IBM Operational Decision Manager V8.7.1 delivers new capabilities that further enhance the business user experience, simplify platform operations, and enhance performance

At a glance

IBM® Operational Decision Manager (IBM ODM) V8.7.1 provides new capabilities that further enhance the business user experience, simplify platform operations, and enhance performance. Version 8.7.1 delivers:

• New capabilities for Decision Server Insights™ including:
  – Easier testing of solutions without programming
  – Enhanced capabilities in the Insight Inspector
  – Usability enhancements in the Insight Designer
  – Improved performance
  – Support for local languages to define business rules
  – Additional platform and operating system support

• New capabilities for Decision Center and Decision Server Rules including:
  – Simpler deployment operations with Execution Object Model (XOM) management now available in Decision Center
  – Easier and dynamic management of user roles
  – Improved change management and governance
  – Improved user experience in the Business Console

• An IBM PureApplication® System pattern configuration, which was previously delivered as a separate IBM ODM Application Pattern program

Overview

Smarter Process is the IBM approach for reinventing business operations to enable greater customer-centricity in the age of mobile social, cloud, and big data. This approach drives greater efficiency and optimization in to end-to-end processes through software capabilities, such as operational decision management, business process management, and case management.

IBM ODM enhances the Smarter Process portfolio by enabling you to identify business situations and make decisions faster. It provides a comprehensive and
easy-to-use platform that allows you to detect situations in real time, capture, automate, and manage frequently occurring, repeatable business decisions. As a result, you can better identify opportunities, respond to market demands, minimize risks, and operate consistently.

The Decision Server offerings, which are structured as Advanced, Standard, and Express(\(^\text{\textregistered}\)), address the incremental requirements from basic rules to full decision management.

- IBM ODM Express provides an entry point that is designed for initial business rules projects.
- IBM ODM Standard provides the ability to adapt decision logic of applications at the speed of business. It has dedicated rule authoring and validation environments for business stakeholders, and gives visibility into, control over, and automation of point-in-time business decisions.
- IBM ODM Advanced builds on the capabilities of IBM ODM Standard with Decision Server Insights, which helps capture events, build context, and apply it to operational decisions in real time. You can detect situations as they occur, presenting risks or opportunities, to enable the appropriate action.

**New capabilities in Version 8.7.1 for Decision Server Insights**

- Easier testing of solutions without programming with a new business-friendly language. It allows developers and subject matter experts to easily create and run tests that submit events to a solution
- Enhanced capabilities in the Insight Inspector for reviewing and analyzing the results of solution tests
- Increased developer productivity with usability enhancements in the Insight Designer
- Improved performance and resource consumption of solutions
- Support for local languages allowing users to define business rules and global aggregates in languages other than English
- Support for additional platforms and operating systems

**New capabilities in Version 8.7.1 for Decision Center and Decision Server Rules**

- Simpler deployment operations with support for XOM archive management in Decision Center that can be used as a single point of deployment for decision services.
- Easier and dynamic management of user roles in Decision Center.
- Improved change management and governance allowing business users to create simulations and report outcome all within validation activities.

**Inclusion of a PureApplication System pattern configuration**

A PureApplication System pattern configuration, which is optimized to help accelerate the setup and management of complex, highly available, decision-management environments, is now available as part of IBM ODM Advanced. This pattern configuration was previously delivered as a separate IBM ODM Application Pattern program. The pattern supports the configuration and deployment of Decision Server Rules and Decision Server Events components. Decision Server Insights is not available in the pattern configuration.

IBM ODM V8.7.1 supports organizations in virtually every industry by:

- Automating and governing operational decision making across business processes and applications to help improve business insight and consistent outcomes.
- Helping detect opportunities and risks in real time.
- Easily and consistently helping business stakeholders to implement, test, and deploy decision changes to meet new market demands and policy requirements.
- Understanding how business decisions that drive operations are made.
• Applying decisions consistently across applications.

**Key prerequisites**

IBM ODM operates with a range of operating environments that include AIX(R), HP-UX, IBM i, Red Hat Enterprise Linux(TM), SUSE Linux Enterprise Server, Solaris, and Microsoft(TM) Windows(TM).

IBM ODM pattern deployments require one of the following:

- PureApplication System W2700, W2500, W1700, or W1500 that runs PureApplication Software V2.1
- PureApplication Service that runs PureApplication Software V2.1

For details, refer to the Technical information section.

**Planned availability date**

- IBM ODM V8.7.1
  - May 15, 2015: Electronic distribution. US English and national languages
  - May 22, 2015: Media pack. US English and national languages
- Pattern configuration for IBM ODM V8.7.1
  - June 12, 2015: Electronic distribution. US English and national languages

Availability of programs with encryption algorithm in France is subject to French government approval.

