## Overview

IBM<sup>®</sup> i2<sup>®</sup> Enterprise Insight Analysis is a modular, cost-effective, and scalable intelligence solution that provides advanced analytical and visual analysis capabilities to help rapidly translate massive and disparate data sets into actionable intelligence. Designed for organizations spanning public safety, national security, defense, and the commercial sector that may be affected by criminal activity, whether from cyber attacks, terrorist threats, corporate espionage, illegal trading, fraud, unethical and immoral activities, i2 Enterprise Insight Analysis is designed to help quickly uncover hidden connections buried within overwhelming volumes of data. i2 Enterprise Insight Analysis helps bring time-sensitive clarity to complex investigations by generating actionable insights in near real time.

With V1.0.11, you can:

- Obtain images and documents from external data sources: Analysts can now download and view pictures and documents directly from external data sources, providing additional visual context for their search results.
- Use a specified repository picture property or a standard icon to represent an item when charting: Images are often stored relative to an item in the analysis repository, the most common example being photos of a person. Analysts commonly need to use this additional visual information to add greater context to charts shared for briefing purposes. This new option enables users to select a repository or external data source image property to provide real-world representation of an object on the chart.
- Set an external data source as the default data source: Where an alternative data source is used as the primary source for searching and analysis, an administrator can set this source as the default to ensure users search the alternative source without needing to manually change the source each time, saving time and minimizing confusion.
- Prohibit the creation of data in an analytical repository: Support personnel and administrators can readily configure the analysis repository to prohibit data creation to ensure compliance with local legal restrictions that may limit how data may be stored or used.
- Find connecting networks: This new capability presents the analyst with the shortest relationships that connect a given set of entities. This helps shorten the time and complexities involved when identifying connections between entities of interest that may otherwise be hidden in large charts. The user can configure this feature to support hypothesis testing and what-if analysis by removing entity types or specific entities from the results.
- View more attributes in one view: Improvements to the *Infotip* capability help make it easier for the analyst to more quickly understand relationships between

entities. The analyst can now choose which analysis attributes to view, for example, the sum of transactions between bank account entities.

Additionally, V1.0.11 extends national language support to add Hebrew, Turkish, and Arabic to selected components as detailed in the *Release Notes*.

---

## Planned availability date

---

March 12, 2015: Electronic download

---

## Reference information

---

For details about the previous release of IBM i2 Enterprise Insight Analysis, refer to Software Announcement [214-460](#), dated December 9, 2014.

---

## Program number

---

Program number	VRM	Program name
5725-G23	1.0.11	IBM i2 Enterprise Insight Analysis

---

## Services

---

### Software Services

---

IBM Software Services has the breadth, depth, and reach to manage your services needs. You can leverage the deep technical skills of our lab-based, software services team and the business consulting, project management, and infrastructure expertise of our IBM Global Services team. Also, we extend our IBM Software Services reach through IBM Business Partners to provide an extensive portfolio of capabilities. Together, we provide the global reach, intellectual capital, industry insight, and technology leadership to support a wide range of critical business needs.

To learn more about IBM Software Services or to contact a Software Services sales specialist, visit

<http://www.ibm.com/software/sw-services/>

---

## Technical information

---

### Specified operating environment

---

#### Hardware requirements

Hardware requirements can be found at

<http://www.ibm.com/support/docview.wss?uid=swg27039188>

#### Software requirements

Software requirements can be found at

<http://www.ibm.com/support/docview.wss?uid=swg27039188>

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a readme file, or other information published by IBM, such as an announcement letter. Documentation and other program content may be supplied only in the English language.

## Planning information

---

### Packaging

This offering is delivered through the Internet in electronic download form only. There is no physical media.

This program, when downloaded from a website, contains the applicable IBM license agreement and License Information, if appropriate, and will be presented for acceptance at the time of installation of the program. For future reference, the license and License Information will be stored in a directory such as LICENSE.TXT.

---

## Ordering information

---

This product is only available via Passport Advantage<sup>(R)</sup>. It is not available as shrinkwrap.

These products may only be sold directly by IBM or by authorized IBM Business Partners for Software Value Plus.

For more information about IBM Software Value Plus, visit

[http://www.ibm.com/partnerworld/page/svp\\_authorized\\_portfolio](http://www.ibm.com/partnerworld/page/svp_authorized_portfolio)

To locate IBM Business Partners for Software Value Plus in your geography for a specific Software Value Plus portfolio, visit

<http://www.ibm.com/partnerworld/wps/bplocator/>

Product group: Safer Planet

Product: Enterprise Insight Analysis 5725-G23

Product category: Intelligence Analysis

### Passport Advantage

The ordering part numbers are unchanged. Refer to Software Announcement [214-460](#), dated December 9, 2014.

### Charge metric

---

Charge metric information is unchanged. Refer to Software Announcement [214-460](#), dated December 9, 2014.

---

## Terms and conditions

---

The terms and conditions for IBM i2 Enterprise Insight Analysis, as previously announced in Software Announcement [214-460](#), dated December 9, 2014, are unchanged except that the License Information document numbers are updated as follows:

Product identifier	Component name	License Information identifier
5725-G23	IBM i2 Enterprise Insight Analysis V1.0.11 Advanced Edition	L-MSER-9SWHEB
5725-G23	IBM i2 Enterprise Insight Analysis V1.0.11Core Edition	L-MSER-9SWHBT
5725-G23	IBM i2 Enterprise Insight Analysis V1.0.11 Collaborate Add On	L-MSER-9SWHFU

Product identifier	Component name	License Information identifier
5725-G23	IBM i2 Enterprise Insight Analysis V1.0.11 Operational Awareness Add On	L-MSER-9SWHHZ
5725-G23	IBM i2 Enterprise Insight Analysis V1.0.11 Recommendation Engine Add On	L-MSER-9SWHK8
5725-G23	IBM i2 Enterprise Insight Analysis V1.0.11 Unstructured Data Add On	L-MSER-9RVKUE

---

## Statement of good security practices

---

IT system security involves protecting systems and information through prevention, detection, and response to improper access from within and outside your enterprise. Improper access can result in information being altered, destroyed, or misappropriated or can result in misuse of your systems to attack others. Without a comprehensive approach to security, no IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems and products are designed to be part of a comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products, or services to be most effective. IBM does not warrant that systems and products are immune from the malicious or illegal conduct of any party.

---

## Prices

---

The prices are unchanged by this announcement.

---

## Order now

---

To order, contact your Americas Call Centers, local IBM representative, or your IBM Business Partner. To identify your local IBM representative or IBM Business Partner call 800-IBM-4YOU (426-4968). For more information, contact the Americas Call Centers.

Phone: 800-IBM-CALL (426-2255)

Fax: 800-2IBM-FAX (242-6329)
