At a glance

A new machine type, model, and feature number are available for administrative purposes only.

- These numbers are a fulfillment mechanism for site preparation and installation support materials on zEnterprise™ 114 servers.
- Site preparation and installation support materials are configured and shipped automatically when an order is placed for a zEnterprise 114 server.

Overview

IBM® System z® is implementing a machine type, model, and feature structure for the delivery of site preparation and installation support materials on zEnterprise 114 servers.

This machine type, its model, and its feature number are for administrative purposes only. This is not a separate product. Through this ordering vehicle, IBM will deliver certain required materials for the z114.

Key prerequisites

None

Planned availability date

September 9, 2011

Description

The site preparation and installation support required materials are applicable to the zEnterprise 114 server, but are shipped separately to satisfy local environmental requirements.

The site preparation and installation support required materials being announced today are not separate IBM products - this announcement provides only a separate ordering vehicle for these site preparation and installation support required materials, to be used only in conjunction with an order for an associated zEnterprise 114 (z114), and for installation in the z114 server.

The site preparation and installation support required materials are configured and shipped automatically when an order is placed for a z114 server.

Reference information

For additional information about z114, refer to Hardware Announcement [111-136](#), dated July 12, 2011, The IBM zEnterprise 114 - A new dimension in computing.
