At a glance

With this release, IBM® Rational Team Concert™ provides breakthrough enhancements in planning, change management, software configuration management, and build management for developers and project managers while accelerating the real-time flow of information and ideas across the extended software delivery team.

For requirements engineers and systems developers IBM Rational Team Concert adds powerful robust change management and approvals to the market-leading IBM Rational® DOORS® environment.

For ordering, contact your IBM representative, an IBM Business Partner, or IBM Americas Call Centers at 800-IBM-CALL (Reference: AE001).

Overview

IBM Rational Team Concert assists organizations of all sizes and complexity to automate, advise and enforce process, information flow and interactions throughout the systems and software development lifecycles. IBM Rational Team Concert integrates planning, software configuration management, change management, and build management into a single application.

IBM Rational Team Concert fully supports systems and software development on a wide variety of platforms including Windows®, Linux®, AIX®, Solaris, IBM i, Linux on Power®, Linux for System z® and z/OS®. IBM Rational Team Concert V3.0 also includes new support for distributed software configuration management across multiple repositories, advanced dependency based-build, promotion of build products, deployment to execution environments, advanced work item customizations, enhanced work item security, formal project management and planning, risk management, task dependencies, context aware searching, support for Open Social dashboard gadgets and new enhanced integrations to IBM Rational DOORS, ClearCase®, ClearQuest®, and Synergy environments.

Key prerequisites

For details, refer to the [Hardware requirements](#) and the [Software requirements](#) sections.

Planned availability date

- November 23, 2010: Electronic availability
- December 10, 2010: Electronic availability for the SMP/E package containing the server and build components of IBM Rational Team Concert
- December 17, 2010: Media availability

Description

IBM Rational Team Concert

Organizations today face growing pressures to quickly deliver high-quality software that is aligned with business objectives. Some of the pressures include:

- Delivering more with same or even fewer resources
- Working in teams that are becoming even more geographically distributed
- Adhering to organizational standards without having the processes defined or documented

IBM Rational Team Concert drives software innovation through collaboration, transforming how people, especially those who have project-distributed teams, work together to develop and deliver software in an increasingly rapid manner. IBM Rational Team Concert enables organizations to better manage the flow of people, process and information across the systems and software lifecycles. Based on the Jazz™ platform, IBM Rational Team Concert helps organizations:

- Meet the specialized needs of skilled practitioners while enabling a real-time flow of information and ideas
- Improve collaboration across teams and geographies through consistent access to team process, workflow and artifacts
- Meet compliance requirements through asset traceability and approval workflows
- Provide the foundation for continuous capability improvement through flexible, rules-based process enforcement, real-time reporting, and integrated best practices

IBM Rational Team Concert provides the latest technology and techniques directly to the environment the user requires. The latest capabilities introduced in IBM Rational Team Concert have been designed to provide powerful functionality in a simple and relevant manner to all parts of an organization. Enhancements made in IBM Rational Team Concert V3.0 include:

- Change Management enhancements to support enterprise-wide adoption including extended customization and security. This allows teams to implement new work item customizations such as calculated value sets and dependent choice lists. The additional security capabilities enable a collection of work items to have their own access control on Change Management artifacts.
- Enhanced planning capabilities with support for both agile and formal methods including new risk management, visual task dependencies, roadmap planning and the ability to support "hybrid" approaches to agile methods that incorporate formal project management methods. For example, a customized scrum/agile method with risk management (risks and risk actions).
- A single integrated solution for all platforms created by merging in the capabilities of IBM Rational Team Concert for System z and IBM Rational Team Concert for Power Systems Software™. This allows all development teams no matter what language or platform they are developing for to work together using an integrated solution.
- Support for distributed software configuration management, which enables teams to deliver and share code changes across multiple Team Concert repositories. For example, now companies with different lines of business or multiple companies

who have consulting or supplier relationships can easily share code changes on a collaborative development effort.

