

WebSphere Commerce V6.0 delivers a complete end-to-end e-commerce solution

Overview

Used by top enterprises and widely regarded as the industry-leading e-commerce solution, IBM WebSphere® Commerce provides a future-proof solution for all of a company's e-commerce needs. From a simple online store to a fully integrated, multi-channel sales network, WebSphere Commerce (WC) can be used for any or all of a company's business models and touchpoints. It is the single, unified customer interaction platform you need to do business directly with consumers and businesses, indirectly through channel partners, or with all of the above simultaneously.

With online sales continuing to grow at double-digit rates, and with the Internet influencing over 20% of sales in other channels, companies big and small recognize e-commerce as a strategic priority. They now realize that e-commerce is more than just an online shopping cart, it's an integral part of their overall business strategy. It's not just about doing new business in a single channel; it's about doing business better (in all channels), all while supporting consumers and business customers that have become more empowered and demand to do business on their terms — whenever, wherever, and however they want.

As you roll out more e-commerce sites, serve more constituents, and handle an increasing number of business processes, the importance of e-commerce to your business has grown. You need new business capabilities to support your growth strategies. You need higher levels of performance and scalability to support transaction loads. You want to deliver the consistent and relevant experience that your customers have come to demand. And you need enhanced productivity for your customers, partners, and employees. At the same time, you must continue to control costs and

optimize operations. To achieve all of this, you need a robust, next-generation platform capable of supporting all of your e-commerce needs.

Looking to the future, you want a solution that supports all of the ways you do business — today and tomorrow. A market-leading solution that is proven in your industry. A solution offered by a world-class vendor that you can count on today and in the future to support your mission-critical, cross-enterprise, or even global needs. The next generation is here.

Key prerequisites

Refer to the **Technical information** section for details.

Planned availability dates

- May 12, 2006: Electronic software delivery
- June 9, 2006: Media and documentation

At a glance

The IBM WebSphere Commerce V6 family of offerings uniquely supports these goals:

- Supports all of a company's business models and e-commerce sites — whether B2C, B2B, or both — on a single platform
- Provides the best balance of out-of-the-box readiness and complete adaptability
- Delivers rich, seamless customer experience across channels
- Leverages the industry's most complete middleware platform for end-to-end integration
- Fully exploits the power of the underlying platform for maximum performance, scalability, and adaptability

Description

The WebSphere Commerce family of products includes WebSphere Commerce — Express, WebSphere Commerce Professional, and WebSphere Commerce Enterprise. The specifics of each of these products is described below.

WebSphere Commerce Express V6 is an easily installed, affordable, yet complete solution designed to help growing mid-market companies do business on the Web. Jump-start your online presence with the basics, then grow with the industry leader as your needs change and grow. Intended for customers who have not purchased WebSphere Commerce previously, deployments on WebSphere Commerce Express are limited to a single processor license only. WebSphere Commerce Express supports both business-to-business (B2B) and business-to-consumer (B2C) business models and is:

- Affordable but complete, with “all-in-one” licensing that gives you everything you need for production and staging at one attractive price
- Easily installed, with a streamlined process that gets you ready to create and customize your store site quickly and in a minimal number of steps
- Ready to go, with the capabilities you need to get started out-of-the-box, while providing many advanced features you can grow into
- Easy to administer, with tools that let mid-market customers manage their site effectively, and without special technical skills
- Built on open standards, freeing your company from proprietary platform restrictions

WebSphere Commerce Professional provides a comprehensive online selling solution for maximizing revenues, improving operational efficiencies, and increasing customer satisfaction and loyalty. Through the use of advanced marketing and merchandising, configurable business processes, A/B testing, search engine optimization, and personalization, businesses will be able to attract, motivate, transact, and understand their customers throughout the customer lifecycle. WebSphere Commerce Professional helps both B2C and B2B business models:

- Increase customer satisfaction and loyalty by strengthening relationships and better understanding customer’s needs
- Maximize sales revenue by optimizing marketing and merchandising initiatives for improved targeted interactions
- Improve operational efficiencies by leveraging, automating and streamlining key sales, marketing, and order processes
- Future-proof your e-commerce investments by leveraging a standards-based, extensible commerce platform

WebSphere Commerce Enterprise provides a powerful, flexible infrastructure based on a unified platform for running complex or high-volume B2B, and advanced B2C e-commerce Web sites for global e-businesses. WebSphere Commerce Enterprise supports many business models including:

- B2B direct, which supports commerce transactions involving products, services, or information between two businesses or parties. In the B2B direct model, business buyers, resellers, distributors, and trading partners are able to purchase directly from the seller.

B2B direct also supports multiple sites, where a seller can have many sites aimed at different audiences, including geographic or market segment focused.

- A demand chain, which is composed of the enterprises that sell the goods or services of a business. For example, a demand chain may be composed of buyers who initiate the sales transaction, resellers who sell the goods of a manufacturer, and the manufacturer who creates the goods. Demand chains also support direct sales channels, in which the demand chain owner sells directly to customers or Business Partners. The demand chain owner may host sites for its channel partners.
- A supply chain, which is composed of the enterprises that provide services to a business. WC supports supply chains by enabling multiple buyers and suppliers, and allowing them to interact directly or through a private marketplace. A private marketplace provides a forum for suppliers to offer goods or services for sale. Buyers can establish contractual relationships directly with individual suppliers, and they can issue RFQs to selected suppliers.
- The extended site business model, which is only available with WebSphere Commerce Enterprise, and provides the market leading approach to running multiple stores (from two stores to thousands), on a single software solution. Through an advanced architecture that minimizes needless replication of code, while optimizing flexibility and minimizing maintenance, as well as self-provisioning tools that allow the seller’s business users to create and administer multiple stores, extended sites is the lowest cost approach available today for operating multiple stores on a single software platform. This technology supports many business models involving multiparty or multitier transactions. Extended sites are easily set up, and maintained and scaled. Shoppers or business buyers can access any extended site directly, and optionally register on that site for shopping. Alternatively, they have the option of browsing the store directory operated by the hosting provider and then transfer to the selected extended site.

