At a glance

The following IBM® Sterling Software-as-a Service (SaaS) products are now available through Passport Advantage®.

- **IBM Sterling B2B Services - Collaboration Network:** A B2B integration solution providing secure connectivity and collaboration with customers and business partners
- **IBM Sterling Data Synchronization** A complete data synchronization solution that helps to simplify the process of data collection, cleansing, registration, validation, and publication to a Global Data Synchronization Network (GDSN) compliant data pool
- **IBM Sterling Web Forms:** An electronic alternative to inefficient paper-based communications

These products are delivered as Software-as-a-Service, which means fewer IT resources, no upgrade charges, configuration rather than installation, fast, easy connectivity, and low total cost of ownership.

For ordering, contact your IBM representative, or IBM Americas Call Centers at 800-IBM-CALL (Reference: VE001).

Overview

The following IBM Sterling B2B Integration Software-as-a-Service (SaaS) products are now available through Passport Advantage:

- **IBM Sterling B2B Services - Collaboration Network:** IBM Sterling B2B Services - Collaboration Network delivers flexible solutions and expert services to help reduce the time and complexity of securely integrating with your business partners. It can communicate securely with global partners regardless of protocols or gateways, handling millions of transactions per day, and its small partner community enablement solutions can help you to extend your electronic B2B community to partners and customers, regardless of their technical expertise or size. It can also offer expert services to on-board partners faster, to automate document exchange quickly, and to manage your B2B and file transfer operations, all through a single connection to over 300,000 trading entities around the world.

With this release, IBM Sterling B2B Services - Collaboration Network:

- Adds two new service components to the product (IBM Sterling B2B Services - Integration Basic - Synchronous B2B Process Services and IBM Sterling B2B Services - Integration Basic - Process Enrichment Service)
- Adds support for double byte character and CII character processing to support Japanese, Korean, and Traditional and Simplified Chinese
- Adds support for Italian, Portuguese, and Spanish in the user interface
- **IBM Sterling Data Synchronization Manager:** IBM Sterling Data Synchronization Manager can help improve supply chain data accuracy by sharing data through a common information pool.
- **IBM Sterling Web Forms:** IBM Sterling Web Forms provides an electronic alternative to paper forms to help reduce errors and build an efficient set of business processes to keep your supply chain operations costs low. This release adds support for Italian in the user interface.

Together, these solutions can help you achieve seamless and secure integration of key business processes by connecting the people, processes, and technology both inside and outside your enterprise to help improve business agility, operational efficiency, and business performance. Specifically, they can help you to:

- Improve business agility by securely and flexibly integrating with virtually any business partner, system, or cloud, virtually anywhere
- Improve operational efficiency by seamlessly automating manual business and IT processes inside and outside your enterprise
- Improve business performance by providing visibility and governance across your key business and IT processes

Key prerequisites

- Internet connection
- Browser

Refer to the [Technical information](#) section for additional information.

Planned availability date

October 18, 2011

Description

IBM Sterling B2B Services - Collaboration Network

IBM Sterling B2B Services - Collaboration Network provides flexible solutions and expert services to help reduce the time and complexity of securely integrating with your business partners in virtually any location. It can help you to solve critical business-to-business and managed file transfer challenges by connecting people, systems, and technology with a highly-scalable SaaS-based multitenant infrastructure.

IBM Sterling B2B Services - Collaboration Network can help you to:

- Improve business agility through secure and flexible integration with virtually any business partner, system, or cloud, virtually anywhere. This capability is crucial to making vital connections with customers, suppliers, and others in the B2B community.
- Improve operational efficiency through the seamless automation of manual business and IT processes inside and outside the enterprise to save you staff, time, and money--resources that can be used to grow your business in other key areas.

- Improve business performance through visibility into actionable information across key business and IT processes.
- Empower data movement to assure file delivery with visibility, control, and governance for all data movement, including third-party FTP servers.

With this release, the product adds two new components:

- IBM Sterling B2B Services - Integration Basic - Synchronous B2B Process Services, which provides real-time website inquiry and response processing, as well as the synchronous exchange of supply chain documents. Companies have the ability to synchronously exchange messages with business partners through the IBM B2B Services environment, regardless of differing web services interfaces.
- IBM Sterling B2B Services - Integration Basic - Process Enrichment Service, which delivers the ability to take a standard B2B document flow and connect out to a web service source to either validate information within the business document or to gather additional information that will be used to enrich the business document content.