- Improved integrations with IBM Rational ClearCase, IBM Rational ClearQuest, and IBM Rational Synergy, IBM Rational Change that enable teams to add collaborative capabilities to their existing development tools.
- Support for a new ISPF client for the source code management, to allow z/OS developers to select their interface of choice. The ISPF client allows full source code management capabilities. This enables the ISPF user to take advantage of repository workspaces, supports linking changes to work items, and allows submitting and monitoring of builds.
- Advanced build dependency and impact analysis for z/OS and IBM i development. Dependency information is discovered automatically via scanners. This dependency information is then used to perform dependency based builds, so only those programs affected by a change are recompiled. The dependency data is also available for the developer to understand what programs will be affected by the change.
- Support for Promotion through a development hierarchy. With the addition of dependency based builds, promotion now supports the copying of the source, object, load, and related metadata up the development hierarchy.
- Support for Deployment is now provided for z/OS, IBM i, UNIX®, and Linux systems. Deployment support allows users to create deployment packages and deploy them to the target platforms of choice.
- Support for advanced context aware search to allow users to easily find work items and source code related to a search request. Context aware search is provided as a quick search as well as in context of a work item to allow users to identify areas of the code that may address the task identified.
- Open Dashboard Collaboration with support for industry standard Open Social gadgets in IBM Rational Team Concert dashboards, enabling glass level, mashup integration. For example, IBM Rational Asset Manager and IBM Rational Team Concert can share dashboard gadgets but now any third-party tool supporting Open Social gadgets can also host or display IBM Rational Team Concert dashboard gadgets.
- Enhanced Open Services for Lifecycle Collaboration (OSLC) integrations with IBM Rational DOORS for advanced formal requirements management integration with IBM Rational Team Concert, with support for rich hovers and link traceability.
- Enhanced IBM Rational Team Concert for Microsoft® Visual Studio IDE Integration: Major enhancements to developer productivity such as support for annotation, visual merge history, process advisor, static analysis integration and pre-built build and unit testing integrations targeted at Microsoft Visual Studio users.
- Enhanced IBM Rational Developer for System z and IBM Rational Developer for Power Systems™ integrations to offer seamless and productive development environments for z/OS and Power Systems developers.
- IBM Rational Team Concert 3.0 includes bundled IBM DB2® 9.7 (for details, refer to the Hardware requirements and Software requirements sections) which offers increased data protection, scalability and performance. Greater availability is delivered through enhancements such as online, automated database reorganization. In addition, the increased scalability and the ability to leverage the latest in server technology helps deliver increased performance of backup and recovery.

IBM Rational Team Concert integrates planning, software configuration management, change management, and build management into a single application. It enables distributed teams spread throughout your enterprise to more effectively collaborate in developing and delivering quality software on time and on budget.

- Planning: IBM Rational Team Concert delivers support for both agile and formal planning methods. Planning processes are easily customized and customers can also deploy hybrid planning models using elements from agile and formal planning. Planning supports multiple levels, including daily, iteration/sprint, release and roadmap planning. Specific functions include: Backlog Plans
 - Daily developer planning

- Iteration or Sprint plans
- Gantt charts
- Release plans
- Developer taskboards
- Progress status bars
- Advanced estimation
- Plan risk assessment
- Software configuration management: IBM Rational Team Concert delivers essential software version control, workspace management, and parallel development support to individuals and teams. Specific functions include:
 - Developer-to-team flow
 - Integrated stream management
 - Component-level baselines
 - Server-based sandboxes
 - Distributed SCM - change set delivery across repositories
 - Components identified in streams and available baselines
 - z/OS and IBM i file system support
 - ClearCase Connector and Bridge
 - Bridge to Subversion and Git
- Change management: IBM Rational Team Concert supports different types of work items for software development teams. Team members can discuss about a particular work item; discussions are captured for later reference. Work item owners or interested parties can subscribe and receive notifications via RSS/Atom feeds. Team members can share queries with the team or with particular users. Functions include:
 - Defects, enhancements, and conversations
 - Advanced customization
 - Query results view and share queries with team or member
 - Support for approvals and discussions
 - ClearQuest Connector and Bridge (ships with ClearQuest)
 - Query editor interface
- Build management: IBM Rational Team Concert enables efficient scheduling and execution of software build processes. You can leverage multiple servers for rapid, cross-platform build processing and create a detailed bill of materials to guarantee build process reproduction. Additional functions include: Work item and change set traceability
 - Local or remote build servers
 - Support for Ant, Maven, and command line tools
 - Build definitions for team and private builds
 - Support for native IBM i builds
 - Support for JCL Builds
 - Support for dependency-based builds for z/OS and IBM i
 - Promotion of built components for z/OS
 - Packaging and Deployment to execution environments for z/OS, IBM i, Linux, and UNIX
 - Integration with IBM Rational Build Forge®

