Overview

IBM Content Manager OnDemand for z/OS , V9.0 is high-performance solution for enterprise report management. It is designed to help companies gain significant return on investment by enabling them to transform costly high-volume print output to electronic information capture and presentation in support of customer service.

Content Manager OnDemand for z/OS , V9.0 includes these enhancements:

- Full text search - An optional feature that is designed to enable quick and efficient store and retrieve of content that is not easily identified by regular indices. Full text search creates an optimal index of all the words within a document and enables rapid search and retrieval against that index. It is also designed to work with IBM Content Navigator and customer-written applications.
- User security enhancements for user proxy, last login, and password limits and restrictions - Reduce administrative overhead associated with user IDs and password policy implementation capability.
- Report Distribution - An optional feature that optimizes performance of logging and distributions tracking.
- Database timestamp support eliminating internal OnDemand data limitations.
- Support for 128 metadata fields - An increase from 32 to 128 so that documents may now be indexed with up to 128 metadata fields.
- Adding fields to existing folder definition extending previous application group new field support.

- Graphical annotation support in the ODWEK line data applet matches existing support in the Windows™ client.
- Enhanced metadata update enabling Windows client to update metadata fields.
- Export to .csv file format - simplified exporting of search hit lists and documents directly to .csv file format that provides an upgrade path for IBM FileNet® Report Manager.
- OS/390® Indexer now supported on AIX® .
- Compatibility with Content Management Interoperability Services (CMIS).

Key prerequisites

Refer to the [Hardware requirements](#) and [Software requirements](#) sections.

In addition to Content Manager OnDemand for z/OS server licenses, you must obtain an appropriate number and type (Authorized, Employee, and External) of user licenses (AUVU, EUVU and XUVU) from Passport Advantage®

Planned availability date

September 7, 2012

Description

IBM Content Manager OnDemand V9.0 is optimized for efficiently storing and managing large volumes of static content including correspondence that has been electronically sent or posted to clients, and reports used to conduct business activity or convey business performance.

Enhancements

- Full text search (optional feature). In addition to the standard meta data search capability, retrieve OnDemand documents by creating an optimal index of all key words in a document for enhance search and retrieval.
- Fully integrated with IBM Enterprise Content Management (ECM) products to preserve and leverage existing content, process and records management investments.
- Enhanced Retention Management (optional feature) so you can hold the documents you need, eliminate the rest.
- Industry-leading compression with up to 90% storage savings for high volume statements.
- Support for multichannel distribution of stored documents to email, PDF, web, CD-ROM, and print.
- A replacement for outdated report management systems.
- Strategic upgrade for FileNet Report Manager and COLD systems.
- Fast deployment and return on investment.
- Proven technology with thousands of customers.
- Content Management Interoperability Services (CMIS) compliance. Content Manager OnDemand V9.0 provides read-only CMIS support. For more information, refer to

<http://www-01.ibm.com/software/data/content-management/cm-interoperability-services.html>

- Offers increased data protection, scalability, and performance for all its database intensive operations which, based on IBM DB2® technology, is designed to manage data more effectively and efficiently. Greater availability is delivered through enhancements such as online, automated database reorganization. In addition, the increased scalability and the ability to leverage the latest in

server technology helps deliver increased performance of backup and recovery processes.

Additional detail on IBM Content Manager OnDemand can be found at

<http://www.ibm.com/software/data/ondemand/>

Deprecation and removal of function

Content Manager OnDemand V9.0 deprecates the following functions previously supported:

- OnDemand Web Enablement Kit CGI
- OnDemand Web Enablement Kit Servlet
- AFP2HTML viewer applet

Content Manager OnDemand V9.0 does not support IBM eClient or Information Integrator for Content (II4C). You should upgrade to IBM Content Navigator if similar function is required.

For information on IBM Content Manager OnDemand for Multiplatforms V9.0, refer to Software Announcement [212-273](#), dated August 21, 2012 .

