## **About IBM Datacap Taskmaster Capture, Version 8.1 Fix Pack 3**

Review this document for installation instructions and other important information before you install IBM® Datacap Taskmaster Capture, Version 8.1 Fix Pack 3, which contains the updates from Fix Pack 1, Fix Pack 2, as well as additional updates.

### **Upgrading to IBM Datacap Taskmaster Capture, Version 8.1 Fix Pack 3**

Run the Fix Pack installation package for IBM Datacap Taskmaster Capture, Version 8.1 Fix Pack 3 on computers on which IBM Datacap Taskmaster Capture, Version 8.1.0, 8.1.1, or 8.1.2 has been installed.

#### Alerts!

Datacap 8.1 FP3 update might take up to 30 seconds to initialize and may require up to 25 minutes to finish installing.

This is in part due to necessary decompression of the fixpack's contents.

Datacap 8.1 FP3 update installer (msp) may require Datacap 8.1 setup installer (msi) and may also ask for a reboot when install completes.

Due to necessary high compression, and patching by binary deltas instead of whole files:

- 1) 8.1 FP3 installer (msp) may look and ask for 8.1 installer (msi) to successfully patch some files.
- 2) 8.1 FP3 installer may ask for a reboot to successfully patch some files.

#### **Important**

Updates are required only on Servers and thick client computers. No update is required for "thin client" computers. You must upgrade all thick clients and servers to the same IBM Datacap Taskmaster Capture version and fix pack. Different versions of IBM Datacap Taskmaster Capture are not compatible; therefore, you cannot connect an IBM Datacap Taskmaster Capture client with a server that has a different IBM Datacap Taskmaster Capture server version or fix pack installed. Operating Taskmaster Client or Taskmaster Web with an incompatible version of Taskmaster Server, or allowing different versions to access one database, can result in loss of data.

Once installed, this Fix Pack cannot be uninstalled. However, you can use "Uninstall or change a program" in Control Panel to uninstall the entire Taskmaster Capture product.

The language you selected when installing Taskmaster Capture Version 8.1 determined the language displayed in the InstallShield panels at that time, and also controls the language in which the InstallShield panels for this Fix Pack are displayed.

#### Reminders:

Oracle database schema changes required for upgrading to IBM Datacap Taskmaster 8.1 FP1 or above

The following technote also applies to 8.1 Fixpack3:

http://www-01.ibm.com/support/docview.wss?uid=swg21665610

Active X security updates were implemented to make Taskmaster Web safe for scripting. These updates are including, starting with Fix Pack 2.

The TWAINPro and DCImage ActiveX controls are updated to be classified as safe for scripting when used on Taskmaster Web client pages. Users can uncheck the Internet Explorer security setting, "Initialize and script ActiveX controls not marked for scripting," on thin client computers and proceed to start the Taskmaster Web client.

After Taskmaster Web is updated with Taskmaster Capture 8.1.0 Fix Pack 2 or fix packs following 8.1.0 Fix Pack 2, the new ActiveX controls are automatically downloaded and installed when the Taskmaster Web client runs either the Scan Task (physical scanner) or the Upload task on a workstation for the first time. In order to install TWAINPro and DCImage ActiveX controls, the user must be logged into the workstation with administrator rights. These ActiveX controls need to be installed only once in any Taskmaster web client station. [RTC118227]

#### **System requirements**

Select the following link to see the hardware and software requirements for IBM Datacap Taskmaster.

http://www.ibm.com/software/reports/compatibility/clarity/softwareReqsForProduct.html

Search for 'Datacap', then select "Datacap Taskmaster Capture"

Check the box 'Show Fix packs' and select 8.1.0.3 for Fix pack 3.

# **New features added to Datacap Taskmaster Capture**

This section describes the new features added to Datacap Taskmaster Version 8.1 in Fix Pack 3. (Note: Bold rows are ERs)

Component	RTC ID	Summary
Actions/Barcode	106587	Barcode X actions deprecated
7.00.01.07 20.0000		Convert actions allow more than
Actions/Convert (eDoc)	68131	maximum of 1296 input files
		Continue on failure option added for
Actions/Convert (eDoc)	71906	Convert library
		New Convert action
		ExcelWorkbookToImageEx can
		limit number of output files, to
Actions/Convert (eDoc)	110031	process very large Excel files without errors.
Actions/ convert (eDoc)	110031	New Convert actions
		PDFFREDocumentToImageEx and
		PDFFREReleaseEngine provide new
		method of converting PDF to image
		including extracting embedded text (if
Actions/Convert (eDoc)	111158	any).
		New Convert action HtmlLayout
		exposes conversion options for