Refer to the Availability of national languages section for national language availability.

**Description**

The ability to effectively automate decision-making within and across business systems helps maximize organizational efficiency. This helps increase employee productivity, and improve the quality and consistency of operational decisions that are made repeatedly in the course of the business day.

IBM ODM V8.7.1 helps address decision-automation challenges by enabling organizations to build highly flexible, adaptable solutions that can detect and react to threats and opportunities and quickly adapt to changing business conditions.

IBM ODM V8.7.1 includes:

- Easier testing of Decision Server Insights solutions without programming
  
  A new business-friendly language is introduced that allows developers and subject matter experts to easily create and run tests that submit a sequence of events to a solution to verify that it is working as designed.

- Enhanced capabilities in the Insight Inspector
  
  Additional capabilities are available in the Insight Inspector, including a new Rules tab to display the list of rules that are associated with an agent showing the rules that fired and the rules that did not fire as a result of a received event, improved navigation through stacked events that happen at or near the same time in the timeline, and the ability to import/export recordings.

- Increased developer productivity with usability enhancements in the Insight Designer
A number of enhancements within the Insight Designer make it even easier to create, edit and debug Insights solutions:

- Easily deploy a solution to a local or remote development environment directly from the Insight Designer.
- Easily navigate your business model definition and verbalizations with improved Outline and Vocabulary views.
- Easily generate a Java™ project to test your solution with a new wizard.

- Improved performance and resource consumption of Decision Server Insights solutions

Enhancements are introduced that improve the performance, memory consumption and CPU consumption of running Insights solutions. These include a reduced memory footprint by allowing in-memory event storage to be tunable, improved database storage efficiency, and the ability to configure time horizons by event type.

- Support for local languages for developing Insights solutions

New support for French, German and Chinese languages allows users to define business rules and global aggregates in those respective languages. This includes the ability to add dictionary definitions to specify the translation of terms to use in your clients’ solution and their plural form and gender.

- Support for additional platforms and operating systems

Includes support for Oracle 12c (including Real Application Clusters (RAC)) and Windows Server 2012 R2.

- A new XOM archive management in Decision Center

It extends and simplifies rule deployment from Decision Center with the ability to deploy the compiled XOM archives associated to the deployed rules. With this new XOM management, XOM archives are treated as decision service resources and can be retrieved from Decision Center, along with the decision service rules.

- Easier management of custom user roles in Decision Center

An administrator can dynamically define new roles without modifying and restarting the Decision Center application or the application server.

- Improved change management and governance

Business users can define or reuse simulations in validation activities and report outcome of these simulations as a mean to validate a decision service release.

- Additional enhancements to the Business Console to help improve the user experience

The breadcrumb bar for navigation has been extended and redesigned so that it is more intuitive and consistent across elements. The test reports for decision services also benefit from an improved layout.

- A PureApplication System pattern configuration

IBM ODM Advanced in Version 8.7.1 is also deployable as a pattern that can be used with other pattern parts to create application configurations for deployment on PureApplication System (W2700, W2500, W1700, and W1500) and PureApplication Service on SoftLayer®. This support is designed to give you an elastic, highly available, and production-ready configuration that is easy to set up, manage, and scale. Using this pattern helps reduce setup and management of your business process solutions. You can focus critical resources on value-add activities and accelerate the expansion of IBM ODM from a project to a program across your enterprise. The pattern configuration includes Decision Server Rules and Decision Server Events components. Decision Server Insights is not available in the pattern configuration.
IBM ODM V8.7.1 consists of several orderable products, which together form a comprehensive platform for the management and execution of business rules and business events:

- **Decision Center V8.7.1**
  Provides an integrated repository and management components for line-of-business, subject-matter experts to directly participate in the definition and governance of rules-based, decision logic. Through the capabilities of Decision Center, that includes the Business Console, business and IT functions can work collaboratively to align the entire organization in the implementation of automated decisions and to accelerate the maintenance lifecycle as they evolve based on new external and internal requirements.

- **Decision Server Advanced V8.7.1**, previously known as Decision Server
  Extends the standard ODM capabilities and components in Decision Server Advanced with Decision Server Insights and the Insights Designer. These additional components enable the building of solutions that enable the detection of actionable business situations and take appropriate action at the time of interaction.

- **Decision Server Standard V8.7.1**, previously known as Decision Server Rules Edition
  Provides specific run-time and development components that are designed to automate and manage decision logic that is based on business rules.

- **Decision Server Express V8.7.1**
  Provides a low-cost, entry point for businesses to get started with decision-management application development.

- **Decision Server Rules Edition for Integration Bus V8.5**
  Decision Server Rules Edition for Integration Bus remains at Version 8.5. It is an entitlement-only package, which extends licensing to deliver IBM ODM integration with the IBM Integration Bus offering.

