At a glance

The IBM® Rational® Quality Management portfolio presents an array of quality offerings that transform the way people work together to ensure the right team members are actively involved in delivering quality solutions. Integrations with other application life cycle management tools, including IBM Rational Quality Manager, improve operational efficiency and reduce the cost of delivering quality software that will meet business and stakeholder requirements.

For ordering, contact your IBM representative, an IBM Business Partner, or IBM Americas Call Centers at 800-IBM CALL (Reference: AE001).

Overview

To help teams meet business objectives with limited resources and tight deadlines, IBM Rational offerings deliver an automated, comprehensive, and collaborative quality management portfolio with IBM Rational Functional Tester, IBM Rational Performance Tester, and IBM Rational Service Tester for SOA Quality. As market conditions are increasingly forcing quicker time to market, innovative thinking, and competitive pricing, a collaborative and automated process-driven approach to quality can assist in lowering the risk of delivering incomplete and poorly performing application software systems. By simplifying the process of developing testing assets, teams can leverage the business process knowledge of nontechnical resources to participate in the quality planning, execution, and reporting analysis of the quality management life cycle.

The Quality Management V8.2 practitioner tools deliver capabilities to:

- Mitigate business risk: Catch defects earlier and keep the team synchronized with dynamic process and activity-based workflows while targeting high-risk items through collaborative community risk ranking and assessment
- Improve operational efficiency: Automate and simplify labor-intensive tasks by actively involving nontechnical project team resources to assist in the production, execution, and analysis reporting
- Gain greater visibility: Make reliable decisions with constant access to prioritized metrics tailored for individuals and teams
- Deliver greater predictability: Adopt successful deployment patterns and map to operational Key Performance Indicators

The cornerstone of the IBM Rational Quality Management portfolio is IBM Rational Quality Manager. Based on the open, extensible Jazz™ technology platform, IBM Rational Quality Manager delivers a Web-based centralized test management environment and provides out-of-the-box integrations to other IBM Rational Quality Management products including IBM Rational Test Lab Manager, IBM Rational Functional Tester, IBM Rational Performance Tester, and IBM Rational Service Tester for SOA Quality among others across the broader quality management delivery life cycle that includes IBM Rational RequisitePro and IBM Rational DOORS® offerings.

Key prerequisites

For details, refer to the [Hardware requirements](#) and the [Software requirements](#) sections.

Planned availability date

- October 26, 2010: Electronic availability
- November 2, 2010: Media availability

Description

IBM Rational Performance Tester V8.2 is a load-and-performance-testing solution for teams concerned about the scalability of their web and packaged business applications. IBM Rational Performance Tester combines multiple ease-of-use features with advanced options for the load testing practitioner. Test creation, load generation, and data collection processes are simplified, helping teams to ensure that their applications can accommodate required user loads.

Enhancements for IBM Rational Performance Tester V8.2 include:

User productivity

- User-defined correlation rules
- Test recording through SOCKS and HTTP proxies; enhanced information throughout the test recording process
- Ability to capture application screen shots during recording
- Improved handling of unexpected server responses

Application and resource monitoring

- Simplified deployment of the Application Performance Analyzer with easier access to response time breakdown diagrams
- Response time breakdown for WebSphere® Application Server V6 and V7 and Oracle WebLogic Server 9 and 10
- Resource Monitoring for Apache Tomcat and J2EE components running on a JVM

Protocol support

- Support for TN3270 terminal-based applications
- Support for Citrix XenApp 5 and XenDesktop with the ability to compare received and expected screen properties
- Creation of SAP batch input tests using JCO 3.0

IBM Rational Functional Tester V8.2 is an automated functional and regression testing solution for Quality Assurance teams concerned with the quality of their web, Java™, and packaged business applications. Combining a simplified test representation with advanced scripting capabilities, IBM Rational Functional Tester

accelerates the process of test creation, execution, and analysis to ensure the early capture and repair of application errors.

