InfoSphere® Optim™ Enterprise Edition V9.1 and Workgroup Edition V9.1 offer simplified packaging with capacity-based pricing for Optim's Archive, Test Data Management, and Data Privacy capabilities.

- Optim Enterprise Edition V9.1
 - InfoSphere Optim Test Data Management Enterprise Edition V9.1
 - InfoSphere Optim Archive Enterprise Edition V9.1
 - InfoSphere Optim Data Privacy Enterprise Edition V9.1
- Optim Workgroup Edition V9.1
 - InfoSphere Optim Test Data Management Workgroup Edition V9.1
 - InfoSphere Optim Archive Workgroup Edition V9.1
 - InfoSphere Optim Data Privacy Workgroup Edition V9.1

For ordering, contact your IBM® representative, an IBM Business Partner, or IBM Americas Call Centers at 800-IBM-CALL (Reference: YE001).

Overview

InfoSphere Optim Archive Enterprise V9.1 and Workgroup Edition V9.1 help improve application performance, lower IT costs, and support data retention compliance programs by allowing you to:

- Archive historical transaction records from mission-critical database applications
- Relocate application data to a secure archive, thereby streamlining the production database and reducing processing overhead
- Retain broad access to archived information

InfoSphere Optim Test Data Management Enterprise Edition V9.1 and Workgroup Edition V9.1 can help improve quality, speed up iterative testing tasks, and accelerate revenue generation by allowing you to:

- Create right-sized, fictionalized test databases that accurately reflect end-to-end business processor training environments
- Edit data to force error and boundary conditions

- Compare baseline data against successive test results
- De-identify, mask, and transform sensitive data

InfoSphere Optim Data Privacy Enterprise Edition V9.1 and Workgroup Edition V9.1 allow you to align application data management with your business objectives to help you optimize performance, control costs, and reduce risk. This offering includes the following capabilities:

- Extract, de-identify, mask, and transform sensitive data
- Propagate masked values from a parent table to related tables at all levels, maintaining the referential integrity of the data

InfoSphere Optim Enterprise Edition for Oracle Applications, V9.1 delivers the benefits and capabilities listed above for test data management, archiving, and data privacy, specifically for Oracle environments.

All of the new Optim Enterprise Edition offerings include a common set of capabilities that can help you accelerate your deployments, reduce risk, and lower your total cost of ownership. These common capabilities include:

- Interactive best practices and blueprints for test data management, archiving, and data privacy
- The ability to automatically discover and create a comprehensive view of data relationships across heterogeneous sources
- The ability to access and integrate diverse data and content sources as if they were a single resource across a wide range of information repositories in distributed and mainframe environments

InfoSphere Optim Archive, Test Data Management, and Data Privacy are offered in Workgroup Edition, targeting smaller projects with a more narrow set of requirements.

For more information on the IBM InfoSphere Optim family of products, visit

<http://www.ibm.com/software/data/data-management/optim/>

Key prerequisites

The announced products run on a variety of Microsoft[™] Windows[™], UNIX[™], and Linux[™] platforms.

Planned availability date

October 5, 2012

Description

InfoSphere Optim Archive Enterprise Edition and Workgroup Edition

When it comes to data, more is not always better. In fact, overgrown databases can impair the performance of your mission-critical ERP, CRM, and custom applications, jeopardizing the superior service you have worked so hard to provide. Periodic reviews of your application portfolio can help identify underperforming or redundant systems where maintenance costs may outweigh business value. Archiving or retiring these applications can help your company optimize application portfolios to support your efforts to reduce costs and address risks.