IBM ODM provides the ability to effectively automate a wide range of decisions across business processes and applications. Some examples of these kinds of decision-management applications include:

- Product and promotional offers
- Eligibility and pricing determinations
- Case and customer prioritizations
- Risk assessments and fraud determinations

IBM ODM helps organizations adapt quickly to changing conditions, align across business and IT, and act with precision and reliability. It provides visibility to achieve a clearer line of sight to business operations, collaboration capabilities to help foster cross-functional and cross-divisional outcomes, and built-in governance to align business operations with strategic intent in the face of change.

**Accessibility by people with disabilities**

A US Section 508 Voluntary Product Accessibility Template (VPAT) containing details on accessibility compliance can be requested at http://www.ibm.com/able/product_accessibility/index.html

Education support

Education is a key component to ensuring software success. IBM creates a comprehensive portfolio of education material to help customers successfully deploy IBM software products to their maximum potential. The IBM education team is committed to providing the highest quality education content available to help your organization prosper in today's competitive marketplace.

The IBM education team works closely with IBM product developers and IBM services organizations to ensure that the courses we offer provide the most current technical and product information. Our courses place an emphasis on the advanced knowledge and insight that only these sources can provide. We draw from a deep pool of IBM technical experience in the development of our courses, and pass that knowledge on to our students. Our courses emphasize hands on labs to develop comprehensive skills in using the product to solve business problems. The education offerings from IBM Training span the spectrum of skill needs, from introductory product overviews to advanced programming and product administration courses.

Role-based, training paths can be found at

http://www.ibm.com/software/websphere/education/paths/

The delivery of IBM education is provided by IBM Global Training Partners.

For more information about available education offerings, search on the product name at

http://www.ibm.com/training

Offering Information

Software requirements

The following information is correct at the time of the announcement of IBM ODM V8.7.1. For the current and full information on system requirements, consult the IBM ODM detailed system requirements page

IBM Decision Center V8.7.1

Supported operating systems

AIX (Decision Center Business Console and Decision Center Enterprise Console)

- Hardware platform
  - IBM POWER4 or later processors
  - Minimum 1 GB physical memory
- Operating systems - one of the following:
  - AIX 7.1 POWER® System (64-bit)
  - AIX 6.1 TL4 POWER System (64-bit)

HP-UX (Decision Center Business Console and Decision Center Enterprise Console)

- Hardware platform
  - Intel® Itanium™ 2 processor
  - Intel Itanium processor 9300 series
  - Minimum 1 GB of physical memory recommended
- Operating systems - one of the following:
  - HP-UX 11i v3 IA64 (64-bit)
  - HP-UX 11i v2 IA64 (64-bit)

IBM i (Decision Center Business Console and Decision Center Enterprise Console)

- Hardware platform - System capable of supporting IBM i POWER V4, V5, or V6
- Operating systems - one of the following:
  - IBM i 7.1 POWER System (32-bit and 64-bit)
  - IBM i 6.1 POWER System (32-bit and 64-bit)
**Solaris (Decision Center Business Console and Decision Center Enterprise Console)**

- **Hardware platform**
  - 1.0 Ghz or fast SPARC workstation
  - Minimum 1 GB of physical memory recommended

- **Operating systems - one of the following:**
  - Solaris 10 x86-64 (64-bit)
  - Solaris 10 SPARC (32-bit and 64-bit)
  - Solaris 11 x86-64 (64-bit)
  - Solaris 11 SPARC (32-bit and 64-bit)

**Red Hat, SUSE, and Ubuntu Linux (Decision Center Business Console and Decision Center Enterprise Console)**

- **Hardware platform**
  - Must meet requirements of the supported operating system level that is used
  - Minimum 1 GB of physical memory recommended

- **Operating systems - one of the following:**
  - Red Hat Enterprise Linux (RHEL) 6.0 Server/Desktop x86-32 (32-bit)
  - Red Hat Enterprise Linux (RHEL) 6.0 Server/Desktop x86-64 (32-bit and 64-bit)
  - Red Hat Enterprise Linux (RHEL) 6.0 Server POWER System (64-bit)
  - Red Hat Enterprise Linux (RHEL) 6.0 Server System z (64-bit)
  - Red Hat Enterprise Linux (RHEL) 7.0 Server/Desktop x86-64 (32-bit and 64-bit)
  - Red Hat Enterprise Linux (RHEL) 7.0 Server POWER System (64-bit)
  - Red Hat Enterprise Linux (RHEL) 7.0 Server System z (64-bit)
  - SUSE Linux Enterprise Server (SLES) 11.0 x86-32 (32-bit)
  - SUSE Linux Enterprise Server (SLES) 11.0 x86-64 (32-bit and 64-bit)
  - SUSE Linux Enterprise Server (SLES) 11.0 POWER System (64-bit)
  - SUSE Linux Enterprise Server (SLES) 11.0 System z (64-bit)
  - SUSE Linux Enterprise Server (SLES) 12.0 x86-64 (32-bit and 64-bit)
  - SUSE Linux Enterprise Server (SLES) 12.0 POWER System (64-bit)
  - SUSE Linux Enterprise Server (SLES) 12.0 System z (64-bit)
  - Ubuntu 14.04 POWER System
  - Ubuntu 14.04 x86-64