IBM Rational Functional Tester V8.2 extends support to the following application environments:

- Dojo Toolkit versions 1.3 and 1.4
- Sybase PowerBuilder 12
- Adobe® Flex 3.5
- Siebel CRM 8.1
- FireFox 3.6
- Citrix XenApp 5

IBM Rational Service Tester for SOA Quality V8.2 is a functional and regression testing tool that enables the creation, comprehension, modification and execution of GUI-less web services testing. New enhancements include:

IBM Rational Service Tester for SOA Quality V8.2 extends support to the following SOA standards:

- SAML Token Profile V1
- WS-Trust 1.3
- WS-Secure Conversation 1.3
- WS-Policy and WS-Policy Attachment 1.5
- WS-SecurityPolicy 1.1

Section 508 of the U.S. Rehabilitation Act

Rational Functional Tester is capable as of November 2, 2010, when used in accordance with IBM's associated documentation, of satisfying the applicable requirements of Section 508 of the Rehabilitation Act, provided that any assistive technology used with the product properly interoperates with it. A U.S. Section 508 Voluntary Product Accessibility Template (VPAT), containing details on the products accessibility compliance, can be requested on the following website

http://www.ibm.com/able/product_accessibility/index.html

No publications are shipped with these products.

The IBM Publications Center

<http://www.ibm.com/shop/publications/order>

The Publications Center is a worldwide central repository for IBM product publications and marketing material with a catalog of 70,000 items. Extensive search facilities are provided. Payment options for orders are via credit card (in the U.S.) or customer number for 20 countries. A large number of publications are available online in various file formats, and they can all be downloaded by all countries.

Specified operating environment

Hardware requirements

IBM Rational Functional Tester V8.2

- Disk space: Minimum: 750 MB of disk space is required for product package installation. Additional disk space is required for the resources that you develop.

Notes

Disk space requirements can be reduced or increased depending on the features that you install. Additional disk space is required if you download the product package to install this product.

For Windows®, additional disk space is required if you use FAT32 instead of NTFS.

For Windows, an additional 500 MB of disk space is required in the directory pointed to by your environment variable TEMP. For Linux®, an additional 500 MB of disk space is required in the /tmp directory.

- Display: 1024 x 768 resolution minimum using 256 Colors (or higher, for best results)
- Memory: Minimum: 1 GB of RAM
- Other hardware: Microsoft® mouse or compatible pointing device
- Processor: Minimum: 1.5 GHz Intel® Pentium® 4 (or higher, for best results)

Software requirements

IBM Rational Functional Tester V8.2

Development tools

- Microsoft .NET Framework 1.1 V1.1 or later, for recording functional test scripts on any Windows applications.
- Microsoft Visual Studio .NET 2003 Standard Edition or Professional Edition, with VB.NET Project support for .Net 2003 scripting.

Eclipse Runtime Environment -- IBM Eclipse SDK 3.6

Java 2 SE Runtime Environment -- IBM Java SDK 6.0 SR8

- Mozilla Firefox 3.5 and future mod levels and fix packs
- Mozilla Firefox 3.6 and future mod levels and fix packs

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a README file, or other information published by IBM, such as an announcement letter. Documentation and other program content may be supplied only in the English language.

Planning information

Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express®. Product upgrades and technical support are provided by the Software Subscription and Support (also referred to as Software Maintenance) offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software, and technical support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with each program license acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available.

Charge metrics definitions

Authorized User

Authorized User is the unit of measure by which this program is licensed. An Authorized User is an individual (named or unnamed) within or outside of your enterprise. The program may be installed on one or more computers or servers and accessed by the number of users authorized by the Proof of Entitlement (PoE). You must have an entitlement for each Authorized User accessing the program or any program component in any manner directly or indirectly (for example, via a multiplexing program, device, or application server) through any means.

Install

Install is a unit of measure by which the program can be licensed. An Install is an installed copy of the program on a physical or virtual disk made available to be executed on a computer. Licensee must obtain an entitlement for each Install of the program.