Accessibility by people with disabilities

A US Section 508 Voluntary Product Accessibility Template (VPAT) containing details on accessibility compliance can be requested at

http://www.ibm.com/able/product_accessibility/index.html

Section 508 of the US Rehabilitation Act

IBM Content Manager OnDemand for z/OS is capable as of September 4, 2012, when used in accordance with IBM's associated documentation, of satisfying the applicable requirements of Section 508 of the Rehabilitation Act, provided that any assistive technology used with the product properly interoperates with it. A U.S. Section 508 Voluntary Product Accessibility Template (VPAT), containing details on the products accessibility compliance, can be requested on the following Web site

http://www.ibm.com/able/product_accessibility/index.html

Technical information

Specified operating environment

Hardware requirements

The exact configuration you need to support your environment with satisfactory response time will vary, depending on the size of the objects you are working with and other factors. Individual display response times vary depending on workstation speed, memory, size of objects, and network and server workload. The minimum recommended configurations that follow need to be evaluated and adjusted according to your unique requirements. Disk space recommendations are for the product installation and working space only. The actual hard disk space required varies, depending upon your installation. The most current and complete information on hardware and software requirements for the IBM Content Manager portfolio, including additional server descriptions, is available in the support section at

http://www.ibm.com/support/entry/portal/Overview/Software/Information_Management/Content_Manager_OnDemand_for_z~OS

Software requirements

The most current and complete information on software requirements for IBM Content Manager portfolio, including additional server descriptions, is available in the support section at

<http://www.ibm.com/support/docview.wss?rs=129&uid=swg27021524>

Software requirements can be found at

- IBM Content Manager OnDemand for Multiplatforms V9.0

<http://www.ibm.com/support/docview.wss?rs=129&uid=swg27021456>

- IBM Content Manager OnDemand for z/OS , V9.0

<http://www.ibm.com/support/docview.wss?rs=129&uid=swg27021524>

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a readme file, or other information published by IBM , such as an announcement letter. Documentation and other program content may be supplied only in the English language.

Planning information

Direct customer support

<http://www.ibm.com/support>

Packaging

IBM Content Manager OnDemand for z/OS , V9.0 includes:

- Content Manager OnDemand for z/OS , V9.0
- Content Manager OnDemand for z/OS Server
- Content Manager OnDemand Client
- Content Manager OnDemand PDF Indexer for z/OS
- Content Manager OnDemand Advanced Function Presentation Transformations for z/OS
- Content Manager OnDemand Enhanced Retention Management for z/OS

This program, when downloaded from a website, contains the applicable IBM license agreement and License Information, if appropriate, and will be presented for acceptance at the time of installation of the program. For future reference, the license and License Information will be stored in a directory such as LICENSE.TXT.

Security, auditability, and control

IBM Content Manager OnDemand for z/OS , V9.0 uses the security and auditability features of the host software. The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

ECM Software Services

IBM ECM Software Services provides packaged and individualized software service offerings to design, deploy, maintain and expand IBM ECM software.

IBM ECM Software Services provides the following to plan, implement, maintain or customize your IBM Content Manager OnDemand for z/OS solution.

Planning services

ECM planning services provide you with the advisory and assessment assistance that you need for an ECM enterprise design, solution assessment, and a transition (upgrade, conversion, or migration) plan.

Infrastructure planning and design services

Comprehensive service to align customer resources, other IBM teams, and Business Partners to map client requirements to ECM products and integrating technologies.

- High-level approaches for integrating the IBM ECM architecture into your existing enterprise architecture hardware, virtualization and storage; operating systems, databases; performance and capacity; connecting products (for instance. data management, IBM InfoSphere® Optim™ , IBM Cognos®))
- High-level approaches for integrating the IBM ECM architecture into your existing enterprise environment
- Answers to questions and issues arising from enterprise distributions of the IBM ECM products
- Architectures' and products' recommendations based upon customer-specific requirements
- Upon request, compare two or more architectural design options

Transition planning services

Unifying your content throughout your organization is a critical ECM requirement. ECM Software Services enables you to unify your content through conversion, migration or federation. The IBM Transition Planning Service provides expert resources to assist you in planning the following transition scenarios and more:

- Legacy IBM ECM product version to current product releases
- Third-party content management system to IBM ECM system architecture
- IBM ECM system merge or split
- Significant architecture refresh or redesign
- Extensive high availability or disaster recovery changes

This service assists clients with the many decisions that need to be made to ensure their organization fully maximizes the benefits of IBM Content Manager OnDemand.

Implementation services

ECM implementation services assist our clients in deploying a technically sound and functional system framework necessary for the successful development and deployment of their ECM solution. These services allow clients to be confident that whether their ECM solution is designed and developed by their staff, ECM Software Services, or a certified partner, it will be implemented and supported on a system framework that has been expertly installed, tested, and certified for support by IBM ECM Support.

IBM Content Manager OnDemand for z/OS Installation

This service provides the expert resources to install the Content Manager OnDemand for z/OS software at your site. This service provides hands-on assistance to address questions and key issues regarding the installation and basic configuration of the software.