This release also provides double-byte character and CII character processing, including protocol routing, conversion, and transformation for current asynchronous and synchronous data flows to support Japanese, Korean, and Traditional and Simplified Chinese and adds support for Italian, Portuguese, and Spanish in the user interface.

Note: The following were separately orderable through Sterling Commerce™. They are now available as components of the IBM Sterling B2B Services - Collaboration Network product.

- IBM Sterling B2B Integration Services Basic
- IBM Sterling B2B Integration Services Plus
- IBM Sterling File Transfer Service

IBM Sterling Data Synchronization Manager

IBM Sterling Data Synchronization Manager can help improve data accuracy across your supply chain by supporting high-speed, high-volume sharing of product data through a common information pool, regardless of platform, operating system, installed database, and applications.

For additional information, visit

<http://www.sterlingcommerce.com/products/b2b-integration/global-data-sync/>

IBM Sterling Web Forms

IBM Sterling Web Forms is a customizable web forms solution that provides an electronic alternative to the inefficient paper-based communications you may be supporting with some of your smaller trading partners. It can help reduce errors and build an efficient set of business processes to help keep your supply chain operations costs low.

Accessibility by people with disabilities

A US Section 508 Voluntary Product Accessibility Template (VPAT) containing details on accessibility compliance can be requested at

Product positioning

IBM Sterling B2B Services is part of the IBM Connectivity & Integration Portfolio. IBM Connectivity & Integration offers fast, flexible, and reliable access to information whether it resides across divisions, across enterprises, or in the cloud bridging people, processes, and applications to help speed innovation, increase collaboration, and get you closer to your customers.

Education support

The IBM B2B Commerce Education team delivers a comprehensive portfolio of education services to help customers successfully deploy service-oriented architecture (SOA) and to integrate B2B Commerce products to achieve the maximum benefit.

Courses are available for:

- IBM Sterling B2B Services - Collaboration Network
- IBM Sterling Vendor Portal
- IBM Sterling Web Forms

Training for IBM Sterling Data Synchronization Service is provided through the on-boarding process.

Education is a key component to ensuring software success. IBM's curriculum provides a unique training value built on exclusive product knowledge direct from IBM developers cemented with expert instructors and flexible time-saving and cost-saving training options.

The IBM B2B Commerce Education team works closely with product developers and services organizations to ensure that the courses we offer provide the most up-to-the-minute technical and product information. Our courses place an emphasis on the advanced knowledge and insight that only these sources can provide. IBM draws from a deep pool of technical experience in the development of our courses and passes that knowledge on to our students.

IBM B2B Commerce Education provides training that spans the spectrum of skills requirements from introductory product overviews to advanced offerings. Hands-on labs let students work with fully-functional versions of the software to round out their training experience. Several training options are available, including instructor-led classroom offerings, customized courses, and virtual (online) training that lets students train from their office without traveling.

Descriptions of Industry Solutions B2B Commerce courses for IT professionals and managers are available at

<http://www-304.ibm.com/jct03001c/services/learning/ites.wss/us/en?pageType=page&c=a0000037>

Follow the links to the Industry Solutions B2B Commerce Education pages for information on course locations and availability dates or call IBM training at 800-IBM-TEACH (426-8322) for catalogs, schedules, and enrollments.

IBM training provides education to support many IBM offerings. For information, visit the IBM training website at

<http://www-304.ibm.com/jct03001c/services/learning/ites.wss/zz/en?pageType=page&c=a0011023>

Offering Information

Technical information

Specified operating environment

Hardware requirements

- A workstation that supports the browser being used
- A direct Internet connection

Software requirements

- For IBM Sterling B2B Services - Collaboration Network and IBM Sterling Web Forms, one of the following browsers:
 - Microsoft™ Internet Explorer Version 7 or 8
 - Mozilla Firefox Version 3.0
 - Google Chrome 5
 - For IBM Sterling Data Synchronization Manager, Microsoft Internet Explorer Version 6, or later
- Control over Domain Name Service (DNS) settings:

- A geographically distributed DNS system
- Ability to change CNAME entries as directed by IBM

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a readme file, or other information published by IBM, such as an announcement letter. Documentation and other program content may be supplied only in the English language.

