Overview

The new 2 TB 7.2K 3.5-inch 6Gb Nearline (NL) SAS HDD replaces the former option for IBM® System Storage® DS3500 Express Storage™ Systems.

Key prerequisites

This 2 TB 7,200 rpm 3.5-inch 6Gb NL SAS HDD:

- Is supported on DS3512 Express Storage Systems and EXP3512 Expansion Units
- Requires controller firmware level 07.77, or later
- Requires DS Storage Manager 10.77, or later

Planned availability date

August 24, 2012

Description

2 TB 7.2K 3.5-inch NL disk drive feature is a single large form factor 7,200 rpm, archival-class nearline SAS drive appropriate for storing large amounts of data.

**Services**

**Global Technology Services**

IBM services include business consulting, outsourcing, hosting services, applications, and other technology management.

These services help you learn about, plan, install, manage, or optimize your IT infrastructure to be an On Demand Business. They can help you integrate your high-speed networks, storage systems, application servers, wireless protocols, and an array of platforms, middleware, and communications software for IBM and many non-IBM offerings. IBM is your one-stop shop for IT support needs.

**Technical information**

**Specified operating environment**

**Hardware requirements**

2 TB 7,200 rpm 3.5-inch 6Gb NL SAS HDD:

- Is supported on DS3512 Express Storage Systems and EXP3512 Expansion Units
- Requires controller firmware level 07.77, or later
- Requires DS Storage Manager 10.77, or later

**Planning information**

**Cable orders**

No cables required.

**Security, auditability, and control**

This product uses the security and auditability features of host hardware.

The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communications facilities.
Global Technology Services

Contact your IBM representative for the list of selected services available in your country, either as standard or customized offerings, for the efficient installation, implementation, and/or integration of this product.

IBM Electronic Services

IBM has transformed its delivery of hardware and software support services to help you achieve higher system availability. Electronic Services is a web-enabled solution that offers an exclusive, no-additional-charge enhancement to the service and support available for IBM servers. These services are designed to provide the opportunity for greater system availability with faster problem resolution and preemptive monitoring. Electronic Services comprises two separate, but complementary, elements: Electronic Services news page and Electronic Services Agent.

The Electronic Services news page is a single Internet entry point that replaces the multiple entry points traditionally used to access IBM Internet services and support. The news page enables you to gain easier access to IBM resources for assistance in resolving technical problems.

The Electronic Service Agent™ is no-additional-charge software that resides on your server. It monitors events and transmits system inventory information to IBM on a periodic, client-defined timetable. The Electronic Service Agent automatically reports hardware problems to IBM. Early knowledge about potential problems enables IBM to deliver proactive service that may result in higher system availability and performance. In addition, information collected through the Service Agent is made available to IBM service support representatives when they help answer your questions or diagnose problems. Installation and use of IBM Electronic Service Agent for problem reporting enables IBM to provide better support and service for your IBM server.

Terms and conditions

**Field installable feature**

Yes

**Warranty period**

Three years

An IBM part or feature installed during the initial installation of an IBM machine is subject to a full warranty effective on the date of installation of the machine. An IBM part or feature that replaces a previously installed part or feature assumes the remainder of the warranty period for the replaced part or feature. An IBM part or feature added to a machine without replacing a previously installed part or feature is subject to a full warranty effective on its date of installation. Unless specified otherwise, the warranty period, type of warranty service, and service level of a part or feature are the same as those for the machine in which it is installed.

**Customer setup**

Yes

**Machine code**
Same license terms and conditions as base machine

Pricing
