At a glance

IBM® offers three VMware Horizon Suite components for use on IBM System x® and BladeCenter® servers:

• VMware Horizon View
• VMware Horizon Mirage
• VMware Horizon Workspace

Overview

VMware Horizon Suite, the platform for workforce mobility, connects users to their data and applications on most devices without sacrificing IT security and control. IT can transform technology silos of desktops, data, and applications into centralized IT services - and improve operational efficiency, security, and agility through policy-based management of those services. Improve workforce productivity by empowering users with a consistent experience across devices - in the office, at home, or on the go.

Horizon Suite empowers both IT and users with advantages that move the business forward:

• Lower the total cost of ownership of existing Microsoft® Windows® PCs and applications
• Provide robust and reliable end-user computing on any desktop, tablet, or smartphone
• Gain centralized physical and virtual desktop management governed by business policies
• Securely deliver Microsoft Windows, software as a service (SaaS), and web applications on any desktop or mobile device

Simplify

Managing individual endpoints is inefficient and costly in a complex environment. Streamline and simplify operations by turning disparate operating systems, applications, and data into centralized services delivered on most devices.
**Manage and secure**

Once end-user assets are transformed into centralized services, they can be managed, secured, backed up, and kept current from one place. Policy-driven access and delivery protect vital data and ensure compliance.

**Empower**

Mobile users need the freedom to choose the right device for each task and setting. Galvanize workforce productivity by delivering a consistent, intuitive, and collaborative computing experience across all devices - anytime, anywhere.

**VMware Horizon Suite components:**

**VMware Horizon View**

Simplify desktop management, security, and control while delivering an optimum end-user computing experience across most devices and networks.

**VMware Horizon Mirage**

Gain centralized, zero-touch physical and virtual desktop management with full native performance and flexibility for end users.

**VMware Horizon Workspace**

Streamline the end-user experience and reduce costs with a single workspace for applications and data, delivered securely on most devices.

Horizon Suites is licensed on a number of VMs basis. VMware Horizon Suites will come with 1-year, 3-year, and 5-year subscription options. As with all VMware software, support must be sold at the time of purchase with the license and subscription. IBM has a full suite of ServicePacs that can be purchased to support your needs.

**Key prerequisites**

Refer to the Technical information section.

**Planned availability date**

October 11, 2013

**Product positioning**

- VMware vSphere Essentials: Provides an all-in-one solution for small offices to consolidate and manage many application workloads while reducing hardware and operating costs with a low up-front investment.
- VMware vSphere Essentials Plus: Adds high application availability and data protection for a complete server consolidation and business continuity solution for the small office IT environment.
- VMware vSphere Standard: Offers basic consolidation of applications to slash hardware costs while accelerating application deployment.
- VMware vSphere Enterprise: Minimizes downtime, protects data, and automates resource management.
- VMware vSphere Enterprise Plus: Delivers the benefits of VMware vSphere and transforms your IT infrastructure into the next generation of flexible, reliable IT services.
• VMware Horizon Suite for user computing virtualization: Delivers a rich, personalized virtual user experience. Designed and built specifically for a mobile and collaborative workforce.
• VMware View for Desktop Virtualization: Delivers rich, personalized virtual desktops as a managed service from a virtualization platform built to deliver the entire desktop, not just applications.
• VMware vCloud Suite: Provides a complete integrated cloud infrastructure that simplifies the deployment and management of the cloud.
• vCenter Operations Management Suites: Delivers operational insight into virtual environments for monitoring, performance, and capacity management.
• vSphere Operations Management: Bundles vSphere with vCenter Operations Standard Edition to provide management capabilities to virtualized environments with attractive licensing.

Offering Information

Product information is available via the Offering Information website

http://www.ibm.com/common/ssi

Publications

No publications are shipped with these programs.