**Microsoft Windows Decision Center Business Console, Decision Center Enterprise Console and Rule Solutions for Office)**

- **Hardware platform**
  - System capable of supporting selected operating system
  - Minimum 1 GB of physical memory recommended

- **Operating systems - one of the following:**
  - Windows Server 2012 Standard Edition x86-64 (32-bit and 64-bit)
  - Windows Server 2012 Datacenter Edition x86-64 (32-bit and 64-bit)
  - Windows Server 2012 Essentials Edition x86-64 (32-bit and 64-bit)
  - Windows Server 2012 Foundation Edition x86-64 (32-bit and 64-bit)
  - Windows Server 2012 R2 Standard Edition x86-64 (32-bit and 64-bit)
  - Windows Server 2012 R2 Datacenter Edition x86-64 (32-bit and 64-bit)
  - Windows Server 2012 R2 Essentials Edition x86-64 (32-bit and 64-bit)
Windows Server 2012 R2 Foundation Edition x86-64 (32-bit and 64-bit)
- Windows 7 Ultimate x86-64 (32-bit)
- Windows 7 Ultimate x86-32 (32-bit)
- Windows 7 Enterprise x86-64 (32-bit)
- Windows 7 Enterprise x86-32 (32-bit)
- Windows 7 Professional x86-64 (32-bit)
- Windows 7 Professional x86-32 (32-bit)
- Windows 7 SP1 Ultimate x86-64 (32-bit)
- Windows 7 SP1 Ultimate x86-32 (32-bit)
- Windows 7 SP1 Enterprise x86-64 (32-bit)
- Windows 7 SP1 Enterprise x86-32 (32-bit)
- Windows 7 SP1 Professional x86-64 (32-bit)
- Windows 7 SP1 Professional x86-32 (32-bit)
- Windows 8 Ultimate x86-64
- Windows 8 Enterprise x86-64
- Windows 8 Professional x86-64
- Windows Server 2008 R2 Standard Edition x86-64 (32-bit and 64-bit)
- Windows Server 2008 R2 Enterprise Edition x86-64 (32-bit and 64-bit)
- Windows Server 2008 R2 Datacenter Edition x86-64 (32-bit and 64-bit)
- Windows Server 2008 Enterprise Edition x86-64 (32-bit and 64-bit)
- Windows Server 2008 Datacenter Edition x86-64 (32-bit and 64-bit)
- Windows Server 2008 Standard Edition x86-64 (32-bit and 64-bit)

1Server supported for application design, development and testing; no support for production use.

2Deprecated.

**Supported application servers**

- WebSphere(R) Application Server V8.5.5 or Network Deployment V8.5.5
- WebSphere Application Server V8.0.0.5 or Network Deployment V8.0.0.5
- WebSphere Application Server V8.5.5 Liberty Profile
- Tomcat 7.0
- JBoss 5.1.2 EAP
- JBoss 6.1 EAP
- Oracle Weblogic 11g (10.3.6)
- Oracle Weblogic 12c (12.1.1)

**Supported databases**

- DB2(R) Enterprise Server Edition 9.5 and future fix packs
- DB2 Workgroup Server Edition 9.5 and future fix packs
- DB2 Enterprise Server Edition 9.7.0.6 and future fix packs
- DB2 Workgroup Server Edition 9.7.0.6 and future fix packs
- DB2 Enterprise Server Edition 10.1 and future fix packs
- DB2 Workgroup Server Edition 10.1 and future fix packs
- DB2 Enterprise Server Edition 10.5 and future fix packs
• DB2 Workgroup Server Edition 10.5 and future fix packs
• DB2 for i5/OS™ 6.1 and future fix packs
• DB2 for i5/OS 7.1 and future fix packs
• DB2 pureScale® Feature for Enterprise Server Edition 9.8 and future fix packs
• MySQL 5.5.20
• Oracle Database 11g Standard/Enterprise Editions Release 2 and future fix packs
• Oracle Database 12g Standard/Enterprise Editions and future fix packs
• PostgreSQL 9.1.2 and future fix packs
• Microsoft SQL Server Enterprise Edition 2008 and future fix packs
• Microsoft SQL Server Enterprise Edition 2012 and future fix packs
• Microsoft SQL Server Enterprise Edition 2014 and future fix packs