The InfoSphere Optim Archive Enterprise Edition and Workgroup Edition can help organizations by:

- Supporting efforts to reduce hardware, storage, and maintenance costs by allowing you to archive historical data from applications and systems, freeing valuable resources
- Helping optimize application performance levels by controlling ongoing database growth
- Archiving, managing, and retaining application data according to business and compliance policies
- Allowing more rapid response to audit and discovery requests with broad access to archived information
- Making application retirement safer and easier by enabling you to archive application data in its original business context, preserving each archived business object as an audit-ready snapshot in time
- Allowing for central management and control of archiving or retiring across enterprise applications (including custom applications and packaged CRM/ERP solutions such as JD Edwards EnterpriseOne, Oracle E-Business Suite, PeopleSoft Enterprise, Siebel CRM, and Amdocs CRM), databases (DB2® , Informix® , Oracle, Sybase, SQL Server, and so on), and platforms (including Windows , UNIX/Linux, and IBM z/OS®)

InfoSphere Optim Test Data Management Enterprise Edition and Workgroup Edition

Secure application testing for quality and reliability has never been more important. Yet testing can be time consuming and expensive. How can you speed iterative testing, better control costs, and support efforts to keep test environments secure?

InfoSphere Optim Test Data Management Enterprise Edition and Workgroup Edition:

- Offer extensive test data management capabilities for creating right-sized, fictionalized test databases that more accurately reflect end-to-end business processes
- Can help you minimize costly cloning processes and address defects early in the development process, when they are cheaper and easier to fix
- Can scale along with your development and testing requirements, across applications, databases, operating systems, and hardware platforms
- Provide security for your test environments, helping to improve quality, accelerate release cycles, and cut costs
- Can de-identify, mask, and transform sensitive data
- Support heterogeneous enterprise environments, including custom applications ERP solutions (JD Edwards EnterpriseOne, Oracle E-Business Suite, PeopleSoft Enterprise, Siebel CRM, SAP, applications, and more), and platforms (including Windows , UNIX/Linux, and IBM z/OS)
- Can be used with separately available powerful diagnostic and impact analysis tooling to help you:
 - Analyze your SAP applications by automatically identifying SAP system changes to help users understand the impact of those changes
 - Assign business process context to your SAP application data by performing automatic business process discovery, helping to simplify business process management tasks

InfoSphere Optim Data Privacy Enterprise Edition and Workgroup Edition

InfoSphere Optim Data Privacy Enterprise Edition and Workgroup Edition provide extensive capabilities to help mask sensitive data more effectively across nonproduction environments, while also transforming the data so that realistic data can be used in development, testing, or training. With these offerings, users can apply a variety of proven data transformation and realistic fictitious data. Users can mask data in a single database or across multiple related systems. Simple examples of the masking techniques in this offering include substrings, arithmetic expressions, random or sequential number generation, date aging, and concatenation. And each solution's context-aware masking capabilities help masked data retain a similar format to the original information.

Key capabilities include:

- Extract data for the purposes of de-identifying and masking.
- Apply a range of masking techniques to transform personally identifying information and other confidential corporate data.
- Leverage prepackaged data masking routines to transform complex data elements such as credit card numbers, email addresses, and national identifiers, while retaining their contextual meaning.
- Substitute test environments with realistic, fictionalized data, creating a "safe sandbox" for application testing.
- Consolidate and mask data from multiple interrelated applications to create a production-like test environment that more accurately reflects end-to-end business processes.
- Support efforts to comply with privacy regulations such as HIPAA, GLBA, DDP, PIPEDA, Safe Harbour, PCI DSS, and others.
- Apply a single, scalable enterprise data management solution across applications (Oracle E-Business Suite, PeopleSoft Enterprise, Siebel, JD Edwards EnterpriseOne, SAP, and Amdocs CRM), databases (DB2 , IMSTM, VSAM/ SEQ, Adabas, Informix , Oracle, Sybase, SQL Server, and XML), and platforms (Windows , UNIX/Linux, and z/OS).

