At a glance

The new ThinkPad® X301 ultraportable notebook offers outstanding features and options including:

- 13.3-inch WXGA+ LED backlight display with 1440 x 900 resolution
- Combination of the latest technologies including global positioning system (GPS)¹ and solid state drive (SSD)
- Intel® Core 2 Duo processor SU9400
- Latest Lenovo® options such as the USB port replicator and modem via USB dongle
- New Intel GS45 Express chip set
- Choice of 64 GB or 128 GB SSD to match your current and future storage needs
- Integrated camera and digital microphone and superior speakers
- DisplayPort
- Microsoft® Windows® Vista operating system
- Traditional ThinkPad security and reliability features

Overview

The new ThinkPad X301 ultraportable notebook is the ultimate business tool for professionals who are constantly on the move and need to stay productive wherever they are. It comes with the latest technology for connectivity such as, wireless WAN (WWAN) to help you to stay connected on the road and in the office. The ThinkPad X301 notebook is extremely thin starting

at just 18.6 mm², or less than 0.75 inches, and the starting weight is as low as 1.33 kg (2.93 lb)³.

It features the latest in security and reliability. The 32-byte preboot password, for example, guarantees that information that is meant to stay private really stays private. The ThinkPad X301 notebook also comes with the powerful Intel Core 2 Duo processor technology that delivers great performance, even for processor-intensive tasks such as VoIP calls or analysis of large amounts of data. The ThinkPad X301 notebook is also friendly for the environment; most packaging material is recyclable and the amount of dangerous metals is reduced. The ThinkPad X301 also meets the EPEAT Gold Standard and is GREENGUARD indoor air quality certified.

Latest technology

- Processors and chip sets to match the performance needs of any mobile professional:
 - Intel Core 2 Duo processor family
 - Mobile Intel GS45 Express chip set
 - Intel GMA 4500MHD Integrated Graphics
- Microsoft Windows Vista operating system
- 13.3-inch WXGA+ LED backlight panel with 1440 x 900 resolution, significantly brighter than a standard panel
- Improved communications enabling users to stay connected in multiple connections:
 - Integrated WWAN
 - AT&T High Speed Access Packet (HSPA)
 - Wireless Broadband Access⁴
 - Wireless LAN (WLAN) connection⁵ for improved range and throughput with:
 - Intel WiFi Link 5300 (3 x 3 AGN)
 - Intel WiFi Link 5100 (1 x 2 AGN)
 - Bluetooth, a convenient way to use, for example, wireless headsets
- Ultrathin DVD burner⁶
- A 1.3 megapixel camera on selected models and new digital microphone and stereo speakers with the latest audio enhancements
- Intelligent design features such as illuminated buttons on the keyboard and new rubber paint to significantly improve usability
- Integrated fingerprint reader, offering superior security against both internal and external security threats
- ThinkVantage® Rescue and Recovery⁷, a one-button recovery and restore solution
- ThinkPad PC3-8500 DDR3 1067 MHz memory⁸, expandable with optional SDRAM SO DIMM module to a maximum 4.0 GB⁹
- DisplayPort that makes digital display connection easier, more readily available, and with higher performance
- Extensive standard ports, including three USB 2.0 ports, external display, and RJ-45
- EPA ENERGY STAR 4.0-compliant¹⁰ and EPEAT Gold certified

Certain product family features are limited to selected models that may not be available in all countries. Some combinations of features are not supported. Refer to the [Pricing](#) or [Product number](#) sections for the models and features available in your country.

Planned availability dates

- August 2008
- September 2008; models with 128 GB solid state drive and AT&T Wireless WAN

New design

The ThinkPad X301 notebook features a 13.3-inch display that combines the portability of a smaller display and the visual comfort of a larger one. It is the thinnest ThinkPad notebook available. It can slide easily into your bag or luggage. With its wide panel, you can work with your office applications or watch a movie on DVD.

The ThinkPad X301 notebook includes these unique design features:

- Rubber paint on the palm rest and top and bottom cover that makes the notebook comfortable to use
- Matte texture finish on the keyboard for a tactile feel on the keys and paint that lasts longer
- Illuminated buttons that improve usability

Latest technology

The new ThinkPad X301 notebook features many industry-leading technologies.

