At a glance

InfoSphere® Information Server Pack for SAP Applications V7.0, formerly named InfoSphere Information Server Pack for SAP R/3, is designed to optimize time-to-value and lower total cost of ownership by automating your integration effort for SAP applications.

InfoSphere Information Server Pack for SAP Applications V7.0 offers:

- Rapid modeling for SAP applications
- Rapid extract, transform, and load (ETL) job generation for SAP applications
- Enhanced support for intermediate document (IDoc) metadata
- Metadata lineage for SAP IDoc metadata

For ordering, contact your IBM® representative, an IBM Business Partner, or IBM Americas Call Centers at 800-IBM-CALL (Reference: YE001).

Overview

InfoSphere Information Server Pack for SAP Applications V7.0 is designed to deliver enhanced automation, improved usability, and robust performance while helping you integrate SAP applications.

Key enhancements include:

- Rapid modeling for SAP applications: Helps you automate the discovery of SAP data objects and extract relevant metadata. It is designed to set up data structures for business objects that require migration. It also helps you create corresponding jobs for extracting and loading the data.
- Rapid extract, transform, and load (ETL) job generation for SAP applications: Helps you automate SAP configuration and validation table extraction for use in initial SAP projects such as SAP-to-SAP migration and integration of SAP data with a data warehouse or master data management (MDM) solution.
- Enhanced support for intermediate document (IDoc) metadata: Offers data lineage for your SAP integration data flows. It also helps you design your ETL and data quality jobs while SAP is offline.
- Robust performance for IDoc imports: Enables the use of parallelism while importing IDocs.

- Improved real-time support for SAP applications: Delivers enhanced real-time support for SAP applications, including new web services for IDocs.

Key prerequisites

For details, refer to the [Hardware requirements](#) and [Software requirements](#) sections.

Planned availability date

December 6, 2011: Electronic availability

December 16, 2011: Media availability

Description

InfoSphere Information Server Pack for SAP Applications V7.0 helps:

- Simplify and automate the migration and consolidation effort for legacy SAP R/3 applications
- Reduce total cost of ownership by accelerating the migration and consolidation effort while requiring less SAP expertise
- Support accelerated integration effort for SAP applications, thereby reducing the impact on SAP business processes

Product positioning

InfoSphere Information Server Pack for SAP Applications is used in combination with InfoSphere DataStage® and InfoSphere QualityStage™ to help you migrate, consolidate, and improve the quality of legacy SAP data. This robust combination helps you leverage the broad capabilities of the IBM InfoSphere Information Server platform and SAP expertise built into InfoSphere Information Server Pack for SAP Applications. It, thereby, accelerates your SAP integration effort with additional SAP applications such as NetWeaver or ECC, as well as non-SAP applications such as a data warehouse or MDM solution.

InfoSphere Information Server Pack for SAP Applications is certified by SAP to indicate it adheres to SAP quality standards.

Education support

Available training offerings include client on-site training, public training at IBM facilities, and remote learning via FlexLearning. Through client on-site training, IBM delivers standard or customized training to meet the requirements of its clients. IBM can also provide mobile academies for a rental fee to minimize clients' setup activities.

IBM public training simplifies the process by providing the complete environment for standard course deliveries and giving students the ability to learn without the distractions of everyday responsibilities. Public training is offered on a regular schedule worldwide. For more information on public instructor-led training, visit

<http://www.ibm.com/software/data/ips/services/learning.html>

The newly enhanced FlexLearning program enables clients to attend training on their own schedule at their own location. This program offers state-of-the-art technology to deliver highly valuable training at minimum cost. All current courses are approximately three hours in length and offer a valuable learn-by-doing, self-paced format.

For more information on any of the training offerings, contact

iiseduc@us.ibm.com

Offering Information

Product information is available via the Offering Information website

<http://www.ibm.com/common/ssi>

Also, visit the Passport Advantage® website

<http://www.ibm.com/software/passportadvantage>

Publications

Publications provided with the product

A printed Quick Start Guide is provided in the product package. The Quick Start Guide is also available from the product's Support page on ibm.com® (using the Product documentation link).

