IBM® InfoSphere® Warehouse Advanced Departmental Edition 9.7.3 and IBM InfoSphere Warehouse Advanced Enterprise Edition 9.7.3 deliver:

- A comprehensive set of warehouse packs for you to easily deploy leading industry models and Cognos® reports to more easily understand and gain insight into your markets and campaigns, customers, and supply chains
- Additional management tools and architecture tools in InforSphere Warehouse Advanced Enterprise Edition that let you deploy, manage, grow, and architect your increasingly business critical and complex warehouse environments

For ordering, contact your IBM representative, an IBM Business Partner, or IBM Americas Call Centers at 800-IBM-CALL

Reference: YE001

Overview

Today, warehouse deployments continue to become increasingly critical to the operations and growth of businesses around the world. As the volume of data has grown exponentially over the last few years in these warehouses, so has their complexity and dependence on them. Businesses are increasingly driving day-to-day operations and future strategic direction from the information contained within and derived from these warehouses. As their complexity and volume of storage grows so does the complexity of managing, evolving, and evolving their structure. InfoSphere Warehouse is introducing two new editions to address these issues and to help organization achieve these objectives.

IBM InfoSphere Warehouse Advanced Enterprise Edition 9.7.3 enhances the capabilities of InfoSphere Warehouse Advanced Departmental Edition by delivering the industry proven warehouse model packs along with leading architecture, performance, backup, and recovery tools.

- InfoSphere Data Architect (10 Authorized User licenses) - a collaborative data design solution that helps you discover, model, relate, and standardize diverse and distributed data assets.

- Optim™ Query Tuner - providing expert advice on writing high quality queries and improving database design via graphical query information and index, statistics, and query advisors.
- Optim High Performance Unload - a high speed tool for unloading, extracting, repartitioning very large quantities of data with less efforts and faster results.
- DB2® Merge Backup - allows you to speed up taking DB2 backups on your production servers and have full current backups available for much shorter restore times.
- DB2 Recovery Expert - a self-managing recovery solution that enables intelligent analysis of altered, incorrect, or missing database assets. Use the log analysis component to isolate accidental or undesired changes made to the database tables and quickly undo those changes.

These tools will help you increase efficiency and reduce time to market through increased understanding of current data assets while simplifying daily operations of managing complex warehouse deployments with InfoSphere Warehouse Advanced Enterprise Edition.

Key prerequisites

Refer to the [Hardware requirements](#) and [Software requirements](#) sections.

Planned availability date

June 17, 2011: Electronic availability

July 8, 2011: Media availability

Description

InfoSphere Warehouse Advanced Enterprise Edition 9.7.3 adds leading architecture, performance, backup, and recovery tools that help increase efficiency and reduce time to market through increased understanding of current data assets while simplifying daily operations of managing complex warehouse deployments.

- InfoSphere Data Architect is a collaborative data design solution that can be used to discover, model, visualize, relate, and standardize diverse and distributed data assets. Included in InfoSphere Warehouse Advanced Enterprise Edition are 10 Authorized User licenses. In conjunction with the warehouse packs, InfoSphere Data Architect lets you enhance those models, and develop and deploy your own custom models tailored to the specific industry or business environment.
- Optim Query Tuner can help cut costs and improve performance by providing expert advice on writing high quality queries and improving database design. Its easy-to-use advisors can help developers to write more efficient SQL queries, identify query candidates, and facilitate analysis of those queries.
- Optim High Performance Unload helps database administrators (DBAs) work with very large quantities of data with less effort and faster results. Organizations value Optim High Performance Unload for its ability to execute concurrently with production applications, reduce the risk of impacting online production by fitting more work into tight or shrinking batch windows, recover data from single table failures or accidental table drops by extracting tables from a backup image (incremental, delta, and full backup images), deliver the value of new hardware and software investments faster by speeding database migrations, eliminate the need for intermediate storage for database migrations, unload large volumes of data with speed, accuracy, and minimal effort.
- DB2 Merge Backup shortens recovery times on production servers. It helps ensure full current backups are available and can be restored as quickly as possible. Perform backup processes with minimal impact on production systems to support business objectives while developing a scalable approach for

responding to unplanned service interruptions. DB2 Merge Backup helps ensure a complete, accurate DB2 backup, even as data volumes increase, and can merge several incremental backups with the latest full backup to create a new, more current full backup.

