At a glance

Version 8.0 of IBM® Rational® AppScan® and Policy Tester™ portfolios brings significant enhancements to best-in-class solutions for static and dynamic security testing and website compliance. From requirements, through design, code, and production, IBM Rational AppScan provides comprehensive application vulnerability management across the application lifecycle. The IBM Rational AppScan portfolio is a fundamental component of the IBM Secure Engineering framework enabling organizations to benefit from the ability to design security into their business.

For ordering, contact your IBM representative, an IBM Business Partner, or IBM Americas Call Centers at 800-IBM CALL (Reference: AE001).

Overview

A major portfolio-wide release of IBM Rational Application Security and Website Compliance offerings is now available. The IBM Rational AppScan and Policy Tester portfolios are upgraded to Version 8.0 with significant enhancements to best-in-class solutions for static and dynamic security testing and website compliance. From requirements, through design, code, and production, IBM Rational AppScan provides comprehensive application vulnerability management across the application lifecycle.

This release of IBM Rational AppScan offerings focuses on accuracy and efficiency for users with:

- Hybrid analysis
 - Correlation of static and dynamic analysis results for enhanced accuracy of results
 - Utilization of static and dynamic scanning for detecting client-side JavaScript™ vulnerabilities
- Enhanced scanning of Web 2.0 and Complex applications
- Enhanced service-oriented architecture(SOA) support (web services security)
- WebSphere® Commerce Server and WebSphere Portal support
- Reporting and usability enhancements

This release of IBM Rational Policy Tester focuses on scanning enhancements and advanced website accessibility:

- Enhanced scanning support for WebSphere Portal and AJAX applications
- Accessibility Edition enhancements to the Web Content Accessibility Guidelines (WCAG) 2.0 rule set, developed in conjunction with experts at the IBM Accessibility Center
- Support for Accessible Rich Internet Applications (WAI-ARIA) to make advanced web applications dynamic content and advanced user interface controls (developed with Ajax, HTML, JavaScript, and related technologies) usable to people with disabilities

Key prerequisites

For details, refer to the [Hardware requirements](#) and the [Software requirements](#) sections.

Planned availability date

October 26, 2010: Electronic availability

November 2, 2010: Media availability

Description

IBM Rational AppScan

The most efficient way to stay ahead of application security vulnerabilities is to build software securely, from the ground up. The challenge is that the majority of developers are not security experts, and secure coding is historically not identified as a priority. As a result web-based and non-web based applications alike continue to be deployed riddled with vulnerabilities ready for exploitation, easily risking sensitive data to a breach.

The onerous task of vulnerability identification and remediation cannot be successfully addressed by limited IT security resources. So, the best way to engage development in the process of application security is to provide tools that fit into the existing environment and workflow, and that generate results in an understandable language. The IBM Rational AppScan portfolio offers a host of offerings to enable application security testing across the application lifecycle.

IBM Rational AppScan is a leading application security testing suite designed to help manage vulnerability testing throughout the software development life cycle. AppScan offers a time-saving solution for all types of security testing - outsourced, individual, and enterprise-wide analysis - and for all types of users - application developers, build managers, quality assurance (QA) teams, penetration testers, security auditors, and senior management.

AppScan offerings include analysis techniques to traverse an application or its source code, analyzing and testing the application or its code, validating the findings, and then reporting results. The reports generated include recommendations to fix the problems. These advanced fix recommendations educate and help developers and security auditors to address and remediate the vulnerabilities identified during the scan.

IBM Rational AppScan editions in this announcement include:

- **IBM Rational AppScan Enterprise Edition** is a web-based, multi-user solution that provides centralized application security scanning, data consolidation and reporting, remediation capabilities, executive dashboards, compliance reporting, and seamless integration with AppScan Standard Edition.