IBM Rational Team Concert helps you gain the cross-organizational visibility and collaboration you need to succeed.

- Process automation and guidance: Enforcement of agreed-upon standards can help ensure higher-quality results. Because not all organizations are the same, rules are configurable and can be defined or refined as needed, enabling continuous improvement.
- In-context collaboration: Through personal customizable views, team members can gain better understanding of project status (news and events, build status, what is being worked on, and changes). Team members can also be made aware of what their teammates are working on and who is online and possibly available for collaboration.
- Web client: Leveraging AJAX technology, users experience a rich client style of interaction for web access. External stakeholders or occasional users can gain access to data without a rich client.
- Dashboards and reporting: Cross repository, cross project, project, individual, and team dashboards offer accurate project health information drawn directly from ongoing work, replacing tedious and time-consuming reporting overhead.

IBM Rational Team Concert includes a complete set of integrated functionality to enable teams to effectively deliver software on time and on budget:

- Integrated planning linked to execution
- Real-time project status window
- Single structure for project-related artifacts
- World-class team on-boarding and off-boarding, including team membership, sub-teams, and project inheritance
- Role-based operational control for flexible definition of process and capabilities
- Team advisor for defining and refining rules and enabling continuous improvement
- Process enactment and enforcement
- In-context collaboration showing team members and work status
- Customizable project dashboards with support for Open Social standards
- Real-time reporting and queries

To reaffirm the IBM commitment and support for the open source market 10 Community Edition Rational Team Concert Developer licenses are available for download free of charge with community support from jazz.net. These licenses are fully enabled for development.

Offering Information

Product information is available via the Offering Information website

<http://www.ibm.com/common/ssi>

Also, visit the Passport Advantage® website

<http://www.ibm.com/software/passportadvantage>

Publications

No publications are shipped with this product.

The IBM Publications Center

<http://www.ibm.com/shop/publications/order>

The Publications Center is a worldwide central repository for IBM product publications and marketing material with a catalog of 70,000 items. Extensive search facilities are provided. Payment options for orders are via credit card (in the U.S.) or customer number for 20 countries. A large number of publications are available online in various file formats, and they can all be downloaded by all countries.

Technical information

Specified operating environment

Hardware requirements

IBM Rational Team Concert client

- Processor: Intel® Pentium® 3 or 4 (minimum); Intel Core 2 Duo (recommended)
- Memory: 1 GB minimum
- Disk space: 1 GB minimum
- Display: 1024 x 768 minimum resolution
- Other hardware: 10/100 mbps wired connectivity or 802.11b

When running two or more Jazz applications on a single Jazz Team Server, we recommend a 64-bit operating system and a minimum of 4 GB of memory.

