At a glance

Imagine Solutions Encapture:

- Includes centralized administration, control, and security for scanned documents.
- Helps make complex document capture processes intuitive with integration to the touch screen interface on many leading multifunction devices or through the capture wizard for desktop capture.
- Utilizes IBM® Datacap Taskmaster for image processing

Overview

Imagine Solutions Encapture enables organizations to support central, distributed, and remote (beyond company firewall) capture. It provides central administration, support for a broad range of scanning devices, and can be tightly integrated into the processes, applications, and repositories that drive your business. Imagine Solutions Encapture utilizes IBM Datacap Taskmaster Capture for image processing. Captured documents may be exported to IBM Datacap Taskmaster Capture or IBM FileNet® Content Manager. Imagine Solutions Encapture helps reduce costs and error rates, helps accelerate business processes, helps enhance satisfaction, and helps improve compliance performance.

Imagine Solutions Encapture components:

- Imagine Solutions Encapture -- MFP Client
- Imagine Solutions Encapture -- Web Client
- Imagine Solutions Encapture -- Windows™ Integration Client
- Imagine Solutions Encapture -- Delivery Service
- Imagine Solutions Encapture -- Discovery Service
- Imagine Solutions Encapture -- Delivery Connectors
- Imagine Solutions Encapture -- Process Service

Key prerequisites

Refer to Hardware requirements and Software requirements sections.
Planned availability date

October 8, 2013: Electronic availability
October 8, 2013: Media availability

Description

Imagine Solutions Encapture features:

- Device clients that enable ad-hoc capture and preview through touch screen for many leading multifunction (MFD and MFP) and scanning devices as well as Microsoft™ Outlook and Microsoft Office integration. You can use devices from Canon, Lanier, Lexmark, HP, Ricoh, Savin, and Xerox.
- The ability to launch document requests and capture processes directly out of your business applications.
- Encryption of content at the point of capture that secures your information both in flight and at rest.
- An audit trail of all content and its disposition that provides content traceability.
- Ability to use IBM Datacap Taskmaster Capture for advanced capture processing of document images. Datacap Taskmaster Capture may be used to clean up images, perform recognition of data, and automatically classify documents in context with the content.
- Support for delivery of batches of documents to IBM Datacap Taskmaster Capture and IBM FileNet Content Manager.

Imagine Solutions Encapture components

Imagine Solutions Encapture -- MFP Client provides users with an easy-to-use capture and index touch screen for MFP devices. The MFD client supports devices from Canon, Lanier, Lexmark, HP, Ricoh, Savin, and Xerox.

Imagine Solutions Encapture -- Web Client provides users with web-based capture and indexing from locally attached TWAIN devices or the Windows File System. This client can be rebranded to fit your needs.

Imagine Solutions Encapture -- Windows Integration Client is a bundle for Microsoft Windows users that includes Microsoft Windows Explorer integration, Microsoft Office integration, Document Request (request user to submit specific documents), and Print-to-Encapture.

Imagine Solutions Encapture -- Delivery Service packages up all batch data and images, and presents them to the target system such as IBM Datacap Taskmaster Capture and IBM FileNet Content Manager.

Imagine Solutions Encapture -- Discovery Service is responsible for importing batches, which originate from an external system such as fax servers, email servers, and non-Encapture capture applications into Encapture.

Imagine Solutions Encapture -- Delivery Connectors delivers images to a target system. Standard delivery connectors are available for IBM Datacap Taskmaster Capture and IBM FileNet Content Manager. Contact Imagine Solutions for information about other delivery connectors.

http://www.imaginesolutions.com

Imagine Solutions Encapture -- Process Service uses IBM Datacap Taskmaster Capture to perform image cleanup (for instance, line removal), data extraction using ICR and OCR, and document classification using various Datacap Taskmaster Capture technologies.
**Product positioning**

Imagine Solutions Encapture provides a secure, customizable, and brandable capture solution that may be used with IBM Datacap Taskmaster Capture for image cleanup, data recognition, and document classification, or other IBM software such as FileNet Content Manager. The solution is particularly strong in the financial services (mortgage processing, account opening) and insurance industries, as well as state and local governments. Imagine Solutions Encapture is available in English and French.

**Publications**

No publications are shipped with this product.

The IBM Publications Center

http://www.ibm.com/shop/publications/order

The Publications Center is a worldwide central repository for IBM product publications and marketing material with a catalog of 70,000 items. Extensive search facilities are provided. Payment options for orders are via credit card (in the U.S.) or customer number for 20 countries. A large number of publications are available online in various file formats, and they can all be downloaded by all countries.

**Technical information**

**Specified operating environment**

**Hardware requirements**

For details about hardware requirements, visit

http://www.imaginesolutions.com/encapture/system-requirements
Software requirements
For details about software requirements, visit

http://www.imaginesolutions.com/encapture/system-requirements

The program's specifications and specified operating environment information may
be found in documentation accompanying the program, if available, such as a
readme file, or other information published by IBM, such as an announcement letter.
Documentation and other program content may be supplied only in the English
language.

Planning information

Customer responsibilities
All software license terms and technical support is provided by Imagine Solutions.
This is a third-party reseller offering and only supplier's support terms apply.

For more information, refer to the Imagine Solutions website at

http://www.imaginesolutions.com

Packaging
Software and documentation is provided via download.

Security, auditability, and control

Imagine Solutions Encapture uses the security and auditability features of the host
software.

The customer is responsible for evaluation, selection, and implementation of security
features, administrative procedures, and appropriate controls in application systems
and communication facilities.

**Charge metrics definitions**

**Install**

Install is a unit of measure by which the program can be licensed. An install is an installed copy of the program on a physical or virtual disk made available to be executed on a computer. Licensee must obtain an entitlement for each install of the program.

**Capture Station**

The MFP, Web and Windows Integration Client software is licensed per Client Capture Station. Client Capture Station is defined as a networked or stand-alone computer, multifunction peripheral, such as a device supporting scanning, copying or printing functions, or other computing device that may be used for content capture, validation, correction, classification, or indexing.

**Server**

Imagine Encapture Services for Delivery, Process and Discovery are licensed per server. Server is defined as a computer system that executes requested procedures, commands, or applications for one or more user or client devices. A license must be obtained for each server regardless of the number of processor cores or partitions in the server on which the program runs or each server managed by the program. Where blade technology is employed, each blade is considered a separate server.

**Target System**

Delivery Connectors are licensed per Target System regardless of how many instances of each Delivery Connector are deployed. Delivery connectors are available for IBM Datacap Taskmaster Capture and IBM FileNet Content Manager.

Terms and conditions

Statement of good security practices

IT system security involves protecting systems and information through prevention, detection, and response to improper access from within and outside your enterprise. Improper access can result in information being altered destroyed or misappropriated or can result in misuse of your systems to attack others. Without a comprehensive approach to security, no IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems and products are designed to be part of a comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products, or services to be most effective. IBM does not warrant that systems and products are immune from the malicious or illegal conduct of any party.