- **IBM Rational AppScan Standard Edition** delivers the desktop solution for automating web application security testing. Used by penetration testers and security auditors, as well as QA and development.
- **IBM Rational AppScan Express® Edition** brings all the value and benefit of IBM Rational AppScan Standard Edition's automated security scanning, testing, and reporting to small- and mid-sized organizations.
- **IBM Rational AppScan Reporting Console** is a web-based, multi-user solution that provides centralized data consolidation and reporting, remediation capabilities, executive dashboards, compliance reporting, and seamless integration with IBM Rational AppScan Standard Edition.
- **IBM Rational AppScan Tester Edition for Rational Quality Manager** integrates security testing into the QA process and supports software quality assurance, and software quality management.
- **IBM Rational AppScan OnDemand** identifies and prioritizes web application security vulnerabilities across the enterprise through an outsourced turnkey, SaaS model that includes ongoing professional services expertise.
- **IBM Rational AppScan OnDemand Production Site Monitoring** monitors production web content and sites for security vulnerabilities through an outsourced turnkey, SaaS model that includes ongoing professional services expertise
- **IBM Rational AppScan OnDemand Premium** provides assessment of an application leveraging IBM Rational AppScan with professional services expertise.

IBM Rational Policy Tester

IBM Rational Policy Tester is an industry-leading, website Compliance Management solution used to assess end-user privacy, accessibility, and website quality issues that impact compliance and site effectiveness and end-user experience. Policy Tester drives significant cost out of the online operation by automating manual processes and by identifying and prioritizing compliance issues for immediate remediation.

Policy Tester editions include:

- **IBM Rational Policy Tester, Privacy Edition** - Will be used to uncover and report oversights that may expose the organization to undue risk and issues including missing privacy statements, non-compliant pages collecting personally identifiable information, insecure data collection forms, and cookie presence. This is critical if you need to comply with privacy regulations such as COPPA, GLBA, HIPAA, and California SB1386 and AB1950.
- **IBM Rational Policy Tester, Accessibility Edition** - Will help to ensure the accessibility of the website for all users, including those accessing the site with the help of assistive technologies such as screen readers and Braille keyboards. It does so by executing hundreds of comprehensive accessibility checks such as appropriate text and background color contrast or the presence of text equivalent "alt" tags on images. It helps determine the site's level of compliance with U.S. Government standards, including the U.S. Government's Section 508 and guidelines such as the W3C's Web Content Accessibility Guidelines (WCAG) and France's AccessiWeb and other international standards. .
- **IBM Rational Policy Tester, Quality Edition** - Will generate reports on issues that impact website quality and effectiveness, including issues such as spelling errors, broken links, and outdated content to enhance site usability and employee productivity by making information accurate and easier to find. Will assist organizations in maintaining their internal quality and web development standards while improving the customer experience. website usability has a direct impact on e-Commerce and revenue attainment.

IBM Rational AppScan Enterprise Edition V8.0 includes the following enhancements:

- Hybrid Analysis - correlation of static and dynamic analysis results
- Enhanced JavaScript, AJAX scanning, Flash/Flex (ActionScript3) scanning
- Support for WebSphere Portal scanning
- Support for web services scanning

- Enhanced REST API, providing the ability to create and run scans programmatically
- Reporting enhancements (PDF executive report and detailed security issues)
- New platform support: Windows® 2003 Server SP2 64-bit (in 32-bit mode), Windows 2008 Server SP2 64-bit (in 32-bit mode), Windows 2008 Server R2 (in 32-bit mode), Windows 7 (client only)

IBM Rational AppScan Tester Edition for Rational Quality Manager V8.0

includes the following enhancements:

- Enhanced JavaScript, AJAX scanning, Flash/FLEX (ActionScript3) scanning
- Support for WebSphere Portal scanning
- Support for Web services scanning
- Reporting enhancements (detailed security issues)
- New platform support: Windows 2003 Server SP2 64-bit (in 32-bit mode), Windows 2008 Server SP2 64-bit (in 32-bit mode), Windows 2008 Server R2 (in 32-bit mode), Windows 7 (client only)
- Reporting enhancements (detailed security issues)

IBM Rational AppScan Reporting Console V8.0 includes the following enhancements:

- Hybrid Analysis - correlation of static and dynamic analysis results
- Reporting enhancements (PDF executive report, detailed security issues)
- New platform support: Windows 2003 Server SP2 64-bit (in 32-bit mode), Windows 2008 Server SP2 64-bit (in 32-bit mode), Windows 2008 Server R2 (in 32-bit mode), Windows 7 (client only)

IBM Rational AppScan Standard Edition V8.0 and Express Edition V8.0

include the following enhancements:

