

# Hardware withdrawal: IBM Power Systems selected features

## Table of contents

<a href="#">1 Overview</a>	<a href="#">4 Replacement product information</a>
<a href="#">1 Withdrawn products</a>	<a href="#">4 AP distribution</a>

## Overview

Effective August 7, 2018, September 30, 2018, and October 19, 2018, IBM<sup>®</sup> will withdraw from marketing the selected IBM Power Systems™ features listed in the [Withdrawn products](#) section. On or after the effective dates of withdrawal, you can no longer order these features directly from IBM. Field-installed features associated with the machine types not listed in this announcement continue to be available.

You can obtain the products on an as-available basis through IBM Business Partners.

If you have a continuing need for these machine types/models, go to the [IBM Certified Pre-owned Equipment](#) website to check on availability or utilize the request a quote to communicate your specific requirements. IBM Certified Pre-owned Equipment has the largest inventory of used IBM systems that are refurbished, tested, and warranted for a minimum of 90 days.

## Withdrawn products

The following features are being withdrawn on the specified models of the IBM Power Systems machine types:

### Effective August 7, 2018

#### Feature withdrawals

Description	MT	Model	Feature
PurePower Base Indicator	7120	48E	EHKX

9179	MHC
9179	MHD

**Capacity Backup for i:** Effectively immediately, when purchasing a IBM POWER8<sup>®</sup> processor-based Capacity Backup (CBU) for i machine, only IBM POWER9<sup>™</sup> and IBM POWER8 processor-based machines are eligible as primary systems to be paired with that CBU. Refer to the CBU for i website [IBM Power Systems: Capacity BackUp](#) regarding the CBU for i requirements.

The following features are being withdrawn on the specified models of the IBM Power Systems machine types:

**Effective September 30, 2018**