Component	RTC ID	Summary
		and can be loaded successfully by Taskmaster
Actions/mVscan	69790	mvscan actions: smart parameter support added to set_types, add option to retain subdirectories
Actions/Zones	73102	Help updated for zones.dll action AdjustZonesToImageOffset
DB SQL	77380	Document schema changes to Oracle from TM8.1 base to TM8.1 FP3
DBCopy	66843	DBCopy resets the Password of a Single User ID During the Admin Table Copy Process
DotEdit	73904	DotEdit and DotScan latest panels can be Built
DotEdit	77452	
DotEdit	109330	Customization of DotEdit's Field- at-a-Time (Default) Panel (also known as the Universal Panel)
DotEdit	112116	DOTEDIT: loading large APT batch in verify panel desktop
DotEdit	113579	DotEdit/DotScan: apps.ini option added to skip qs_op clause for hold batches
DotScan	63810	Populate DCO variable indicates rotation performed by operator during DotScan session on the batch
DotScan	75096	Hebrew resources added for the DotScanPanels project
DotScan	88221	dcScanISIS API gives more programmatic access to configure the imprinter
DotScan	95307	DotScan: Specific barcode can trigger new document creation
DotScan	105921	Enhanced rescan capability in Dotscan
DotScan	106028	DotScan: Alert improved when deleting multiple pages
DotScan	108793	DotScan: Cancel button replaced with Hold button
DotScan	109021	DotScan: Handle digital annotation feature available through some scanner drivers
DotScan	110664	rescan capability enhanced in Dotscan, for TWAIN
FileNet P8	63177	Export logs enhanced when using FNP8 actions to upload documents to P8

Component	RTC ID	Summary
Companient	1(1012	IBMCM.IBMCM_SetAttribute ()
		assigns Integer type, date type
IBM Content Manager (CM8)	64081	and long type values to a field
		Allow optional Hide of the Recognition
Foundation APT	69384	Feature in the APT Verify Panel
		custom APT actions deprecated that
Foundation APT	70061	have global versions
		APT Invoice Date Display Format
		based on the Locale of the computer
Foundation APT	71919	Running DotEdit
Foundation APT	104872	•
		Nenu no longer returns false when
		ProcessRunQuery () returns 0
Nenu	112585	records.
		New Key implemented to enable
Danas OCDA Alakana	62126	Hebrew Recognition With Abbyy Out of
Recog OCRA Abbyy	63136	
Bosos OCRA Abbyy	74051	Abbyy license updated to include
Recog OCRA Abbyy	74051	Abbyy FR Engine upgrade to version
Recog OCRA Abbyy	107636	11
Recog Ocika Abbyy	107030	OCR_SR 8.0.1 merged with OCR_SR
		8.1 - new action
Recog OCRS Scansoft	67179	
		Currently logged in user displayed
Reporting	113308	on every report.
		Current filter selections displayed
Reporting	113311	on every report.
Reporting	113692	Translation of reports
		CM8 8.1 connector: new features
		SetMimeType(),
Dula sata /Fana aut ta IDM CM	105115	CreateChildItem(), Add Page(),
Rulesets/Export to IBM CM	105115	
		Taskmaster Administrator able to set
		own encryption seed value when importing or exporting encryption keys
		between the local keystore and the
Taskmaster Services	70056	dc KTF.xml file
TUBERTINGS OF FICES	, 5550	"Multiple Connections" property added
Taskmaster Services	80662	for MSSQL via OLEDB
		TM Server enhanced to increase SQL
		Server performance - option to add
Taskmaster Services	87672	NOLOCK hint to Grab Batch query
		Add SSL support for the LLLDAP
Taskmaster Services	115768	authentication
		Support for IBM Security Access
Taskmaster Web	91302	Manager to Taskmaster
		TMweb: responsiveness indicator
		in "Web Monitor" and add session
Taskmaster Web	111714	in "Web Monitor" and add session start / session end entries in aTM log