Maintenance services

ECM maintenance services provide you with the advisory and assessment assistance that you need for an ECM enterprise design, solution assessment, and a transition (upgrade, conversion, or migration) plan.

Transition services

Transition services assist you with product upgrades, platform conversions, and data migrations providing a fail-safe methodology for protecting client data during the transition of your current ECM solution to the target solution. Our team of experts manages and executes the transition process for supported platforms.

Remote system administration services

IBM ECM Remote System Administration team offers comprehensive and reliable system administration services for all server-based IBM solutions that are completely seamless to a client operations. This service will develop a customized solution specific for the target systems and implement a clear and concise plan of daily, weekly, monthly, and periodic monitoring tasks.

System health check services

IBM offers a combination of health check services to meet your specific system health-related needs. These services can identify the causes of existing system bottlenecks or even identify the capacity limits of your current hardware and software configuration prior to realizing a production bottleneck. Whether or not your system has health related issues, Software Services Health Check services can recommend the appropriate changes to increase overall system performance getting you the most value and the best performance from your system every day.

Additional custom services

ECM Software Services can also help you with these additional custom services:

- Reports Management (Content Manager OnDemand) and FileNet P8 Design Consulting - Assist you in identifying and evaluating IBM Content Manager OnDemand integration with FileNet P8 for a complete reports management solution.
- IBM Content Manager OnDemand Application Implementation - Assists you in identifying and evaluating application options for implementing a complete content management application in a Content Manager OnDemand environment.
- Post Installation System Administration - Mentors individuals with limited administration knowledge on the support and maintenance of the Content Manager OnDemand environment. This service should be employed as a supplement to the standard Content Manager OnDemand Administration education offering and tailored to the client specific environment.

To learn more about IBM Software Services or to contact a Software Services sales specialist, visit

<http://www.ibm.com/software/sw-services/>

Ordering information

Charge metric

IBM Content Manager OnDemand for z/OS , V9.0 package includes six chargeable units. Order one or more of the following to meet your requirements:

- Library Server - per establishment license. One license per establishment.
- Object Server - per establishment license. One license per establishment.
- PDF Indexer Feature - per establishment license. One license per establishment.
- OnDemand Distribution Facility (ODF) - per establishment license. One license per establishment.
- Enhanced Retention Manager - per establishment license. One license per establishment.
- Advanced Function Presentation Transformations Transforms - per server license. One license per copy/install deployed.

In addition to Content Manager OnDemand z/OS server licenses, you must obtain an appropriate number and type (Authorized, Employee, and External) of user licenses from Passport Advantage .

Content Manager OnDemand for Multiplatforms - Full Text Search is a separately available feature. You must obtain an appropriate number of Processor Value Unit (PVU) licenses from Passport Advantage .

For information on IBM Content Manager OnDemand for Multiplatforms V9.0, refer to Software Announcement [212-273](#), dated August 21, 2012 .

Install

Install is a unit of measure by which the program can be licensed. An install is an installed copy of the program on a physical or virtual disk made available to be executed on a computer. Licensee must obtain an entitlement for each install of the program.

Server

Server is a unit of measure by which the program can be licensed. A server is a physical computer that is comprised of processing units, memory, and input/output capabilities and that executes requested procedures, commands, or applications for one or more users or Client Devices. Where racks, blade enclosures, or other similar equipment is being employed, each separable physical device (for example, a blade or a rack-mounted device) that has the required components is considered itself a separate server. For the purpose of server-based licensing, licensee must obtain entitlements for each server that is made available to the program, regardless of the number of processor cores and partitions in the server or the number of copies of the program on the server.

Notes :

- Some programs may require licenses for the program **and** what is being managed. In that case, the following applies. In addition to the entitlements required for the program directly, licensee must obtain entitlements for this program sufficient to cover the servers managed by the program.
- Some programs may be licensed on a managed basis **only** . In that case, the following applies. Instead of the entitlements required for the program directly, licensee must obtain entitlements for this program sufficient to cover the servers managed by program.

Basic license

To order, specify the program product number and the appropriate license or charge option. Also, specify the desired distribution medium. To suppress shipment of media, select the license-only option in CFSW.

On/Off CoD

IBM Content Manager OnDemand for z/OS , V9.0 is eligible for On/Off CoD with a temporary use charge calculated based on MSUs per-day usage.

Program name IBM Content Manager OnDemand for z/OS, V9.0
Program PID 5697-CMD

Customized Offerings

Product deliverables are shipped only via CBPDO, ServerPac, SystemPac® .

