## At a glance

IBM® Lotus® Quickr™ 8.2 adds:

- Lotus Connections Files and Wikis for Lotus Quickr product entitlements.
- Lotus Quickr services for WebSphere® Portal that supports Oracle 10.2 as an alternative database.
- Lotus Quickr services for WebSphere Portal that supports AIX® V5.3.
- National language support for all languages supported on previous versions of Lotus Quickr.
- Upgrade capability from Lotus Quickplace 6.5.1 or 7.0 directly to Lotus Quickr 8.2 without requiring intermediate steps.

To order, contact your IBM representative, an IBM Business Partner, or the Americas Call Centers at 800-IBM-CALL.

Reference: YE001

## Overview

IBM Lotus Quickr 8.2 delivers:

- New social collaboration dimensions for Lotus Quickr via Lotus Connections Files and Wikis. The files capability complements team libraries by providing an option for individuals to share files with others on an adhoc basis. It provides an easy-to-use Web 2.0 alternative to outdated network drives. The wikis capability complements the wiki component in team spaces with a full-function, standalone wiki environment.
- Two new, frequently requested infrastructure options for Lotus Quickr services for WebSphere Portal.
  - Support for AIX V5.3, providing a highly scalable server alternative and giving you the ability to leverage your existing systems administration skills.
  - Support for Oracle 10.2 as an alternative database. If you have standardized on Oracle as your database of choice, you can now more easily incorporate Lotus Quickr into your infrastructure.
- National language support for Lotus Quickr services for Domino® 8.2 giving organizations around the world the opportunity to leverage the recently announced enhancements to Lotus Quickr.
- Direct upgrade process that provides organizations, who are currently running Lotus Quickplace 6.5.x or 7.0.x, with the ability to upgrade to Lotus Quickr 8.2

without first upgrading to intermediate versions. This makes the transition process much more efficient and economical, and enables organizations to benefit from the advanced capabilities and ease-of-use of Lotus Quickr.

## Description

---

IBM Lotus Quickr 8.2 adds new social collaboration dimensions with Lotus Connections Files and Wikis for Lotus Quickr. With the files capability, individuals can upload personal files and share them, tag them to enable discovery, and comment on and recommend the files of others. The wiki service provides the ability to create and edit pages collaboratively and to compare this information with preview versions of a page.

These capabilities are also available as part of Lotus Connections 2.5 (refer to Software Announcement [209-210](#), dated August 18, 2009). Organizations with a Lotus Quickr license that want to take advantage of these new features will need to separately install and administer a Lotus Connections server with the files and wiki services.

Lotus Quickr services for WebSphere Portal now provides support for Oracle 10.2 as an alternative database. If you have standardized on Oracle as your database of choice you can now more easily incorporate Lotus Quickr into the infrastructure. To take advantage of this option, you must perform a standard installation and then make the transition to Oracle as the database. If you are a new customer, you are encouraged to make this transition immediately before populating the Quickr places with content. If you are an existing customer, you will have the option to switch to Oracle 10.2 as the Lotus Quickr database. Instructions for deploying Lotus Quickr using an Oracle database and links to the required hotfixes are available at

<http://www.ibm.com/support/docview.wss?rs=3264&uid=swg21392466>

Note: Lotus Quickr does not include a license for Oracle 10.2. You are responsible for ensuring that you have the appropriate license.

Lotus Quickr services for WebSphere Portal now provides support for AIX V5.3, which is a highly scalable server alternative and gives you the ability to leverage your existing systems administration skills. You can now deploy Lotus Quickr and the supporting software (for example, DB2® or Oracle, WebSphere Application Server, and WebSphere Portal) on a IBM Power® system running AIX V5.3.

Note: This capability will be available for electronic download only. No physical media will be available for Lotus Quickr services for WebSphere Portal on AIX until the next major release of Lotus Quickr.

National language support for Lotus Quickr services for Domino 8.2 is now available in many languages giving organizations around the world the opportunity to leverage the recently announced enhancements to Lotus Quickr. Refer to the [Availability of national languages](#) section for details.

The direct upgrade process provides organizations who are currently running Lotus Quickplace 6.5.x or 7.0.x with the ability to upgrade to Lotus Quickr 8.2 without first upgrading to intermediate versions. Instructions and links to any necessary hotfixes are available at

<http://www-10.lotus.com/ldd/lqwiki.nsf/dx/06302009062522PMWEBUAW.htm>

This direct upgrade process will make the transition process much more efficient and economical, and it will enable organizations to benefit from the advanced capabilities and ease-of-use of Lotus Quickr.