New and changed components in WebSphere Commerce V6

Key WebSphere Commerce V6 themes:

- **Cross channel execution:** Deliver a consistent and relevant experience to customers and partners by extending a common set of business services across every point of interaction
- **Customer empowerment:** Maximize productivity and usability for your customers, partners and employees
- **Foundational leadership:** Simplify the development, management, and delivery of business functionality while maximizing reliability, performance, and scalability

Cross channel execution improvements include:

IBM Sales Center for WebSphere Commerce — This new, separately orderable feature (not available with Express) leverages the catalog, order management, promotions and merchandising capabilities of WebSphere Commerce to provide contact center representatives with the functionality they need to service and up-sell your cross-channel customers. It delivers the speed and productivity required for high-volume contact centers via a customizable user interface designed for maximum productivity and multi-tasking.

Sales Center key features:

- Work with multiple stores, customers, and orders simultaneously
- View cross-sell, up-sell, and promotional information
- Find and visually compare products
- View product availability
- Create quotes and turn quotes into orders
- View and override contract and list pricing for products, orders, and shipping
- Create, update, block, and cancel orders
- Create and manage customer profiles
- Process payments
- Create and manage ticklers (“to-do’s”) for themselves or others
- All functions are hot-key enabled
- An Eclipse-based solution for easy integration to other applications

Sales Center key benefits:

- Improves service for cross-channel customers
- Increases sales in the call center by enabling cross-selling and up-selling
- Reduces the cost and complexity of your technology environment by using WebSphere Commerce as the central server for call center and Web operations
- Eliminates the need to synchronize catalog, customer, promotion, and order data between disparate systems

IBM Gift Center for WebSphere Commerce — This new, separately-orderable feature (not available with Express) is a complete multi-channel gift registry solution. It can operate as a Web-only gift registry, integrate to an existing back-end registry system, or stand on its own as a centralized cross-channel solution. It leverages the marketing and merchandising capabilities of WebSphere Commerce and provides integration points to your POS (point of sale) system, store kiosks, and scanning devices

Gift Center key features:

- Support for multiple events types: Weddings, engagements, birthdays
- Private and public registries
- Rich registry creation and management features
- Ability for multiple co-registrants
- E-mail announcements for guests
- Completion program with seller-defined discounts upon closeout
- “Thank You” notes tracker
- Sample kiosk user interface
- Sample gift store consultant user interface
- Ability for gift givers to purchase an item for themselves and from the registry in a single checkout

Gift Center key benefits:

- Increases revenues
- Improves customer service through seamless registry interaction and service across channels

- Improves average order values, as gift givers often buy items for themselves when purchasing from a registry
- Improves customer reach, as registry guests who purchase become new customers
- Reduces the cost and complexity of your technology environment by using WebSphere Commerce as the central server for all cross-channel gifting processes

Cross-channel order processing

The order processing subsystem of WebSphere Commerce has been extended and improved to provide enhanced support for cross-channel business processes and efficiently serve new constituents, such as contact center representatives, gift registrants, and distribution channel partners. Additional integration interfaces have been added to facilitate communication with external systems (for example, POS systems, kiosks, ERP, and fulfillment systems) and a new plug-in-based payment processing capability has also been added.

Cross-channel order processing enhancements include:

- Ability to create future orders and order items with a requested ship date
- Ability to Pre-order, expedite and block orders
- Ability to request order to be shipped as complete
- Support for order and item level release to fulfillment
- Multiple releases per order and payment methods per order
- Ability to capture shipping account codes and shipping instructions
- Create quote and convert quote to order
- Support for manual price, shipping, and contract term
- Plug-in payments processing for integration to third party payment providers

Cross-channel order processing benefits:

- Reduce order processing costs through automation and streamlining of processes
- Greater efficiency through single view of transactions across multiple channels
- Improved customer satisfaction through better visibility into inventory and order history, as well as seamless and consistent order experience across all channels
- Easier and quicker integration to third party online payment providers

Customer empowerment improvements include:

Workspaces — This feature (not available with Express) empowers business users with end-to-end control over the creation, management, and publishing of product information, Web content, promotion rules, and campaign information, with no involvement required from the IT staff.

Workspace key features:

- Tasks, notifications, and approvals
- Collaboration through task descriptions and comments
- Single view of all tasks and task status
- Integrated catalog, content, and campaign preview
- Preview at a future date

- Quick Fix publishing for emergency changes
- Scheduled publishing of granular site changes
- Ability to work on multiple projects operating on independent timelines

Workspace key benefits:

- Ability to execute a higher volume of marketing initiatives
- Shortened time to complete site changes
- Improved business user productivity
- Improved quality and reduction in errors via preview and Quick Fix capability

Attachments — Attachments in WebSphere Commerce give business users a productive and easy-to-use graphical interface for managing files related to products. Business users can load, manage, and define how file content, such as images, user manuals, warranty documents, Flash files, audio, and video files are used on the Web site.

