IBM DataQuant for Multiplatforms V2.1 helps you easily work with data to develop reports, interactive dashboards, and information portals

At a glance

IBM® DataQuant offers a single streamlined package that includes the following features and benefits:

- Multiple query methods
- Flexible yet comprehensive visual design and presentation options
- Dashboard functions
- Application development interfaces across a variety of platforms

Overview

DataQuant for Multiplatforms V2.1.0 is a powerful query, reporting, and dashboard business intelligence (BI) tool from IBM that can be customized by user or by group.

Key prerequisites

Refer to the Hardware requirements and Software requirements sections.

Planned availability date

October 25, 2013

Refer to the Availability of national languages section for national language availability.

Description

DataQuant for Multiplatforms V2.1.0 (5724-R90) delivers a powerful graphical reporting environment that enables you to quickly and easily develop executive dashboards, information portals, and interactive data visualization solutions. This includes dozens of easy-to-use charts, controls, and graphics that you can drag and drop to quickly create dashboards and reports.
Enhancements include:

- Ad hoc Reports now enables users to drag and drop DataQuant queries onto an open canvas in runtime mode and select from a series of display options (charts or tabular presentations). Users can quickly and easily create their own sophisticated reporting objects, which can help to increase productivity and ease of use for all users, especially those who are new to DataQuant.
- Visual Applications enables concurrent development on dashboards and integrates Ad hoc Report functionality into the dashboard.
- The new Text Analytics feature, available only in DataQuant for Workstation, enables users to extract entities from unstructured data sources (either file-based or database-based) and display the results graphically. This function is capable of recognizing entities such as people, products, places, and organizations as well as the connections between them. It can be configured to recognize enterprise-specific vocabulary and extract key data from contracts, support records, field notes, and comments, giving the user insight into sources beyond typical structured information.
- Scheduled tasks. Users have more options for the scheduled objects beyond the procedure that could be scheduled previously. Queries, quick reports, and visual reports can now be scheduled as well. This new feature delivers the enhanced ability to schedule objects to run based upon user criteria, thus giving the user an autonomic approach to running DataQuant objects. In addition, there are now a wide variety of actions to take with these objects.
- Quick reports enable users to create a new type of grid-based GUI report with grouping, aggregation, charts, titles, fonts, and standard text formatting. With this new reporting facility wizard, users now have a simple, prompted approach to DataQuant report creation.
- Dynamarts enable users to save result sets with the query object. DataQuant dashboards and reports can be partially or fully driven by offline or scheduled data sets. Users can then send a snapshot of the result set and associated report to others so that they can "see it as it was" or refresh it to "see it as it is." With Dynamarts users have greater flexibility to share and access DataQuant dashboards and reports.
- Support for existing DataQuant queries, procedures, forms, visual reports, dashboards, forecasts, drill-down paths, analytical queries, and other objects and infrastructure.

Accessibility by people with disabilities

A US Section 508 Voluntary Product Accessibility Template (VPAT) can be requested via the IBM Web site

Product positioning

DataQuant is a full-function BI tool for the creation of end-user queries and the delivery of critical business information by the rendering of reports, charts, and dashboards. It is not intended to deliver deep, inline, or imbedded analytics or BPM, CPM, EPM levels of analytics.

It is a server-based query, reporting, and dashboard solution targeted to clients of any size with a BI requirement. It is a programmer-free environment designed to provide maximum value on an extremely cost-effective basis.

DataQuant delivers a scalable and manageable solution that can be used by small and large enterprises alike.

No publications are shipped with this product.

The IBM Publications Center

http://www.ibm.com/shop/publications/order

The Publications Center is a worldwide central repository for IBM product publications and marketing material with a catalog of 70,000 items. Extensive search facilities are provided. Payment options for orders are via credit card (in the U.S.) or customer number for 20 countries. A large number of publications are available online in various file formats, and they can all be downloaded by all countries.

Technical information

Specified operating environment

Hardware requirements

DataQuant for Multiplatforms consists of two components:

- DataQuant for Workstation: DataQuant for Workstation requires a workstation that supports:
  - Network connectivity
  - Approximately 1 GB of disk space (single language installation)
  - Minimum of 1 GB of RAM
- DataQuant for WebSphere®: DataQuant for WebSphere requires 220 MB of hard disk space.
  - Approximately 500 MB of disk space
– Minimum of 1 GB of RAM

**Software requirements**

**DataQuant for Workstation:** DataQuant for Workstation runs on any one of the following operating environments:

- Microsoft® Windows® XP
- Windows 7
- Windows 8
- Windows Server 2008
- Windows Server 2012
- Windows Vista
- Red Hat Enterprise Linux® 5 and 6
- SUSE Linux 10, 11, 12
- Mac OS X 10.6, 10.7, and 10.8

DataQuant for Workstation supports the following data servers (subject to license restrictions):

- DB2® for iSeries®, V5.4, V6.1, or V7.1
- DB2 for Linux, UNIX®, and Windows, V9.1, V9.5, V9.7, or V10.1
- IBM® Informix® Dynamic Server V11.5 or V12.10

DataQuant for Workstation has the following software dependencies:

Database connectivity requires an appropriate JDBC driver for each type of RDBMS accessed.