Browsers
• Microsoft Internet Explorer 10.0 and 11.0
• Mozilla Firefox 24 ESR
• Google Chrome 35

Microsoft Office for Rule Solution for Office

IBM Decision Server Advanced V8.7.1

Decision Server Insights component

Supported operating systems for Insights Server and Insights Designer

Red Hat Linux
• Hardware platform
  – Hardware must meet requirements of the supported operating system level that is being used
  – Minimum 1 GB of physical memory recommended
• Operating systems - one of the following:
  – Red Hat Enterprise Linux (RHEL) 6.0 Server x86-64
  – Red Hat Enterprise Linux (RHEL) 6.0 Desktop x86-64 - For development activities only

Windows
• Hardware platform
  – System capable of supporting selected operating system
  – Minimum 1 GB of physical memory recommended
• Operating systems - one of the following:
  – Windows Server 2012 R2 Standard Edition x86-64
  – Windows Server 2012 R2 Datacenter Edition x86-64
  – Windows Server 2012 R2 Essentials Edition x86-64
  – Windows Server 2012 R2 Foundation Edition x86-64
  – Windows 7 SP1 Ultimate x86-64 64
  – Windows 7 SP1 Enterprise x86-64 64
  – Windows 7 SP1 Professional x86-64 64
  – Windows 8 Ultimate x86-6464
  – Windows 8 Enterprise x86-64 64
- Windows 8 Professional x86-64
- Windows Server 2008 R2 Standard Edition x86-64
- Windows Server 2008 R2 Enterprise Edition x86-64
- Windows Server 2008 R2 Datacenter Edition x86-64

**Supported databases**
- DB2 Enterprise Server Edition 10.1 and future fix packs
- DB2 Workgroup Server Edition 10.1 and future fix packs
- DB2 Enterprise Server Edition 10.5 and future fix packs
- DB2 Workgroup Server Edition 10.5 and future fix packs
- Oracle Database 12c Standard and Enterprise Editions and future fix packs

**Browsers**
- Internet Explorer 10.0 and 11.0
- Mozilla Firefox 24 ESR
- Google Chrome 35

**Software Development Kit for Insights Designer**
- IBM Eclipse SDK 4.2.2

**Supported Server Rules component**

**Supported operating systems**

**AIX (Rule Designer in Headless mode only and Rule Execution Server)**
- Hardware platform
  - IBM POWER4 or later processors
  - Minimum 1 GB physical memory
- Operating systems - one of the following:
  - AIX 7.1 POWER System (64-bit)
  - AIX 6.1 TL4 POWER System (64-bit)

**HP-UX (Rule Execution Server)**
- Hardware platform
  - Intel Itanium 2 processor
  - Intel Itanium processor 9300 series
  - Minimum 1 GB of physical memory recommended
- Operating systems - one of the following:
  - HP-UX 11i v3 IA64 (64-bit)
  - HP-UX 11i v2 IA64 (64-bit)

**IBM i (Rule Execution Server)**
- Hardware platform - System capable of supporting IBM i POWER V4, V5, or V6
- Operating systems - one of the following:
  - IBM i 7.1 POWER System (32-bit and 64-bit)
  - IBM i 6.1 POWER System (32-bit and 64-bit)
Solaris (Rule Designer in Headless mode only and Rule Execution Server)

- Hardware platform
  - 1.0 Ghz or fast SPARC workstation
  - Minimum 1 GB of physical memory recommended
- Operating systems - one of the following:
  - Solaris 10 x86-64 (64-bit)
  - Solaris 10 SPARC (32-bit and 64-bit)
  - Solaris 11 x86-64 (64-bit)
  - Solaris 11 SPARC (32-bit and 64-bit)

Red Hat, SUSE, and Ubuntu Linux (Rule Designer and Rule Execution Server)

- Hardware platform
  - Must meet requirements of the supported operating system level that is being used
  - Minimum 1 GB of physical memory recommended
- Operating systems - one of the following:
  - Red Hat Enterprise Linux (RHEL) 6.0 Server/Desktop x86-32 (32-bit)
  - Red Hat Enterprise Linux (RHEL) 6.0 Server/Desktop x86-64 (32-bit and 64-bit)
  - Red Hat Enterprise Linux (RHEL) 6.0 Server POWER System (64-bit)
  - Red Hat Enterprise Linux (RHEL) 6.0 Server System z (64-bit)
  - Red Hat Enterprise Linux (RHEL) 7.0 Server/Desktop x86-64 (32-bit and 64-bit)
  - Red Hat Enterprise Linux (RHEL) 7.0 Server POWER System (64-bit)
  - Red Hat Enterprise Linux (RHEL) 7.0 Server System z (64-bit)
  - SUSE Linux Enterprise Server (SLES) 11.0 x86-32 (32-bit)
  - SUSE Linux Enterprise Server (SLES) 11.0 x86-64 (32-bit and 64-bit)
  - SUSE Linux Enterprise Server (SLES) 11.0 POWER System (64-bit)
  - SUSE Linux Enterprise Server (SLES) 11.0 System z (64-bit)
  - SUSE Linux Enterprise Server (SLES) 12.0 x86-64 (32-bit and 64-bit)
  - SUSE Linux Enterprise Server (SLES) 12.0 POWER System (64-bit)
  - SUSE Linux Enterprise Server (SLES) 12.0 System z (64-bit)
  - Ubuntu 14.05 POWER System
  - Ubuntu 14.04 x86-64

