

# Software end of service and software withdrawal: IBM WebSphere Developer Debugger for System z -- No replacements available

## Table of contents

- [1 Overview](#)
- [1 Replacement information](#)
- [2 Description](#)

## Overview

Effective March 17, 2011, IBM® will withdraw from marketing, part numbers from WebSphere® Developer Debugger for System z® V7.0.0 (5724-N06), licensed under the IBM International Program License Agreement.

Effective on the following dates, IBM will withdraw support from the following product releases licensed under the IBM International Program License Agreement:

Program number	withdrawal from support date	Program release name
5724-N06	09/28/12	webSphere Developer Debugger for System z V7.0.0
5724-N06	04/30/09	webSphere Developer Debugger for System z V6.01.1

## Replacement information

### Replacement products

Customers can now obtain the equivalent WebSphere Developer Debugger for System z functionality as a complimentary no-charge upgrade to Debug Tool for z/OS® V10.1 or later. These features provide additional value to the already feature-rich IBM Debug Tool for z/OS. The IBM Debug Tool website provides additional information, licensing, and download options. Visit

<http://www-01.ibm.com/software/awdtools/deployment/pdtplugins/>

WebSphere Developer Debugger for System z customers can also upgrade to a product in the IBM Rational® Developer for System z family. IBM Rational Developer for System z offers upgrade licenses from WebSphere Developer Debugger for System z providing a discount for upgrading customers. IBM Rational Developer for System z provides an upgraded version of the WebSphere Developer Debugger for System z functionality, including facilities such as code editing, code outlines, enhanced code navigation, software configuration management integration, and much more.