The Publications Center is a worldwide central repository for IBM product publications and marketing material with a catalog of 70,000 items. Extensive search facilities are provided. Payment options for orders are via credit card (in the US) or customer number for 20 countries. A large number of publications are available online in various file formats, and they can all be downloaded by all countries, free of charge.

New licensees

Program delivery
To order the programs described in this announcement, specify the type model number, order type description, one-time charge (OTC) feature number with quantity, and supply feature as indicated and listed in the tables below.
Except where noted, configuration aid ECMPWR must be used for creation of valid software and hardware orders for the offerings in this announcement as well as other referenced and affiliated announcement offerings.

Billing for the operating systems will occur under the licensed program order number contained in this announcement.

The licenses below are available for stand-alone purchase. To order these programs, specify the type model number, order type description, one-time charge (OTC) feature number with quantity, and supply feature number as indicated and listed in the tables below.

IBM Europe, Middle East, and Africa Software
Announcement ZP13-0363
IBM is a registered trademark of International Business Machines Corporation
Named User

Named User is a unit of measure by which the program can be licensed. A Named User is a unique person who is given access to the program. The program may be installed on any number of computers or servers and each Named User may have simultaneous access to any number of instances of the program at one time. Licensee must obtain separate, dedicated entitlements for each Named User given access to the program in any manner directly or indirectly (for example: via a multiplexing program, device, or application server) through any means. An entitlement for a Named User is unique to that Named User and may not be shared, nor may it be reassigned other than for the permanent transfer of the Named User entitlement to another person.

Concurrent User

Concurrent User is a unit of measure by which the program can be licensed. A Concurrent User is a person who is accessing the program at any particular point in time. Regardless of whether the person is simultaneously accessing the program multiple times, the person counts only as a single Concurrent User. The program may be installed on any number of computers or servers, but Licensee must obtain entitlements for the maximum number of Concurrent Users simultaneously accessing the program. Licensee must obtain an entitlement for each simultaneous Concurrent User accessing the program in any manner directly or indirectly (for example: via a multiplexing program, device, or application server) through any means.

Note: Some programs may be licensed where devices are considered users. In that case the following applies: Any computing device that requests the execution of or receives for execution a set of commands, procedures, or applications from the program or that is otherwise managed by the program is considered a separate user of the program and requires an entitlement as if that device were a person.

Virtual machine

A virtual machine is a virtual computer created by allocating a portion of the resources available to a physical server. Licensee must obtain virtual machine entitlements for each virtual machine managed by the program.

Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage® Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

Licensing

Supplier's license terms apply.

Limited warranty

Not warranted by IBM. Warranty, if any, provided by supplier.
**Volume orders**
Not applicable.

**Educational allowance**
Yes. 15% to qualified educational institutions.

**Statement of good security practices**

IT system security involves protecting systems and information through prevention, detection, and response to improper access from within and outside your enterprise. Improper access can result in information being altered destroyed or misappropriated or can result in misuse of your systems to attack others. Without a comprehensive approach to security, no IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems and products are designed to be part of a comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products, or services to be most effective. IBM does not warrant that systems and products are immune from the malicious or illegal conduct of any party.

**Prices**

For all local charges, contact your IBM representative.

**Announcement countries**

All European, Middle Eastern, and African countries except Iran, Sudan, and Syria.

**Trademarks**

IBM, System x, BladeCenter, ServerProven, Global Technology Services and Passport Advantage are registered trademarks of IBM Corporation in the United States, other countries, or both.

Microsoft and Windows are trademarks of Microsoft Corporation in the United States, other countries, or both.

Other company, product, and service names may be trademarks or service marks of others.

**Terms of use**

IBM products and services which are announced and available in your country can be ordered under the applicable standard agreements, terms, conditions, and prices in effect at the time. IBM reserves the right to modify or withdraw this announcement at any time without notice. This announcement is provided for your information only. Reference to other products in this announcement does not necessarily imply those products are announced, or intend to be announced, in your country. Additional terms of use are located at