Windows (Rule Designer, Rule Execution Server and Scorecard Modeler)

- Hardware platform
  - System capable of supporting selected operating system
  - Minimum 1 GB of physical memory recommended
- Operating systems - one of the following:
  - Windows Server 2012 Standard Edition x86-64 (32-bit and 64-bit)
  - Windows Server 2012 Datacenter Edition x86-64 (32-bit and 64-bit)
  - Windows Server 2012 Essentials Edition x86-64 (32-bit and 64-bit)
  - Windows Server 2012 Foundation Edition x86-64 (32-bit and 64-bit)
  - Windows Server 2012 R2 Standard Edition x86-64 (32-bit and 64-bit)
  - Windows Server 2012 R2 Datacenter Edition x86-64 (32-bit and 64-bit)
  - Windows Server 2012 R2 Essentials Edition x86-64 (32-bit and 64-bit)
- Windows Server 2012 R2 Foundation Edition x86-64 (32-bit and 64-bit)
- Windows 7 Ultimate x86-64 (32-bit)
- Windows 7 Ultimate x86-32 (32-bit)
- Windows 7 Enterprise x86-64 (32-bit)
- Windows 7 Enterprise x86-32 (32-bit)
- Windows 7 Professional x86-64 (32-bit)

Pattern configuration for IBM ODM V8.7.1

The pattern configuration for IBM ODM Advanced requires:

- PureApplication System W2700, W2500, W1700, or W1500 that runs PureApplication Software V2.1
- PureApplication Service that runs PureApplication Software V2.1

For a current list of hardware and software requirements, visit

http://www-01.ibm.com/support/docview.wss?uid=swg27036156

The program’s specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a readme file, or other information published by IBM, such as an announcement letter. Documentation and other program content may be supplied only in the English language.

Planning information

Packaging

IBM ODM V8.7.1 is distributed via electronic download and a set of physical media packs consisting of multiple DVDs and CD-ROMs. The IBM ODM pattern is available as a downloadable eAssembly file that can be directly uploaded onto one of the supported pattern environments.

For more information about IBM Download Director, visit

This program, when downloaded from a website, contains the applicable IBM license agreement and License Information, if appropriate, and will be presented for acceptance at the time of installation of the program. For future reference, the license and License Information will be stored in a directory such as LICENSE.TXT.

Security, auditability, and control

IBM ODM V8.7.1 uses the security and auditability features of the host software.

The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

Ordering information

For ordering information, consult your IBM representative or authorized IBM Business Partner, or visit

http://www.ibm.com/software/support/pa.html

This product is only available via Passport Advantage. It is not available as shrinkwrap.

These products may only be sold directly by IBM or by authorized IBM Business Partners for Software Value Plus.

For more information about IBM Software Value Plus, visit

http://www.ibm.com/partnerworld/page/svp_authorized_portfolio
To locate IBM Business Partners for Software Value Plus in your geography for a specific Software Value Plus portfolio, visit

http://www.ibm.com/partnerworld/wps/bplocator/

Product group: Application and Integration Middleware

Product: IBM Operational Decision Manager V8.7 (5725-B69)

Product category: Operational Decision Manager

The programs in this announcement all have Value Unit-Based pricing.

<table>
<thead>
<tr>
<th>Program number</th>
<th>Program name</th>
<th>Value Unit exhibit</th>
</tr>
</thead>
<tbody>
<tr>

<td>Resource Value Units</td>
</tr>
</tbody>
</table>

For each System z IPLA program with Value Unit pricing, the quantity of that program needed to satisfy applicable IBM terms and conditions is referred to as the **required license capacity**. Your required license capacity is based upon the following factors:

- The System z IPLA program you select
- The applicable Value Unit Exhibit
- The applicable terms
- Whether your current mainframes are full capacity or sub-capacity

**Passport Advantage**

IBM ODM V8.7.1 ordering information for license and software subscription and support remains unchanged. Refer to Software Announcement ZP14-0526, dated October 1, 2014.

