At a glance

IBM® InfoSphere® Master Data Management V10:

- Unifies three market-leading master data management (MDM) offerings: InfoSphere Master Data Management Server, Initiate Master Data Service®, and InfoSphere Master Data Management Collaboration Server.
- Uses common matching and linking technology and integration among leading MDM engines. The common probabilistic matching engine means matching is now standardized across IBM InfoSphere Master Data Management and the solution employs advanced statistical techniques and methods to resolve and manage data quality issues.
- Uses a common application toolkit for UI generation and development. Organizations can create new lightweight MDM-powered applications that are specifically designed to manage newly accessible data and are the best way to increase the value of MDM. These applications are easily customizable to meet individual customer requirements.
- Includes IBM Business Process Manager (BPM) Express® in the Standard, Advanced, and Enterprise editions to improve data quality through capabilities necessary to implement and coordinate multi-step and multi-role workflow for data stewardship and data governance.

Overview

InfoSphere Master Data Management V10 is the most complete, proven, and powerful operational MDM solution on the market and includes transaction-oriented MDM, collaborative authoring, and workflow capabilities to handle all domains, implementation styles, and use cases across all industries. This single offering can be purchased via four separate editions:

- InfoSphere Master Data Management Enterprise Edition: Addresses your MDM needs with a single comprehensive solution.
- InfoSphere Master Data Management Advanced Edition: Helps you strategically transform your organization through improved business processes and applications.
- InfoSphere Master Data Management Standard Edition: Delivers business value for MDM projects with quick time to value.

- InfoSphere Master Data Management Collaborative Edition: Streamlines workflow activities across users who are involved in authoring and defining master information.

In addition to the unified packaging, IBM InfoSphere Master Data Management V10 contains significant enhancements that include:

- Adaptive Services Interface (ASI) designed to make it easier and faster to integrate MDM services to support predefined interfaces for compute-intensive applications and business processes. The ASI also enables easy publishing and lookup of MDM services via service registry from processes and applications.
- Simplification features to streamline implementation options and accelerate the overall time to value, helping to decrease the time to go live for an MDM project and lower total cost of ownership.
- InfoSphere Global Name Management to manage, search, analyze, and compare multicultural name data sets by leveraging culture-specific name data and linguistic rules that are associated with the name's culture.
- Support of direct party-product relationships, along with a set of ready-to-use services, for use by business processes and applications. By having a comprehensive view of party-product relationships out-of-the-box, additional use cases can be implemented with less effort and customization. This can help reduce risk and achieve faster time to value.

For information regarding upgrades, migrations, and trade ups, refer to the [Description](#) section.

To order, contact your IBM representative, an IBM Business Partner, or the Americas Call Centers at: 800-IBM-CALL Reference: YE001

Key prerequisites

Refer to the [Hardware requirements](#) and [Software requirements](#) sections.

Planned availability date

- November 4, 2011: Electronic availability
- December 2, 2011: Media availability

Description

InfoSphere Master Data Management V10

Key functionality includes:

- Support for MDM implementation styles: Virtual master registry, hybrid, centralized physical master repository, and collaborative authoring.
- Support for master data domains: Party, product, account, financial, location, and custom domains.
- Support for MDM use cases: Operational, analytical, real-time, and batch.
- Support for a wide set of industries: Banking, insurance, retail, telecommunications, government, healthcare, and so on.
- MDM-powered applications: Rapidly deliver business value with governance applications through pre-built blue prints and widgets for embedding within existing applications.
- Business services: Enable business processes to easily leverage master data with a library of pre-built services.
- InfoSphere integration: Pre-built integration with InfoSphere DataStage® and InfoSphere QualityStage™.

- Data models: Pre-built and extensible for any domain; optimized for MDM; import existing data models; build data models from scratch.
- Probabilistic Matching Engine: A highly accurate matching and record comparison capability.
- Governance and stewardship user interfaces: Inspect and resolve data quality issues in real time, including relationships and hierarchies; author and edit the "golden record".
- Data quality: Native capabilities for the cleansing, matching, linking, and semantic reconciliation of master data from different data sources to create and maintain the golden record.
- MDM workflow: Uses IBM BPM Express in the Standard, Advanced, and Enterprise editions to improve data quality through capabilities necessary to implement and coordinate multi-step and multi-role workflow for data stewardship and data governance.
- Reporting: Pre-built and ad-hoc customized reports.
- Loading: Multiple flexible options for loading master data. Data can be loaded via business services in batch or real time .
- Integration: Designed to run in a heterogeneous environment, but is also pre-integrated with IBM products.
- Synchronization: Maintains keys on master data held within other systems for all objects and attributes within the MDM hub. Imports and exports with deltas and versioning.
- Performance and scalability: Designed to support large transaction loads and high-availability operational environments.
- Collaborative authoring: Workflows for collaborative authoring tasks.
- Extendable authoring UI: Business user interface for authoring and search.
- Security: Addresses multiple aspects of security relevant to an MDM implementation, including logging, authentication and access control, privacy and preference management, and auditing.