Component	RTC ID	Summary
Taskmaster Web/TMWeb Client	52007	TMWeb: Group/Queuing updated
		TMweb limited to one pop-up message
		when a scanner is not configured or
Taskmaster Web/TMWeb Client	63155	connected to the station
		TMWeb: LoadBatch setting allows
		loading of all datafiles within batch, not just that of the current
Taskmaster Web/TMWeb Client	75055	document
	7000	Image display window retains
		position in dual monitor
Taskmaster Web/TMWeb Client	75307	configuration
		Columns can be reordered by
		dragging column buttons below
Tankanastan Wah /TMWah Cliant	77763	job monitor to establish desired
Taskmaster Web/TMWeb Client	77763	order Datacap can disable storing of
Taskmaster Web/TMWeb Client	77764	sticky values
, , , , , , , , , , , , , , , , , , , ,		Zoom level increased in
Taskmaster Web/TMWeb Client	77765	ProtoID.aspx
		Dual Monitor Functionality enhanced
Taskmaster Web/TMWeb Client	77766	,
T. I. W. I. (TANK I. CI)	77760	Tree view support for multi page
Taskmaster Web/TMWeb Client	77768	documents
		Enhance averify.aspx to synch up field values with the image in
		viewer when clicking on page_no
Taskmaster Web/TMWeb Client	94600	+ left or right arrow
	2.530	Added wTM retry attempts and
		wTM logging when reading and
wTM	112086	writing using Datacap Server

# **New Qualifications**

IBM Datacap Taskmaster Capture, Version 8.1 Fix Pack 3 is additionally qualified for use with:

- Microsoft Windows 8.1
- Microsoft Windows 2012 R2
- Microsoft SQL Server 2014
- VMware ESXi 5.5
- Open Text RightFax 10.6

Issues fixed in IBM Datacap Taskmaster Capture, 8.1 Fix Pack 3

APAR Number	RTC Id	Brief Problem description
IO17427	34279	DotScan FlexId panel returns errors when a field is added at the batch level
IO17469	34243	FlexID UI (RunFlexIDPanel action) - Default type for added pages is Document_Separator
IO18037	37418	tmweb when only the Change Password permission is set for a user, the Administrator tab is not visible.
IO18191	39922	TM 8.1 now cause Read Only fields in New Line Item to act like they are editable
IO18260	38481	RV2 reports on Current Stations does not display values under IP Address, JobID, TaskID or Batches column
IO18889	54240	From TMWeb, go to Administrator tab, click on Groups, then click on one of the Groups, it takes 5 minutes to load the group info
IO18927	55013	App Wizard Copy App function does not report an error when there is indeed an error reported in the log.
IO18982	56010	Datacap 8.1 Flex Sample Application has a typo that prevents it from running.
IO18992	56173	Extra reference appears in datacap.xml file
IO19266	57423	DStudio: A setup DCO node can be added using application name
IO19299	60936	(dcimage): ImageToTIFF converts JPEG image to B&W TIFF with very poor quality
IO19305	58660	Converting a large text file aborted the batch with an "out of memory exception error" using Convert Library.Convert.Tiff.TxtTiffCompression
IO19352	61664	Flex: reprocessing Profiler task does not finish, left indefinitely at running status
IO19386	61250	Getting "Server Error in '/tmweb.net' Application" when trying to log in to the application after 20+ minutes idle.
IO19507	63489	DotScan app stores the display name of a Dictionary instead of the Dictionary list value when running it through a Start Batch Panel
IO19539	62966	IBMCM.IBMCM_UploadDCO_DOC () fails to export multiple page tiff, only first page gets exported.
IO19595	63197	CreateDocuments: Documents skip numbers based on amount of start batch fields
IO19636	64778	Error occured @ /tmweb.net/Task/verifine.aspx if you click on Doc ID to review document type in DCO tree view and then click on Submit
IO19651	63823	Using FNP8_SetProperty action to set an Object data type or ID data type property on P8 CE fails with "'The method invoked is inappropriate for the datatype of the property
IO19670	65103	Rulerunner: NullReferenceException when there is an empty workflow
IO19698	65603	Rulerunner: Cannot add more than 2 applications to single thread
IO19703	62654	Getting an "unhandled exception" after renaming job name to "Job".
IO19721	66124	FastDoc keeps reverting back to the default scanner's properties with scanner using ISIS
IO19723	63367	PDF/A documents created using RecognizeToPDFOCR_A() creates a white border and contains darker text
IO19745	62282	Unable to click multiple words while holding down "Shift" key in DotEdit

