Fixes since the previous release

Reference	Description
MD00065	IIW relationship with supertype.
8839	An error message is generated in ERwin import when exporting a new entity from MMM.

Known issues and limitations

Reference	Description
12699	Communication content - Assessment result Rlship] attribute [Identifier] available in MMM, but not in the ERwin Atomic Warehouse Model. Workaround: valid new entry to be bridged back to MMM.
12764	One warning returned when exporting from MMM IDA BDM. Type not set for entity "statistics in risk agreement [BID: ENC2176, Source Model: Business]". Default type will be used: Type. Workaround: to remove warning, go to Specification Product and Agreement/ Agreement SubTypes /Corporate Agreement SubTypes / Risk Agreement SubTypes and delete statistics in risk agreement.
12763	Four warnings returned when exporting from MMM IDA BDM. Workaround: to remove warning, delete the inversion entries in IDA on the following supportive entities. Code(2), Relationship Type(1) and Type (1).
