**Overview**

ACG Service Bus includes the following set of modules and tools:

- ACG Modulo Base (RPG and Java™ version)
- ACG Archivi di Base RPG
- ACG Service Bus Components

ACG Modulo Base and ACG Archivi di Base are the same products included in the ACG Web Edition V3.

Services Components is a set of software services that enhance previous ACG Web Edition system services like sign-on, user authorization, messaging layer, workflow layer, application monitoring, and Web user interface. It contains functions for Microsoft® Office interoperability and ACG data multidimensional analysis. It also contains new ACG Web services launched in a controlled and secured way, and corresponding Java portlets to be used in a IBM® WebSphere® Portal Server environment.

This announcement supersedes the Software Announcement ZP06-0491, dated October 03, 2006 (last revised on March 18, 2008).

**Planned availability date**

March 13, 2009

**Description**

ACG Service Bus V1.1.2 contains Modulo Base, Archivi di Base, and a set of tools that can convert RPG code into Java, ready to run on the target IBM iSeries® server.