CBPDO and ServerPac are offered for Internet delivery in countries where ShopzSeries product ordering is available. Internet delivery reduces software delivery time and allows you to install software without the need to handle tapes. For more details on Internet delivery, refer to the ShopzSeries help information at

<http://www.software.ibm.com/ShopzSeries>

You choose the delivery method when you order the software. IBM recommends Internet delivery. In addition to Internet and DVD, the supported tape delivery options for CBPDO, ServerPac, and SystemPac , include:

- 3590

Most products can be ordered in ServerPac and SystemPac the month following their availability on CBPDO. z/OS can be ordered via all three offerings at general availability. Production of software product orders will begin on the planned general availability date.

- CBPDO shipments will begin one week after general availability.
- ServerPac shipments will begin two weeks after general availability.
- SystemPac shipments will begin four weeks after general availability due to additional customization, and data input verification.

Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

Licensing

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use.

This software license includes Software Subscription and Support (also referred to as Software Maintenance).

Agreement for Acquisition of Software Maintenance

The following agreement applies for Software Subscription and Support (Software Maintenance) and does not require customer signatures:

- IBM Agreement for Acquisition of Software Maintenance (Z125-6011)

These programs are licensed under the IBM Program License Agreement (IPLA) and the associated Agreement for Acquisition of Software Maintenance, which provide for support with ongoing access to releases and versions of the program. These programs have a one-time license charge for use of the program and an annual renewable charge for the enhanced support that includes telephone assistance (voice support for defects during normal business hours), as well as access to updates, releases, and versions of the program as long as support is in effect.

IBM System z® Operational Support Services - SoftwareXcel is an option if you desire added services.

License Information form number

The program's License Information will be available for review on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

Limited warranty applies

Yes

Limited warranty

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional charge. For further information, consult the IBM Software Support Handbook found at

<http://www.ibm.com/support/handbook>

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

Program support

Enhanced support, called Subscription and Support, includes telephone assistance, as well as access to updates, releases, and versions of the program as long as support is in effect. You will be notified of discontinuance of support with 12 months' notice.

Money-back guarantee

If for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

For clarification, note that for programs acquired under any of IBM's On/Off Capacity on Demand (On/Off CoD) software offerings, this term does not apply since these offerings apply to programs already acquired and in use by you.

Other terms**Volume orders (IVO)**

No

IBM International Passport Advantage Agreement**Passport Advantage applies**

No

Usage restriction

Yes.

Explanation of terms

Note: The following terms supersede and replace the previous license terms. Updated licensing terms are included in the program package.

IBM Content Manager OnDemand z/OS - Library Server Feature

The Library Server Feature is a priced feature of IBM Content Manager OnDemand for z/OS , V9.0. The Library Server Feature is included on the program media. You are not authorized to use the feature unless you first acquire a Proof of Entitlement for this feature. The Library Server feature is licensed per establishment.

IBM Content Manager OnDemand z/OS - Object Server Feature

The Object Server Feature is a priced feature of Content Manager OnDemand for z/OS , V9.0. The Object Server Feature is included on the program media. You are not authorized to use the feature unless you first acquire a PoE for this feature. The Object Server Feature is licensed per establishment.

You may elect to have your Information Technology Services managed solely for your benefit by a third party; however, as the licensee, you remain responsible for compliance with all terms and conditions, including but not limited to, the acquisition and maintenance of a sufficient number of licenses as described in this License Information document. You may not assign, transfer, delegate, or sublicense any of your rights or obligations, in whole or in part, to such third party without the express written permission of IBM .

You may not use the program or any component thereof to provide hosting services to third parties unless otherwise agreed to in writing by IBM .

IBM Content Manager OnDemand z/OS - Authorized User

An Authorized User authorization must be obtained for each individual user accessing the program in any manner. Each Authorized User authorization is attributable to one and only one individual user, either within or outside your enterprise. An Authorized User authorization is required for each individual user who accesses the program or any component, application, feature, function, or capability thereof, either directly or indirectly, through any means on behalf of the user. Users require authorization for accessing content managed within, or distributed from the program server. Each Authorized User authorization entitles one individual user to establish one or more connections to any number of program servers across any of the supported platforms with the exception of IBM Content Manager OnDemand for z/OS , which requires a separate server PoE. An Authorized User authorization may only be reassigned for the long-term replacement of personnel. The programs may be installed on one or more computers and accessed by multiple users, provided that an Authorized User authorization has been obtained for each individual user.