Product positioning

For organizations challenged with business processes that are ineffective, inefficient, costly, or that increase business risk due to poor quality data, InfoSphere Master Data Management V10 is a comprehensive, proven, and powerful operational MDM solution.

Including both transaction-oriented MDM and collaborative authoring and workflow capabilities, InfoSphere Master Data Management can be used to create trusted views of your data assets and elevate the effectiveness of your most important business processes and applications. It can help improve business results, lower costs, reduce risk, and enable strategic agility to meet current and future business needs.

For business and IT leaders who use a BPM platform to streamline and gain visibility into their processes, master data management provides the increased level of data accuracy that is needed for critical and timely decision making.

InfoSphere Master Data Management is:

- **Comprehensive:** Offers deep and broad capabilities to address existing and emerging business requirements, including all domains, use cases, implementation styles, and workflow for collaborative authoring. Your option is to purchase prebuilt and modifiable capabilities or a build-it-yourself platform that is capable of supporting your entire enterprise information management and integration architecture rather than just one component of it.
- **Proven:** IBM has 600+ customers and long-standing MDM customer relationships for 10+ years, helping to lower your risk. IBM is an MDM leader in banking, insurance, retail, healthcare, and government.
- **An ideal solution for real-time processes:** The focus is on active, real-time usage of master data within applications and business processes through MDM business services and MDM-powered application UI generation. By including IBM BPM Express to implement and coordinate multi-step and multi-role workflow for data stewardship and data governance, the offering enables common tooling and run time between enterprise and data-centric processes.
- **Quick time to value:** IBM offers a fast, low-cost deployment for each MDM architectural implementation style.

Specified operating environment

Hardware requirements

InfoSphere Master Data Management Server

The information in this section is for InfoSphere Master Data Management Server only and is supplied for guidance only. If you run other applications on the same system, make adjustments accordingly. For complete hardware requirement information, refer to the InfoSphere Master Data Management Server Installation Guide and the readme document.

InfoSphere Master Data Management Server V10 for AIX® and WebSphere® Application Server

- Operating system
 - AIX 6.1 TL07
 - AIX 7.1 SP03
- RAM: 8 GB
- Disk space: 72 GB

InfoSphere Master Data Management Server V10 for Sun Solaris and Oracle WebLogic Server

- Operating system: Solaris 10 Release 9 and 10

- RAM: 8 GB
- Disk space: 72 GB

The hardware requirements for InfoSphere Master Data Management Server may be occasionally updated. To obtain the most current information for supported hardware, visit

Initiate Master Data Service

There are numerous aspects to consider when determining hardware for Initiate Master Data Service and Master Data Engine. Consult your IBM Initiate Systems® representative or your IBM Business Partner for sizing and architecture recommendations that best fit your business and technology requirements.

InfoSphere Master Data Management Collaboration Server

The exact configuration you need to support your environment with satisfactory performance will vary, depending on multiple factors such as server speed, memory, disk I/O, data volumes, and network and server workload. The minimum recommended configurations listed below need to be evaluated and adjusted according to your unique requirements and the complexity of the InfoSphere Master Data Management Collaboration Server solution.

Disk space recommendations are for the product installation and working space only. The actual hard disk space required varies, depending upon your installation.

Application server

- A minimum of two to four processor cores (based on CPU type and speed)
- 6 GB of RAM
- 50 GB of disk space

Database server

- A minimum of four processor cores
- 8 GB of RAM
- 100 to 200 GB of disk space in a RAID configuration

Additional server requirements include:

- Additional CPUs may be required based on capacity requirements.
- Additional memory may be required based on capacity requirements.
- Additional servers may be required for added capacity and redundancy.
- Multi-server installations require network-attached shared storage.