IO19780	63097	Barcode_P.GetBarcodeBP () returns garbage and incomplete barcode values when trying to read data matrix barcode on the image
IO19807	66917	DotEdit: Exception when lineitem has no Position variable
IO19842	67300	DotEdit: Synchronisation issues in APT verify sample app with Image View, Data View and Batch View panels.
IO19864	68031	No error thrown and batch doesn't abort if the actions try to split twice in the same task.
IO19874	68098	Field Variable - 'PictureString' when set to 'n' does not accept valid data. i.e Uppercase alphabetic character, numeric digit, or space
IO19875	64820	Convert: PDFDocumentToImage abort - pages not extracted from PDF
IO19901	68252	NENU: ProcessMoveDBRecords fails when destination engine database is SQL
IO19959	68886	RV2: Records with empty column values are not retrieved from database using filters in RV2 as there is no "IS" condition provided
IO19977	69279	SplitBatch does not preserve text for batch level fields
IO19984	68588	Using DotScan to rotate Grayscale or Color TIF corrupts the image
IO20010	69485	PDF to TIFF conversion hang when not using alternate conversion method
IO20040	67927	DotEdit does not retry loading of setup hierarchy - process cannot access the file
IO20050	69798	In DotEdit, Unable to mark trailing page delete
IO20051	68784	Recog_Shared.AnalyzeImage() fails to create CCO files for subsequent images when it fails on one of the images
IO20052	69806	DotScan: Image View in DotScan shows all thumbnails as the same orientation of the first thumbnail
IO20053	69809	Held batches from other stations displaying in DotScan/DotEdit when we queue by station
IO20085	69493	Convert.Datacap.Libraries.Convert.Tiff->SplitMultipageTiff () aborts the batch and returns Error: A generic error occurred in GDI+.
IO20094	69944	Unable to launch DotEdit app after changing the shortcut keys in a French OS
IO20095	34135	Custom columns created in EngDb displayed in tmweb shows the column name prefixed with pb_
IO20097	70533	With protoid.aspx, zooming in and then viewing full page image will reformat page in a single column making it hard to process pages
IO20098	69316	Convert.PDF.PDFDocumentToImage () returns an error, Attempted to read or write protected memory. This is often an indication that other memory is corrupt.
IO20104	69933	VScan actions don't preserve case of ingested file path in ScanSrcPath
IO20105	68852	Japanese characters are garbled when using Convert actions to extract images from a pdf file
IO20111	70652	If PageID or DocID in the DCO is too long the Dotedit batch view doesn't display the complete name
IO20122	69492	Enhance recognition to not abort when field's zone positions exceed image dimensions
IO20126	70697	DATAFILE variable deleted when running validations against a batch with nested document structure

IO20127	69792	Zones tab severely slow to load when using a high number of fingerprints
IO20187	71696	AddDocument creates document node with no TYPE variable
IO20189	70972	DotEdit - Slow performance when having large database and
1020103	, 03, 2	BatchLimit setting
IO20201	71679	RV2 reports Scan or Scan summary only display records of filter
		Start Time = This week from Tuesday thru rest of the week.
		Monday data is missing.
IO20202	70638	Dotedit App shuts down with no warning after a user selects a different page type for the 1st page in the document
IO20203	71529	DotScan allows user to Hold batch during scanning resulting in an exception
IO20214	71976	RV2 automatic refresh does not work until revisiting the page / running the report again
IO20224	72061	Incorrect Station and Operator values set in JM when a batch is
<b> ·</b>		spawned to Jump to a previous task which then restricts the
		operator/station that can grab that batch
IO20238	71889	Custom DotEdit panels sizes are limited to 1036x780, where as
		they were unlimited previously
IO20239	71596	The zones of a field cannot be deleted after enabling FPXML in app
		mgr for the application
IO20240	72267	When using MVScan.mvscan.set_wait_time(10) to scan images
		over 25 MB file, transfer process is longer than the hard coded 8
		seconds.
IO20241	72274	Image in the thumbview does not match the image in the image
		view when using the ARROW key to go to the next page in IFlexID panel
IO20242	69467	mvscan on multiple computers can get stuck in race condition
IO20242	69540	mvscan is moving the image to the problem folder before the
1020243	05540	client app has finished saving the scanned image
IO20248	72301	Flex: Unable to add new users
IO20271	72381	PDF to TIFF conversion fails to convert inverted text using
		conversion method 1
IO20291	72421	PDFs (primarily those containing annotations) converted into
		completely black images
IO20302	65596	Convert: PDFDocumentToImage creates blank images
IO20303	65599	Convert: PDFDocumentToImage creates skewed images
IO20304	72424	DotScan panel buttons cut off at bottom of screen for specific
		screen resolutions
IO20317	72543	Upload fails on heart beat check with non-zero maximum upload
		size
IO20331	73174	RecognizeToPDFOCR_S unhandled exception on long conversion
1020240	72452	causes Rulerunner crash
IO20349	72152	PDFDocumentToImage aborts on the 17th batch when processing
IO20350	73264	a specific PDF file  From whom clicking on TM0000X link to open a new image spinnet
1020350	/3204	Error when clicking on TM0000X link to open a new image snippet, "ActiveX component can't create object: 'MSXML2.DOMDocument.
		4.0'
IO20401	73303	Dotscan: restore type-ahead for drop down lists on ISIS and
1020401	, 5505	TWAIN panels (lost from 8.1 base to FP1)