Solid state drive (SSD)

The ThinkPad X301 notebook features a 64 or 128 GB SSD that delivers these benefits:

- Faster boot time and application launch time
- Lower power usage and less heat production
- Longer lifetime; no moving parts and less wear and tear
- Quiet operation

LCD TFT display

The ThinkPad X301 ultraportable notebook includes a 13.3-inch WXGA+ TFT display with 1440 x 900 resolution and LED backlight panels. LED offers benefits over regular panels, including:

- Lower power consumption
- Brighter presentation

The LED backlight panels accommodate an extremely thin design and contribute to a longer battery life. Because LED panels are brighter than regular panels, they offer easier viewing outdoors or in bright offices.

DisplayPort

The next-generation display interface technology that combines HD video and audio into a single digital connector-interface used for a broad range of applications. Benefits include making digital display connections easier, more readily available, and with higher performance.

Ultrathin DVD burner

The ThinkPad X301 notebook features the industry-leading 7-mm (0.28-in) ultrathin DVD burner.

Integrated camera and digital microphone

The ThinkPad X301 notebook has the latest technology for voice and video communications for both the traveler and home user who want to stay connected via a computer. It includes an integrated 1.3 megapixel camera and a digital microphone. The digital microphone delivers true sound and effectively cancels background noise. It also enables superior speech recognition.

Long battery life

The ThinkPad X301 notebook features three battery options:

- Three-cell Li-Polymer battery (standard)
- Three-cell Li-Polymer battery (options bay slot)
- Six-cell prismatic (Li-Ion extended battery)

The ThinkPad X301 notebook can deliver up to 10 hours of battery life. It also comes with the BatteryStretch feature that lets you squeeze extra minutes out of your notebook when it appears that the battery is about to run out.

Improved wireless performance

The ThinkPad X301 notebook features several ways to connect to networks whether you are at the office or on the road, including:

- WWAN
- WLAN
- Bluetooth
- Modem via USB dongle (option)

Environmentally friendly features

The ThinkPad X301 notebook meets the EPEAT gold standard. EPEAT is a universally accepted, highest-rated environment tool. Products with EPEAT gold certification have low energy consumption and are environmentally friendly. The ThinkPad X301 notebook has many energy-saving features including:

- Dual core ultra low voltage (LV) processors
- SSDs
- LED backlight panel
- Arsenic-free LCD glass panels

The ThinkPad X301 manufacturing process is environmentally friendly.

- Most packaging materials are recyclable.
- Use of environmentally sensitive materials such as cadmium, mercury, and hexavalent chromium is reduced.

The ThinkPad X301 notebook has improved energy efficiency with:

- BatteryStretch
- ENERGY STAR 4.0 compliance
- GREENGUARD indoor air quality certification

Latest options available

The ThinkPad X301 notebook can be expanded with multiple options designed to improve productivity. These include:

- USB port replication
- USB modem
- External HDD

Processor technology

Intel Core 2 Duo small form factor SU9400 processor (1.4 GHz with 3 MB of L2 cache and 800 MHz front-side bus (FSB))

System memory

1 GB (512 MB x 2), 1 GB, 2 GB, 2 GB (1024 MB x 2), or 4 GB (2048 MB x 2)

Important information about memory

Lenovo notebooks announced in April 2007, or later, have a new 64-bit architecture.

The standard memory can be expanded to 3 or 4 GB of addressable memory, depending on whether the operating system is a 32- or 64-bit operating system. The new notebooks with a Windows Vista 32-bit or previous Windows 32-bit operating system can support up to 3 GB of addressable memory. The new notebooks with a Windows Vista 64-bit operating system can support up to 4 GB of addressable memory.

Recommended for memory expansion are 512 MB, 1 GB, and 2 GB PC3-8500 DDR3 SDRAM 1067 MHz SO DIMM.

Security and reliability

Lenovo combines thoughtful engineering with bold design, delivering systems that help lower your total cost of ownership.

- Lenovo password management is easy to use. It enables secure access to your system as well as your Web pages and is integrated with the fingerprint reader available on many Lenovo systems.
- Lenovo systems include a fully integrated recovery environment that works even when the operating system is not working.
- Lenovo systems manage everything that changes when your location changes, not just your Internet connection.

Data protection

Models include integrated fingerprint reader technology from ThinkVantage technologies to help protect access to your ThinkPad notebook and data.