DB2 Recovery Expert helps reduce the time it takes to recover production warehouses. It provides the ability to slim down log transactions by creating subsets by table. It also assists DBAs and IT support teams in determining the best path of recovery and resources needed. The Log analysis feature allows DBAs to monitor activity to sensitive DB2 tables. DBAs can view data changes by dates, users, tables, and other criteria. You can isolate accidental or undesired changes made to the database tables and quickly undo those changes with minimal disruption to the business.

If you are developing, managing, growing, evolving, and struggling with the complexity of your warehouse deployments, InfoSphere Warehouse Advanced Enterprise Edition delivers an enhanced set of database performance, management, and design tools to help assist you to maintain and receive increased value from your warehouses while helping to reduce the total cost for maintaining these complex environments.

The following table summarizes the features available in each edition of InfoSphere Warehouse beginning with 9.7.3:

Features	Advanced Enterprise	Enterprise	Enterprise Base	Advanced Departmental	Departmental	Departmental Base	Developer
DB2 9.7 Enterprise Server Edition	Included	Included	Included	Included	Included	Included	Included
DB2 Database Partitioning	Included	Included	Included	Included	Included	Included	Included
Cubing Service	Included	Included	Included	Included	Included	Included	Included

* Applies to customers with the Base Warehousing Feature for DB2.

** Applies to customers with the Enterprise Warehousing Feature for DB2.

IBM also offers InfoSphere Warehouse with Optim Data Retention software. This is a bundled solution that includes both IBM InfoSphere Warehouse Enterprise Edition and IBM Optim Data Growth Solution. This combination of products provides an end-to-end data growth solution for IBM enterprise data warehouse customers.

Accessibility by people with disabilities

A US Section 508 Voluntary Product Accessibility Template (VPAT) can be requested via the IBM website

http://www.ibm.com/able/product_accessibility/index.html

Section 508 of the U.S. Rehabilitation Act

IBM InfoSphere Warehouse is capable as of July 8, 2011, when used in accordance with IBM's associated documentation, of satisfying the applicable requirements of Section 508 of the Rehabilitation Act, provided that any assistive technology used with the product properly interoperates with it. A U.S. Section 508 Voluntary Product Accessibility Template (VPAT), containing details on the products accessibility compliance, can be requested on the following Web site

http://www.ibm.com/able/product_accessibility/index.html

Education support

IBM training provides education to support many IBM offerings. Descriptions of courses for IT professionals and managers are on the IBM training website

<http://www.ibm.com/services/learning/>

Call IBM training at 800-IBM-TEACH (426-8322) for catalogs, schedules, and enrollments.

The following InfoSphere Warehouse courses are currently available. Check with your country's Information Management Training and Education website or contact person to determine exactly when the new course material will be available.

Information Management Training is now offering some of our most popular courses in a new learning format, instructor-led online (ILO). With this new format, you get the benefits of being in a classroom with the convenience and cost savings of online training.

Courses

The following educational offerings are available:

Category	Course code	Course title	Course type
Introduction courses	DW03	Changing Business with Data Insight	Classroom
	3W03	Changing Business with Data Insight	Instructor Led Online
	1W03	Changing Business with Data Insight	WBT
	DW11	Architecting the Data Warehouse	Classroom
Intermediate courses	DW31	IBM Alphablox Essentials and Blox® Builder	Classroom
	3W31	IBM Alphablox Essentials and Blox Builder	Instructor Led Online
	DW32	Managing workloads for DB2 LUW and InfoSphere Warehouse	Classroom
	3W32	Managing workloads for DB2 LUW and InfoSphere Warehouse	Instructor Led Online
	2W322	Managing workloads for DB2 LUW and InfoSphere Warehouse	SPVC

