At a glance

IBM® InfoSphere® Information Server Packages:

- Makes it easier for customers to purchase InfoSphere Information Server's broad capabilities by function, such as data quality, data integration, and business/IT alignment, allowing you to focus on your essential information integration needs
- Includes new offerings, which may be licensed with unlimited use or with restricted use with IBM's Data Warehouse Appliances: Netezza® and Smart Analytics Systems
- Enables existing InfoSphere Information Server clients to easily upgrade to new simplified offerings

For ordering, contact your IBM representative, an IBM Business Partner, or IBM Americas Call Centers at 800-IBM-CALL (Reference: YE001).

Overview

IBM InfoSphere Information Server simplified offerings include:

- IBM InfoSphere Business Information Exchange
- IBM InfoSphere Information Server for Data Quality
- IBM InfoSphere Information Server for Data Integration
- IBM InfoSphere Information Server Enterprise Edition

IBM InfoSphere Business Information Exchange, a foundation offering across InfoSphere, is designed to deliver faster time to value, decrease project risk, and increase overall governance of information by enabling a strong alignment between business and IT team members. Some of the capabilities include the ability to define business terms, automatically discover technical metadata, link business terms to technical metadata, and perform logical and physical data mapping and data lineage.

IBM InfoSphere Information Server for Data Quality helps enable faster time to value and improved governance for your information so that your data is more accessible, authoritative, consistent, timely, and in context for analysis and reporting and can better support your key business initiatives, such as master data management, data warehousing, application consolidation and retirement, and business intelligence. Some of the capabilities in this offering include data profiling,

deduplication, standardization, enrichment as well as data quality rule development, monitoring, and dashboarding.

Some of the capabilities in this offering include business friendly tooling for source to target mapping, world-class ETL (extract, transform, and load) capabilities, operations monitoring and management, and parallel processing.

IBM InfoSphere Information Server Enterprise Edition includes all the capabilities of InfoSphere Business Information Exchange, InfoSphere Information Server for Data Quality, and InfoSphere Information Server for Data Integration.

All of these offerings are part of the IBM InfoSphere Information Server product family. IBM InfoSphere Information Server is a leader in data integration and includes a common metadata server to support reuse and enhanced governance, as well as capabilities to support creating managing project blueprints, to help improve project visibility and decrease project risk.

In addition, clients may license these offerings, which have restricted licenses, with a restricted license for use with one of the following IBM Data Warehouse Appliances:

- IBM Netezza 100
- IBM Netezza 1000
- IBM Netezza High Capacity Appliance C1000
- IBM Smart Analytics System 7700

Planned availability date

March 27, 2012: Electronic availability

April 20, 2012: Media availability

Description

Trusted information in today's organization requires collaboration between IT and business, using a unified platform to define and integrate data. Organizations need data that is accessible, authoritative, consistent, timely, and in context for analysis and reporting.

InfoSphere Information Server is a comprehensive information integration and governance platform that helps clients create, manage, and deliver information where it is needed in a timely manner. InfoSphere Information Server includes advanced governance capabilities within a highly scalable, security-rich, and robust data integration platform designed to simplify your data integration needs. It addresses the most demanding information needs of organizations while improving the operational management and governability of integration projects and information infrastructure.

In this release, IBM is introducing simplified packaging of InfoSphere Information Server, based on the core capabilities that clients require.

Education support

IBM training provides education to support many IBM offerings. Descriptions of courses for IT professionals and managers are on the IBM training website

<http://www.ibm.com/services/learning/>

Call IBM training at 800-IBM-TEACH (426-8322) for catalogs, schedules, and enrollments.

Education support

Available training offerings include client on-site training, public training at IBM facilities, and remote learning via FlexLearning. Through client on-site training, IBM delivers standard or customized training to meet the requirements of its clients. IBM can also provide mobile academies for a rental fee to minimize clients' setup activities.

IBM public training simplifies the process by providing the complete environment for standard course deliveries and giving students the ability to learn without the distractions of everyday responsibilities. Public training is offered on a regular schedule worldwide. For more information on public instructor-led training, visit

<http://www.ibm.com/software/data/ips/services/learning.html>

The newly enhanced FlexLearning program enables clients to attend training on their own schedule at their own location. This program offers state-of-the-art technology to deliver highly valuable training at minimum cost. All current courses are approximately three hours in length and offer a valuable learn-by-doing, self-paced format.