- Because fingerprints are unique, using them along with other security measures can provide strong security.
- Fingerprint reader is built right into the palm rest area of the computer. When used with Password Manager and the Client Security Solution, pass your finger over the reader instead of typing passwords or combine it with passwords.
- Security software is preloaded and combines the integrated fingerprint reader with Password Manager and the Client Security Solution for strong security measures that are easy to follow.
- Administrators can implement strong security policies and users can meet ongoing password requirements easily.

Keyboard and TrackPoint with enhanced features

The keyboard has the familiar layout and quality of a ThinkPad notebook with function keys that allow you to quickly access system functions such as power management control.

Each of these quick key combinations launches a menu that can be used to easily manage your ThinkPad system:

- Fn + F5 for wireless radio control
- Fn + F7 for Presentation Director to toggle through different displays and adjust resolutions
- Fn + F9 for Easy Eject to seamlessly remove add-on peripherals such as a memory key

TrackPoint® with enhanced features incorporates the press-to-select and release-to-select function to speed icon launches and help reduce keystrokes. A programmable center button enables fast scrolling of Web sites (requires Internet access; not included) and documents or fast panning across wide spreadsheets. The innovative magnifying glass feature can be used to enlarge screen views in any application.

Other features

The ThinkPad X301 systems include these ports:

- External display
- Built-in RJ-45 connectors for LAN connections

- Microphone
- Headphone
- Three USB 2.0 ports

Software

Non-Lenovo software

The non-Lenovo software programs listed in this section may be licensed to you under the non-Lenovo manufacturer's, supplier's, or publisher's terms and conditions. The non-Lenovo manufacturers, suppliers, or publishers are responsible for providing any service or support associated with these programs. The descriptions of these programs were obtained from information made available by these companies to the general public. Lenovo does not warrant these products. Some software may differ from its separately available version (if available), and may not include user manuals or all program function.

Software that may be included or preloaded on the system:

Standard preload for ThinkPad X301 systems

Windows Vista operating system operating system

- ThinkVantage Productivity Center
- ThinkVantage Access Connections™
- ThinkVantage Rescue and Recovery®
- ThinkVantage Client Security Solution
- ThinkVantage System Update
- PC-Doctor diagnostics
- Adobe® Acrobat Reader
- McAfee VirusScan Plus with 30 days of virus definitions
- Sun JRE
- ThinkVantage fingerprint software (only on models with fingerprint reader)
- Creator Business Edition
- Creator Business Edition and MyDVD
- InterVideo WinDVD
- Microsoft Office Ready 2007 Trial
- Microsoft Office Professional 2007 Hybrid
- Microsoft Office Small Business 2007 with Microsoft Office Professional 2007 Trial Hybrid
- Microsoft Office Basic 2007 with Microsoft Office Professional 2007 Trial Hybrid

Reference information

- 1 This footnote does not apply.
- 2 Thickness may vary at certain points on the system.
- 3 Actual weight may vary depending on vendor components, manufacturing process, or options. Weight includes battery and optional travel bezel instead of the standard optical drive.
- 4 Lenovo customers must contact their service provider after purchase to activate service. WWAN requires a separate service contract with the service provider, and monthly or daily service charges and air time charges will apply. Roaming charges may also apply. Some service providers may have 30-day free trial offers for Lenovo customers.

The wireless service provider, not Lenovo, is solely responsible for service. Service is not available in all areas; the purchaser is responsible for verifying that service is available for the intended location before purchasing a computer equipped with a WWAN card. For information on network details, coverage limitations, and maps, visit your service provider's Web site.

