

IBM Simplifies and Enhances the IBM International Passport Advantage Agreement

Overview

IBM Passport Advantage (the way to do worldwide volume licensing of IBM software) has just gotten better. In response to your feedback, we are pleased to provide an enhanced, simplified IBM Passport Advantage for software licenses and subscriptions, as well as technical support acquisition for IBM distributed software. These improvements will begin to take effect on September 1, 2001, and will be implemented worldwide for software acquired through the IBM International Passport Advantage Agreement, IBM Business Partners who remarket IBM @server iSeries and pSeries, and IBM directly.

Key changes to the IBM Passport Advantage offering include:

- A single Passport Advantage offering with a Relationship Suggested Volume Price (SVP) level continuum ranging from level A to H. The Contract Option Forecast (CO Forecast) is being withdrawn.
- "Perpetual" agreement terms, removing the need to renew the Passport Advantage agreement every two years.
- All software licenses now include Software Maintenance (Software Subscription and Technical Support).
- A simplified renewal process with only one renewal part number per product.
- The annual recalculation of your Relationship SVP level based on your prior year's acquisitions.
- The introduction of a new Transaction SVP, giving you the ability to attain better SVP levels on large transactions.
- Complete Enterprise Option product categories are now available to all customers with a 500-user minimum initial order for

any product category. Follow-on orders can be of any size.

Note: Primary product category coverage must be across your entire enterprise.

- Tivoli® software is now included in Passport Advantage.
- Continued ability to access new IBM software versions and releases as they become generally available as long as Software Maintenance is kept current.
- Enhanced Technical Support features included in Software Maintenance:
 - Unlimited calls to IBM software technical support centers by any number of authorized IS technical staff
 - The ability to assign a site technical contact enabling that person to allocate authorized IS staff from a Passport Advantage site
 - 24 x 7 coverage for mission-critical problems

For additional information, contact your IBM representative, or IBM Business Partner, or visit the Passport Advantage Web site at:

<http://www.ibm.com/software/passportadvantage>

Refer to the **Description** section of this announcement for a complete list of IBM's new distributed software acquisition model announcements.

Planned Availability Date

September 1, 2001

At a Glance

Simplification and enhancement of IBM Passport Advantage offers new benefits which include:

- A streamlined way to acquire IBM software and assure technical support coverage for all licenses with the inclusion of Software Maintenance (Software Subscription and Technical Support) with all license acquisitions
- Stand-alone licenses, Software Subscription, and Annual Support will no longer be offered for IBM distributed software.
- A simplified renewal process with a single Software Maintenance Renewal part number
- The continued ability to access new IBM software versions and releases as they become generally available as long as Software Maintenance is kept current
- The ability to attain a high SVP level with the introduction of Relationship SVP level and Transaction SVP
- The addition of Tivoli products in Passport Advantage
- No limits on the number of Passport Advantage additional sites

This announcement is provided for your information only. For additional information, contact your IBM representative, call 800-IBM-4YOU, or visit the IBM home page at: <http://www.ibm.com>.

Description

The announcement of IBM's new distributed software acquisition model encompasses a series of announcements which include:

- Software Announcement 201-203, dated July 10, 2001 (Tivoli Systems Participates in the IBM Passport Advantage Offering)
- Software Announcement 201-200, dated July 10, 2001 (IBM Simplifies Acquisition Model for Distributed Software)
- Software Announcement 201-202, dated July 10, 2001 (IBM Simplifies and Enhances the IBM International Passport Advantage Agreement)
- Software Withdrawal 901-174, dated July 10, 2001 (Selected AIX® and AS/400® Products Removed from Software Subscription)
- Services Announcement 601-023, dated July 10, 2001 (Revised Support Line Terms and Conditions Complement the New Acquisition Model for Distributed Software)
- Software Announcement 201-201, dated July 10, 2001 (Changes to Distributed Software Products Acquired Outside of Passport Advantage)
- Software Withdrawal 901-173, dated July 10, 2001 (Passport Advantage II Part Numbers Withdrawn from Marketing)

IBM Passport Advantage, IBM's volume acquisition offering, will continue to provide consistent worldwide features, pricing, and multilingual license acquisition. Whether you are a small company, a decentralized department, or a member of the Fortune 500, IBM Passport Advantage will make it easier to acquire software and technical support as well as provide the ability to leverage your buying power across the entire organization.