InfoSphere Optim Enterprise Edition for Oracle Applications

InfoSphere Optim Enterprise Edition for Oracle Applications delivers the benefits and capabilities listed above for test data management, archiving, and data privacy, but goes further to deliver accelerators for faster deployments in Oracle environments. These accelerators include:

- Apply test data management best practices to deploy Oracle E-Business, PeopleSoft, Siebel, and JD Edwards enhancements.
- Manage data growth by moving inactive JD Edwards Enterprise One, PeopleSoft, Siebel, and Amdocs CRM data at the business object level from current activity to a secure archive.
- Provide a seamless, integrated view of archived data from within the Amdocs CRM environment.

For more information about all the new features in Optim V9.1, refer to Software Announcement [212-328](#), dated October 02, 2012 .

Education support

IBM Training

Available from IBM training, the newest offerings support your training needs, enhance your skills, and boost your success with IBM software. IBM offers a complete portfolio of training options, including traditional classroom, private onsite, and eLearning courses. Many of our classroom courses are part of IBM's "Guaranteed to run program," ensuring your course will never be cancelled. We have a robust eLearning portfolio including Instructor-Led Online (ILO) courses, Self Paced Virtual courses (SPVC), and traditional Web Based Training (WBT) courses. A perfect complement to classroom training, our eLearning portfolio offers something for every need and every budget; simply select the style that suits you.

Be sure to take advantage of our custom training plans to map your path to acquiring skills. Enjoy further savings when you purchase training at a discount with an IBM Education Pack - online account, a flexible and convenient way to pay, track, and manage your education expenses online.

The following key education resources have been updated to reflect Version 9.1:

The following classes are available for InfoSphere Optim Archive Enterprise Edition and InfoSphere Optim Archive Workgroup Edition:

Course: InfoSphere Optim Data Growth for Archiving on Dist Systems				
Classroom	Instructor-Led	Online	Self Paced Virtual	Web Based
DT20	3T20	1T20		2T20

Course: Installing and Configuring Optim Core Technology for Distributed Systems (Systems Administrators only)				
Classroom	Instructor-Led	Online	Self Paced Virtual	Web Based
DT2A	3T2A	1T2A		2T2A

The following classes are available for InfoSphere Optim Test Data Management Enterprise Edition, InfoSphere Optim Data Privacy Enterprise Edition, InfoSphere Optim Test Data Management Workgroup Edition, and InfoSphere Optim Data Privacy Workgroup Edition:

Course: Using InfoSphere Optim Test Data Mgmt and Data Masking on Dist Systems				
Classroom	Instructor-Led	Online	Self Paced Virtual	Web Based
DT21	3T21	1T21		2T21

Course: Installing and Configuring Optim Core Technology for Distributed Systems (Systems Administrators only)				
Classroom	Instructor-Led	Online	Self Paced Virtual	Web Based
DT2A	3T2A	1T2A		2T2A

The following classes are available if you are implementing InfoSphere Optim Archive Enterprise Edition, InfoSphere Optim Archive Workgroup Edition, InfoSphere Optim Test Data Management Enterprise Edition, InfoSphere Optim Data Privacy Enterprise Edition, InfoSphere Optim Test Data Management Workgroup Edition, and InfoSphere Optim Data Privacy Workgroup Edition:

Course: Using InfoSphere Optim Core Technology on Dist Systems					
Classroom	Instructor-Led	Online	Self Paced	Virtual	Web Based
DT29	3T29	1T29			2T29

Course: Installing and Configuring Optim Core Technology for Distributed Systems (Systems Administrators only)					
Classroom	Instructor-Led	Online	Self Paced	Virtual	Web Based
DT2A	3T2A	1T2A			2T2A

IBM training provides education to support many IBM offerings. Descriptions of courses for IT professionals and managers are on the IBM training website

Offering Information

Product information is available via the Offering Information website

<http://www.ibm.com/common/ssi>

Also, visit the Passport Advantage® website

<http://www.ibm.com/software/passportadvantage>

Publications

All product publications are provided in softcopy format on the product DVD.

In addition, a hardcopy Quick Start Guide and hardcopy License Information document are shipped with these products.

Technical information

Specified operating environment

Hardware requirements

For information on hardware requirements, refer to the website listed in the [Software requirements](#) section.