- 5 The Intel WiFi Link 5100 (1 x 2) and WiFi Link 5300 (3 x 3) follow 802.11 a, b, g and draft n specifications. The Wi-Fi Alliance is certifying products based on 802.11n Draft 2.0 standard. The Intel 5300 Series Wireless Card is capable of supporting transfer rates of up to 450 Mbps. The maximum speed depends on the access point device and the number of integrated antennas used for connection.
- 6 Maximum CD and DVD rates; rates are variable and are often less than the maximum. For combination drives, maximum speeds are given in the following order: CD-W, CD-RW, CD-R, and DVD-R.
- 7 One-button recovery and restore solution. A suite of self-recovery tools to help users diagnose and recover - even if the operating system will not boot.
- 8 Lenovo notebooks announced April 2007, or later, have a new 64-bit architecture.
- The standard memory can be expanded to 3 or 4 GB of addressable memory, depending on whether the operating system is a 32- or 64-bit operating system. The new notebooks with a Windows Vista 32-bit or previous Windows 32-bit operating system can support up to 3 GB of addressable memory. The new notebooks with a Windows Vista 64-bit operating system can support up to 4 GB of addressable memory.
- Recommended for memory expansion are 512 MB, 1 GB, and 2 GB PC3-8500 DDR3 SDRAM 1067 MHz SO DIMM.
- 9 For PCs without a separate video card, memory supports both system and video. Accessible system memory is up to 256 MB less than the amount stated, depending on video mode.
- 10 As an ENERGY STAR partner, Lenovo has determined that all ThinkPad notebook systems capable of running Windows 32-bit and 64-bit operating systems, except those with Intel Celeron® processors, are designed to meet the EPA ENERGY STAR 4.0 guidelines for energy efficiency.

Warranty information

For a copy of applicable product warranties, contact your authorized Lenovo reseller or Lenovo representative. Lenovo makes no representation or warranty regarding third-party products or services.

Telephone support may be subject to additional charges, even during the limited warranty period. For Lenovo machines with on-site labor, Lenovo will attempt to diagnose and resolve the problem remotely before sending a technician. For Lenovo machines with courier or depot service, your service provider will attempt to diagnose and resolve the problem remotely before sending a courier.

All offers are subject to availability. Lenovo reserves the right to alter product offerings and specifications at any time without notice. Lenovo is not responsible for photographic or typographic errors.

Accessibility by people with disabilities

Technical information

Specified operating environment

Physical specifications

- Width: 318 mm (12.5 in)
- Depth: 231 mm (9.09 in)
- Height: 18.6 to 23.4 mm (0.74 to 0.92 in)
- Approximate travel weight:
 - Three-cell standard battery: From 1.33 kg (2.93 lb) with travel bezel
 - Six-cell extended life battery: From 1.42 kg (3.12 lb) with travel bezel
- AC adapter (two- or three-pin)
- Power cord for ac adapter

Note: Actual specifications and weights may vary based on features, vendor components, or manufacturing processes.

Electrical specifications

- Universal ac adapter
- Input: 100/240 V ac, 50/60 Hz
- Output: 20 V dc
- Li-Ion battery pack:
 - Three-cell standard battery: 11.2 V, 2.44 Ah
 - Six-cell extended life battery: 10.8 V, 4.0 Ah

Operating environment

ThinkPad computers are designed, built, and tested for high quality and reliability. When used properly in standard business environments, a ThinkPad system should be a reliable computing asset for many years. Harsh environments and abuse can damage ThinkPad systems since they are not intended to withstand extreme temperatures, dust, shock, or other severe physical environments. ThinkPad systems should not be used in unsuitable environments. For example, a ThinkPad system should not be used in non-stationary environments, such as in-vehicle installations, without additional casing or shock dissipation.

For additional information about supported environments, refer to the Physical Specifications section.

Software requirements

The preinstalled Microsoft Windows Vista operating system support the new ThinkPad X301 series computers.

Operating systems other than those preinstalled on the systems may not provide full-feature functionality. To view considerations or Service Hints and Tips by operating system, visit

<http://www.lenovo.com/think/support>

Vendor software compatibility

Lenovo tests a large number of commonly used and available applications for compatibility with its ThinkPad systems using supporting operating systems and configurations. In general, you can expect that most vendor applications designed to run on supported operating systems and Intel-compatible system architectures should be compatible with a ThinkPad system. Some configurations, however, may not be compatible.

Lenovo does not warrant or support vendor software products, nor guarantee compatibility of those products with Lenovo systems. Refer to the applicable warranty and license terms provided by the respective vendors.

Limitations

ThinkPad X301 series models featuring a Windows Vista 32-bit operating system can support up to 3 GB of addressable memory.

For a list of tips about running various versions of operating systems, visit

<http://www.lenovo.com/think/support>

Planning information

Cable orders

All cables are included in the shipment group.

Installability

The ThinkPad X301 notebook requires approximately 20 minutes for installation. Installation includes unpacking, setting up, and powering on the system. Additional time is required to install optional memory and other optional features.