---

## Statement of direction

---

It is the intention of IBM Lotus to continue to offer feature-rich, scalable, security-rich, easy-to-use software for organizing, managing, and sharing everyday content and for online team collaboration, regardless of company size and industry focus.

All statements regarding IBM's plans, directions, and intent are subject to change or withdrawal without notice.

IBM Lotus Quickr Entry	5724-S31	PA Per Authorized User

### Charge metrics definitions

#### Processor Value Unit (PVU)

PVU is the unit of measure by which this program is licensed. PVU entitlements are based on processor families (vendors and brands). A Proof of Entitlement (PoE) must be obtained for the appropriate number of PVUs based on the level or tier of all processor cores activated and available for use by the Program on the server. Some programs allow licensing to less than the full capacity of the server's activated processor cores, sometimes referred to as sub-capacity licensing. For programs which offer sub-capacity licensing, if a server is partitioned utilizing eligible partitioning technologies, then a PoE must be obtained for the appropriate number of PVUs based on all activated processor cores available for use in each partition where the program runs or is managed by the program. Refer to the International Passport Advantage Agreement Attachment for Sub-Capacity Terms or the program's License Information to determine applicable sub-capacity terms. The PVU entitlements are specific to the program and may not be exchanged, interchanged, or aggregated with PVU entitlements of another program.

For general overview of PVUs for processor families (vendors and brands), go to

[http://www-306.ibm.com/software/lotus/passportadvantage/pvu\\_licensing\\_for\\_customers.html](http://www-306.ibm.com/software/lotus/passportadvantage/pvu_licensing_for_customers.html)

To calculate the exact PVU entitlements required for the program, go to

## Authorized User

Authorized User is the unit of measure by which this program is licensed. An Authorized User is an individual (named or unnamed) within or outside of your enterprise. The program may be installed on one or more computers or servers and accessed by the number of users authorized by the Proof of Entitlement (PoE). You must have an entitlement for each Authorized User accessing the program or any program component in any manner directly or indirectly (for example, via a multiplexing program, device, or application server) through any means.

## Terms and conditions

---

The terms and conditions for IBM Lotus Quickr as previously announced in Software Announcement [207-145](#), dated June 26, 2007.

---

## IBM Electronic Services

---

IBM has transformed its delivery of hardware and software support services to help you achieve higher system availability. Electronic Services is a Web-enabled solution that offers an exclusive, no-additional-charge enhancement to the service and support available for IBM servers. These services are designed to provide the opportunity for greater system availability with faster problem resolution and preemptive monitoring. Electronic Services comprises two separate, but complementary, elements: Electronic Services news page and Electronic Services Agent.

The Electronic Services news page is a single Internet entry point that replaces the multiple entry points traditionally used to access IBM Internet services and support. The news page enables you to gain easier access to IBM resources for assistance in resolving technical problems.

The Electronic Service Agent™ is no-additional-charge software that resides on your server. It monitors events and transmits system inventory information to IBM on a periodic, client-defined timetable. The Electronic Service Agent automatically reports hardware problems to IBM. Early knowledge about potential problems enables IBM to deliver proactive service that may result in higher system availability and performance. In addition, information collected through the Service Agent is made available to IBM service support representatives when they help answer your questions or diagnose problems. Installation and use of IBM Electronic Service Agent for problem reporting enables IBM to provide better support and service for your IBM server.

## Prices

---

For additional information and current prices, contact your local IBM representative.

The charges are unchanged by this announcement.

### **IBM Global Financing**

---

IBM Global Financing offers competitive financing to credit-qualified customers to assist them in acquiring IT solutions. Offerings include financing for IT acquisition, including hardware, software, and services, both from IBM and other manufacturers or vendors. Offerings (for all customer segments: small, medium, and large enterprise), rates, terms, and availability can vary by country. Contact your local IBM Global Financing organization or visit

<http://www.ibm.com/financing>

IBM Global Financing offerings are provided through IBM Credit LLC in the United States, and other IBM subsidiaries and divisions worldwide to qualified commercial and government customers. Rates are based on a customer's credit rating, financing terms, offering type, equipment type, and options, and may vary by country. Other restrictions may apply. Rates and offerings are subject to change, extension, or withdrawal without notice.