Software requirements

All software requirements for InfoSphere Optim Archive Enterprise Edition and InfoSphere Optim Archive Workgroup Edition are available at

<http://www.ibm.com/support/docview.wss?&uid=swg27024848>

All software requirements for InfoSphere Optim Data Privacy Enterprise Edition and InfoSphere Optim Data Privacy WorkGroup Edition are available at

<http://www.ibm.com/support/docview.wss?&uid=swg27024849>

All software requirements for InfoSphere Optim Test Data Management Enterprise Edition and InfoSphere Optim Test Data Management Workgroup Edition are available at

<http://www.ibm.com/support/docview.wss?&uid=swg27024851>

All software requirements for InfoSphere Optim Enterprise Edition for Oracle Applications are available at

<http://www.ibm.com/support/docview.wss?&uid=swg27024852>

The programs' specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a readme file, or other information published by IBM, such as an announcement letter. Documentation and other program content may be supplied only in the English language.

Planning information

Packaging

Media packs include:

- Product code and documentation on CD and DVD
- Quick Start Guide
- Hardcopy License Information document

Security, auditability, and control

The InfoSphere Optim family of products uses the security and auditability features of the host hardware or software. The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

Software Services

IBM Software Services has the breadth, depth, and reach to manage your services needs. You can leverage the deep technical skills of our lab-based, software services team and the business consulting, project management, and infrastructure expertise of our IBM Global Services team. Also, we extend our IBM Software Services reach through IBM Business Partners to provide an extensive portfolio of capabilities. Together, we provide the global reach, intellectual capital, industry insight, and technology leadership to support a wide range of critical business needs.

To learn more about IBM Software Services or to contact a Software Services sales specialist, visit

<http://www.ibm.com/software/sw-services/>

Ordering information

This product is only available via Passport Advantage. It is not available as shrinkwrap.

These products may only be sold directly by IBM or by authorized IBM Business Partners for Software Value Plus.

For more information about IBM Software Value Plus, visit

<http://www.ibm.com/software/info/itsolutions/softwarevalueplus/>

To locate IBM Business Partners for Software Value Plus in your geography for a specific Software Value Plus portfolio, contact your IBM representative.

5724-H99	Terabyte	InfoSphere Optim Test Data Management Workgroup Edition

Processor Value Unit (PVU)

PVU is a unit of measure by which some of the programs can be licensed. The number of PVU entitlements required is based on the processor technology (defined within the PVU table by processor value, brand, type, and model number at the website below) and the number of processors made available to the program. IBM continues to define a processor, for the purpose of PVU-based licensing, to be each processor core on a chip. A dual-core processor chip, for example, has two processor cores. The PVU table can be found at

http://www.ibm.com/software/lotus/passportadvantage/pvu_licensing_for_customers.html

Licensee can deploy the program using either full capacity licensing or virtualization capacity (sub-capacity) licensing according to the Passport Advantage Sub-

Capacity Licensing Terms (refer to the web page below). If using Full Capacity licensing, Licensee must obtain PVU entitlements sufficient to cover all activated processor cores¹ in the physical hardware environment made available to or managed by the program, except for those servers from which the program has been permanently removed. If using Virtualization Capacity licensing, Licensee must obtain entitlements sufficient to cover all activated processor cores made available to or managed by the program, as defined according to the Virtualization Capacity License Counting Rules at

http://www.ibm.com/software/lotus/passportadvantage/Counting_Software_licenses_using_specific_virtualization_technologies.html

¹ An activated processor core is a processor core that is available for use in a physical or virtual server, regardless of whether the capacity of the processor core can be or is limited through virtualization technologies, operating system commands, BIOS settings, or similar restrictions.