- Hybrid Analysis - leveraging static and dynamic analysis for detecting client-side JavaScript vulnerabilities
- Enhanced scanning for JavaScript, AJAX and ActionScript3-based Flash/Flex applications
- Enhanced support for SOA (Web Services Security: WS-Security v1.1 support, Improved Microsoft® .NET framework support, and WS-Addressing 2004 and 2006 support)
- Improved scan configuration with automatic website rewriting
- Defect tracking system integrations with IBM Rational ClearQuest® and HP Quality Center
- Enhanced cookie testing
- New platform support: Windows 2008 Server R2 (in 32-bit mode)

IBM Rational Policy Tester Accessibility, Privacy and Quality Editions V8.0

includes the following enhancements:

- Enhanced WCAG 2.0 compliance assessment capabilities, including WAI-ARIA (a standard for making Rich Internet Applications accessible)
- New tooling for testing Rich Internet Applications (RIA) for accessibility issues
- Enhanced scan engine performance, especially for sites using JavaScript
- Enhanced support for automatically exploring and testing applications based on Ajax frameworks
- Enhanced support for automatically exploring and testing WebSphere Portal applications
- Enhanced REST API, providing the ability to create and run scans programmatically
- New platform support: Windows 2003 Server SP2 64-bit (in 32-bit mode), Windows 2008 Server SP2 64-bit (in 32-bit mode), Windows 2008 Server R2 (in 32-bit mode), and Windows 7 (client only)

Statement of direction

The following editions will be included in a subsequent announcement later in fourth quarter, 2010:

- IBM Rational AppScan Source Edition provides a comprehensive approach to security source code analysis (static analysis), with fast scans and actionable information to quickly get the reports and remediation advice required to find and eliminate vulnerabilities in applications
- IBM Rational AppScan Build Edition enables both static and dynamic analysis for security testing to be automated through testing in the build environment providing the benefits of full application testing coverage early in the application development process.

All statements regarding IBM's plans, directions, and intent are subject to change or withdrawal without notice.

Publications

No publications are shipped with these products.

The IBM Publications Center

<http://www.ibm.com/shop/publications/order>

The Publications Center is a worldwide central repository for IBM product publications and marketing material with a catalog of 70,000 items. Extensive search facilities are provided. Payment options for orders are via credit card (in the U.S.) or customer number for 20 countries. A large number of publications are available online in various file formats, and they can all be downloaded by all countries.

Specified operating environment

Hardware requirements

Disk space

- Approximately 800 MB of available hard-disk space for the recommended installation
- Approximately 10 GB of available hard-disk space for scan logs on Agent Server
- Approximately 200 GB of available hard-disk space on the system hosting the database (equals approximately 400®,000 pages)
- Approximately 330 MB for the Web Services Explorer -- GSC (Generic Service Client tool) version 8.1 used to test Web Services for security vulnerabilities

Memory: 4 GB of RAM, or more recommended

Processor: 3.0-GHz Pentium® IV-compatible processor; faster processor or multiple processors recommended

IBM Rational AppScan Standard edition

Disk Space -- Approximately 30 GB of available hard-disk space

Memory -- 2 GB of RAM or more recommended

Processor -- 2.4-GHz Pentium IV-compatible processor

Software requirements

Development tools -- Microsoft .NET Framework 2.0; Service Pack 2 is required

Databases

- Microsoft SQL Server Enterprise Edition 2008 SP1
- Microsoft SQL Server Enterprise Edition 2005 SP2
- Microsoft SQL Server Standard Edition 2005
- Microsoft SQL Server Standard Edition 2008 SP1

Web browsers

- Mozilla Firefox 3.0 and future mod levels, and fix packs
- Microsoft Internet Explorer 6.0 SP1 and future releases, mod levels, and fix packs

Web servers

- Microsoft Internet Information Services 6.0 (IIS6 must be enabled on the Windows 2003 Server so that the product properly installs).
- Microsoft Internet Information Services 7.0 (IIS7 must be enabled on the Windows 2008 Server so that the product properly installs)

IBM Rational AppScan Standard Edition

Development tools -- Microsoft .NET Framework 2.0 SP1

Web browsers -- Microsoft Internet Explorer 6.0 and future releases, mod levels and fix packs

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a README file, or other information published by IBM, such as an announcement

letter. Documentation and other program content may be supplied only in the English language.

Planning information

Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and technical support are provided by the Software Subscription and Support (also referred to as Software Maintenance) offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software, and technical support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with each program license acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available.