Security, auditability, and control

Passwords

These password protection mechanisms are available:

- Power-on passwords to help protect the system from unauthorized use
- Supervisor password for use by a system administrator
- SSD password to help protect data on the removable HDD

In addition, an optional locking device in the security slot provides physical security.

The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communications facilities.

Terms and conditions

IBM Global Financing

Yes

To obtain copies of the Lenovo Limited Warranty, contact your reseller or Lenovo.

In the United States, call 800-426-7378 or write to:

Warranty Information
500 Park Offices Drive
Research Triangle Park, NC 27709
Attn: Dept ZPYA/B500

Warranty period

- System hardware: One year on parts and labor (machine type 2777)
- System hardware: Three years on parts and labor (machine type 2776)
- System battery: One year

Optional Lenovo features initially installed in a Lenovo system carry the same warranty period as the system. If installed after the initial system installation, they carry the balance of the system warranty or the optional feature warranty, whichever is greater.

Warranty service

If required, your service provider provides repair or exchange service depending on the type of warranty service specified for the machine. A service technician will attempt to resolve your problem over the telephone. You must follow the problem determination and resolution procedures. Scheduling of service will depend upon the time of your call and is subject to parts availability. Service levels are response time objectives and are not guaranteed. The specified level of warranty service may not be available in all worldwide locations. Additional charges may apply outside your service provider's normal service area. Contact your local service provider representative or your reseller for country and location specific information.

Customer replaceable unit (CRU) service

Under CRU service, your service provider will ship CRUs to you for installation by you. CRU information and replacement instructions are shipped with your product and are available from Lenovo at any time upon request. CRUs that are easily installed by you are called self-service CRUs, while optional-service CRUs may require some technical skill and tools. Installation of self-service CRUs is your responsibility. You can request that a service provider install optional-service CRUs under one of the other types of warranty service designated for your product. An optional service offering may be available from Lenovo to have Lenovo install self-service CRUs for you. You can find a list of CRUs and their designation in the publication that is shipped with your product or at

<http://www.lenovo.com/CRUs>

The requirement to return a defective CRU, if any, will be specified in the materials shipped with a replacement CRU. When return is required, return instructions, a prepaid return shipping label, and a container will be included with the replacement CRU. You may be charged for the replacement CRU if your service provider does not receive the defective CRU within 30 days of your receipt of the replacement.

Courier or depot service

Under courier or depot service, your product will be repaired or exchanged at a designated service center, with shipping arranged by your service provider. You are responsible for disconnecting the product. A shipping container will be provided to you for you to return your product to a designated service center. A courier will pick up your product and deliver it to the designated service center. Following its repair or exchange, the service center will arrange the return delivery of the product to you.

This type of service is called EasyServ in the U.S. and Canada.

Call 800-426-7378 to assist with problem isolation for hardware to determine if warranty service is required. Telephone support may be subject to additional charges, even during the limited warranty period. If a hardware problem is identified, the Customer Support Center will either initiate the shipment of a CRU or arrange for a courier to pick up the system for overnight delivery (where available) to the repair location. Most repairs should be made within 48 hours after the system is received at the repair location (actual repair time may vary). Keep the original shipping carton for shipping to the repair location. If the original shipping carton is not available, the courier will deliver a shipping carton and return to pick up the system for delivery to the repair location.

International Warranty Service (IWS)

IWS is available during the warranty period to customers who travel or relocate to countries where their computer is sold and serviced by a service provider authorized to perform warranty service. Eligible Lenovo computers are identified by their four-digit machine type.

You can obtain IWS through the method of service, such as CRU, depot, carry-in, or on-site, provided in the servicing country. Service methods and procedures vary by country, and some service or parts may not be available in all countries. Service centers in certain countries may not be able to service all models of a particular machine type. In addition, some countries may have fees and restrictions that apply at the time of service.

Note: Due to the earth's magnetic field, cathode ray tube (CRT) monitors are manufactured to work in northern, southern and equatorial regions of the earth and may not produce a satisfactory image when moved between them. Any required adjustment (if possible) is not covered under IWS and may be subject to a chargeable action. The magnetic field does not affect flat panel LCD monitors and ThinkPad LCD displays.

Licensing

Programs included with this product are licensed under the terms and conditions of the License Agreements that are shipped with the system.