Limitations

Refer to the Terms of Use documents that are available on the IBM Software as a Service Terms of Use website

<http://www.ibm.com/software/sla/sladb.nsf/sla/tou>

Planning information

Packaging

This product is accessed from the Internet. There are no physical or electronic deliverables.

Security, auditability, and control

IBM customer data is protected by a two-pronged security strategy comprising perimeter security practices and application-level security, all driven by IBM data security requirements.

Perimeter practices ensure that security controls, system patching, monitoring, and alerting are uniformly implemented and maintained for all service offerings. These practices cover disaster recovery, regulatory compliance, operational risk assessment, and auditing procedures that include regular SAS 70 Type II reviews. Regular penetration testing and ethical hacking tests are performed.

The procedures for implementing application-level security are defined in the *Configuration Guides*. The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

Software Services

IBM Software Services has the breadth, depth, and reach to manage your services needs. You can leverage the deep technical skills of our lab-based, software services team and the business consulting, project management, and infrastructure expertise of our IBM Global Services team. We provide the global reach, intellectual capital, industry insight, and technology leadership to support a wide range of critical business needs.

Charge metric

Program name	Part number or PID number	Charge metric
IBM Sterling B2B Services - Collaboration Network	5725-E36	Connection Copy Document Entity ID File Gigabyte Kilo Character Mailslot Map PIP Request
IBM IBM Sterling Data Synchronization Manager	5725-E37	SKU
IBM Sterling Web Forms	5725-E39	Entity ID

Connection

Connection is a unit of measure by which the IBM SaaS can be obtained. A Connection is a link or association of a database, application, server, or any other type of device to the IBM SaaS. Sufficient entitlements must be obtained to cover the total number of Connections which have been or are made to the IBM SaaS during the measurement period specified in Customer's Proof of Entitlement (PoE) or Transaction Document.

Copy

Copy is a unit of measure by which the IBM SaaS can be obtained. A Copy is a complete transaction that is duplicated and sent to one or more mailboxes. Sufficient entitlements must be obtained to cover the total number of Copies sent through the IBM SaaS during the measurement period specified in Customer's Proof of Entitlement (PoE) or Transaction Document.

Document

Document is a unit of measure by which the IBM SaaS can be obtained. A Document is defined as a finite volume of data that is enveloped within a document header and trailer record that marks its beginning and end. Sufficient entitlements must be obtained to cover the total number of Documents processed by the IBM SaaS during the measurement period specified in Customer's Proof of Entitlement (PoE) or Transaction Document.

Entity ID

Entity ID is a unit of measure by which the IBM SaaS can be obtained. An Entity ID is a unique identifier which may be referred to in the SaaS environment by different terms that may include, but would not be limited to, Client ID, customer ID, partner ID, supplier ID, vendor ID or EDI ID within the IBM SaaS. Sufficient entitlements must be obtained to cover the number of Entity IDs identified in the IBM SaaS during the measurement period specified in Customer's Proof of Entitlement (PoE) or Transaction Document.

File

File is a unit of measure by which the IBM SaaS can be obtained. A File is one or more data, information or program records bundled together with a specific name. Sufficient entitlements must be obtained to cover the total number of Files processed by the IBM SaaS during the measurement period specified in Customer's Proof of Entitlement (PoE) or Transaction Document.

Gigabyte

Gigabyte is a unit of measure by which the IBM SaaS can be obtained. A Gigabyte is defined as 2 to the 30th power bytes of data (1,073,741,824 bytes). Sufficient entitlements must be obtained to cover the total number of Gigabytes processed by the IBM SaaS during the measurement period specified in Customer's Proof of Entitlement (PoE) or Transaction Document.

Kilo Character

Kilo Character is a unit of measure by which the IBM SaaS can be obtained. A Kilo Character is one thousand bytes. Sufficient entitlements must be obtained to cover the total number of Kilo Characters processed by the IBM SaaS during the measurement period specified in Customer's Proof of Entitlement (PoE) or Transaction Document.