	1W322	Managing workloads for DB2 LUW and InfoSphere Warehouse	WBT
Advanced courses	DW12	Advanced Data warehousing workshop: Multi-Dimensional Modeling	Classroom
	DW35	InfoSphere warehouse 9 Components	Classroom
	3DA52	InfoSphere warehouse 9 - SQL warehouse Tool and Administration Console	Instructor Led Online
	3DB52	InfoSphere Warehouse 9 - Cubing Service	Instructor Led Online
	3DC52	InfoSphere warehouse 9 - Data Mining and Unstructured Text Analysis	Instructor Led Online
	3W35	InfoSphere warehouse 9 Components	Instructor Led Online
	2WA52	InfoSphere warehouse 9 - SQL warehouse Tool and Administration Console	SPVC
	2WB52	InfoSphere warehouse 9 - Cubing Service	SPVC
	2WC52	InfoSphere Warehouse 9 - SQL warehouse Tool and Administration Console	SPVC
	1WA52	InfoSphere warehouse 9 - SQL warehouse Tool and Administration Console	WBT
	1WB52	InfoSphere warehouse 9 - Cubing Service	WBT
	1WC52	InfoSphere Warehouse 9 - Data Mining and Unstructured Text Analysis	WBT

Offering Information

Product information is available via the Offering Information website

<http://www.ibm.com/common/ssi>

Also, visit the Passport Advantage® website

<http://www.ibm.com/software/passportadvantage>

Publications

No hardcopy publications are shipped with this product.

The IBM Publications Center

<http://www.ibm.com/shop/publications/order>

The Publications Center is a worldwide central repository for IBM product publications and marketing material with a catalog of 70,000 items. Extensive search facilities are provided. Payment options for orders are via credit card (in the U.S.) or customer number for 20 countries. A large number of publications are available online in various file formats, and they can all be downloaded by all countries.

The InfoSphere Warehouse Installation Guide is available in PDF format in the Publications Center.

The InfoSphere Warehouse 9.7 information is included in the DB2 9.7 Information Center.

SG24-7138-00	Dimensional Modeling: In a Business Intelligence Environment
SG24-7274-00	Leveraging DB2 Data Warehouse Edition for Business Intelligence
SG24-7104-00	Moving Forward with the On Demand Real-time Enterprise
SG24-2238-00	Data Modeling Techniques for

SG24-5174-00	Data Warehousing From Multiplatform Operational Data to Data Warehousing and Business Intelligence
SG24-7582-00	InfoSphere Warehouse: Cubing Services and Client Access Interfaces
SG24-7679-00	Multidimensional Analytics: Delivered with InfoSphere warehouse Cubing Services

Technical information

Specified operating environment

Hardware requirements

InfoSphere Warehouse has a component-based architecture that consists of three component groups: a data server, an application server, and a client. In a typical production environment, you install each of these component groups on different computers to form a complete warehousing solution.

The system requirements for InfoSphere Warehouse may be occasionally updated. To obtain the most current information visit

<http://www.ibm.com/software/data/infosphere/warehouse/sysreqs.html>

Requirements for the data server components

The data warehouse server components of InfoSphere Warehouse have requirements for hardware, software, disk space, and memory.

Operating system and hardware requirements

AIX®

- AIX V5.3 (64-bit only)
- AIX V6.1 (64-bit only)
- AIX V7.1 (64-bit only)

HP-UX

- HP-UX 11i v2 for 64-bit HP Integrity servers (Itanium-based systems)
- HP-UX 11i v3 for 64-bit HP Integrity servers (Itanium-based systems)

Linux®

- Red Hat Enterprise Linux (RHEL) 5 on 64-bit AMD and Intel® x86-64 systems
- Red Hat Enterprise Linux (RHEL) 6 on 64-bit AMD and Intel x86-64 systems
- SUSE Linux Enterprise Server (SLES) 10 and 11 on 64-bit AMD and Intel x86-64 systems

