Overview

IBM® plans to provide the IBM Blueworks Live™ service and IBM Business Process Manager (IBM BPM) on Cloud service hosted on SoftLayer cloud infrastructure. These services are planned to be available for new Blueworks Live and IBM BPM on Cloud clients.

Blueworks Live is designed to be easy for users to collaboratively model and optimize their business processes and decisions. Simple to use, Blueworks Live is cloud-based software with an intuitive graphical interface that requires no installation and little-to-no training. With a low-cost monthly subscription, Blueworks Live provides a 'single source of truth' for enterprise processes and decisions. Process models created in Blueworks Live can be imported into IBM BPM for implementation and execution.

IBM BPM on Cloud is a comprehensive and consumable, business process management platform as a service offering that offers visibility and management of your business processes in a cloud environment. It includes tooling and run time for process design, execution, monitoring, and optimization. This service offering, available on a monthly subscription basis, helps eliminate typical inhibitors to starting new process improvement projects, such as capital expenditures (CAPEX), hardware availability, and deep IT skills for setting up and managing systems.

SoftLayer, an IBM company, is the cloud infrastructure provider of choice for companies building for Internet Scale.

Statements regarding IBM plans, directions, and intent are subject to change or withdrawal without notice at the sole discretion of IBM. Information regarding potential future products is intended to outline our general product direction and it should not be relied on in making a purchasing decision. The information mentioned regarding potential future products is not a commitment, promise, or legal obligation to deliver any material, code, or functionality. Information about potential future products may not be incorporated into any contract. The development, release, and timing of any future features or functionality described for our products remains at the discretion of IBM.

Announcement countries