Processor Value Unit

Processor Value Unit (PVU) is a unit of measure by which the program can be licensed. The number of PVU entitlements required is based on the processor technology (defined within the PVU Table by Processor Value, Brand, Type and Model Number at http://www.ibm.com/software/lotus/passportadvantage/pvu_licensing_for_customers.html) and the number of processors made available to the program. IBM continues to define a processor, for the purpose of PVU-based licensing, to be each processor core on a chip. A dual-core processor chip, for example, has two processor cores

Licensee can deploy the program using either Full Capacity licensing or Virtualization Capacity (Sub-Capacity) licensing according to the Passport Advantage Sub-Capacity Licensing Terms (see web page below). If using Full Capacity licensing, Licensee must obtain PVU entitlements sufficient to cover all activated processor cores* in the physical hardware environment made available to or managed by the program, except for those servers from which the program has been permanently removed. If using Virtualization Capacity licensing, Licensee must obtain entitlements sufficient to cover all activated processor cores made available to or managed by the program, as defined according to the Virtualization Capacity License Counting Rules at http://www.ibm.com/software/lotus/passportadvantage/Counting_Software_licenses_using_specific_virtualization_technologies.html

* An Activated processor core is a processor core that is available for use in a physical or virtual server, regardless of whether the capacity of the processor core can be or is limited through virtualization technologies, operating system commands, BIOS settings, or similar restrictions.

Notes

Some programs may require licenses for the program AND what is being managed. In that case, the following applies: In addition to the entitlements required for the program directly, Licensee must obtain PVU entitlements for this program sufficient to cover the processor cores managed by the program.

Some programs may be licensed on a managed basis ONLY. In that case, the following applies: Instead of the entitlements required for the program directly, Licensee must obtain PVU entitlements for this program sufficient to cover the processor cores managed by the program.

A few programs on an exception basis may be licensed on a referenced basis. In that case, the following applies: Rather than obtaining entitlements for the activated processor cores available to the program, Licensee must obtain PVU entitlements for this program sufficient to cover the environment made available to the Referenced program as if the program itself were executing everywhere the Referenced program was executing, independent of the basis on which the Referenced program is licensed.

Express and Workgroup programs may be licensed with maximum use terms. In that case, the following applies: The maximum authorized use terms and conditions for PVU licensed IBM Express and Middleware programs can be found in the *IBM Express and Middleware Licensing Guide*.

Cross-platform product for use on System z IFL engines

Order the part numbers that follow when the product is intended to run on the Linux operating system on System z IFL engines. If the product is not intended to run on the Linux operating system on System z IFL engines, order from the other set of part numbers in this announcement. This set of part numbers provides the identical supply and authorization as the other set in this announcement.

Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

Licensing

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use.

Part number products only, offered outside of Passport Advantage, where applicable, are license only and do not include Software Maintenance.

This software license includes Software Subscription and Support (also referred to as Software Maintenance).

License Information form number

Program name	Program number	Form number
Rational Functional Tester	5724-G25	L-KHUY-89GSA2
Rational Performance Tester Extension for SIP	5724-J96	L-KHUY-89GSJ7
Rational Service Tester for SOA Quality	5724-S34	L-KHUY-89GSVC

The program's License Information will be available for review on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

Limited warranty applies

Yes

Limited warranty

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional charge. For further information, consult the IBM Software Support Handbook found at

<http://www.ibm.com/support/handbook>

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

Program technical support

Technical support of a program product version or release will be available for a minimum of five years from the general availability date, as long as your Software Maintenance is in effect. This technical support allows you to obtain assistance (via telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Maintenance also provides you with access to updates (modifications or fixes),

releases, and versions of the program. You will be notified, via announcement letter, of discontinuance of support with 12 months' notice. If you require additional technical support from IBM, including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

Money-back guarantee

For clarification, note that if for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

For clarification, note that for programs acquired under the IBM International Passport Advantage Agreement, this term applies only to your first acquisition of the program.

Volume orders (IVO)

No

Passport Advantage applies

Yes, and through the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

This product is only available via Passport Advantage. It is not available as shrinkwrap.

Software Subscription and Support (Software Maintenance)

Yes. Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and technical support are provided by the Software Subscription and Support (also referred to as Software Maintenance) offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software and Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with each program license acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available.

While your Software Subscription and Support (also referred to as Software Maintenance) is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance via telephone and, if available, electronic access, to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, consult your IBM Software Support Handbook at

<http://www.ibm.com/support/handbook>

Software Subscription and Support (also referred to as Software Maintenance) does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.

For additional information about the International Passport Advantage Agreement and the IBM International Passport Advantage Express Agreement, visit the Passport Advantage website at