IO20433	73235	Using Next LC button or the Alt-L hotkey to move through the low confidence fields does not advance to the next document nor does
		it prompt the user to submit the document .
IO20434	73231	ComboBox in DotEdit App Verify Panel allows values to be typed in
		but those values are not saved to the field.
IO20435	73585	Unable to assign or reassign keyboard shortcuts to menu commands by selecting Edit > Shortcut Keys in DotEdit.
IO20518	74599	Enabling smart parameters for FileNet P8 actions: FNP8_UploadDir action () returns an error
IO20551	74082	Fingerprint Service malfunctions after some time, returning match always to the same fingerprint, with low confidence
IO20562	74969	DotScan not displaying image when asking user to click on anchors in some cases, also no user feedback if setup missing anchor position
IO20619	75878	LLLDAP authentication fails to retrieve the user's distinguished name when accessing a multi-domain AD environment
IO20620	75196	Datacap to check if it complies with required security for Internet applications in Error.aspx and Default.aspx pages

IO23031	117048	Datacap Taskmaster service crashed abruptly preventing
		rulerunner from processing subsequent batches

# **INTERNAL DEFECTS FIXED**

RTC Id	Brief Problem description
34264	In TM8.1 GA, some actions in imprint and rrunner do not have
	comleplete help in DStudio
45495	DCPDF: Setxxx actions in dcpdf do not work with smart
	parameters
45857	Nenu- The ProcessInjectBatches action does not update the
	PB_PAGEFILE field in the TMBATCH table
46121	Invalid Fixup task settings when creating new application
46575	TM8.1.0.34: Zones.dll v8.1.0.53:action AdjustZonesToImageOffset
	returns False for the condition where it suppose to return true.
46590	TM8.1.0.34: Zones.dll v8.1.0.53l:action FindBlocks_WhiteSpace
	returns False due to 'No Recognition Characters in Search Area'
	but cco is present and recog result is there
46726	Nenu: The action LogConfigure does not create a log file.
47223	TM8.1.0.34: Zones.dll v8.1.0.53:actions PopulateZNField and
	PopulateZNLineItemField return unexpected results.
47911	EWSMail: From and To are left blank in an email then an email
	with attachment is not processed
49665	ID: Convert action PDFDocumentToImage failed Unicode test
51505	Rulerunner: The executables did not terminate at expected times
	based on the thread timeout when the thread timeout was
54504	exceeded.
51521	TM8.1.0.38: DotEdit: highlight on the current page in batch tree is
F2260	too dark - impossible to read image number and page type
52269	SetTaskStatus(5) is reflected as "5" instead of Suspended in job
58805	monitor when batch is processed by RuleRunner service  ID: OCR_SR Confidence calculation returns high confidence for
30003	replaced characters
60327	OpenTextFaxServer.rrx: actions from
00327	TM8.1.0.45+OpenTxtFaxServer.rrs v.8.1.0.11 can not connect to
	RightFax10.5
61667	Imail: im_scan failed when attachment is tif, jpg, or pdf file (text
	file is ok)
63465	[Imprint.rrx] action Redact does not work on field level
63803	CalculateFields does not work with greater than equal to (>=) and
	less than equal to (<=) operators
63816	Trouble Images with OCR_S RotateImage and RecognizeToPDF
64000	Does Taskmaster 8.1 FP 1 Mclaims App support the new CMS1500
	form to support ICD-10 in MClaims
64194	(BiDi) Livelink action Connect_LL() failed to connect to the Livelink
	server when userID/UserPassword are Hebrew or Arabic.
64476	Split: Error handling does not work when moving files (SplitBatch)
64543	Aspose EML / MSG Arabic Conversion To Tif Problem
64907	ExportDB.dll:action help for action ExportBatchIDToColumn need
	an adjustment
64917	ColorToBW: Converted images are uncompressed
65494	DotScan ISIS cannot scan using Fujitsu PaperStream drivers
66173	DStudio AppWizard (Copy): Source fingerprint database updated if
	connection string does not end in semi-colon
66450	DotScan: Unhandled exception occurs when Start Batch Panel is
	enabled
66468	[Imprint.rrx] Some issues with Imprint Redact action

