At a glance

IBM® Mobile Enterprise Services for managed mobility is designed to help enterprises utilize mobile platforms to support business transformation by reducing complexity, risk, and high costs that come with maintaining highly dynamic mobile IT infrastructure and multivendor device environments. The solution addresses security for devices, data on devices, applications, and networks, as well as application provisioning. A simplified subscription-based pricing model is built around devices, usage, and service options for greater predictability, flexibility, and cost-effectiveness.

Overview

IBM Mobile Enterprise Services for managed mobility Version 2.1, announced in Services Announcement ZS13-0006, dated March 05, 2013, has been updated to Version 2.2 and includes these enhancements:

- Simplified pricing model
- Support for BlackBerry 10, AirWatch, and IEM
- Operations monitoring
- Corporate content management
- Enterprise application store
- Secure browsing and application access to the enterprise

IBM Mobile Enterprise Services for managed mobility is designed to help enterprises utilize mobile platforms to support business transformation by reducing complexity, risk, and high costs that come with maintaining highly dynamic mobile IT infrastructure and multivendor device environments. The solution addresses security for devices, data on devices, applications, and networks, as well as application provisioning. A simplified subscription-based pricing model is built around devices, usage, and service options for greater predictability, flexibility, and cost-effectiveness.

Key prerequisites

- All server hardware and operating system for mobile device management and mobile middleware
- All mobile devices (for example, iPhone, iPad, Android, BlackBerry), including voice and data plans
Planned availability date

January 2014

Description

The IBM Mobile Enterprise Services for managed mobility offering addresses the enterprise need for a managed service that delivers mobile capabilities to a variety of mobile platforms, including BlackBerry smartphones and tablets (for example, PlayBook), Apple iOS smartphones and tablets (for example, iPhone, iPod Touch, iPad), and Google Android smartphones and tablets.

Specific capabilities include mobile device management (MDM), BlackBerry Enterprise Server, secure mobile messaging middleware (for example, Good for Enterprise), and level 2 and 3 end-user and administrative support. Supported messaging platforms include Lotus® Domino® and Microsoft™ Exchange.

Both corporate-liable and employee-liable devices are supported, and employees are able to leverage a self-service portal to connect their devices and manage them without administrative intervention.

Accessibility by people with disabilities

A US Section 508 Voluntary Product Accessibility Template (VPAT) containing details on accessibility compliance can be requested at
