## About these release notes

These release notes address known product issues and related information about this product.

For information about by-design changes, new and enhanced features in the current release, see the “What’s new” topic in the IIW Knowledge Center, which is available at:

[http://www.ibm.com/support/knowledgecenter/SSRAR8\\_8.8.0](http://www.ibm.com/support/knowledgecenter/SSRAR8_8.8.0)

Change Documents, in spreadsheet format, which describe the changes made in the models since the previous release are available at:

<http://www.ibm.com/support/docview.wss?uid=swg27047860>

## What’s in the box

The product includes:

- An InfoSphere Data Architect Business Data Model.
- An InfoSphere Data Architect Atomic Warehouse Data Model, containing System of Record entities.
- An InfoSphere Data Architect Dimensional Warehouse Data Model, including Transactional, Aggregate, Factless Fact, Bridge, Hierarchy Bridge and Dimensional entities.
- An InfoSphere Information Governance Catalog representation of Business Terms, Analytical Requirements and Supportive Content.  
Note: ERwin equivalents of the above are also included.
- Industry models utilities for InfoSphere Data Architect and InfoSphere Information Governance Catalog.

Note: The IDA logical models are mapped to the Governance Catalog content.

## Fixes since the previous release

Reference	Description
MD00098	<b>Calendar Date Dimension</b> Calendar week number and Fiscal week number were deleted, as they are redundant with Week number in calendar year and Fiscal week respectively.
MD00108	<b>Communication Party Role entity missing relationships and foreign keys</b> Two relationships and associated Foreign Keys were created on the Communication party role Atomic Warehouse Model Entity: <ul style="list-style-type: none"> <li>role player is playing in communication role</li> <li>Communication is context of communication role</li> </ul>
22806	<b>DWM relationship and nature anomaly</b> Relationships and natures were correctly defined for the following DWM elements: <ul style="list-style-type: none"> <li>Relationship RLL0051 Coverage component is dimension of Intermediary commission Fact ENJ0405 Coverage component ENL0007 Intermediary commission Fact</li> <li>Relationship RLL0078 Signer mini-dimension is dimension of communications fact ENJ0544 Financial services role mini-dimension ENJ0636 Communications Fact</li> <li>Relationship RLL0079 Unstructured content is dimension of communications fact ENJ0412 Unstructured content ENJ0636 Communications Fact</li> <li>Relationship RLL0175 Geometric shape in the role of hurricane zone is dimension of Hurricane building structure analysis ENL0014 Geometric shape ENL0005 Hurricane building structure analysis</li> </ul>

## Known issues and limitations

Reference	Description
32107	<b>Duplicate ERwin model entity and subject area names</b> When importing the IIW ERwin xml into IMAM, the subject areas and entities which have the same name are conflicting. The result is /1 is added to the duplicate subject area to make the name unique. ie. Activity/1  <i>Workaround:</i> Rename the subject area or entity name to make the name unique.
32411	<b>ERwin model entity key group name is inconsistent.</b> The name of the key group of an entity is inconsistent. <i>Workaround:</i> Rename the inconsistent key group name for foreign keys of an entity.
32408	<b>ERwin model color coding of diagrams</b> The color coding applied to existing entities is unavailable in ERwin model. <i>Workaround:</i> Use the Copy theme and overridden style feature in ERwin from existing IIW entities.

Reference	Description
n/a	<p><b>IDA performance can be affected when automatic IGC indexing is enabled</b></p> <p>The performance of IDA can be affected when the “Automatically update the index of local glossary assignments” option in the Business Glossary &gt; Updates preference page is enabled. This is because all models in all projects in the workspace are indexed when the workspace begins, and indexing occurs again each time a model is saved.</p> <p><i>Workaround:</i> Disable the “Automatically update the index of local glossary assignments” option, and manually build the IGC index as required by clicking the “Build Index” button in the Business Glossary &gt; Updates preference page.</p> <p><i>Note:</i> When IGC indexing has been performed, the “Local Model” table in the Properties &gt; Assigned Assets view is populated for glossary terms, which allows you to view and navigate to model elements that are mapped to a glossary term.</p>
29435	<p><b>Dependency type property not retaining entered text</b></p> <p>When creating a dependency in IDA, the dependency type information entered in the text box is not being retained. With most fields, when you enter text and then click away on any other field on the property tab, the update takes place and is retained.</p> <p><i>Workaround:</i> After inputting the information, press &lt;Enter&gt; to retain the text.</p>