Attachments key features:

- Graphical tool for uploading and sorting files
- Productivity features for managing many files
- Ability to view thumbnail of images for easy management
- Assign usage codes and other meta data to files telling WebSphere Commerce how to use the files on the Web site
- Single view of all files attached to a product and their usage

Attachments key benefits:

- Increased sales due to improved ability to describe products and services
- Improved business user productivity and control
- Decreased cost of operations due to reduced dependence on IT

E-mail Template Editor — This feature provides business users with an easy-to-use interface to control the e-mail campaign creation process from end-to-end with no involvement from the IT staff. The E-mail Template Editor gives campaign managers a new graphical interface for creating and previewing the text and imagery that goes into an e-mail campaign.

E-mail Template Editor key features:

- Ability to create targeted personalized e-mails
- Select from available e-mail templates
- Enter text and HTML, and add images
- Add e-spots and use campaign activities to target content and product recommendations, as part of the e-mail content
- Point and click to add tags to include the customers' name in the e-mail
- Create links to other Web pages, and images
- Select from list of available URL commands to direct the customer to the Web site and add an item directly to a shopping cart.
- Use push-button preview to see the completed e-mail before it is sent out to customers

E-mail Template Editor benefits:

- Better customer response through highly targeted and personalized e-mail campaigns
- Increased ability to deliver e-mail campaigns by removing dependence on IT
- Improved quality and accuracy of e-mail content with preview capability
- Decreased cost of operations due to reduced dependence on IT

Foundational leadership improvements include:

Simplified clustering — This feature allows for configuring hardware and software to achieve higher levels of performance and reliability with less cost and complexity. By spreading a software application across multiple servers, you can handle larger computing workloads by sharing work across servers in a cluster. If one server in the cluster fails, the others will share the workload maintaining service and providing a higher level of reliability. These powerful benefits have made clustering a common practice, yet businesses are always looking for ways to minimize the inherent complexity of solutions with multiple parts. In this release of WebSphere Commerce, several enhancements are provided to make it easier to install and maintain WebSphere Commerce in a clustered configuration.

Simplified clustering features:

- Exploitation of J2EE packaging and services of WebSphere to distribute the WebSphere Commerce application to a cluster
- Enable fine grained application updates by simplifying deployment of changes to WebSphere Commerce, including store publish by using WebSphere APIs to update the commerce Enterprise Application Archive (EAR) file
- Fix pack installer changed to automatically update Commerce in a clustered environment
- Leveraging WebSphere Application Server (WAS) Profiles to enable management of WebSphere Commerce via the WAS Administrative Console: Start/stop, set trace specification, and so on.

Simplified clustering benefits:

- Significant reduction in cost to install and manage WebSphere Commerce in a clustered environment
- Reduction in the number of manual steps required to install fix packs in clustered environment
- Centralized management of WAS and WebSphere Commerce

Improved performance and availability — As you extend the use of WebSphere Commerce to address an increasing number of business services and customer interaction points, you require new levels of performance and availability. Workloads have increased, along with the mission-critical nature of your e-commerce deployment. WebSphere Commerce V6 delivers new enhancements in this area that extend its industry-leading performance, scalability, and availability.

Improved performance and availability features:

- Optimistic locking
- WAS V6 integration

Improved performance and availability benefits:

- Enhanced database performance
- Out-of-the box integration and exploitation of the market leading application server

Coremetrics for IBM WebSphere Commerce

IBM WebSphere Commerce and Coremetrics have joined forces to deliver a best of breed cross-channel business analytics solution specifically for use with IBM WebSphere Commerce software. Starting with Coremetrics' deep e-commerce expertise, market leading reporting interface and aptitude for integrating data across channels, the combined solution will now include reports specifically designed for WebSphere Commerce.

For availability of Coremetrics for IBM WebSphere Commerce functionality, refer to Coremetrics Analytics at

<http://www.coremetrics.com/>

WebSphere Commerce Developer V6.0

Get a quick start on developing your WebSphere Commerce implementation with WebSphere Commerce Developer Enterprise, WebSphere Commerce Developer Professional, or WebSphere Commerce Developer Express. They include tools to:

- Create, test, and deploy a WebSphere Commerce site under the test environment and workspaces provided by Rational® Application Developer (RAD)
- Build and extend Enterprise JavaBeans (EJBs)

Accessibility by people with disabilities

Accessibility features help a user who has a physical disability, such as a visual impairment, hearing impairment, or limited mobility, to use software products successfully. These are the major accessibility features in WC allow you to:

- Use screen-reader software and a digital speech synthesizer to hear what is displayed on the screen.
- Operate all features using the keyboard instead of the mouse.
- Magnify what is displayed on your screen using a Windows™ operating system.
- Change the color scheme of the WC Configuration Manager.
- Perform a silent-based installation by using the -silent -options parameters. For details, refer to the *WC Installation Guide* for the appropriate platform through the following Web site

<http://publib.boulder.ibm.com/infocenter/wchelp/v6r0m0/topic/com.ibm.commerce.base.doc/concepts/cabaces.htm>

Section 508 of the U.S. Rehabilitation Act

WebSphere Commerce Version 6 is capable as of June 9, 2006, when used in accordance with IBM's associated documentation, of satisfying the applicable requirements of Section 508 of the Rehabilitation Act, provided that any assistive technology used with the product properly interoperates with it. A U.S. Section 508 Voluntary Product Accessibility Template (VPAT) can be requested via IBM's Web site at the following URL

The Publications Center is a worldwide central repository for IBM product publications and marketing material with a catalog of 70,000 items. Extensive search facilities are provided. Payment options for orders are via credit card (in the U.S.) or customer number for 20 countries. A large number of publications are available online in various file formats, and they can all be downloaded by all countries free of charge.

