DVD or network drive.
3. Configure the Java runtime environment.
4. Configure IBM CICS Transaction Gateway for Multiplatforms V8.1 using the Configuration Tool.
5. Configure the communications links on your CICS servers.
6. Configure a JEE application server, if required, and deploy a CICS Transaction Gateway resource adapter.
7. Use the ctgredist package to set up a CICS Transaction Gateway client environment on remote machines, if required.

More information

For more information, see the IBM CICS Transaction Gateway home page at:
