Overview

IBM® Connections is social software for business that is designed to help users easily access and work with the members of their professional network, including their colleagues, customers, and partners.

The new Connections Extension Authorized User part numbers enable customers to upgrade their existing Connections restricted use rights, obtained through an IBM Lotus Notes® or IBM Lotus® Domino® product, to the full capabilities of Connections.

The entitlement to IBM Connections' Files and Profiles capabilities, which is included with IBM Lotus Notes 8.5.3, provides an example of when customers might choose to use these new part numbers.

IBM Lotus Notes 8.5.3 provides entitlement to the Files and Profiles applications of IBM Connections 3.0.1 to customers, who have the following licenses:

- IBM Lotus Domino Enterprise Client Access License
- IBM Lotus Domino Messaging Client Access License
- IBM Lotus Domino Collaboration Express® License
- IBM Lotus Domino Messaging Express License

The entitlement, provided with the above licenses, enables customers, as an example, to:

- Share content with other people.
- Find the people they need by searching across the organization's content to identify expertise, current projects, and responsibilities.
- Stay informed of the latest updates from across their social network.

The new Connections Extension Authorized User part numbers permit customers with the above licenses to expand their existing Connections restricted use rights to the full capabilities of IBM Connections.

Some of the benefits from expanding usage to the full capabilities of Connections include the ability to:

- Collaborate with a community of professionals using activities, blogs, wikis, forums, and shared files, including rich media files.
- Expand one's professional network through social analytics-based recommendations for people to connect with, and communities to join.
- Access one's social data while on the go using mobile device support.

Additional information on IBM Connections can be found at the following website

<http://www.ibm.com/software/lotus/products/connections/>

When these new Connections Extension Authorized User part numbers are used, the terms of the Connections license apply. For example, a Connections Authorized User license may be used only by employees or independent contractors of the licensee.

Consult the Connections license for the full details of the license.

Processing of orders for these new part numbers will begin at general availability.

Planned availability date

November 22, 2011: Electronic availability

Refer to the complete letter for national language availability.

Availability of national languages

Product description	Language	General availability date
IBM Connections V3.0.1	Multilingual (Portuguese, French, Danish, Russian, Hebrew, Arabic, Korean, Chinese-Simplified, Spanish, Norwegian Bokmal, Portuguese-Brazilian, German, Swedish, Japanese, Chinese-Traditional, Hungarian, English, Slovenian, Greek, Turkish, Dutch, Czech, Italian, Finnish, Polish)	May 6, 2011

Charge metrics definitions

Authorized User

Authorized User is the unit of measure by which this program is licensed. An Authorized User is an individual (named or unnamed) within or outside of your enterprise. The program may be installed on one or more computers or servers and accessed by the number of users authorized by the Proof of Entitlement (PoE). You must have an entitlement for each Authorized User accessing the program or any program component in any manner directly or indirectly (for example, via a multiplexing program, device, or application server) through any means.

Processor Value Unit

Processor Value Unit (PVU) is a unit of measure by which the program can be licensed. The number of PVU entitlements required is based on the processor technology (defined within the PVU Table by Processor Value, Brand, Type and Model Number at http://www.ibm.com/software/lotus/passportadvantage/pvu_licensing_for_customers.html) and the number of processors made available to the program. IBM continues to define a processor, for the purpose of PVU-based licensing, to be each processor core on a chip. A dual-core processor chip, for example, has two processor cores

Licensee can deploy the program using either Full Capacity licensing or Virtualization Capacity (Sub-Capacity) licensing according to the Passport Advantage Sub-Capacity Licensing Terms (see webpage below). If using Full Capacity licensing, Licensee must obtain PVU entitlements sufficient to cover all activated processor cores* in the physical hardware environment made available to or managed by the program, except for those servers from which the program has been permanently removed. If using Virtualization Capacity licensing, Licensee must

obtain entitlements sufficient to cover all activated processor cores made available to or managed by the program, as defined according to the Virtualization Capacity License Counting Rules at http://www.ibm.com/software/lotus/passportadvantage/Counting_Software_licenses_using_specific_virtualization_technologies.html

* An Activated processor core is a processor core that is available for use in a physical or virtual server, regardless of whether the capacity of the processor core can be or is limited through virtualization technologies, operating system commands, BIOS settings, or similar restrictions.

Note: Some programs may require licenses for the program AND what is being managed. In that case, the following applies: In addition to the entitlements required for the program directly, Licensee must obtain PVU entitlements for this program sufficient to cover the processor cores managed by the program.