Technical information

Specified operating environment

Hardware requirements

Recommended requirements for WC development with WC Enterprise or WC Professional

WC Developer Enterprise and WC Developer Professional

For Windows™ 2000, Windows 2000 Professional, and Windows XP Professional:

- IBM PC Server with Intel® Pentium® 4, or compatible processor, at 1.6 GHz, or higher
- 2 GB MB of RAM
- 6.1 GB hard drive for program files:
 - 4.2 GB for Rational® Application Developer 6.0.1.1
 - 1.9 GB for WebSphere Commerce Developer
- 1.9 GB for each additional copy of Commerce Developer
- CD-ROM drive
- LAN adapter that supports the TCP/IP protocol
- A graphics-capable monitor with 1024 x 768 display resolution

WC Enterprise and WC Professional

For Windows 2000 Server with Service Pack 4, or later, Windows 2000 Advanced Server with SP4, or later, Windows 2003 Server Enterprise Edition, and Windows 2003 Server Standard Edition:

- IBM PC Server with Intel Pentium 4, or compatible processor, at 1.0 GHz, or higher
- 2 GB MB of RAM per process for the first WC instance
- 4.5 GB of free disk space for program files

This announcement is provided for your information only. For additional information, contact your IBM representative, call 800-IBM-4YOU, or visit the IBM home page at: <http://www.ibm.com>.

- CD-ROM drive
- LAN adapter that supports the TCP/IP protocol
- A graphics-capable monitor with 1024 x 768 display resolution

For the AIX® version:

- One of the following IBM @server® pSeries® or IBM RS/6000® family of machines:
 - IBM RS/6000 (44P Model 170, or later)
 - IBM @server® pSeries 640
- A processor at 375MHz, or higher
- 2 GB of RAM per processor for the first WC instance
- 6 GB of free disk space
- 1 GB of paging space per processor
- CD-ROM drive
- LAN adapter that supports the TCP/IP protocol
- A graphics-capable monitor with 1024 x 768 display resolution

For the Solaris version:

- Sun SPARC or UltraSPARCstation at 400 MHz, or higher
- 2 GB of RAM
- 6 GB of free disk space
- CD-ROM drive
- LAN adapter that supports the TCP/IP protocol
- A graphics-capable monitor with 1024 x 768 display resolution

For the i5/OS™ version:

- A system capable of running i5/OS Version 5 Release 3 or Version 5 Release 4, with L2 cache and CPW rating of 950, or more
- 4 GB RAM for first WC instance, plus 2 GB RAM for each additional WC instance
- 12 GB of free disk space
- CD-ROM drive
- LAN adapter that supports the TCP/IP protocol
- A graphics-capable monitor with 1024 x 768 display resolution

For Linux™ on Intel:

- IBM PC Server with Pentium III, or compatible processor, at 733 MHz, or higher
- 2 GB MB of RAM
- 4.5 GB of free disk space
- 1 GB of paging space per processor
- CD-ROM drive
- LAN adapter that supports the TCP/IP protocol
- A graphics-capable monitor with 1024 x 768 display resolution

For Linux on @server® iSeries™ and @server® pSeries (WC Enterprise only):

- Linux is supported on selected IBM @server® systems with POWER™ technology. For a list, visit

<http://www.ibm.com/systems/linux/power/>

- 2 GB of RAM
- 4.5 GB of free disk space
- 1 GB of paging space per processor
- CD-ROM drive
- LAN adapter that supports the TCP/IP protocol
- A graphics-capable monitor with 1024 x 768 display resolution

For Linux on an IBM @server® zSeries® servers or S/390® machines (WC Enterprise only):

- zSeries server or S/390 processor
- For a VM configuration:
 - 1 GB per Linux instance (guest)
 - 900 MB of free space in your temporary directory
 - 2 GB of paging space per Linux instance
 - 200 MB of Linux swap file space
 - 2 full volume (3300 cylinders) free disk space for the Linux system
 - 1 full volume (3300 cylinders) free disk space for DB2® UDB
 - 1 full volume (3300 cylinders) free disk space for WC and WebSphere Application Server
 - 1 full volume (3300 cylinders) temporary free disk space for the contents of the WC CDs that are transferred from a workstation to the @server® zSeries or S/390
 - LAN adapter that supports the TCP/IP protocol
- For a native LPAR configuration:
 - 1 GB of RAM per Linux instance
 - 200 MB of Linux swap file space
 - 2 full volume (3300 cylinders) free disk space for the Linux system
 - 1 full volume (3300 cylinders) free disk space for DB2 UDB
 - 1 full volume (3300 cylinders) free disk space for WC and WebSphere Application Server
 - 1 full volume (3300 cylinders) temporary free disk space for the contents of the WC CDs that are transferred from a workstation to the @server® zSeries or S/390
 - LAN adapter that supports the TCP/IP protocol
- A graphics-capable monitor with 1024 x 768 display resolution on a Windows, Linux, or UNIX® machine
- CD-ROM drive

Requirements for WC production

Production requirements vary widely depending on many factors associated with the creation and use of your Web site. Contact your IBM representative to help determine your specific requirements.