For more information on any of the training offerings, contact

iiseduc@us.ibm.com

Offering Information

Product information is available via the Offering Information website

<http://www.ibm.com/common/ssi>

Also, visit the Passport Advantage® website

<http://www.ibm.com/software/passportadvantage>

Publications

Documentation provided with the product

Documentation for IBM InfoSphere Information Server Packages and IBM InfoSphere Information Server for Data Warehousing is provided for each product module part of the acquired offering. No hardcopy publications are shipped with these offerings. However, Quick Start Guides are provided on [ibm.com](http://www.ibm.com)® at

<http://www-01.ibm.com/support/docview.wss?uid=swg27022353>

The Information Center

When you install the product module parts of the acquired offering, the documentation is installed in the IBM InfoSphere Information Server Information Center. The Information Center is also available at

The IBM Publications Center

In addition to the documentation provided with the product module parts of the acquired offering, you can also obtain publications from the IBM Publications Center at

<http://www.ibm.com/shop/publications/order>

The Publications Center is a worldwide central repository for IBM product publications and marketing material with a catalog of 70,000 items. Extensive search facilities are provided. Payment options for orders are via credit card (in the US) or customer number for 20 countries. A large number of publications are available online in various file formats, and they can all be downloaded by all countries. Those with order numbers that begin with SC or GC can be downloaded by all countries free of charge, and those with order numbers that begin with LC can be purchased by customers with an active product license for the related product.

The following table provides information that can be used to locate this product's publications from the IBM Publications Center.

Technical information

Specified operating environment

Hardware requirements

IBM InfoSphere Information Server V8.7 simplified offering packages and InfoSphere Information Server Data Warehousing:

Refer to the information and system requirements website for each modular part of the acquired offering

<http://www-01.ibm.com/software/data/infosphere/info-server/overview/requirements.html>

Note: The IBM InfoSphere Information Server for Data Warehousing programs may only load to certain hardware targets, which are specified in the Program license. Refer to the Program license, Program Unique Terms for details.

Software requirements

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a readme file, or other information published by IBM, such as an announcement letter.

Documentation and other program content may be supplied only in the English language.

Refer to the system requirements website, listed below for each product module, for information regarding software requirements.

Limitations

Refer to the [Software requirements](#) section.

For additional information, refer to the [Terms and conditions](#) section of this announcement, or to the License Information document that is available on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

Performance considerations

Refer to the [Software requirements](#) section.

Note: This product, Information Server Packages and offering chargeable components and Information Server for Data Warehousing offering chargeable components, includes entitlement to IBM DB2 Enterprise Server Edition V9.7 for specific uses as defined within the software license. IBM DB2 offers increased data protection, scalability, and performance for database-intensive operations in order to manage data more effectively and efficiently. Greater availability is delivered through enhancements such as online, automated database reorganization. In addition, the increased scalability and the ability to leverage the latest in server technology help deliver increased performance of backup and recovery processes.

Planning information

Installability

Software Subscription and Support, also referred to as Software Maintenance, is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and technical support are provided by the Software Subscription and Support offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software, and technical support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support with each program license acquired. The initial period of Software Subscription and Support can be extended by the purchase of a renewal option, if available.

Security, auditability, and control

The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

Ordering information

These products are only available via Passport Advantage. They are not available as shrinkwrap.

These products may only be sold directly by IBM or by authorized IBM Business Partners for Software Value Plus.

Charge metrics definitions

Authorized User

Authorized User is the unit of measure by which this program is licensed. An Authorized User is an individual, named or unnamed, within or outside of your enterprise. The program may be installed on one or more computers or servers and accessed by the number of users authorized by the Proof of Entitlement (PoE). You must have an entitlement for each Authorized User accessing the program or any program component in any manner directly or indirectly (for example, via a multiplexing program, device, or application server) through any means.

Processor Value Unit (PVU)

Processor Value Unit (PVU) is a unit of measure by which the program can be licensed. The number of PVU entitlements required is based on the processor technology, defined within the PVU Table by processor value, brand, type, and model number at the following website and by the number of processors made available to the program.

http://www.ibm.com/software/lotus/passportadvantage/pvu_licensing_for_customers.html

IBM continues to define a processor, for the purpose of PVU-based licensing, to be each processor core on a chip. A dual-core processor chip, for example, has two processor cores.