Note: Some programs may be licensed on a managed basis ONLY. In that case, the following applies: Instead of the entitlements required for the program directly, Licensee must obtain PVU entitlements for this program sufficient to cover the processor cores managed by the program.

Note: A few programs on an exception basis may be licensed on a referenced basis. In that case, the following applies: Rather than obtaining entitlements for the activated processor cores available to the program, Licensee must obtain PVU entitlements for this program sufficient to cover the environment made available to the Referenced program as if the program itself were executing everywhere the Referenced program was executing, independent of the basis on which the Referenced program is licensed.

Note: Express and Workgroup programs may be licensed with maximum use terms. In that case, the following applies: The maximum authorized use terms and conditions for PVU licensed IBM Express and Middleware programs can be found in the *IBM Express and Middleware Licensing Guide*.

Cross-platform products

Cross-platform product for use on System z

Order the part numbers that follow when the product is used for either the development of code that will be deployed on System z servers or when the product will be communicating or transferring data between a distributed server

and a System z server. Otherwise order from the other set of part numbers in this announcement. This set of part numbers provides the identical supply and authorization as the other set in this announcement

Cross-platform product for use on System z IFL engines

Order the part numbers that follow when the product is intended to run on the Linux operating system on System z IFL engines. If the product is not intended to run on the Linux operating system on System z IFL engines, order from the other set of part numbers in this announcement. This set of part numbers provides the identical supply and authorization as the other set in this announcement.

Terms and conditions

Terms and conditions for the new IBM Connections Extension part number have been added to the terms and conditions for IBM Lotus Connections, as previously announced in Software Announcement [ZP09-0245](#), dated August 18, 2009. Consult the IBM Connections license for details.

IBM Electronic Services

IBM has transformed its delivery of hardware and software support services to help you achieve higher system availability. Electronic Services is a web-enabled solution that offers an exclusive, no-additional-charge enhancement to the service and support available for IBM servers. These services are designed to provide the opportunity for greater system availability with faster problem resolution and preemptive monitoring. Electronic Services comprises two separate, but

complementary, elements: Electronic Services news page and Electronic Services Agent.

The Electronic Services news page is a single Internet entry point that replaces the multiple entry points traditionally used to access IBM Internet services and support. The news page enables you to gain easier access to IBM resources for assistance in resolving technical problems.

The Electronic Service Agent™ is no-additional-charge software that resides on your server. It monitors events and transmits system inventory information to IBM on a periodic, client-defined timetable. The Electronic Service Agent automatically reports hardware problems to IBM. Early knowledge about potential problems enables IBM to deliver proactive service that may result in higher system availability and performance. In addition, information collected through the Service Agent is made available to IBM service support representatives when they help answer your questions or diagnose problems. Installation and use of IBM Electronic Service Agent for problem reporting enables IBM to provide better support and service for your IBM server.

Prices

The charges are unchanged by this announcement.

IBM Global Financing

IBM Global Financing offers competitive financing to credit-qualified customers to assist them in acquiring IT solutions. Offerings include financing for IT acquisition, including hardware, software, and services, both from IBM and other manufacturers or vendors. Offerings (for all customer segments: small, medium, and large enterprise), rates, terms, and availability can vary by country. Contact your local IBM Global Financing organization or visit

<http://www.ibm.com/financing>

IBM Global Financing offerings are provided through IBM Credit LLC in the United States, and other IBM subsidiaries and divisions worldwide to qualified commercial and government customers. Rates are based on a customer's credit rating, financing terms, offering type, equipment type, and options, and may vary by country. Other restrictions may apply. Rates and offerings are subject to change, extension, or withdrawal without notice.

Announcement countries

All European, Middle Eastern and African countries except:

- Iran
- Libyan Arab Republic
- Sudan
- Syria

Trademarks

Electronic Service Agent is a trademark of IBM Corporation in the United States, other countries, or both.

IBM, Lotus Notes, Lotus, Domino, Express, Passport Advantage and System z are registered trademarks of IBM Corporation in the United States, other countries, or both.

Linux is a registered trademark of Linus Torvalds in the United States, other countries, or both.

Other company, product, and service names may be trademarks or service marks of others.

Terms of use

IBM products and services which are announced and available in your country can be ordered under the applicable standard agreements, terms, conditions, and prices in effect at the time. IBM reserves the right to modify or withdraw this announcement at any time without notice. This announcement is provided for your information only. Reference to other products in this announcement does not necessarily imply those products are announced, or intend to be announced, in your country. Additional terms of use are located at:

<http://www.ibm.com/legal/us/en/>

For the most current information regarding IBM products, consult your IBM representative or reseller, or visit the IBM worldwide contacts page