**DataQuant for WebSphere:** DataQuant for WebSphere requires a web server, such as one of the following:

- WebSphere Application Server V7.0
- WebSphere Application Server V8.0
- WebSphere Application Server V8.5
- Apache Tomcat V6 and V7

DataQuant for WebSphere requires one of the following web browsers (with JavaScript support enabled) on each user machine:

- Microsoft Internet Explorer V7, or later
- Mozilla Firefox V4, or later
- Apple Safari browser V5.1, or later
- Google Chrome browser V7, or later

DataQuant for WebSphere supports the following database servers (subject to license restrictions):

- DB2 for iSeries, V5.4, V6.1, or V7.1
- DB2 for Linux, UNIX, and Windows, V9.1, V9.5, V9.7, or V10.1
- IBM Informix Dynamic Server V11.5 or V12.10

DataQuant for WebSphere has the following software dependency: Database connectivity requires an appropriate JDBC driver for each type of RDBMS accessed.

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a README file, or other information published by IBM, such as an announcement.
Planning information

Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and technical support are provided by the Software Subscription and Support (also referred to as Software Maintenance) offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software, and technical support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with each program license acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available.

Packaging

The physical deliverable for DB2 DataQuant for Multiplatforms V2.1 consists of a media pack that includes the following CD:

<table>
<thead>
<tr>
<th>Product</th>
<th>Media pack content</th>
</tr>
</thead>
<tbody>
<tr>
<td>DataQuant for Multiplatforms</td>

<td>Quick Start Guide CD (1)</td>
</tr>
</tbody>
</table>

Security, auditability, and control

IBM DataQuant for Multiplatforms, 5724-R90, uses the security and auditability features of the DB2 data server.

The client is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

Global Technology Services®

Contact your IBM representative for the list of selected services available in your country, either as standard or customized offerings for the efficient installation, implementation, or integration of this product.

Ordering information

For ordering information, consult your IBM representative or authorized IBM Business Partner, or visit

This product is only available via Passport Advantage. It is not available as shrinkwrap.

Processor Value Unit (PVU)

Processor Value Unit (PVU) is a unit of measure by which the program can be licensed. The number of PVU entitlements required is based on the processor technology (defined within the PVU Table by processor value, brand, type, and model number at the following website and the number of processors made available to the program.

IBM continues to define a processor, for the purpose of PVU-based licensing, to be each processor core on a chip. A dual-core processor chip, for example, has two processor cores.

Licensee can deploy the program using either Full Capacity licensing or Virtualization Capacity (Sub-Capacity) licensing according to the Passport Advantage Sub-Capacity Licensing Terms (see webpage below). If using Full Capacity licensing, Licensee must obtain PVU entitlements sufficient to cover all activated processor cores’ in the physical hardware environment made available to or managed by the program, except for those servers from which the program has been permanently removed. If using Virtualization Capacity licensing, Licensee must obtain entitlements sufficient to cover all activated processor cores made available to or managed by the program, as defined according to the Virtualization Capacity License Counting Rules at

An Activated processor core is a processor core that is available for use in a physical or virtual server, regardless of whether the capacity of the processor core can be or is limited through virtualization technologies, operating system commands, BIOS settings, or similar restrictions.

Notes:

• Some programs may require licenses for the program and what is being managed. In that case, the following applies: In addition to the entitlements required for the program directly, Licensee must obtain PVU entitlements for this program sufficient to cover the processor cores managed by the program.

• Some programs may be licensed on a managed basis only. In that case, the following applies: Instead of the entitlements required for the program directly, Licensee must obtain PVU entitlements for this program sufficient to cover the processor cores managed by the program.

• A few programs on an exception basis may be licensed on a referenced basis. In that case, the following applies: Rather than obtaining entitlements for the activated processor cores available to the program, Licensee must obtain PVU entitlements for this program sufficient to cover the environment made available to the referenced program as if the program itself were executing everywhere the referenced program was executing, independent of the basis on which the referenced program is licensed.

Orders for these part numbers will not be accepted after the stated effective date of withdrawal, nor will normal marketing activities or educational support be available unless previous agreement exists between the customer and IBM.

Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

Licensing

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use.

Part number products only, offered outside of Passport Advantage, where applicable, are license only and do not include Software Maintenance.

This software license includes Software Subscription and Support (also referred to as Software Maintenance).

The program’s License Information will be available for review on the IBM Software License Agreement website

Limited warranty applies

Yes

Limited warranty

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional charge. For further information, consult the IBM Software Support Handbook found at

http://www.ibm.com/support/handbook

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).
**Money-back guarantee**

For clarification, note that if for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

For programs acquired under the IBM International Passport Advantage Agreement, this term applies only to your first acquisition of the program.

**Volume orders (IVO)**

No

**Passport Advantage applies**

Yes, and through the Passport Advantage website at

http://www.ibm.com/software/passportadvantage

This product is only available via Passport Advantage. It is not available as shrinkwrap.

**Software Subscription and Support applies**

Yes. Software Subscription and Support is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and technical support are provided by the Software Subscription and Support offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software and Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support with each program license acquired. The initial period of Software Subscription and Support can be extended by the purchase of a renewal option, if available.

While your Software Subscription and Support is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance via telephone and, if available, electronic access, to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, consult your IBM Software Support Handbook at

http://www.ibm.com/support/handbook

Software Subscription and Support does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.

For additional information about the International Passport Advantage Agreement and the IBM International Passport Advantage Express Agreement, visit the Passport Advantage website at

http://www.ibm.com/software/passportadvantage

**System i® Software Maintenance applies**

Education software allowance does not apply.

Special education prices are available for qualified customers through Passport Advantage.

**Statement of good security practices**

IT system security involves protecting systems and information through prevention, detection, and response to improper access from within and outside your enterprise. Improper access can result in information being altered, destroyed, or misappropriated or can result in misuse of your systems to attack others. Without a comprehensive approach to security, no IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems and products are designed to be part of a comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products, or services to be most effective. IBM does not warrant that systems and products are immune from the malicious or illegal conduct of any party.