Packaging

Charge metrics definitions

Authorized User

Authorized User is the unit of measure by which this program is licensed. An Authorized User is an individual (named or unnamed) within or outside of your enterprise. The program may be installed on one or more computers or servers and accessed by the number of users authorized by the Proof of Entitlement (PoE). You must have an entitlement for each Authorized User accessing the program or any program component in any manner directly or indirectly (for example, via a multiplexing program, device, or application server) through any means.

Install

Install is a unit of measure by which the program can be licensed. An Install is an installed copy of the program on a physical or virtual disk made available to be executed on a computer. Licensee must obtain an entitlement for each Install of the program.

Server

Server is the unit of measure by which this program is licensed. A server is a computer system that executes requested procedures, commands, or applications to one or more user or client devices. A Proof of Entitlement (PoE) must be obtained for each server regardless of the number of processor cores or partitions in the server on which the program runs or each server managed by the program. Where blade technology is employed, each blade is considered a separate server.

Resource Value Unit

Resource Value Unit (RVU) is the unit of measure by which this program is licensed. RVU entitlements are based on the quantity of a specific designated measurement for the given program. A Proof of Entitlement (PoE) must be obtained for the appropriate number of RVUs required for your environment as defined by the specific program terms. The RVU entitlements are specific to the program and may include, but are not limited to the following: Client Devices, data source records, messages, and servers, and may not be exchanged, interchanged, or aggregated with RVU entitlements of another program. To understand these benefits of RVU licensing, and to determine how many RVUs to obtain for the program, contact your IBM representative.

AppScan Enterprise includes the ability to scan web applications via scan agents, where each Server License of AppScan Enterprise includes entitlement for up to but no more than one hundred (100) scan agents, as specified in your Licensee's Proof of Entitlement.

Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

Licensing

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use.

Part number products only, offered outside of Passport Advantage, where applicable, are license only and do not include Software Maintenance.

This software license includes Software Subscription and Support (also referred to as Software Maintenance).

License Information form number

Program name	Program number	Form number
IBM Rational AppScan Enterprise Edition	5724-T52	L-KHUY-88NGGC
IBM Rational AppScan Standard Edition	5724-T59	L-KHUY-88PJA9

IBM Rational Policy Tester Quality Edition	5724-T58	L-KHUY-88NGGC
Rational AppScan Express Edition	5724-V91	L-KHUY-88PJA9

The program's License Information will be available for review on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

Limited warranty applies

Yes

Limited warranty

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional charge.

For further information, consult the *IBM Software Support Handbook* found at

<http://www.ibm.com/support/handbook>

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

Program technical support

Technical support of a program product version or release will be available for a minimum of three years from the general availability date, as long as your Software Maintenance is in effect. This technical support allows you to obtain assistance (via telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Maintenance also provides you with access to updates (modifications or fixes), releases, and versions of the program. You will be notified, via announcement letter, of discontinuance of support with 12 months' notice. If you require additional technical support from IBM, including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

Technical support of a program product version or release will be available for a minimum of five years from the general availability date, as long as your Software Maintenance is in effect. This technical support allows you to obtain assistance (via telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Maintenance also provides you with access to updates (modifications or fixes), releases, and versions of the program. You will be notified, via announcement letter, of discontinuance of support with 12 months' notice. If you require additional technical support from IBM, including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

Money-back guarantee

For clarification, note that if for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

For clarification, note that for programs acquired under the IBM International Passport Advantage Agreement, this term applies only to your first acquisition of the program.

Volume orders (IVO)

No

Passport Advantage applies

Yes, and through the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

This product is only available via Passport Advantage. It is not available as shrinkwrap.

Software Subscription and Support (Software Maintenance)

Yes. Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and technical support are provided by the Software Subscription and Support (also referred to as Software Maintenance) offering as described in the Agreements. Product upgrades provide the latest

versions and releases to entitled software and Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with each program license acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available.

While your Software Subscription and Support (also referred to as Software Maintenance) is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance via telephone and, if available, electronic access, to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, consult your IBM Software Support Handbook at

<http://www.ibm.com/support/handbook>

Software Subscription and Support (also referred to as Software Maintenance) does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.

For additional information about the International Passport Advantage Agreement and the IBM International Passport Advantage Express Agreement, visit the Passport Advantage website at