Client system

Minimum recommended system requirements for client access to InfoSphere Master Data Management Collaboration Server include:

- x86-based system with a standard business configuration
- 2.1 GHz processor
- 2 GB of RAM for Windows™ XP; 3 GB of RAM for Windows 7

For the most current and complete information on hardware requirements, visit

http://www.ibm.com/software/data/infosphere/mdm_server_pim/requirements.html

Software requirements

InfoSphere Master Data Management Server

The minimum software requirements listed in this section are for InfoSphere Master Data Management Server only and are supplied for guidance only. If you run other applications on the same system, make adjustments accordingly. For complete software requirements, including information about client software, optional software, and supporting infrastructure software, refer to the InfoSphere Master Data Management Server Installation Guide and the readme document.

InfoSphere Master Data Management Server V10 for AIX and WebSphere Application Server

- Application server: WebSphere Application Server V7.0
- Database - one of the following:
 - DB2® Enterprise Server Edition V9.7
 - DB2 pureScale® Feature for Enterprise Server Edition V9.8
 - DB2 for z/OS®, V9.1
 - DB2 for z/OS, V10.1
 - Oracle Database 11g Enterprise Edition Release 2 (Fix Pack 11.2)
- Messaging: WebSphere MQ 7.0.1

InfoSphere Master Data Management Server V10 for Sun Solaris and Oracle WebLogic Server

- Application server: Oracle WebLogic Server 11gR1 (10.3.4)
- Database: Oracle Database 11g Enterprise Edition Release 2 (Fix Pack 11.2)
- Messaging: WebSphere MQ 7.0.1

The software requirements for InfoSphere Master Data Management Server may be occasionally updated. To obtain the most current information for supported software, contact IBM Support or visit

http://www-306.ibm.com/software/data/infosphere/mdm_server/requirements.html

Initiate Master Data Service

Initiate Master Data Service software requirements include:

Operating system (all 64-bit)	Chipset	Databases
AIX V6.1 and V7.1	Power® PC	DB2 UDB V9.5 and V9.7 Oracle 10g and 11g
Microsoft Windows Server 2008 R2	AMD64, Intel64	DB2 UDB V9.5 and V9.7 SQL Server 2005, 2008 Oracle 10g and 11g
Red Hat Enterprise Linux™ 5.0 and 6.0	AMD64, Intel64	DB2 UDB V9.5 and V9.7
Enterprise SUSE Linux 11	AMD64, Intel64	Oracle 10g and 11g DB2 UDB V9.5 and V9.7 SQL Server 2005, 2008
Solaris Sparc 10	SuperSPARC	Oracle 10g and 11g DB2 UDB V9.5 and V9.7

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a readme file, or other information published by IBM, such as an announcement letter. Documentation and other program content may be supplied only in the English language.

InfoSphere Master Data Management Collaboration Server

InfoSphere Master Data Management Collaboration Server V10.0 runs on a variety of operating systems.

Server

- IBM AIX 6.1 and 7.1 (IBM Power Systems)
- Red Hat Enterprise Linux AS 5.0 Advanced Platform Power Systems™
- Red Hat Enterprise Linux AS 5.0 Advanced Platform x86 (32-bit and 64-bit)
- Sun Solaris 10 SPARC

Client

- Microsoft™ Windows XP Professional with Internet Explorer

For the most current and complete information on software requirements, visit

http://www.ibm.com/software/data/infosphere/mdm_server_pim/requirements.html

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a README file, or other information published by IBM, such as an announcement letter. Documentation and other program content may be supplied only in the English language.

Companion products

The Standard Edition, Advanced Edition, Enterprise Edition, and Custom Domain Hub Companion Standalone bundle include an additional licence to use IBM BPM Express 7.5 for MDM workflows.

- Operating system
 - Microsoft Windows Server 2008 R2
 - Red Hat Enterprise Linux AS 5.0 Advanced Platform x86 (32-bit and 64-bit)
 - Enterprise SuSE Linux 11
 - Microsoft Windows XP, Windows Vista, and Windows 7 (for use with development and testing only)
- Database servers
 - IBM DB2 Enterprise Server Edition V9.5 and V9.7
 - IBM DB2 Express Server Edition V9.7
 - Oracle 11g and 11g R2
 - Microsoft SQL Server 2005, 2008, and 2008 R2

For AIX operating system support, high availability clustering, or additional capacity over the restricted-use copy of BPM, separate licenses are required of IBM BPM Standard Edition V7.5 or IBM BPM Advanced Edition V.5.

Planning information

Packaging

InfoSphere Master Data Management packages are available both electronically and on physical DVD media.