Recommended requirements for WC development with WC Express

WC Developer Express

For Windows 2000, Windows 2000 Professional and Windows XP Professional:

- IBM PC Server with Intel Pentium 4, or compatible processor, at 1.6 GHz, or higher
- 2 GB MB of RAM
- 6.1 GB hard drive for program files:
 - 4.2 GB for Rational Application Developer 6.0.1.1
 - 1.9 GB for WebSphere Commerce Developer
- 1.9 GB for each additional copy of Commerce Developer
- CD-ROM drive
- LAN adapter that supports the TCP/IP protocol
- A graphics-capable monitor with 1024 x 768 display resolution

WC Express

For Windows 2000 and Windows 2003:

- IBM PC Server with Pentium III, or compatible processor, at 733 MHz, or higher
- 1 GB MB of RAM
- 4.0 GB of free disk space
- CD-ROM drive
- LAN adapter that supports the TCP/IP protocol
- A graphics-capable monitor with 1024 x 768 display resolution

For Linux on Intel:

- IBM PC Server with Pentium III, or compatible processor, at 733 MHz, or higher
- 2 GB MB of RAM
- 4 GB of free disk space
- 1 GB of paging space per processor
- CD-ROM drive
- LAN adapter that supports the TCP/IP protocol
- A graphics-capable monitor with 1024 x 768 display resolution

For the IBM *@server** iSeries server version:

- AS/400® or iSeries model with L2 cache and CPW rating of 950 or more, for example:
 - AS/400 server, model 270 with processor feature 2252
 - AS/400 server, model 820 with processor feature 2396
 - iSeries, model 810, with processor feature 2466
- 2 GB RAM for first WC instance, plus 0.5 GB RAM for each additional WC instance
- 8 GB of free disk space
- CD-ROM drive
- LAN adapter that supports the TCP/IP protocol

- A graphics-capable monitor with 1024 x 768 display resolution

Requirements for WC Express production

Production requirements vary widely depending on many factors associated with the creation and use of your Web site. Contact your IBM representative to help determine your specific requirements.

Recommended requirements for WCA

For Windows 2000 and Windows 2003:

- IBM PC Server with Pentium III processor, or compatible processor at 733 MHz, or higher
- 2 GB of RAM
- 2 GB of free disk space for software installation
- 6 GB of free disk space for database (additional space required for data — depends on customer environment)
- 100 MB of free disk space on the system drive and 100 MB of free disk space on a drive for temporary use
- CD-ROM drive
- A graphics-capable monitor with 1024 x 768 display resolution
- LAN adapter that supports the TCP/IP protocol

Recommended requirements for Sales Center for WC

For Windows XP:

- IBM PC Server with Pentium III processor, or compatible processor at 733 MHz, or higher
- 512 MB of RAM
- 350 MB of free disk space
- CD-ROM drive
- A graphics-capable monitor with 1024 x 768 display resolution
- LAN adapter that supports the TCP/IP protocol

Software requirements

WC Developer Enterprise or WC Developer Professional

- Windows 2000 Server or Advanced Server Edition with Service Pack 4, or higher
- Windows 2000 Professional Edition with Service Pack 4, or higher
- Windows XP Professional with Service Pack 2

WC Enterprise or WC Professional

Requires one of the following operating systems:

- Windows 2000 Server or Advanced Server Edition with Service Pack 4 or Windows 2003 Server Enterprise or Standard Edition
- AIX V5.2 with maintenance level 05 or later and AIX V5.3 with maintenance level 01 or later
- Solaris 9 and 10
- SUSE Linux Enterprise Server 8 with service pack 4 and SUSE Linux Enterprise Server 9 with service pack 1 for Intel
- Red Hat Enterprise Linux AS/ES, V4 for Intel

- Red Hat Enterprise Linux AS/ES, V3.0 with Update 4 for Intel
- Red Hat Enterprise Linux AS V3.0 with Update 3 or 4 and Red Hat Enterprise Linux AS V4.0 for @server* iSeries and pSeries (64bit support only) (WC Enterprise only)
- SUSE Linux Enterprise Server 8 with service pack 4 and SUSE Linux Enterprise Server 9 with service pack 1 for @server* iSeries and pSeries (64bit support only) (WC Enterprise only)
- SUSE Linux Enterprise Server 8 with service pack 4 and SUSE Linux Enterprise Server 9 with service pack 1 for @server* zSeries and S/390 (64 bit support only) (WC Enterprise only)
- Red Hat Enterprise Linux AS V3.0 with Update 4 and Red Hat Enterprise Linux AS V 4 for zSeries server and S/390 processor (WC Enterprise only)
- For i5/OS:
 - i5/OS Version 5 Release 3 (5722SS1), which includes:
 - DB2 UDB for iSeries, V5.3
 - DB2 UDB Symmetric Multiprocessing (Option 26)
 - DB2 UDB Multisystem (Option 27)
 - Crypto Access Provider for iSeries (5722SS1 Option 35)
 - Host Server (5722SS1 Option 12)
 - Digital Certificate Manager (5722SS1 Option 34)
 - QShell Interpreter (5722SS1 Option 30)
 - Extended Base Directory Support (5722SS1 option 3)
 - Portable App Solutions Environment (5722SS1 Option 33)
 - International Components for Unicode (5722SS1 Option 39)
 - CCA Cryptographic Service Provider (5722SS1 option 35)
 - Crypto Access Provider 128-bit (5722AC3 option *BASE)
 - IBM Java™ Developer Kit, V1.3 (5722JV1 Option 6)
 - TCP/IP Connectivity Utilities for iSeries (5722TC1 option *BASE)
 - DB2 Query Manager and SQL Development Kit for iSeries (5722ST1 option *BASE)
 - Additional optional software products:
 - iSeries Access Base (5722XW1 option *BASE)
 - iSeries Access Option 1 (5722XW1 option 1)
 - iSeries Access for Windows (5722XE1 option *BASE)
 - i5/OS Version 5 Release 4 (5722SS1), which includes:
 - DB2 UDB for iSeries, V5.4
 - DB2 UDB Symmetric Multiprocessing (Option 26)
 - DB2 UDB Multisystem (Option 27)
 - Crypto Access Provider for iSeries (5722SS1 Option35)
- Host Server (5722SS1 Option 12)
- Digital Certificate Manager (5722SS1 Option 34)
- QShell Interpreter (5722SS1 Option 30)
- Extended Base Directory Support (5722SS1 option 3)
- Portable App Solutions Environment (5722SS1 Option 33)
- International Components for Unicode (5722SS1 Option 39)
- Java Developer Kit 1.4 (5722JV1 option 6)
- IBM Toolbox for Java (5722JC1 option *BASE)
- IBM HTTP Server for i5/OS (5722DG1 option *BASE)
- TCP/IP Connectivity Utilities for i5/OS (5722TC1 option *BASE)
- Additional optional software products:
 - iSeries Access Base (5722XW1 option *BASE)
 - iSeries Access Option 1 (5722XW1 option 1)
 - iSeries Access for Windows (5722XE1 option *BASE)
 - DB2 Query Manager and SQL Development Kit for iSeries (5722ST1 option *BASE)