Notes :

- Some programs may require licenses for the program and what is being managed. In that case, the following applies. In addition to the entitlements required for the program directly, licensee must obtain PVU entitlements for this program sufficient to cover the processor cores managed by the program.
- Some programs may be licensed on a managed basis only. In that case, the following applies. Instead of the entitlements required for the program directly, licensee must obtain PVU entitlements for this program sufficient to cover the processor cores managed by the program.
- A few programs on an exception basis may be licensed on a referenced basis. In that case, the following applies. Rather than obtaining entitlements for the activated processor cores available to the program, licensee must obtain PVU entitlements for this program sufficient to cover the environment made available to the referenced program as if the program itself were executing everywhere the referenced program was executing, independent of the basis on which the referenced program is licensed.

Cross-platform product for use on System z

Order the part numbers that follow when the product is used for either the development of code that will be deployed on System z servers or when the product will be communicating or transferring data between a distributed server and a System z server. Otherwise, order from the other set of part numbers in this announcement. This set of part numbers provides the identical supply and authorization as the other set in this announcement.

Processor Value Unit (PVU) sub-capacity licensing

Some of these software products are eligible for sub-capacity licensing. Customers must accept the terms of the IBM International Passport Advantage Agreement Attachment for Sub-Capacity Licensing Terms (Attachment), and must obtain PVU Proofs of Entitlement (PoEs) for the maximum processor core capacity available to an eligible sub-capacity product when deployed in an eligible virtualization environment. This is also referred to as *sub-capacity* or *virtualization capacity licensing*.

Customers must use the IBM License Metric Tool unless they meet the exceptions described in the Attachment.

For information regarding PVU sub-capacity licensing, including terms and IBM License Metric Tool ordering information, visit

<http://www.ibm.com/software/lotus/passportadvantage/subcaplicensing.html>

Refer to each product's License Information document for more details.

Terabyte (TB)

Terabyte is a unit of measure by which some of these programs can be licensed. A *terabyte* is 2 to the 40th power bytes. Licensee must obtain an entitlement for each terabyte of storage available to the program.

Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

This product is only available via Passport Advantage . It is not available as shrinkwrap.

Licensing

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use. Part number products only, offered outside of

Passport Advantage , where applicable, are license only and do not include Software Maintenance.

This software license includes Software Subscription and Support (also referred to as Software Maintenance).

These programs are licensed under the IBM Program License Agreement (IPLA) and the associated Agreement for Acquisition of Software Maintenance, which provide for support with ongoing access to releases and versions of the program. IBM includes one year of Software Subscription and Support with the initial license acquisition of each program acquired. The initial period of Software Subscription and Support can be extended by the purchase of a renewal option, if available. These programs have a one-time license charge for use of the program and an annual renewable charge for the enhanced support that includes telephone assistance (voice support for defects during normal business hours), as well as access to updates, releases, and versions of the program as long as support is in effect.

The programs' License Information will be available for review on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

Limited warranty applies

Yes

Limited warranty

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional charge. For further information, consult the IBM Software Support Handbook found at

<http://www.ibm.com/support/handbook>

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

Program technical support

Technical support of a program product version or release will be available for a minimum of three years from the general availability date, as long as your Software Subscription and Support (also referred to as Software Maintenance) is in effect. This technical support allows you to obtain assistance (via telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Subscription and Support also provides you with access to updates (modifications or fixes), releases, and versions of the program. You will be notified, via announcement letter, of discontinuance of support with 12 months' notice. If you require additional technical support from IBM, including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

Money-back guarantee

If for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

For clarification, note that (1) for programs acquired under the IBM International Passport Advantage offering, this term applies only to your first acquisition of the program and (2) for programs acquired under any of IBM's On/Off Capacity on Demand (On/Off CoD) software offerings, this term does not apply since these offerings apply to programs already acquired and in use by you.

Volume orders (IVO)

No

Passport Advantage applies

Yes, and through the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

Usage restrictions

Yes. For information on usage restrictions, refer to the License Information document that is available for each product on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

Software Subscription and Support applies

Yes. Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express® . Product upgrades and Technical Support are provided by the Software Subscription and Support offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software and Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support with each program license acquired. The initial period of Software Subscription and Support can be extended by the purchase of a renewal option, if available.