Solaris

- Solaris 9 for UltraSPARC servers (64-bit only)
- Solaris 10 for UltraSPARC servers (64-bit only)

Windows®

- Windows 2003 Standard, Enterprise, and Datacenter Editions (32 bit and 64 bit)
- Windows 2008 Standard, Enterprise, and Datacenter Editions (32 bit and 64 bit)

Web browser requirements

Ensure that you have one of the following browsers on your computer:

- Internet Explorer V7.0
- Internet Explorer V6.0 with SP 1
- Firefox V3.0
- Firefox V2.0

Disk space requirements

Temporary space for installable images: If you are a Passport Advantage customer, before you can install the product, you must download the installation images to the target computer. These images contain the installation executable files for the components that you are installing. The temporary space that is required for these images is different from the space that is required to run the installation program. Approximately 1.2 GB of disk space is recommended for the installation images of the data server components. If you also download the installation images for the client components on the same computer, you need a total of 2.5 GB of disk space.

The recommended temporary space for running the installation program is approximately 1.5 GB of disk space.

Permanent space for the installed components:

- On Windows, approximately 1 GB of disk space is recommended for the installation directory of the data server components.
- On Linux and UNIX®, approximately 1.4 GB of disk space is recommended for the installation directory of the data server components.

Memory requirements

Memory for installing the product: A minimum of 512 MB of memory is required to install the data server components.

Memory for running the product: A minimum of 1 GB of memory is required to run the data server components. If you run the client components on the same computer, 2 GB of memory is recommended.

Requirements for the application server components

The application server components of InfoSphere Warehouse have requirements for hardware, software, disk space, and memory.

For detailed information about supported hardware and software for WebSphere®, visit

<http://www.ibm.com/software/webservers/appserv/doc/latest/prereq.html>

- Internet Explorer V6.0 with SP 1
- Firefox V3.0
- Firefox V2.0

Disk space requirements

Temporary space for installable images: If you are a Passport Advantage customer, before you can install the product, you must download the installation images to the target computer. These images contain the installation executable files for the components that you are installing. The temporary space that is required for these images is different from the space that is required to run the installation program. Approximately 1.2 GB of disk space is recommended for the installation images of the application server components. If you also download the installation images for the client components on the same computer, you need a total of 2.5 GB of disk space.

The recommended temporary space for running the installation program is approximately 1.5 GB of disk space.

Permanent space for the installed components:

- On Windows, approximately 1 GB of disk space is recommended for the installation directory of the application server components. If you install the client components on the same computer, you need a total of 3 GB of disk space.
- On Linux and UNIX, approximately 1.4 GB of disk space is recommended for the installation directory of the application server components. If you install the client components on the same computer, you need a total of 3.4 GB of disk space.

Memory requirements

Memory for installing the product: A minimum of 512 MB of memory is required to install the application server components.

Memory for running the product: A minimum of 1 GB of memory is required to run the application server components. If you run the client components on the same computer, 2 GB of memory is recommended.

Requirements for the client components

The client components of InfoSphere Warehouse have requirements for hardware, software, disk space, and memory.

Operating system and hardware requirements

Linux

- Red Hat Enterprise Linux (RHEL) 5 on 32 bit AMD and Intel x86 systems
- Red Hat Enterprise Linux (RHEL) 6 on 64 bit AMD and Intel x86-64 systems
- SUSE Linux Enterprise Server (SLES) 10 and 11 on 32 bit AMD and Intel x86 systems

Windows

- Windows XP Professional Edition 32 bit
- Windows Vista Business, Enterprise, and Ultimate Editions 32 bit

Web browser requirements

Ensure that you have one of the following browsers on your computer:

- Internet Explorer V7.0
- Internet Explorer V6.0 with SP 1
- Firefox V3.0
- Firefox V2.0

Disk space requirements

Temporary space for installable images: If you are a Passport Advantage customer, before you can install the product, you must download the installation images to the target computer. These images contain the installation executable files for the components that you are installing. The temporary space that is required for these images is different from the space that is required to run the installation program. Approximately 1.5 GB of temporary disk space is recommended for the installation images of the client components.