**Passport Advantage trade-up**

IBM ODM V8.7.1 ordering information for trade-up parts remains unchanged. Refer to Software Announcement ZP14-0526, dated October 1, 2014.

Consult your IBM representative or IBM Business Partner if you have any questions.

**Passport Advantage customer: Media pack entitlement details**

Customers with active maintenance or subscription for the products listed are entitled to receive the corresponding media pack.

**Processor Value Unit (PVU)**

PVU is a unit of measure by which the program can be licensed. The number of PVU entitlements required is based on the processor technology (defined within the PVU table by processor value, brand, type, and model number at the website below) and the number of processors made available to the program. IBM continues to define a processor, for the purpose of PVU-based licensing, to be each processor core on a chip (socket). A dual-core processor chip, for example, has two processor cores. The PVU table can be found at

Licensee can deploy the program using either full capacity licensing or virtualization capacity (sub-capacity) licensing according to the Passport Advantage Sub-Capacity Licensing Terms (refer to the web page below). If using full capacity licensing, licensee must obtain PVU entitlements sufficient to cover all activated processor cores* in the physical hardware environment made available to or managed by the program, except for those servers from which the program has been permanently removed. If using virtualization capacity licensing, licensee must obtain entitlements sufficient to cover all activated processor cores made available to or managed by the program, as defined according to the Virtualization Capacity License Counting Rules at

* An activated processor core is a processor core that is available for use in a physical or virtual server, regardless of whether the capacity of the processor core can be or is limited through virtualization technologies, operating system commands, BIOS settings, or similar restrictions.

**Notes**

- Some programs may require licenses for the program and what is being managed. In that case, the following applies. In addition to the entitlements required for the program directly, licensee must obtain PVU entitlements for this program sufficient to cover the processor cores managed by the program.
- Some programs may be licensed on a managed basis only. In that case, the following applies. Instead of the entitlements required for the program directly, licensee must obtain PVU entitlements for this program sufficient to cover the processor cores managed by the program.
- A few programs on an exception basis may be licensed on a referenced basis. In that case, the following applies. Rather than obtaining entitlements for the activated processor cores available to the program, licensee must obtain PVU entitlements for this program sufficient to cover the environment made available to the referenced program as if the program itself were executing everywhere the referenced program was executing, independent of the basis on which the referenced program is licensed.

**Resource Value Unit (RVU)**

RVU is a unit of measure by which the program can be licensed. RVU Proofs of Entitlement are based on the number of units of a specific resource used or managed by the program. Licensee must obtain sufficient entitlements for the number of RVUs required for licensee's environment for the specific resources as specified in the program specific table. RVU entitlements are specific to the program and the type of resource and may not be exchanged, interchanged, or aggregated.
with RVU entitlements of another program or resource. Refer to the program specific RVU table.

Notes

- Some programs may require licenses for the resources available to and the resources being managed by the program. In that case, the following applies. In addition to the entitlements required for the resources used by the program directly, licensee must obtain entitlements for this program sufficient to cover the resources managed by the program.
- Some programs may be licensed on a managed basis only. In that case, the following applies. Instead of the entitlements required for the resources used by the program directly, licensee must obtain entitlements for this program sufficient to cover the resources managed by the program.

Processor Value Unit (PVU) sub-capacity licensing

This software product is eligible for sub-capacity licensing. Customers must accept the terms of the IBM International Passport Advantage Agreement Attachment for Sub-Capacity Licensing Terms (Attachment), and must obtain PVU Proofs of Entitlement (PoEs) for the maximum processor core capacity available to an eligible sub-capacity product when deployed in an eligible virtualization environment. This is also referred to as sub-capacity or virtualization capacity licensing.

Customers must use the IBM License Metric Tool unless they meet the exceptions described in the Attachment.

For information regarding PVU sub-capacity licensing, including terms and IBM License Metric Tool ordering information, visit

Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

This product is only available via Passport Advantage.

Licensing

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use. Part number products only, offered outside of Passport Advantage, where applicable, are license only and do not include Software Maintenance.

Agreement for Acquisition of Software Maintenance

These programs are licensed under the IBM Program License Agreement (IPLA) and the associated Agreement for Acquisition of Software Maintenance, which provide for support with ongoing access to releases and versions of the programs. IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with the initial license acquisition of each program acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available. These programs have a one-time license charge for use of the programs and an annual renewable charge for the enhanced support that includes telephone assistance (voice support for defects during normal business hours), as well as
access to updates, releases, and versions of the programs as long as support is in effect.