66618	UpdateFingerprintStats action is not updating the correct date to the Template Table.
66777	TMS: Engine database's db_loc column not set to none, batch creation fails
67928	DotScan does not retry loading of setup hierarchy when failing initially
67942	static RRX actions can't be overriden
67982	RV2 user cannot log in with LDAP/ASDI when the login ID has a period in it (8.1 version)
68885	FastDoc configured with customer application causes typing to slow down
68892	OCR/A Barcode Recognition Not Licensed for 2D Barcodes - Remove Selections from DStudio
69333	detail lines are over layed with Show Fields from other images when Show Fields is enabled and you go through pages using Next Page button
69455	NENU: ProcessMoveDBRecords only inserts last task's [qstats] record
69477	Smart Parameters Do Not Find A Batch Level Variable When It Is Listed First In The Runtime DCO
69783	Taskmaster Web: SecMod contains hard-coded references to cookie name (ASP.NET_SessionId)
69799	scanning returns an error in tmweb when using a Canon scanner with twain interface
69990	email actions should return False if email cannot be sent
70518	NENU: ProcessMoveBatchesEx does not continue on failure when source batch's directory does not exist
70521	Populate DCO variable to indicate rotation performed against an image by web operator
70793	mvscan does not respect set_max_docs if set_tree_mode is TRUE
70962	RecognizeToPDFOCR_A only converts full Color TIFFs to partial color
70973	DotScan - Slow performance when having large database and BatchLimit setting
71074	When hr_locale is set at lower level but not set at a higher level objects can run using the wrong locale
71712	Batch ID column width can become truncated when sorting
72253	ShowChar variable does not work with verifine.aspx
72355	PDF conversion from color directly to black & white no longer works with alternate conversion method (method 2)
72358	ValidateVendor action in the APT application fails validation when the VendorName has Unicode Characters and the Database is SQL Server
72389	ICR_C is failing on Windows Server 2012 R2 and on Windows 8.1 (License unavailable)
72463	CCO sometimes not loaded in subsequent task
73148	Convert: PDFDocumentToImage - Change re-extraction, re- compression logic
73175	RecognizeToPDFOCR_S action does not create image-only PDF as documented when called with parameter 4
73304	Compilation Errors in tm810.701

7	4788	TMWeb: averify.aspx highlights characters with low confidence even after modifying ReqConf variable
7	'5377	8.1 FP2 Valications Actions are old versions when running in a non-English language.
7	'5656	print <script>alert(`XSS vulerability');</script> on Default and Error page instead of displaying a messagebox with "XSS vulnerabity" message."
7	6838	Recog_Shared Library.AnalyzeImage() action is not creating a valid CCO for complex images
7	6974	Unable to read data matrix barcodes from sample images
7	8607	IMAIL: Batches abort when ingesting email messages with pdf attachments and body of the email is left blank.
8	1535	Compilation Errors in tm810.773
8	1841	IBMCM_UploadDCO_DOC will fail to return a document ID after upload to CM8
8	7931	SetFilter_PageType can not clear fingerprint match page type filter
8	8011	Nenu: There are 2 actions with the same name in the Nenu Library "QueryClear()"
8	8315	DCO.ChkIntegrity () intermittently throws unhandled exception or possibly corrupt memory if setup DCO child has same name as parent.
9	1258	RV2 Update to support LDAP with IE 11.
9	1511	DotScan from 8.1FP2 + HOTFIX does not sort properly
9	2766	Some RRS errors do not generate an infrastructure error inside the an RRProcessor
9	3468	using CreateFolder () to upload to same folder on CE 5.2 returns error, 'A uniqueness requirement has been violated." and aborts the batch
9	3491	Convert action OutlookMessageToAttachmentOnly against MSG files fails to extract TIFF images that have been saved with Rich Text or HTML format
9	4064	DCO: Document variable is case sensitiv, when called: @D.ID is returning nothing. It has to be called: @D.id
9	4955	Validation library help inaccurate for action AllowOnlyChars as it references regular expression which are not supported by this action
9	5589	Accusoft barcode engine having trouble detecting some barcodes due to the way it only scans top to bottom
9	6943	RV2 Dashboard filters do not work
9	7576	VBScript error when calling GenerateDetails multiple times
9	7712	Split batch child batch creation fails intermittently with no warning to users (active-active TM Servers)
9	7981	no error thrown and batch doesn't abort if the actions try to split twice in the same task.
9	8200	TMS.exe crashes on a system running 8.1 FP1
9	8531	VeryPDF: Fix Pack 3 installer must remove p2isdk.dll
	01708	Using CreateFolder () to upload to same folder on CE 5.2 returns error, 'A uniqueness requirement has been violated." and aborts the batch
1	05013	DotScan: Vscan.xml comes with TYPE null from some random images.