Temporary space for running the installation program: Approximately 500 MB of disk space is recommended to run the installation program.

Permanent space for the installed components: Approximately 2 GB of disk space is recommended for the installed product.

Memory requirements

Memory for installing the product: Approximately 1 GB of memory is recommended to install the client components.

Memory for running the product: Approximately 1 GB of memory is recommended to run the client components.

Software requirements

For a current list of supported operating systems, refer to the IBM InfoSphere Warehouse website

<http://www.ibm.com/software/data/infosphere/warehouse/sysreqs.html>

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a readme file, or other information published by IBM, such as an announcement letter.

Documentation and other program content may be supplied only in the English language.

Planning information

Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express®. Product upgrades and technical support are provided by the Software Subscription and Support (also referred to as Software Maintenance) offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software, and technical support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with each program license acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available.

Packaging

Notes:

- The InfoSphere Warehouse Server DVDs include Enterprise Server Edition, applicable DB2 Feature entitlements, InfoSphere Warehouse components, and WebSphere Application Server.
- The InfoSphere Warehouse Client DVDs include IBM Data Server Client, InfoSphere Warehouse components, and samples.

IBM InfoSphere Warehouse 9.7.3 Departmental Base Edition - Authorized User and Limited Use Socket options

- IBM InfoSphere Warehouse Departmental Base Edition Quick Start and Activation CD
- IBM InfoSphere Warehouse Server for Linux on AMD64 and Intel EM64T systems (x86-64) DVD
- IBM InfoSphere Warehouse Server for Windows on 32-bit AMD and Intel systems (x86) DVD

Note: Debundling of Alphablox from the packaging

In this release, Alphablox is debundled from the Infosphere Warehouse Enterprise, Departmental, and Optim Data Retention Editions, as well as from Enterprise Warehouse Feature for DB2. Customers with these editions will be given an entitlement to the equivalent number of PVUs or sockets (280 PVU per socket) of Alphablox so that they can choose to renew support on their next renewal anniversary. The AlphaBlox® component of InfoSphere Warehouse Developer edition will be removed from the package.

Security, auditability, and control

IBM InfoSphere Warehouse uses the security and auditability features of the host hardware or software.

The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

Ordering information

This product is only available via Passport Advantage. It is not available as shrinkwrap.

IBM Infosphere Warehouse Advanced Enterprise Edition - Terabyte Option	IBM Database Management Other	IBM InfoSphere Warehouse
Program name	PID number	Charge unit description
IBM Infosphere Warehouse Advanced Departmental Edition - Terabyte Option	5724-E34	Per Terabyte
IBM Infosphere Warehouse Advanced Enterprise Edition - PVU Option	5724-E34	Per Processor Value Unit (PVU)
IBM Infosphere Warehouse Advanced Enterprise Edition - Terabyte Option	5724-E34	Per Terabyte

Charge metrics definitions

Install

Install is a unit of measure by which the program can be licensed. An install is an installed copy of the program on a physical or virtual disk made available to be executed on a computer. Licensee must obtain an entitlement for each install of the program.

Processor Value Unit (PVU)

PVU is a unit of measure by which the program can be licensed. The number of PVU entitlements required is based on the processor technology (defined within the PVU Table by processor value, brand, type, and model number at

http://www.ibm.com/software/lotus/passportadvantage/pvu_licensing_for_customers.html

and the number of processors made available to the program. IBM continues to define a processor, for the purpose of PVU-based licensing, to be each processor core on a chip. A dual-core processor chip, for example, has two processor cores.

Licensee can deploy the program using either full capacity licensing or virtualization capacity (sub-capacity) licensing according to the Passport Advantage Sub-Capacity Licensing Terms (refer to the webpage below). If using full capacity licensing, licensee must obtain PVU entitlements sufficient to cover all activated processor cores* in the physical hardware environment made available to or managed by the program, except for those servers from which the program has been permanently removed. If using virtualization capacity licensing, licensee must obtain entitlements sufficient to cover all activated processor cores made available to or managed by the program, as defined according to the Virtualization Capacity License Counting Rules at

http://www.ibm.com/software/lotus/passportadvantage/Counting_Software_licenses_using_specific_virtualization_technologies.html

* An activated processor core is a processor core that is available for use in a physical or virtual server, regardless of whether the capacity of the processor core can be or is limited through virtualization technologies, operating system commands, BIOS settings, or similar restrictions.