Mailslot

Mailslot is a unit of measure by which the IBM SaaS can be obtained. A mailslot is a location to drop off or pick up data within the IBM SaaS. Sufficient entitlements must be obtained to cover the total number of mailslots managed within the IBM SaaS during the measurement period specified in Customer's Proof of Entitlement (PoE) or Transaction Document.

Map

Map is a unit of measure by which the IBM SaaS can be obtained. A Map is an electronic correlation that is used during the run-time of a transaction that determines what to do with source data fields to make them understandable by the recipient of the data. Sufficient entitlements must be obtained to cover the total number of Maps provided by the IBM SaaS that transform input data into something

that is understood on the output side during the measurement period specified in Customer's Proof of Entitlement (PoE) or Transaction Document.

PIP

PIP (Partner Interface Process) is a unit of measure by which the IBM SaaS can be obtained. A PIP is an orchestration of transactions into a business process. There are one-way, two-way, and three-way PIPs, each of which is considered a single PIP unit. The term "way" designates how many individual transactions it takes to make up the process. Sufficient entitlements must be obtained to cover the total number of PIPs that are processed by the IBM SaaS during the measurement period specified in Customer's Proof of Entitlement (PoE) or Transaction Document.

Request

Request is a unit of measure by which the IBM SaaS can be obtained. A Request is the act by the client that authorized IBM to perform a service. Depending upon the service, the Request can be in the form of a written notice or a support request which is made by phone call, email or online case. Sufficient entitlements must be obtained to cover the total number of Requests submitted to the IBM SaaS during the measurement period specified in Customer's Proof of Entitlement (PoE) or Transaction Document.

Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents, such as the IBM International Passport Advantage Agreement and the IBM SaaS Terms of Use Agreement.

Subscription

This offering requires a customer-signed IBM International Passport Agreement and IBM SaaS Terms of Use Agreement. The Terms of Use agreement outlines the terms of this offering.

Technical support

Technical support is included with subscriptions purchased through Passport Advantage and Passport Advantage Express® and is provided for this IBM SaaS offering and Enabling Software, as applicable, during the Subscription Period as set forth in their Terms of Use Agreement. For details and to request support, visit

https://customer.sterlingcommerce.com/group/sterling/support_center

Technical support is included with the IBM SaaS and is not available as a separate offering.

Terms of Use

The Terms of Use documents for these offerings are available on the IBM Software as a Service Terms of Use website

<http://www.ibm.com/software/sla/sladb.nsf/sla/tou>

Limited warranty applies

Yes

Limited warranty

IBM warrants that IBM SaaS will conform to the specifications contained in the Terms of Use. Such specifications may be supplied only in the English language, unless required by local law, without the possibility of contractual waiver or limitation. The warranty will not apply to the extent that there has been misuse, accident, modification, unsuitable physical or operating environment, or improper maintenance by customer of a third party, or failure or damage caused by a product for which IBM is not responsible. IBM does not warrant uninterrupted or error-free operation of the service or that IBM will correct all service defects. You are responsible for the results obtained from the use of the service.

IBM Global Financing

IBM Global Financing offers competitive financing to credit-qualified customers to assist them in acquiring IT solutions. Offerings include financing for IT acquisition, including hardware, software, and services, from both IBM and other manufacturers or vendors. Offerings (for all customer segments: small, medium, and large enterprise), rates, terms, and availability can vary by country. Contact your local IBM Global Financing organization or visit

<http://www.ibm.com/financing>

IBM Global Financing offerings are provided through IBM Credit LLC in the United States, and other IBM subsidiaries and divisions worldwide to qualified commercial and government customers. Rates are based on a customer's credit rating, financing terms, offering type, equipment type, and options, and may vary by country. Other restrictions may apply. Rates and offerings are subject to change, extension, or withdrawal without notice.

Financing from IBM Global Financing helps you preserve cash and credit lines, enables more technology acquisition within current budget limits, permits accelerated implementation of economically attractive new technologies, offers payment and term flexibility, and can help match project costs to projected benefits. Financing is available worldwide for credit-qualified customers.

For more financing information, visit