IBM Passport Advantage is a worldwide volume acquisition offering that allows you to acquire IBM distributed software on a single planning and predictable budgeting cycle. This announcement enhances and simplifies the current Passport Advantage terms and conditions, and provides you with new offering benefits that include:

Perpetual Agreement

The new IBM International Passport Advantage Agreement no longer requires a customer signature or an IBM counter signature unless required by local law or practice. Once a customer enrolls in the new Passport Advantage offering, their first acquisition signifies the acceptance of the program terms and conditions. This new agreement acceptance process not only simplifies the initial enrollment into Passport Advantage, but guarantees no interruption to the Passport Advantage relationship. Customers can continue acquiring through the Passport Advantage offering until it is terminated by either party. If you decide to terminate Passport Advantage, you can do so by providing IBM with 30 days written notice. IBM will provide a 90-day written notice prior to changing any Passport Advantage terms and conditions, or withdrawing the IBM International Passport Advantage Agreement.

Consolidation of Purchase Options

Volume Purchase Option (VPO), Contract Option Commit (CO Commit), and Complete Enterprise Option (CEO), have been consolidated into a single offering. For details regarding what these options provided, refer to Software Announcement 299-244, dated September 7, 1999.

Withdrawal of CO Forecast

CO Forecast, announced in Software Announcement 299-244, dated September 9, 1999, has been withdrawn.

Software Maintenance

Software Maintenance (previously available separately as Software Subscription and Technical Support) is the most effective way for you to ensure that your users have the latest technology at their fingertips and maintain the highest levels of productivity. With Software Maintenance, your IS technical staff has continual access to our software technical support centers as needed.

Software Maintenance is the most effective strategy for staying up to date and assuring technical support coverage is available whenever you need it. Software Maintenance provides you with access to new versions and releases for covered products, and allows for cross-platform migration at no extra cost during their coverage period. In addition to software upgrades, an integral part of Software Maintenance is technical support designed to meet the support requirements of a customer running multiple IBM products in a complex environment. The support is not intended as an end-user support offering, but is designed to supplement your support staff by providing telephone and electronic cross-platform support for routine, short duration installation, as well as usage (how-to) questions, and code-related problems. Software Maintenance is automatically included with all licenses until the first or second anniversary date of your Passport Advantage contract, dependant on the anniversary coverage you selected with your initial acquisition.

With Software Maintenance, you receive the following technical support benefits:

- Streamlined problem resolution process with quicker access to highly skilled support teams.
- Telephone access and/or electronic access via the Web (where available) to an IBM Support Center.
- Support for routine, short duration installation and usage (how-to) questions, and code-related problems for product licenses covered by Software Maintenance.
- Support during normal country business hours, namely prime shift hours excluding national or statutory holidays.
- Support for mission-critical (Severity 1) problems during non-prime shift hours, namely all hours outside normal country business hours including national and/or statutory holidays.
- Two-hour response time objective during prime shift for voice and electronic problem submissions. The response objective for critical/emergency problems during offshift is also two hours.
- Access to hints, tips, and frequently asked questions.
- Ability to transfer calls/issues to IBM Support Centers.
- Access to escalation management 24 hours a day, 7 days a week.

- Ability to authorize any number of knowledgeable IS technical staff who can submit problems to an IBM Support Center on your behalf. Each caller must be registered through our new and improved problem submission Web site in order to submit problems. The authorized caller list is managed by you.
- eCare for Software — An initiative designed to enhance your electronic support experience by providing a single view of IBM distributed software that includes easy, integrated access to the following information and functions:
 - Marketing
 - Technical
 - Developer
 - Business Partner
 - IBM Services
 - Download
 - ibm.com
- Comprehensive electronic SelfHelp capabilities.
- Advanced search capabilities.
- A single interface into problem submission/management system for IBM distributed software.

Terms and Conditions

IBM Responsibilities: IBM will provide telephone support (and electronic access in countries where available) to product specialists who will:

- Be available to provide support during the authorized caller's period of coverage. IBM's objective is to respond to callers within a maximum of two business hours after receiving their calls during normal business hours.
- Answer specific, task-oriented problems or questions pertaining to the use and operation of currently supported products. Refer the caller to specific IBM, Lotus®, or Tivoli product documentation or publications for additional information and instructions.

Customer Responsibilities

- An authorized technical caller must be available to work with IBM staff during the entire time IBM is providing support outside of normal country business hours.
- Each customer site should identify a Site Technical Contact at the time of the first acquisition.
- You agree that each authorized caller is a technically trained person, a member of your IS technical staff, with knowledge on the product they are calling in on and is not an end user.
- An authorized caller may call on any IBM supported products across their assigned site as long as they are technically skilled on that product.

Other Terms and Conditions

- Software Maintenance does not extend the announced end of service date (as noted in the announcement letter) of any eligible product.
- Software Maintenance is not intended as a help desk for end users.