While your Software Subscription and Support is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance via telephone and, if available, electronic access, only to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, consult your IBM Software Support Handbook at

<http://www.ibm.com/support/handbook>

Software Subscription and Support does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.

For additional information about the International Passport Advantage Agreement and the IBM International Passport Advantage Express Agreement, visit the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

Not applicable.

Statement of good security practices

IT system security involves protecting systems and information through prevention, detection, and response to improper access from within and outside your enterprise. Improper access can result in information being altered, destroyed, or misappropriated or can result in misuse of your systems to attack others. Without a comprehensive approach to security, no IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems and products are designed to be part of a comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products, or services to be most effective. IBM does not warrant that systems and products are immune from the malicious or illegal conduct of any party.

IBM Electronic Services

IBM has transformed its delivery of hardware and software support services to help you achieve higher system availability. Electronic Services is a web-enabled solution that offers an exclusive, no-additional-charge enhancement to the service and support available for IBM servers. These services are designed to provide the opportunity for greater system availability with faster problem resolution and preemptive monitoring. Electronic Services comprises two separate, but complementary, elements: Electronic Services news page and Electronic Services Agent.

The Electronic Services news page is a single Internet entry point that replaces the multiple entry points traditionally used to access IBM Internet services and support. The news page enables you to gain easier access to IBM resources for assistance in resolving technical problems.

The Electronic Service Agent™ is no-additional-charge software that resides on your server. It monitors events and transmits system inventory information to IBM on a periodic, client-defined timetable. The Electronic Service Agent automatically reports hardware problems to IBM. Early knowledge about potential problems enables IBM to deliver proactive service that may result in higher system availability and performance. In addition, information collected through the Service Agent is made available to IBM service support representatives when they help answer your questions or diagnose problems. Installation and use of IBM Electronic Service Agent for problem reporting enables IBM to provide better support and service for your IBM server.

To learn how Electronic Services can work for you, visit

<http://www.ibm.com/support/electronic>

Prices

For additional information and current prices, contact your local IBM representative.

Business Partner information

If you are an IBM Business Partner -- Distributor for Workstation Software acquiring products from IBM , you may link to Passport Advantage Online for resellers where you can obtain Business Partner pricing information. An IBM ID and password are required.

<https://www.ibm.com/software/howtobuy/passportadvantage/paoreseller>

Passport Advantage

For Passport Advantage information and charges, contact your IBM representative, authorized IBM Business Partner, or authorized IBM Business Partner for Software Value Plus, if applicable. Additional information is also available at

<http://www.ibm.com/software/passportadvantage>

IBM Global Financing

IBM Global Financing offers competitive financing to credit-qualified customers to assist them in acquiring IT solutions. Offerings include financing for IT acquisition, including hardware, software, and services, from both IBM and other manufacturers or vendors. Offerings (for all customer segments: small, medium, and large enterprise), rates, terms, and availability can vary by country. Contact your local IBM Global Financing organization or visit

<http://www.ibm.com/financing>

IBM Global Financing offerings are provided through IBM Credit LLC in the United States, and other IBM subsidiaries and divisions worldwide to qualified commercial and government customers. Rates are based on a customer's credit rating, financing terms, offering type, equipment type, and options, and may vary by country. Other restrictions may apply. Rates and offerings are subject to change, extension, or withdrawal without notice.

Financing from IBM Global Financing helps you preserve cash and credit lines, enables more technology acquisition within current budget limits, permits accelerated implementation of economically attractive new technologies, offers payment and term flexibility, and can help match project costs to projected benefits. Financing is available worldwide for credit-qualified customers.

Order now

To order, contact the Americas Call Centers or your local IBM representative, or your IBM Business Partner.

To identify your local IBM representative or IBM Business Partner, call 800-IBM-4YOU (426-4968).