WC Developer Express

- Windows 2000 Server or Advanced Server Edition with Service Pack 3, or higher
- Windows 2000 Professional Edition with Service Pack 3, or higher
- Windows XP Professional with Service Pack 2

WC — Express

Requires one of the following operating systems:

- Windows 2000 Server or Advanced Server Edition with Service Pack 4 or Windows 2003 Server Enterprise or Standard Edition
- SUSE Linux Enterprise Server 8 for Intel
- Red Hat Enterprise Linux AS V2.1 for Intel
- Red Hat Enterprise Linux AS/ES v3.0 with Update 1 for Intel
- For i5/OS:
 - i5/OS Version 5 Release 3 (5722-SS1), which includes:
 - DB2 UDB for iSeries, V5.3
 - Host Server (5722SS1 option 12)
 - Digital Certificate Manager (5722-SS1 Option 34)
 - QShell Interpreter (5722-SS1 Option 30)
 - WebSphere Portal Applications Solutions Environment (5722SS1 option 33)
 - International Components for Unicode (5722SS1 option 39)
 - IBM Java Developer Kit, V1.3 (5722-JV1 option 5)
 - IBM HTTP Server Powered by Apache (5722-DG1)
 - Crypto Access Provider for iSeries, V5R2 (5722-AC3)

- TCP/IP Connectivity Utilities for iSeries, V5R2 (5722-TC1)
- Additional optional software products:
 - iSeries Client Access Family (5722-XW1 and 5722-XE1) (recommended)
 - DB2 Query Manager and SQL Development Kit for iSeries (5722-ST1)
 - LDAP Directory Services (5722SS1)
 - For WebSphere Commerce Administrator and Accelerator, Internet Explorer V5.5
- i5/OS Version 5 Release 4 (5722-SS1), which includes:
 - DB2 UDB for iSeries, V5.4
 - DB2 UDB for iSeries Symmetric Multiprocessing (option 26)
 - DB2 UDB for iSeries Multisystem (option 27)
 - Crypto Access Provider for iSeries (5722SS1 option 35)
 - Host Server (5722SS1 option 12)
 - Digital Certificate Manager (5722-SS1 Option 34)
 - QShell Interpreter (5722-SS1 Option 30)
 - WebSphere Portal Applications Solutions Environment (5722SS1 option 33)
 - International Components for Unicode (5722SS1 option 39)
- IBM Java Developer Kit, V1.4 (5722-JV1 option 5)
- IBM HTTP Server Powered by Apache (5722-DG1)
- TCP/IP Connectivity Utilities for iSeries, V5R2 (5722-TC1)
- Additional optional software products:
 - iSeries Client Access Family (5722-XW1 and 5722-XE1) (recommended)
 - DB2 Query Manager and SQL Development Kit for iSeries (5722-ST1)
 - LDAP Directory Services (5722SS1)
 - For WebSphere Commerce Administrator and Accelerator, Internet Explorer V5.5

WebSphere Commerce Analyzer (WCA)

- Operating system:
 - Windows 2000 Server or Advanced Server Edition with Service Pack 4, or higher or Windows 2003 Server Enterprise or Standard Edition
- Database access: WCA can extract data from DB2 V8.2.3 or Oracle database on the WebSphere Commerce Server. DB2 Information Integrator Replication Edition V8.2 is required to replicate commerce data on Oracle database to the WCA datamart.
- Replication: If WC is installed on an AS/400, then data replication requires DB2 DataPropagator™ for iSeries, which must be purchased separately.

Sales Center for WebSphere Commerce

- Operating system:
 - Windows XP with Service Pack 1 or 2

Performance considerations: Response time in an Internet environment depends on a variety of network and telecommunication factors, such as line speeds, local network constraints, and availability processing capacity on the server.

Planning information

Customer responsibilities: Consider the installation, design, implementation, and maintenance of the WebSphere Commerce system. It is recommended strongly that Global Services or Business Partners be used to assist in these activities, unless adequate in-house skills are available. To implement a complete WebSphere Commerce system, you or a Business Partner should have the following skills:

- Basic systems and network administration skills
- Understanding of TCP/IP protocols, including HTTP and SSL
- Experience in administering a Web server, such as the HTTP Server
- Experience in creating Web Content using HTML and Java
- Understanding of relationship database concepts
- Ability to perform basic SQL queries
- Java programming skills for advanced customization

Software Maintenance, previously referred to as Software Subscription and Technical Support, is included in the Passport Advantage Agreement. Installation and technical support is provided by the Software Maintenance offering of the IBM International Passport Advantage Agreement. This fee service enhances customer productivity, with voice and electronic access into IBM support organizations.