Software requirements

One of the following operating systems:

Desktop

- Windows 7 x86-32, x86-64
- Windows Vista Business, Enterprise, Ultimate SP2 x86-32, x86-64
- Windows XP Professional SP2 x86-32, x86-64
- Red Hat Enterprise Linux 5 Updates 4 and 5 x86-32, x86-64
- SUSE Linux Enterprise Desktop 10 SP3 x86-32, x86-64
- Ubuntu LTS Desktop 10.0.04 x86-32, x86-64

Server

- Windows Server 2008 R2 SP2 - x86-64
- Windows Server 2008 SP2 - x86-32, x86-64
- Windows Server 2003 SP2 - x86-32, x86-64
- Red Hat Enterprise Linux 5.0 Updates 4 and 5- x86-32, x86-64, System z, POWER
- SUSE Linux Enterprise Server 10 SP3- x86-32, x86-64, System z, POWER
- AIX 6.1 - (Standard and Enterprise Editions)
- AIX 5.3 - (Standard and Enterprise Editions)
- VMWare vSphere 4.0 - x86-32, x86-64 (with supported Windows and Linux OS)

- VMWare ESX 3.5 - x86-32, x86-64 (with supported Windows and Linux OS)
- IBM z/OS v1.10, and later
- IBM i5/OS® V5R4; IBM i 6.1; IBM i 7.1

One of the following application servers:

- WebSphere® Application Server 7.0 Fixpack 9 (Bundled)
- WebSphere Application Server 6.1 Fixpack 27
- WebSphere Application Server OEM Edition for z/OS V7.0 (Bundled)
- WebSphere Application Server OEM Edition for z/OS V6.1
- WebSphere Application Server for z/OS V7.0
- WebSphere Application Server for z/OS V6.1
- WebSphere Application Server for IBM i 6.1
- WebSphere Application Server for IBM i 7.0
- Apache Tomcat 5.5.28 (Bundled)

One of the following databases:

- IBM Derby SDK 10.5 (for up to 10 users)
- DB2 Enterprise Server Editions v9.5, v9.7 (9.7 Bundled for 64-bit platforms)
- DB2 Workgroup Server Editions v9.5, v9.7 (9.7 Bundled for 32-bit Windows and Linux platforms)
- DB2 Express® Server Editions v9.5, v9.7 (Windows and Linux; small teams only)
- DB2 for IBM i, V5R4, IBM i 6.1, and IBM i 7.1
- DB2 for z/OS V9.1
- DB2 for z/OS V9.1 Value Unit Edition
- DB2 for z/OS V10.1
- DB2 for z/OS V10.1 Value Unit Edition
- Microsoft SQL Server 2008 R2
- Microsoft SQL Server 2005 SP3, 2008 SP1
- Microsoft SQL Server Express 2005 SP3, 2008 SP1 (small teams only)
- Oracle Database 11g Release 2¹
- Oracle Database 10g Release 2¹

¹ For latest information on required service levels, visit <http://jazz.net/library/article/496>

Eclipse

- IBM Eclipse SDK 3.5.2
- IBM Eclipse SDK 3.6 and 3.6.1

For optional Microsoft Visual Studio Support

- Microsoft Visual Studio 2010 with .NET 4.0
- Microsoft Visual Studio 2008 SP1 with .NET 3.5 SP1
- Microsoft Visual Studio 2005 SP1 with .NET 3.5 SP1

Java™

- IBM Java SDK 6.0 SR6+
- IBM Java SDK 5.0 SR11+ (Bundled) (not for IBM i or z/OS)
- Sun Java JRE 1.6 Update 17+
- Sun Java JRE 1.5 Update 16+

One of the following web browsers:

- Firefox 3.6
- Firefox 3.5
- Microsoft Internet Explorer 8.0
- Microsoft Internet Explorer 7.0

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a README file, or other information published by IBM, such as an announcement letter. Documentation and other program content may be supplied only in the English language.

Planning information

Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and technical support are provided by the Software Subscription and Support (also referred to as Software Maintenance) offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software, and technical support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with each program license acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available.

Packaging

IBM Rational Team Concert V3.0

Security, auditability, and control

The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

Ordering information

This product is only available via Passport Advantage. It is not available as shrinkwrap.