Product documentation is installed in the Information Server Information Center when you install the product. A subset of the Information Server Information Center is available online at

<http://publib.boulder.ibm.com/infocenter/iisinfsv/v8r1/index.jsp>

The IBM Publications Center

Publications for InfoSphere Information Server products are provided on a CD in the product package. Publications can also be obtained from the IBM Publications Center at

<http://www.ibm.com/shop/publications/order>

The Publications Center is a worldwide central repository for IBM product publications and marketing material with a catalog of 70,000 items. Extensive search facilities are provided. Printed publications can be ordered from the IBM Publications Center; payment options for orders are via credit card (in the U.S.) or customer number for 20 countries. A large number of publications are available online in various file formats. Those with publication numbers that begin with SC or GC can be downloaded by all countries free of charge, and those with publication numbers that begin with LC can be purchased by customers with an active product license for the related product.

The following table provides information that can be used to locate this product's publications on the IBM Publications Center.

Technical information

Specified operating environment

Hardware requirements

The exact configuration you need to support your environment with satisfactory processing time will vary, depending on multiple factors. Processing times vary, depending on server speed, memory, and network and server workload.

The minimum recommended configurations listed below need to be evaluated and adjusted according to your unique requirements.

Disk space recommendations are for the product installation and working space only. The actual hard disk space required varies, depending upon your installation.

InfoSphere Information Server Pack for SAP Applications runs as an application on InfoSphere DataStage Server V8.5 and V8.7, thus requiring the hardware requirements of the base product to be met or exceeded.

Software requirements

For detailed information, refer to the InfoSphere Information Server system requirements website at

<http://www-01.ibm.com/software/data/infosphere/info-server/overview/requirements.html>

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a README file, or other information published by IBM, such as an announcement letter. Documentation and other program content may be supplied only in the English language.

Security, auditability, and control

These products use the security and auditability features of the host hardware or software.

The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

Software Services

Services from IBM InfoSphere Professional Services complement the IBM Information Server platform. You can leverage the extensive technical skills and proven methodologies based on years of accumulated knowledge and experience, gained through hundreds of successful implementations. The IBM InfoSphere Professional Services team offers a wide range of services-related packages that are designed to help you achieve success in the design, implementation, and rollout of your information integration projects.

To learn more about IBM InfoSphere Professional Services or contact a services representative, visit

<http://www-306.ibm.com/software/data/ips/services/professional.html>

We also extend our IBM Software Services reach through IBM Business Partners to provide an unmatched portfolio of capabilities. Together we provide the global reach, intellectual capital, industry insight, and technology leadership to support any critical business need.

Charge metrics definitions

Server

Server is the unit of measure by which this program is licensed. A server is a computer system that executes requested procedures, commands, or applications to one or more user or client devices. A Proof of Entitlement (PoE) must be obtained for each server regardless of the number of processor cores or partitions in the server on which the program runs or each server managed by the program. Where blade technology is employed, each blade is considered a separate server.

IBM Global Financing

IBM Global Financing offers competitive financing to credit-qualified customers to assist them in acquiring IT solutions. Offerings include financing for IT acquisition, including hardware, software, and services, both from IBM and other manufacturers or vendors. Offerings (for all customer segments: small, medium, and large enterprise), rates, terms, and availability can vary by country. Contact your local IBM Global Financing organization or visit

<http://www.ibm.com/financing>

IBM Global Financing offerings are provided through IBM Credit LLC in the United States, and other IBM subsidiaries and divisions worldwide to qualified commercial and government customers. Rates are based on a customer's credit rating, financing terms, offering type, equipment type, and options, and may vary by country. Other restrictions may apply. Rates and offerings are subject to change, extension, or withdrawal without notice.