Packaging: WC Professional and WC Enterprise V6.0 are available on CD-ROM media and electronic download. The following are included:

- Media pack:
 - WebSphere Commerce Quick Start, V6.0
 - WebSphere Commerce, V6.0
 - WebSphere Application Server Network Deployment V6.0.2.5 — HTTP Server and Plugins
 - WebSphere Application Server Network Deployment V6.0.2.5 — Application Server (including Network Deployment)
 - WebSphere Application Server, Edge Component V6.0.2.5
 - Tivoli® Directory Server V5.2 (Not Applicable to AS/400)
 - DB2 Universal Database® Enterprise Server Edition V8.2.3 (Not applicable to AS/400)
 - WebSphere Information Integrator Replication Edition V8.2 for Windows
 - DB2 Admin Client V8.2.3
 - WebSphere Commerce Analyzer for Windows V6.0

WC Developer Professional and WC Developer Enterprise V6.0 are available on CD-ROM media and electronic download. The following are included:

- Media pack:

- WebSphere Commerce Developer Quick Start, V6.0
- WebSphere Commerce Developer, V6.0
- Rational Application Developer V6.0.1 CD-ROMs
- WebSphere Commerce V6.0 for Windows (Development copy)
- Sales Center for WebSphere Commerce V6.0 (Development copy)
- DB2 Universal Database Enterprise Server Edition V8.2.3 for Windows
- DB2 Admin Client V8.2.3

WC Express V6.0 is available on CD-ROM media and electronic download. The following are included:

- Media pack:
 - WebSphere Commerce Quick Start, V6.0
 - WebSphere Commerce —Express V6.0
 - WebSphere Application Server —Express V6.0.2.5
 - DB2 Universal Database Express Edition V8.2.3
 - DB2 Admin Client V8.2.3
 - DB2 Connect® Personal Edition V8.2.3 for Windows (For iSeries only)
 - WebSphere Commerce Analyzer for Windows, V6.0

WC Developer Express V6.0 is available on CD-ROM media and electronic download. The following are included:

- Media pack:
 - WebSphere Commerce Developer Express Quick Start, V6.0
 - WebSphere Commerce Developer Express V6.0 for Windows
 - Rational Application Developer V6.0.1 CD-ROMs
 - WebSphere Commerce —Express V6.0 for Windows (Development copy)
 - DB2 Universal Database Express Edition V8.2.3 for Windows
 - DB2 Admin Client V8.2.3

Sales Center for WebSphere Commerce V6.0 is available on CD-ROM media and electronic download. The following are included:

- Media pack:
 - Sales Center for WebSphere Commerce V6.0

Security, auditability, and control

WC for Multiplatforms V6.0 uses the security and auditability features of the Windows 2000, Windows 2003, AIX, Solaris, OS/400®, RedHat, and SUSE for Linux on @server® xSeries®, pSeries, iSeries, and zSeries.

The SSL protocol, an Internet open standard, is used to encrypt communications between Web browser and the Web server, and between WC components.

The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

Software services

IBM Services has the breadth, depth, and reach to manage your services needs. You can leverage the deep technical skills of our lab-based, software services team and the business consulting, project management, and infrastructure expertise of our IBM Global Services team. Also, we extend our IBM Software Services reach through IBM Business Partners to provide an unmatched portfolio of capabilities. Together, we provide the global reach, intellectual capital, industry insight, and technology leadership to support any critical business need.

Charge metrics definitions

Processor

A processor (commonly called a “CPU” or “core”) is a functional unit within a computing device that interprets and executes instructions. A processor consists of at least an instruction control unit and one or more arithmetic or logic units. With multi-core technology, each core is considered a processor. With full capacity licensing, a Proof of Entitlement (PoE) must be acquired for all activated processors on the server available to the program or a component of the program.

Sub-capacity processor

A processor (commonly called a “CPU” or “core”) is a functional unit within a computing device that interprets and executes instructions. A processor consists of at least an instruction control unit and one or more arithmetic or logic units. With multi-core technology, each core is considered a processor. With sub-capacity licensing, a PoE must be acquired for all activated processors in partitions (utilizing eligible partitioning technologies) on the server available to the program or a component of the program.

Authorized user

An authorized user is one and only one individual (named or unnamed) within or outside your enterprise. A PoE must be obtained for each individual user accessing the program in any manner. A program licensed under an authorized user PoE may be installed on a single computer or server, and accessed by multiple users, provided that a PoE has been obtained for each individual user accessing the program either directly or indirectly (via a multiplexing program, device, or application server) through any means on behalf of the user.

Store

- WC — Express entitlement allows one store per processor. Only one processor is allowed for each Express customer
- WC — Professional entitlement allows one store per processor. WC Professional customer must purchase additional processor license to have additional store.
- WC —Enterprise entitlement allows unlimited store per processor.

Physical retail store

- Gift registry physical retail store entitlement allows each customer to have up to 25 physical retail store. For example, if you have 90 physical retail stores, you have to purchase four gift registry physical retail store entitlements

IBM Tivoli License Manager V2.2 with fix pack 1 is required to support sub-capacity licensing for the above products.

Sub-capacity for selected middleware products

Sub-capacity licensing on a per-processor basis is available for selected middleware products. To offer sub-capacity licensing, IBM software products implement IBM Tivoli License Manager within their offerings so that customers can monitor and report quarterly to IBM on their use of the programs on a continuous basis.

More information can be found on the Passport Advantage Web site

<http://www.ibm.com/software/passportadvantage>

Eligibility requirements for sub-capacity licensing

To be eligible for sub-capacity licensing terms on this product, you must agree to install and configure IBM Tivoli License Manager for IBM Software, in accordance with the IBM Tivoli License Manager publications, and to enable the collection of program use data on all eligible machines subject to sub-capacity terms.