107107	OCRA Barcode - Barcode settings in the OCR/A tab of DStudio are
10/10/	not in synch with values expected by the engine.
107112	pending batch is not launched in Verify panel and instead batch
10/112	status changes to "running" state
107333	OCR_SR: Full page OCR returns duplicate words on some Japanese
10/333	documents
107437	Fingerprint Service crash, application creating unnecessary
107437	fingerprints while service starting up
108450	IMAIL actions allowing batch to advance with no pages if there is
	an email with unselected attachments
108478	ImageName after Convert (e.g. PDF conversion) returns file name
	instead of full path
108585	When clicking batches pending verification in tmweb users
	sometimes encounter an error, "Unable to get queueEntry object
	for queue id xxx"
108785	Post-FP2 Convert module failing to extract TIFF image during
	PDFDocumentToImage
108955	OpenTextFaxServer: have troubles working with smart params:
100010	batch aborts on Connect action
109019	OCR_A.rrx contains syntax error in RecognizeToFile
109988	SELECT statement in StartBatchPanel behaving strangely for
100000	DotScan
109989	Field at a time interface does not allow populating multiple fields with a lookup
110010	SetFingerprintWebServiceURL help gives incorrect example of URL
110010	for service
110287	APT: Tax fields are not being located on all images:
110291	APT: The Invoice Total field is not being populated on the Stuart
110251	Apothecary 2 page invoice
110293	Dstudio: When attempting to exit Dstudio it freezes and becomes
	unresponsive.
110405	OCRSr: "Couldn't load needed object:
	Datacap.Libraries.ScansoftR.Actions into
	Datacap.Libraries.ScansoftR.Actions"
111367	ColorToBW:action C2BW_Convert if param set to tif, original
	images just being eraised.
111417	hr_locale becomes set incorrectly on date field with
	AllowOnlyCharacters
111483	DStudio: Test tab: when batch is running throught workflow via
	Test tab, moving from one task to other takes from 30 sec to 3
111726	min.
111726	Test tdco.dll for read/write retries in rulerunner tasks
111972	Convert: Reprocessing appends instead of overwriting files in
112248	batch directory.  Setting hr_locale to blank can hide hr_locale settings in the
112240	hierarchy
112344	DotEdit does not escape lookup queries, possible SQL injection
112556	ImageFix: hang during line removal when using customer image
112727	GUI Automation: Remove inner classes from comparison code
113119	LLLDAP Authentication Cannot Login.
113212	
	GUI Automation: DotScanTest1 failing in automation regression
 113487	MSXML4 has a security vulnerability and is not supported