IBM InfoSphere Master Data Management Standard Edition

- InfoSphere MDM Product Documentation

IBM InfoSphere Master Data Management Custom Domain Hub Stand Alone

- InfoSphere MDM Custom Domain Hub Quick Start Guide
- InfoSphere MDM Custom Domain Hub for WebSphere Application Server for multiplatform
- InfoSphere MDM Custom Domain Hub for Oracle WebLogic Server for multiplatform
- InfoSphere MDM Application Toolkit
- InfoSphere MDM Product Documentation

Collaborative Edition and Custom Domain Hub Stand Alone bundle with the following software:

- IBM DB2 Enterprise Server Edition V9.7
- WebSphere Application Server Network Deployment V7.0
- WebSphere MQ V7.0.1
- WebSphere Portal Server 7.0
- IBM Content Integrator 8.6
- IBM Tivoli® Directory Server V6.3
- IBM Rational® Software Architect V8.0.3

- IBM Cognos® Business Intelligence V10.1 components
- IBM InfoSphere Blueprint Director V2.0.1

The Standard Edition, Advanced Edition, and Enterprise Edition bundle include all of the above software plus the following:

- IBM Business Process Manager (BPM) Express 7.5

Security, auditability, and control

InfoSphere MDM uses the security and auditability features of the host hardware or software.

The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

Charge metrics definitions

Processor Value Unit (PVU)

PVU is a unit of measure by which the Program can be licensed. The number of PVU entitlements required is based on the processor technology and the number of processors made available to the Program. The processor technology is defined within the PVU Table by Processor Value, Brand, Type, and Model Number at

http://www.ibm.com/software/lotus/passportadvantage/pvu_licensing_for_customers.html

IBM continues to define a processor, for the purpose of PVU-based licensing, to be each processor core on a chip. For example, a dual-core processor chip has two processor cores.

Licensee can deploy the Program using either Full Capacity licensing or Virtualization Capacity (Sub-Capacity) licensing according to the Passport Advantage Sub-Capacity Licensing Terms (see webpage below). If using Full Capacity licensing, Licensee must obtain PVU entitlements sufficient to cover all activated processor cores* in the physical hardware environment made available to or managed by the Program, except for those servers from which the Program has been permanently removed. If using Virtualization Capacity licensing, Licensee must obtain entitlements sufficient to cover all activated processor cores made available to or managed by the Program, as defined according to the Virtualization Capacity License Counting Rules at

http://www.ibm.com/software/lotus/passportadvantage/Counting_Software_licenses_using_specific_virtualization_technologies.html

* An Activated processor core is a processor core that is available for use in a physical or virtual server, regardless of whether the capacity of the processor core can be or is limited through virtualization technologies, operating system commands, BIOS settings, or similar restrictions.

Note 1: Some programs may require licenses for the Program AND what is being managed. In that case, in addition to the entitlements required for the Program directly, Licensee must obtain PVU entitlements for this Program sufficient to cover the processor cores managed by the Program.

Note 2: Some programs may be licensed on a managed basis ONLY. In that case, instead of the entitlements required for the Program directly, Licensee must obtain PVU entitlements for this Program sufficient to cover the processor cores managed by the Program.

Note 3: A few programs on an exception basis may be licensed on a referenced basis. In that case, rather than obtaining entitlements for the activated processor cores available to the Program, Licensee must obtain PVU entitlements for this Program sufficient to cover the environment made available to the Referenced Program as if the Program itself were executing everywhere the Referenced Program was executing, independent of the basis on which the referenced Program is licensed.

Note 4: Express and Workgroup programs may be licensed with maximum use terms. In that case, the maximum authorized use terms and conditions for PVU licensed IBM Express and middleware programs can be found in the *IBM Express and Middleware Licensing Guide*.

Note 5: IBM InfoSphere Master Data Management Custom Domain Hub Stand Alone is licensed on a PVU basis.

Note 6: IBM BPM Express is licensed on a PVU basis. The bundled restricted-use copy of IBM BPM Express includes the following restrictions:

- A maximum of 120 PVUs of the IBM Process Center
- A maximum of 240 PVUs of the IBM Process Server
- A maximum of 200 authorized users for IBM Process Server
- A maximum of two authorized users for IBM Process Designer

Resource Value Unit (RVU)

RVU is the unit of measure by which this program is licensed. RVU entitlements are based on the quantity of a specific designated measurement for the given program. A Proof of Entitlement (PoE) must be obtained for the appropriate number of RVUs required for your environment as defined by the specific program terms. The RVU entitlements are specific to the program and may include, but are not limited to the following: Client Devices, data source records, messages, and servers, and may

not be exchanged, interchanged, or aggregated with RVU entitlements of another program. To understand these benefits of RVU licensing, and to determine how many RVUs to obtain for the program, contact your IBM representative.