For those machines running programs with sub-capacity licensing terms, you must use IBM Tivoli License Manager for IBM Software to monitor program use and submit to IBM an IBM Use Report each calendar quarter. Multiple copies of IBM Tivoli License Manager for IBM Software or IBM Tivoli License Manager are not required. You can use more copies if you need them to support your operational environment, but only one copy is required to monitor all your sub-capacity licensed products.

Additionally, if this is the first product you have licensed under sub-capacity terms, you must agree to the terms of an attachment to your Passport Advantage or Passport Advantage Express contract and submit a new Passport Advantage enrollment form. First-time sub-capacity clients also have an opportunity to ensure a primary business contact is established for their contracts.

For more information on required and entitled license capacity, license requirements and reporting refer to Software Announcement Letter 205-093, dated April 19, 2005.

If you order (this product) under sub-capacity terms, IBM Tivoli License Manager for IBM Software will be made available to you if you do not already have one. You must install and configure this tool for your sub-capacity products. Alternately, you can use Tivoli License Manager. Once the license manager software is installed, you will be required to register online (IBM may need to contact you in order to finalize the registration process). You must monitor program use on a continuous basis with an IBM Tivoli License Manager for IBM Software and submit IBM Use Reports to IBM on a calendar quarterly basis.

IBM Tivoli License Manager for IBM Software is documented in the following customer publications, which are available from IBM Publications Center at

<http://www.elink.IBMLink.ibm.com/public/applications/publications/cgibin/pbi.cgi?>

Publication	Form
Planning, Installation, and Configuration	SC32-1431
Administration	SC32-1430
Problem Determination	SC32-9102
Data Dictionary	SC32-1432
Release Notes(R)	SC32-1429

For IBM Tivoli License Manager configuration guidance and instructions for specific products (including this product) acquired with sub-capacity terms, refer to

<http://www.lotus.com/sub-capacity>

The Web site will give you information about how to set up the product for detection by IBM Tivoli License Manager, any required maintenance, and any required steps that are unique to this product.

Terms and conditions

This product is only available via Passport Advantage. It is not available as shrinkwrap.

Licensing: IBM International Program License Agreement and License Information document. Proofs of Entitlement (PoE) are required for all authorized use.

Part number products only, offered outside of Passport Advantage, where applicable, are license only and do not include Software Maintenance.

This software license includes Software Maintenance, previously referred to as Software Subscription and Technical Support.

License information form numbers:

Program name	Program number	Form number
WebSphere Commerce Enterprise	5724-I38	L-DYUG-6L8JV
WebSphere Commerce Professional	5724-I40	L-DYUG-6L8JV

On or near the planned availability date, the LI will be available for review on the IBM Software License Agreement Web site

<http://www.ibm.com/software/sla/sladb.nsf>

Limited warranty: Yes

Warranty: This program includes a warranty for one year from acquisition from IBM or an authorized IBM Business Partner. For one year from acquisition of the program, this warranty provides the customer with access to databases containing program information and FAQs, including any known fixes to defects, which the customer can download or otherwise obtain and install.

Program technical support: Technical support of a program product will be available for a minimum of three years from the general availability date, as long as your Software Maintenance is in effect. This technical support allows you to obtain assistance (via telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Maintenance also provides you with access to updates, releases, and versions of the program. Customers will be notified, via

announcement letter, of discontinuance of support with 12 months' notice. If you require additional technical support from IBM, including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

Money-back guarantee: If for any reason you are dissatisfied with the program and you are the original licensee, return it within 30 days from the invoice date, to the party (either IBM or its reseller) from whom you acquired it, for a refund.

- For programs acquired under the IBM International Passport Advantage offering, this term applies only to your first acquisition of the program.
- For programs acquired under any of IBM's On/Off Capacity on Demand (On/Off CoD) software offerings, this term does not apply since these offerings apply to programs already acquired and in use by the customer.

Volume orders (IVO): No

Passport Advantage applies: Yes, and through the Passport Advantage Web site at

<http://www.ibm.com/software/passportadvantage>

Usage restriction: Yes

All products require the correct licensing terms. The software products provided on the product media are provided solely for use with your licensed use of the WebSphere Commerce product as described in the program unique license information that is provided to you electronically. If the total number of processors or total number of stores exceeds the number authorized by the applicable Proofs of Entitlement acquired under Passport Advantage, you must notify IBM or its reseller as stated in the IPLA.

For additional information refer to the License Information Document that is available on the IBM Software License Agreement Web site

<http://www.ibm.com/software/sla/sladb.nsf>

Software Maintenance applies: Yes

Software Maintenance, previously referred to as Software Subscription and Technical Support, is included in the IBM International Passport Advantage Agreement. Installation and technical support is provided by the Software Maintenance offering of the IBM International Passport Advantage Agreement. This fee service provides voice and electronic access to IBM support organizations.

IBM includes one year of Software Maintenance with the initial license acquisition of each program acquired. The

initial period of Software Maintenance can be extended by the purchase of a renewal option, if available.

While your Software Maintenance is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions; and code-related questions. IBM provides assistance via telephone and, if available, electronic access, only to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, every day of the year. For additional details, consult your *IBM Software Support Guide* at

<http://techsupport.services.ibm.com/guides/handbook.html>

Software Maintenance does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under this agreement.

For more information about the Passport Advantage Agreement, visit the Passport Advantage Web site at

<http://www.ibm.com/software/passportadvantage>

iSeries Software Maintenance applies: No

Educational allowance available: Not applicable.

On/Off capacity on demand

To be eligible for On/Off Capacity on Demand pricing, customers must be enabled for temporary capacity on the corresponding hardware, and the required contract — Z125-6907, *Amendment for iSeries and pSeries Temporary Capacity On Demand — Software* — must be signed prior to use.