Licenses for optional priced features

IBM Content Manager OnDemand z/OS - PDF Indexer Feature

If you choose to install the IBM Content Manager OnDemand PDF Indexer Feature (the PDF Indexer Feature), you must acquire a PoE. Your license to the PDF Indexer Feature allows you to install and use the PDF Indexer Feature to support definition and capture of PDF data streams on one or more IBM Content Manager OnDemand Library Server. The PDF Indexer Feature is licensed per establishment.

IBM Content Manager OnDemand z/OS - OnDemand Distribution Facility (ODF)

The ODF feature is a priced feature of Content Manager OnDemand for z/OS , V9.0. One license to the Content Manager OnDemand Distribution Facility feature entitles you to install the program feature on one or more physical servers. The ODF Indexer Feature is licensed per establishment.

Recipients of reports generated by the Content Manager OnDemand Distribution Facility do not need to be licensed as Authorized Users.

IBM Content Manager OnDemand z/OS - Enhanced Retention Manager

The Enhanced Retention Manager feature is a priced feature of Content Manager OnDemand for z/OS , V9.0. One license to the Content Manager OnDemand Enhanced Retention Manager feature entitles you to install the program feature on one or more physical servers. The Enhanced Retention Manager Feature is licensed per establishment.

IBM Content Manager OnDemand z/OS - Advanced Function Presentation Transformations

The Advanced Function Presentation Transformations feature is a priced feature of Content Manager OnDemand for z/OS , V9.0. One license to the Content Manager OnDemand Advanced Function Presentation Transformations feature entitles you to deploy one copy (or instance) of the program feature. If you wish to deploy additional copies (or instances), you must acquire additional PoE.

IBM Content Manager OnDemand for Multiplatforms - Full Text Search

The Full Text Search feature is a priced feature of Content Manager OnDemand for Multiplatforms, V9.0. The Full Text Search Feature is licensed per Processor Value Unit (PVU). The number of PVU licenses required depends on the processor technologies of the Full Text Search server. For additional information, refer to

http://www-01.ibm.com/software/lotus/passportadvantage/pvu_licensing_for_customers.html

Software Subscription and Support applies

Yes. All distributed software licenses include Software Subscription and Support (also referred to as Software Maintenance) for a period of 12 months from the date of acquisition, providing a streamlined way to acquire IBM software and assure technical support coverage for all licenses. Extending coverage for a total of three years from date of acquisition may be elected.

While your Software Subscription and Support is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance via telephone and, if available, electronic access, only to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, every day of the year. For additional details, consult your IBM Software Support Handbook at

<http://www.ibm.com/support/handbook>

Software Subscription and Support does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under this agreement.

For more information about the Passport Advantage Agreement, visit the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

IBM Operational Support Services - SoftwareXcel

System i® Software Maintenance applies

No

Variable charges apply

No

Educational allowance available

Yes. A 15% education allowance applies to qualified education institution customers.

On/Off Capacity on Demand (CoD)

To be eligible for On/Off CoD pricing, you must be enabled for temporary capacity on the corresponding hardware, and the required contract, Attachment for IBM System z On/Off Capacity on Demand (Z125-7883) must be signed prior to use.

Statement of good security practices

IT system security involves protecting systems and information through prevention, detection, and response to improper access from within and outside your enterprise. Improper access can result in information being altered destroyed or misappropriated or can result in misuse of your systems to attack others. Without a comprehensive approach to security, no IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems and products are designed to be part of a comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products, or services to be most effective. IBM does not warrant that systems and products are immune from the malicious or illegal conduct of any party.

IBM Electronic Services

IBM has transformed its delivery of hardware and software support services to help you achieve higher system availability. Electronic Services is a web-enabled solution that offers an exclusive, no-additional-charge enhancement to the service and support available for IBM servers. These services are designed to provide the opportunity for greater system availability with faster problem resolution and preemptive monitoring. Electronic Services comprises two separate, but complementary, elements: Electronic Services news page and Electronic Services Agent.

The Electronic Services news page is a single Internet entry point that replaces the multiple entry points traditionally used to access IBM Internet services and support. The news page enables you to gain easier access to IBM resources for assistance in resolving technical problems.

The Electronic Service Agent™ is no-additional-charge software that resides on your server. It monitors events and transmits system inventory information to IBM on a periodic, client-defined timetable. The Electronic Service Agent automatically reports hardware problems to IBM . Early knowledge about potential problems enables IBM to deliver proactive service that may result in higher system availability and performance. In addition, information collected through the Service Agent is made available to IBM service support representatives when they help answer your questions or diagnose problems. Installation and use of IBM Electronic Service Agent for problem reporting enables IBM to provide better support and service for your IBM server.