113772	New application created by AppWizard includes \DStudio in
112000	admin/engine DB connection string paths  NENU: Support universal date format for SQL
113889	,,
113938	Fingerprint Maintenance Tool does not launch.
114031	The Taskmaster ADSI and LDAP plug-in should have the ability to
114166	verify a users password
	db error shown in tms log when connecting to an application using SQL Server in the Italian language.
114250	DotEdit APT Panel Exception Removing Line Items 8.1 FP3
114579	Full page OCR_A action aborts in latest ocr_a.rrx v8.1.0.77
114826	Locate Action FilterIt is Broken in FP3
114914	Zones.PopulateZNField () fails to populates the field with the correct field recognition results from the CCO file
115414	Fingerprint Service does not match fingerprints when there are 2
	Rulerunner Clients each performing many calls to Find Fingerprint on 4 executables per Client.
115440	DStudio Application Wizard New incorrectly use datacap.xml path
113440	for path in adm and eng connection strings
115627	Rulerunner is Repeatedly logging an error message to the
113027	Windows Event Viewer that should be an informational message.
115631	TMweb: Medium security issue found with Rational Appscan (8.1
	FP3:) XPath Injection
115837	In the Fixup task the Ctrl + F9 shortcut closes the DotScan panel
	and keeps the task in running state for TWAIN scan from DotScan
115921	Autodoc 8.1 FP3 UpdateFingerprintStats Runtime Exception Regression
116038	Rulerunner does not fail over to the backup tms when running in Active/Passive mode:
116057	EWSmail actions: batches abort with error: Object reference not set to an instance of an object.
116064	Rulerunner: When Roaming between 2 Taskmaster Servers and
110001	one server goes down Rulerunner does not processes any more work.
116350	PopulateZNField is aborting when trying to retrieve the zoned text
	"Office Use Only" on the image that is uploaded within the application I am uploading.
116352	APT: Only the first 2 to 3 line items are getting populated on each
	image and also the tax and taxes fields are not getting populated
	probably a zonal issue.
116716	OCR_S is failing when run on a machine with Windows 8.1 as an operating system.
116804	SetFingerprintSearchArea treats parameter 100p or 100% as zero
117226	When you copy an application from client machine to the server
117220	machine without renaming the application and point the client to
	the server datacap.xml the fingerprint, lookup and export
	databases point to c:\ instead of \\9.39.9.49\( UNC path) in
	DCorchard
117274	RecognizeToPDFOCR_A Is Slower in FP3 and Aborts with 500 Images
117719	Nenu: ProcessMoveDBRecords: Only moves the first batch from
	the set query and then produces the following error:
117738	Convert Action PDFFREDocumentToImage Aborts 8.1 FP3

117990	After applying 8.1 Fixpack3, some remnants of previous OCRS files
	are causing problems running OCRS
118032	Rulerunner: All Batches abort from a specific thread during the
	longevity test with the error "Error: Call to external module failed."
118441	IBMCM_StoreItemIDinDCO failed when called at batch level to
	store folder ID to a batch variable.

# **Known limitations in IBM Datacap Taskmaster Capture, Version 8.1 Fix Pack 3**

Read this information to learn about known limitations in IBM Datacap Taskmaster Capture, Version 8.1 Fix Pack 3.

- Unicode characters in an input PDF can cause the PDFDocumentToImage conversion to fail: (Conversions from PDF to TIFF can fail with the PDFDocumentToImage action if the input PDF file contains Unicode characters, for example, "Çàa". The Datacap.Libraries.Convert.Pdf library actions do not support Unicode characters in the file name or path and PDFs that contain non-native style fonts might have limited or poor output. You can use the Datacap.Libraries.Convert.PdfFRE actions as a working alternative. (RTC 49665)
- Encrypted smart parameters cannot be used with the User parameter in the custom values tab in Taskmaster Application Manager (In Application Manager, you can enter passwords for the Password parameter as an encrypted smart parameter. However, the User parameter cannot handle encrypted smart parameters; you must enter the plain-text user name instead. (RTC 110579)
- OCR-S might return high confidence for replaced characters in Chinese (traditional), Chinese (simplified), and Japanese: OCR-A is recommended instead of OCR-S/OCR-SR, because OCR-S confidence calculation might return high confidence for replaced characters. (RTC 58805)
- **AnalyzeImage action time limit was reduced**. Some very complex / noisy images may no longer match the previous fingerprint (RTC115414)
- Workflow "Copy" does not automatically create the child objects of the original workflow. When an existing workflow is selected and click on "copy", a new workflow will be created but no child objects present in the source workflow will be copied to the target workflow (RTC101373)
- When loading a large number of line items (e.g., 1000) in DotEdit after
  processing a large batch through Batch Profile, the verify task can fail. This
  problem is resolved in 8.1 Fix Pack 3 for APT applications that come with IBM Taskmaster
  Capture, but if you have custom panels that need to handle a thousand or more line items
  in a single batch, you can add a vertical scroll bar to the desktop panel by customizing
  your DotEdit panel to scroll line items. [RTC112552]

For documentation updates to Datacap Taskmaster Capture, Version 8.1 FP3, see: http://www.ibm.com/support/docview.wss?uid=swg27045486
