Overview

With the release of IBM® Rational® ClearCase® - Cadence Integration, IBM brings its enterprise configuration and change management solution to analog, radio frequency, or mixed signal designers using Cadence Design Framework. This allows customers to take advantage of core capabilities of IBM Rational ClearCase, without leaving their familiar design environment.

The integration offers the following capabilities:

- A rich set of integrated Menus, toolbar, and custom user interface for designer productivity
- Instant on Workspace support - Ability to instantly access any large sets of data through clearcase workspace (Dynamic Views) without having to pre-populate information
- Ability to freeze workspace content
- Ability to perform version control operations from within your design environment
- Support for co-managed sets and Atomic Checkin operations
- Ability to manage design input inside Cadence DFII from open access data objects to SKILL, Circuit Design language (CDL), PSF, PSF XL, and others
- Ability to manage design outputs in ClearCase like Library, cell view and cell folder and file assets including XML database, PSF, PSF XL, scripts, and other related assets

With these enhancements, organizations can now bring together their IT and systems development teams, and assets produced by these teams including software assets, digital design assets, analog, radio frequency, mixed signal design assets, under one roof, to promote individual, team, and organizational productivity for effective globally distributed development.

For ordering, contact Your IBM representative or an IBM Business Partner. For more information contact the Americas Call Centers at 800-IBM-CALL (426-2255). Reference: AE001

Planned availability date

November 23, 2010

- Electronic availability
- Media availability

Program number

Program number	VRM	Program name
5724-V29	7.1.2	IBM Rational Lifecycle Package
5724-V30	7.1.2	IBM Rational Lifecycle Package with Clearcase
5724-G29	7.1.2	IBM Rational ClearCase
5724-G34	7.1.2	IBM Rational ClearCase Change Management Solution
5724-G30	7.1.2	IBM Rational ClearCase Change Management Solution Enterprise Edition
5724-G32	7.1.2	IBM Rational ClearCase MultiSite
5724-G33	7.1.2	IBM Rational ClearCase and ClearCase MultiSite
5724-G36	7.1.2	IBM Rational ClearQuest
5724-G37	7.1.2	IBM Rational ClearQuest® MultiSite
5724-G38	7.1.2	IBM Rational ClearQuest and ClearQuest MultiSite

Ordering information

This product is only available via Passport Advantage®. It is not available as shrinkwrap.

Cross-platform products

Cross-platform product for use on System z IFL engines

Order the part numbers that follow when the product is intended to run on the Linux® operating system on System z® IFL engines. If the product is not intended to run on the Linux operating system on System z IFL engines, order from the other set of part numbers in this announcement. This set of part numbers provides the identical supply and authorization as the other set in this announcement.

IBM Electronic Services

IBM has transformed its delivery of hardware and software support services to help you achieve higher system availability. Electronic Services is a Web-enabled solution that offers an exclusive, no-additional-charge enhancement to the service and support available for IBM servers. These services are designed to provide the opportunity for greater system availability with faster problem resolution and preemptive monitoring. Electronic Services comprises two separate, but complementary, elements: Electronic Services news page and Electronic Services Agent.

The Electronic Services news page is a single Internet entry point that replaces the multiple entry points traditionally used to access IBM Internet services and support. The news page enables you to gain easier access to IBM resources for assistance in resolving technical problems.

The Electronic Service Agent™ is no-additional-charge software that resides on your server. It monitors events and transmits system inventory information to IBM on a periodic, client-defined timetable. The Electronic Service Agent automatically reports hardware problems to IBM. Early knowledge about potential problems enables IBM to deliver proactive service that may result in higher system availability and performance. In addition, information collected through the Service Agent is made available to IBM service support representatives when they help answer your questions or diagnose problems. Installation and use of IBM Electronic Service Agent for problem reporting enables IBM to provide better support and service for your IBM server.

Prices

The charges are unchanged by this announcement.