Acquisitions

IBM's Passport Advantage now makes it easier to acquire IBM software across a broad range of IBM products by providing a single common structure for acquiring IBM distributed software programs which include, but are not limited to, DB2®, WebSphere™, Lotus, and Tivoli products. An organization can still order a single license including Software Maintenance or many, for one location, or a network of offices around the world. You can now take advantage of a single planning and predictable budgeting cycle for all IBM distributed software needs.

Single Relationship Suggested Volume Price (SVP) Level

After an originating site enrolls in the Passport Advantage program, an agreement effective date is established based on the date IBM accepts the initial order. Once an agreement effective date is established, the anniversary date is set and a Relationship SVP is established based on the point value of your initial order using the table below:

Relationship SVP Level	A	B	C	D	E	F	G	H
Points	10	100	250	500	1,000	2,500	5,000	10,000

At each anniversary date, your Relationship SVP Level will be recalculated based on the point value of your acquisitions made in the prior term, using the table above. (Refer to the **Relationship SVP Terms** section.) If, during the current Term, additional acquisitions are made, you may qualify to have your current Relationship SVP adjusted to a higher level.

Relationship SVP Terms

Your Relationship SVP Level applies up to the next anniversary date, but may be amended due to additional acquisitions (that is, from effective date of contract to the first anniversary).

- The total (net) point value of the valid orders received by IBM at the time the contract goes into effect (that is, the date IBM accepts the initial order) determines the initial Relationship SVP Level for this period.

For Each Subsequent Term

- The total (net) point value of the acquisitions made during the prior Term will be calculated and confirmed during the calendar month immediately following the anniversary date most recently passed. This value, called "Carry-Over Points," will determine the initial Relationship SVP Level for this subsequent Term, which will be designated as the

“current Term.” However, regardless of the number of Carry-Over Points, the initial Relationship SVP Level will not be reduced by more than two levels from that Relationship SVP Level which was last in effect during the prior Term.

Transaction SVP Level

Customers with a Relationship SVP Level of D or above may also qualify for a Transaction SVP Level. The Transaction SVP is an additional discount which is applied to any qualifying order using the table below:

Transaction SVP Level	E	F	G	H	*	*
Points in Order	250+	500+	1,000+	2,500+	5,000+	10,000+

* Contact your IBM Business Partner, reseller, or IBM representative, as applicable, for pricing.

Note: Transaction SVP Level does not apply to government or academic customers.

Examples

- New Customer X: Initial order for 500 points, Relationship SVP is set to D (BAU); process the transaction at F (refer to the table above, note that F = D+2).
- New Customer Y: Initial order for 1,000 points, Relationship SVP is set to E (BAU); process the transaction at G (refer to the table above, note that G = E+2).
- Customer X places an additional order: Their Relationship SVP Level is D, they place a 1,000 points additional order; transaction is processed at G (refer to the table above, note that G = E+2). Order achieves the same SVP Level as would an initial order of the same size (refer to Customer Y example).

Orders at Relationship SVP Levels G and H that qualify for a Transaction SVP Level will be confirmed by IBM and processed at the applicable I or J prices without the requirement for any additional internal (for example, special bid) authorization.

Transition Plans

To complement this announcement, all CO, CEO, VPO, Government, and Academic Volume Purchase Option customers of record will receive a direct mailing which will include:

- An outline of the changes to the Passport Advantage
- The IBM International Passport Advantage Agreement
- A Passport Advantage Enrollment Form
- An overview of the transition of your current agreement to the new IBM International Passport Advantage Agreement
- The effective date when you will be transitioned to the new Passport Advantage terms and conditions

At time of contract transition, your new Relationship SVP will remain at the same level established under the current program. This Relationship SVP Level will stay in effect until your next anniversary date or until a follow-on transaction qualifies you for a better Relationship SVP. At your next anniversary, your Relationship SVP Level will be recalculated, based on the (net) point value of your acquisitions made during the prior Term. Whatever the result, your Relationship SVP Level will not be reduced by more than two levels from that which was in effect prior to the recalculation.

Note: Government Option, and Academic Option customer’s new Relationship SVP will remain at the same level as under the current applicable program. This Relationship SVP Level will stay in effect as long as you maintain your Passport Advantage relationship through the applicable Passport Advantage offering previously mentioned.

Technical Support Transition

- Customers who currently acquire annual support through Passport Advantage will receive the new Software Maintenance technical support features on September 1, 2001.
- Customers who acquired technical support outside of Passport Advantage or Lotus Incident Based Packs will transition to the new Software Maintenance technical support features at the time of:
 - Passport Advantage renewal date
 - License with Software Maintenance acquisition
 - Support contract end date when it occurs prior to Passport Advantage renewal date