Terabyte (TB) metric guide

TB is a unit of measure by which the Program can be licensed. You are able to purchase the program based only on the amount of user data (TB) reported by the program. As your user data volumes grow, you can purchase additional warehousing capacity. User data is defined as user tables, derived summary tables (for multidimensional clustering), and temp tables.

For each database, you must acquire enough TB entitlements to cover the the amount of user data reported by the program.

- Example A:
A database with 1.75 TB of data must acquire a 2 terabyte entitlement.
- Example B:
An instance with 2 databases, one storing 1.4 TB, and a second with 3.2 TB must acquire 6 TB (2 plus 4) worth of entitlement.

The actual amount of storage used can be measured by running the terabyte metric tool against each database.

Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

Licensing

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use.

Part number products only, offered outside of Passport Advantage, where applicable, are license only and do not include Software Maintenance.

This software license includes Software Subscription and Support (also referred to as Software Maintenance).

The program's License Information will be available for review on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

Limited warranty applies

Yes

Limited warranty

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional charge. For further information, consult the IBM Software Support Handbook found at

<http://www.ibm.com/support/handbook>

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

Program technical support

Technical support of a program product version or release will be available for a minimum of five years from the general availability date, as long as your Software Maintenance is in effect. This technical support allows you to obtain assistance (via telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Maintenance also provides you with access to updates (modifications or fixes), releases, and versions of the program. You will be notified, via announcement letter, of discontinuance of support with 12 months' notice. If you require additional technical support from IBM, including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

Money-back guarantee

For clarification, note that if for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

For clarification, note that for programs acquired under the IBM International Passport Advantage Agreement, this term applies only to your first acquisition of the program.

International Passport Agreement

Volume orders (IVO)

No

Passport Advantage applies

Yes, and through the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

This product is only available via Passport Advantage. It is not available as shrinkwrap.

Software Subscription and Support (Software Maintenance)

Yes. Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and technical support are provided by the Software Subscription and Support (also referred to as Software Maintenance) offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software and Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with each program license acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available.

While your Software Subscription and Support (also referred to as Software Maintenance) is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance via telephone and, if available, electronic access, to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, consult your IBM Software Support Handbook at

<http://www.ibm.com/support/handbook>

Software Subscription and Support (also referred to as Software Maintenance) does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.

For additional information about the International Passport Advantage Agreement and the IBM International Passport Advantage Express Agreement, visit the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

System i Software Maintenance applies

No

Educational allowance available

Not applicable.

IBM Electronic Services

IBM has transformed its delivery of hardware and software support services to help you achieve higher system availability. Electronic Services is a web-enabled solution that offers an exclusive, no-additional-charge enhancement to the service and support available for IBM servers. These services are designed to provide the opportunity for greater system availability with faster problem resolution and preemptive monitoring. Electronic Services comprises two separate, but complementary, elements: Electronic Services news page and Electronic Services Agent.

The Electronic Services news page is a single Internet entry point that replaces the multiple entry points traditionally used to access IBM Internet services and support. The news page enables you to gain easier access to IBM resources for assistance in resolving technical problems.

The Electronic Service Agent™ is no-additional-charge software that resides on your server. It monitors events and transmits system inventory information to IBM on a periodic, client-defined timetable. The Electronic Service Agent automatically reports hardware problems to IBM. Early knowledge about potential problems enables IBM to deliver proactive service that may result in higher system availability and performance. In addition, information collected through the Service Agent is made available to IBM service support representatives when they help answer your questions or diagnose problems. Installation and use of IBM Electronic Service Agent for problem reporting enables IBM to provide better support and service for your IBM server.