Note: All chargeable components, except IBM InfoSphere Master Data Management Custom Domain Hub Stand Alone, are licensed on an RVU basis.

Cross-platform products

Cross-platform products for use on System z

Order the part numbers that follow when the product is used for either the development of code that will be deployed on System z servers or when the product will be communicating or transferring data between a distributed server and a System z server. Otherwise order from the other set of part numbers in this announcement. This set of part numbers provides the identical supply and authorization as the other set in this announcement

Cross-platform product for use on System z IFL engines

Order the part numbers that follow when the product is intended to run on the Linux operating system on System z IFL engines. If the product is not intended to run on the Linux operating system on System z IFL engines, order from the other set of part numbers in this announcement. This set of part numbers provides the identical supply and authorization as the other set in this announcement.

Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

Licensing

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use.

Part number products only, offered outside of Passport Advantage, where applicable, are license only and do not include Software Maintenance.

License Information form numbers

Program name	Form number
InfoSphere Master Data Management Application Toolkit v10.0	L-JLII-8KUUVN
InfoSphere Master Data Management Collaborative Edition v10.0	L-JLII-8KUULB
InfoSphere Master Data Management Enterprise Edition v10.0	L-JLII-8KUUFN
InfoSphere Master Data Management Advanced Edition v10.0	L-JLII-8ECSPF
InfoSphere Master Data Management Standard Edition v10.0	L-JLII-8ECSG9
InfoSphere Master Data Management Custom Domain Hub Stand Alone v10.0	L-JLII-8ECS94

The program's License Information is available for review on the IBM Software License Agreement website at

<http://www.ibm.com/software/sla/sladb.nsf>

Limited warranty applies

Yes

Money-back guarantee

For clarification, note that if for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

For clarification, note that for programs acquired under the IBM International Passport Advantage Agreement, this term applies only to your first acquisition of the program.

Volume orders (IVO)

No

Passport Advantage applies

Yes, and through the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

This product is only available via Passport Advantage. It is not available as shrinkwrap.

Usage restriction

Yes. Refer to the License Information document that is available on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

IBM Operational Support Services - SoftwareXcel

No

System i Software Maintenance applies

No

Educational allowance available

Not applicable.

Prices

IBM Global Financing

IBM Global Financing offers competitive financing to credit-qualified customers to assist them in acquiring IT solutions. Offerings include financing for IT acquisition, including hardware, software, and services, both from IBM and other manufacturers or vendors. Offerings (for all customer segments: small, medium, and large enterprise), rates, terms, and availability can vary by country. Contact your local IBM Global Financing organization or visit

<http://www.ibm.com/financing>

IBM Global Financing offerings are provided through IBM Credit LLC in the United States, and other IBM subsidiaries and divisions worldwide to qualified commercial and government customers. Rates are based on a customer's credit rating, financing terms, offering type, equipment type, and options, and may vary by country. Other restrictions may apply. Rates and offerings are subject to change, extension, or withdrawal without notice.

Financial benefit

Financing from IBM Global Financing helps you preserve cash and credit lines, enables more technology acquisition within current budget limits, permits accelerated implementation of economically attractive new technologies, offers payment and term flexibility, and can help match project costs to projected benefits. Financing is available worldwide for credit-qualified customers.

Order now

To order, contact the Americas Call Centers or your local IBM representative, or your IBM Business Partner.

To identify your local IBM representative or IBM Business Partner, call 800-IBM-4YOU (426-4968).

Phone: 800-IBM-CALL (426-2255)
Fax: 800-2IBM-FAX (242-6329)

Note: Shipments will begin after the planned availability date.

IBM Software ValueNet

These products are available under IBM Software ValueNet, either directly from IBM or through authorized Business Partners who invest in skills and high value solutions. IBM customers may benefit from the industry-specific or horizontal solutions, skills and expertise provided by these Business Partners.

Additions to Software ValueNet will be communicated through standard product announcements. For a current list of IBM software available under Software ValueNet, visit

http://www-01.ibm.com/software/lotus/passportadvantage/IBM_SW_ValueNet.html

Questions regarding IBM Software ValueNet may be sent to AskSoftwareValueNet@us.ibm.com

Trademarks

QualityStage, Power Systems and zEnterprise are trademarks of IBM Corporation in the United States, other countries, or both.

IBM, InfoSphere, Initiate Master Data Service, Express, DataStage, Passport Advantage, AIX, WebSphere, Initiate Systems, DB2, pureScale, z/OS, Tivoli, Rational, Cognos, ValueNet, BladeCenter, System z and ibm.com are registered trademarks of IBM Corporation in the United States, other countries, or both.