The program's License Information will be available for review on the IBM Software License Agreement website

**Limited warranty applies**

Yes

**Limited warranty**

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional charge. For further information, consult the *IBM Software Support Handbook* found at

http://www.ibm.com/support/handbook

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

**Program technical support**

This technical support allows you to obtain assistance (via telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Subscription and Support (Software Maintenance) also provides you with access to updates (modifications or fixes), releases, and versions of the program. You will be notified,
via announcement letter, of discontinuance of support with 12 months' notice. If you require additional technical support from IBM, including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

**Money-back guarantee**

If for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

For clarification, note that (1) for programs acquired under the IBM International Passport Advantage offering, this term applies only to your first acquisition of the program and (2) for programs acquired under any of IBM's On/Off Capacity on Demand (On/Off CoD) software offerings, this term does not apply since these offerings apply to programs already acquired and in use by you.

**Volume orders (IVO)**

No

**Passport Advantage applies**

Yes, and through the Passport Advantage website at

http://www.ibm.com/software/passportadvantage

**Usage restriction**

Yes. Usage is limited to the quantity of Value Units licensed.

For additional information, refer to the License Information document that is available on the IBM Software License Agreement website

**Software Subscription and Support applies**

Yes. Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and Technical Support are provided by the Software Subscription and Support offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software and Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support with each program license acquired. The initial period of Software Subscription and Support can be extended by the purchase of a renewal option, if available.

While your Software Subscription and Support is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance via telephone and, if available, electronic access, only to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, consult your IBM Software Support Handbook

http://www.ibm.com/support/handbook
Software Subscription and Support does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.

For additional information about the International Passport Advantage Agreement and the IBM International Passport Advantage Express Agreement, visit the Passport Advantage website at

http://www.ibm.com/software/passportadvantage

**IBM Operational Support Services - Support Line**

No

**Other support**

Passport Advantage

**System i Software Maintenance applies**

No

**Variable charges apply**

No

**Educational allowance available**

Education allowance does not apply. Education software allowance does not apply. Special education prices are available for qualified customers through Passport Advantage.

**Sub-capacity pricing terms and conditions**

To be eligible for sub-capacity pricing, the machine on which the eligible products are installed and running must be eligible for sub-capacity pricing terms and conditions. Software pricing, at less than full machine capacity for eligible products, apply when running:

- AIX 5L™ V5.1, or later, on an IBM System p® 690 or equivalent partition-capable operating system and machine.
- OS/400® V5R1, or later, running on an IBM System i®.
- Linux running in an LPAR under AIX 5L V5.1, OS/400 V5R1, or in a partition on an equivalent partition-capable operating system and server.

Sub-capacity pricing for eligible products is based on the current program pricing methodology, but the number of processors will be determined based on the sum of processors for all partitions where the program is defined (used). To obtain pricing at less than full machine capacity for eligible products, you are required to:

- Install and use, when available, IBM's license use management program, which installs with eligible IBM programs.
- Install available updates to the operating system and eligible products such that license use can be accurately managed.
- Determine if the use of sub-capacity pricing terms results in a reduced requirement for entitlements; you can reallocate the entitlement difference by distributing entitlements across a larger or different set of systems, or reserve them for future growth. There will be no refunds for these freed up entitlements. Subscription, Software Maintenance and support volumes, and entitlements for existing contracts will continue at the same levels as the acquired licenses.
Statement of good security practices

IT system security involves protecting systems and information through prevention, detection, and response to improper access from within and outside your enterprise. Improper access can result in information being altered, destroyed, or misappropriated or can result in misuse of your systems to attack others. Without a comprehensive approach to security, no IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems and products are designed to be part of a comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products, or services to be most effective. IBM does not warrant that systems and products are immune from the malicious or illegal conduct of any party.

Prices

Business Partner information

If you are an IBM Business Partner -- Distributor for Workstation Software acquiring products from IBM, you may link to Passport Advantage Online for resellers where you can obtain Business Partner pricing information. An IBM ID and password are required.

IBM Global Financing

IBM Global Financing offers competitive financing to credit-qualified customers to assist them in acquiring IT solutions. Offerings include financing for IT acquisition, including hardware, software, and services, from both IBM and other manufacturers or vendors. Offerings (for all customer segments: small, medium, and large enterprise), rates, terms, and availability can vary by country. Contact your local IBM Global Financing organization or visit

http://www.ibm.com/financing

IBM Global Financing offerings are provided through IBM Credit LLC in the United States, and other IBM subsidiaries and divisions worldwide to qualified commercial and government customers. Rates are based on a customer's credit rating, financing terms, offering type, equipment type, and options, and may vary by country. Other restrictions may apply. Rates and offerings are subject to change, extension, or withdrawal without notice.

Financing from IBM Global Financing helps you preserve cash and credit lines, enables more technology acquisition within current budget limits, permits accelerated implementation of economically attractive new technologies, offers payment and term flexibility, and can help match project costs to projected benefits. Financing is available worldwide for credit-qualified clients.

For more financing information, visit