Licensee can deploy the program using either Full Capacity licensing or Virtualization Capacity (Sub-Capacity) licensing according to the Passport Advantage Sub-Capacity Licensing Terms (see webpage below). If using Full Capacity licensing, Licensee must obtain PVU entitlements sufficient to cover all activated processor cores (refer to notes below) in the physical hardware environment made available to or managed by the program, except for those servers from which the program has been permanently removed. If using Virtualization Capacity licensing, Licensee must obtain entitlements sufficient to cover all activated processor cores made available

to or managed by the program, as defined according to the Virtualization Capacity License Counting Rules at

http://www.ibm.com/software/lotus/passportadvantage/Counting_Software_licenses_using_specific_virtualization_technologies.html

Notes:

- An Activated processor core is a processor core that is available for use in a physical or virtual server, regardless of whether the capacity of the processor core can be or is limited through virtualization technologies, operating system commands, BIOS settings, or similar restrictions.
- Some programs may require licenses for the program and what is being managed. In that case, the following applies: In addition to the entitlements required for the program directly, Licensee must obtain PVU entitlements for this program sufficient to cover the processor cores managed by the program.
- Some programs may be licensed on a managed basis only. In that case, the following applies: Instead of the entitlements required for the program directly, Licensee must obtain PVU entitlements for this program sufficient to cover the processor cores managed by the program.
- A few programs on an exception basis may be licensed on a referenced basis. In that case, the following applies: Rather than obtaining entitlements for the activated processor cores available to the program, Licensee must obtain PVU entitlements for this program sufficient to cover the environment made available to the referenced program as if the program itself were executing everywhere the referenced program was executing, independent of the basis on which the referenced program is licensed.
- Express and Workgroup programs may be licensed with maximum use terms. In that case, the following applies: The maximum authorized use terms and conditions for PVU licensed IBM Express and Middleware programs can be found in the IBM Express and Middleware Licensing Guide.

Manager Server

Managed Server is a unit of measure by which the program can be licensed. A server is a physical computer that is comprised of processing units, memory, and input/output capabilities and that executes requested procedures, commands, or applications for one or more users or client devices. Where racks, blade enclosures, or other similar equipment is being employed, each separable physical device (for example, a blade or a rack-mounted device) that has the required components is considered itself a separate server. Licensee must obtain Managed Server entitlements for each server managed by the program.

Cross-platform products

Cross-platform products for use on System z

Order the part numbers that follow when the product is used for either the development of code that will be deployed on System z servers or when the product will be communicating or transferring data between a distributed server and a System z server. Otherwise, order from the other set of part numbers in this announcement. This set of part numbers provides the identical supply and authorization as the other set in this announcement.

Cross-platform product for use on System z IFL engines

Order the part numbers that follow when the product is intended to run on the Linux operating system on System z IFL engines. If the product is not intended to run on the Linux operating system on System z IFL engines, order from the other set of part numbers in this announcement. This set of part numbers provides the identical supply and authorization as the other set in this announcement.

Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

Licensing

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use.

Part number products only, offered outside of Passport Advantage, where applicable, are license only and do not include Software Maintenance.

This software license includes Software Subscription and Support (also referred to as Software Maintenance).

The program's License Information will be available for review on the IBM Software License Agreement website

Limited warranty applies

Yes

Limited warranty

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional charge. For further information, consult the IBM Software Support Handbook found at

<http://www.ibm.com/support/handbook>

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

Program technical support

Technical support of a program product version or release will be available for a minimum of five years from the general availability date, as long as your Software Maintenance is in effect. This technical support allows you to obtain assistance, via telephone or electronic means, from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Maintenance also provides you with access to updates (modifications or fixes), releases, and versions of the program. You will be notified, via announcement letter, of discontinuance of support with 12 months' notice. If you require additional technical support from IBM, including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

Money-back guarantee

For clarification, note that if for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

- For clarification, note that for programs acquired under the IBM International Passport Advantage Agreement, this term applies only to your first acquisition of the program.

Volume orders (IVO)

No

Passport Advantage applies

Yes, and through the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

These products are only available via Passport Advantage. They are not available as shrinkwrap.

These products may only be sold directly by IBM or by authorized IBM Business Partners for Software Value Plus.

For more information about IBM Software Value Plus, visit

To locate IBM Business Partners for a specific Software Value Plus portfolio, contact your IBM representative.

Software Subscription and Support applies

Yes. Software Subscription and Support is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and technical support are provided by the Software Subscription and Support offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software and Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support with each program license acquired. The initial period of Software Subscription and Support can be extended by the purchase of a renewal option, if available.

While your Software Subscription and Support is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance via telephone and, if available, electronic access, to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, consult your IBM Software Support Handbook at

<http://www.ibm.com/support/handbook>

Software Subscription and Support does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.

For additional information about the International Passport Advantage Agreement and the IBM International Passport Advantage Express Agreement, visit the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

System i Software Maintenance applies

No

Educational allowance available

Not applicable.

IT system security involves protecting systems and information through prevention, detection, and response to improper access from within and outside your enterprise. Improper access can result in information being altered destroyed or misappropriated or can result in misuse of your systems to attack others. Without a comprehensive approach to security, no IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems and products are designed to be part of a comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products, or

services to be most effective. IBM does not warrant that systems and products are immune from the malicious or illegal conduct of any party.

Prices