Charge metrics definitions

Authorized User Single Install

Authorized User Single Install is a unit of measure by which the program can be licensed. An Authorized User is a unique person who is given access to the program. An Install is an installed copy of the program on a physical or virtual disk made available to be executed on a computer. The program may be installed on any number of computers or servers, but if the Authorized User has accessed or has access to more than one Install of the program, the Authorized User requires a separate entitlement for each such Install. Licensee must obtain separate, dedicated entitlements for each Authorized User accessing the program on each Install in any manner directly or indirectly (for example: via a multiplexing program, device, or application server) through any means. An entitlement for an Authorized User is unique to that Authorized User and may not be shared, nor may it be reassigned other than for the permanent transfer of the Authorized User entitlement to another person. Any computing device that requests the execution of or receives for execution a set of commands, procedures, or applications from the program or that is otherwise managed by the program is considered a separate User of the program and requires an entitlement as if that device were a person.

Floating User Single Install

Floating User Single Install is a unit of measure by which the program can be licensed. A Floating User is a person who is accessing the program at any particular point in time. An Install is an installed copy of the program on a physical or virtual disk made available to be executed on a computer. The program may be installed on any number of computers or servers, but if the Floating User simultaneously accesses more than one Install of the program, the Floating User requires a separate entitlement for each such Install. Licensee must obtain separate entitlements for each Floating User simultaneously accessing the program on each Install in any manner directly or indirectly (for example: via a multiplexing program, device, or application server) through any means. Any computing device that requests the execution of or receives for execution a set of commands, procedures, or applications from the program or that is otherwise managed by the program is considered a separate User of the program and requires an entitlement as if that device were a person.

Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

Licensing

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use.

Part number products only, offered outside of Passport Advantage, where applicable, are license only and do not include Software Maintenance.

This software license includes Software Subscription and Support (also referred to as Software Maintenance).

License Information form number

| Program name | Program number | Form number |
|---------------------------|----------------|---------------|
| IBM Rational Team Concert | 5724-V04 | L-KHUY-8A7L92 |

The program's License Information will be available for review on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

Limited warranty applies

Yes

Limited warranty

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional charge. For further information, consult the *IBM Software Support Handbook* found at

<http://www.ibm.com/support/handbook>

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

Program technical support

Technical support of a program product version or release will be available for a minimum of five years from the general availability date, as long as your Software Maintenance is in effect. This technical support allows you to obtain assistance (via telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Maintenance also provides you with access to updates (modifications or fixes), releases, and versions of the program. You will be notified, via announcement letter, of discontinuance of support with 12 months' notice. If you require additional technical support from IBM, including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

Money-back guarantee

For clarification, note that if for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

For clarification, note that for programs acquired under the IBM International Passport Advantage Agreement, this term applies only to your first acquisition of the program.

Volume orders (IVO)

No

Passport Advantage applies

Yes, and through the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

This product is only available via Passport Advantage. It is not available as shrinkwrap.

Software Subscription and Support (Software Maintenance)

Yes. Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and technical support are provided by the Software Subscription and Support (also referred to as Software Maintenance) offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software and Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with each program license acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available.

While your Software Subscription and Support (also referred to as Software Maintenance) is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance via telephone and, if available, electronic access, to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, consult your *IBM Software Support Handbook* at

<http://www.ibm.com/support/handbook>

Software Subscription and Support (also referred to as Software Maintenance) does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.

For additional information about the International Passport Advantage Agreement and the IBM International Passport Advantage Express Agreement, visit the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

System i Software Maintenance applies

No

Educational allowance available

Not applicable.

Prices

For additional information and current prices, contact your local IBM representative.

Passport Advantage

For Passport Advantage information and charges, contact your IBM representative or authorized IBM Business Partner, or authorized IBM Business Partner for Software ValueNet®, if applicable. Additional information is also available at

<http://www.ibm.com/software/passportadvantage>

Business Partner information

If you are an IBM Business Partner -- Distributor for Workstation Software acquiring products from IBM, you may link to Passport Advantage Online for resellers where you can obtain Business Partner pricing information. An IBM ID and password are required.
