At a glance

Rational Team Concert™ provides the developer role for the Rational® Solution for Collaborative LifeCycle Management. This release provides three main features:

- Performance
- Expanded platform support
- Enhanced process sharing

IBM® delivers as much as a 25% performance boost when rendering plans in the web UI, compared to the previous release. New, expanded platform support for Mac OS X clients, new Chrome browser support and updated Rational Team Concert client support for Microsoft™ Visual Studio 2012. Enterprise deployments are now able to share a common process across projects while enabling some local project add-on process customization.

IBM also added more flexible dependency build support for z/OS® and improved visibility of files changes for code reviews. Finally, when Rational Team Concert is used together with the new Rational LifeCycle Adaptors, customers can now easily link and integrate with HP ALM, HP Quality Center, Git, Jira and Visual Studio Team System enabling incremental adoption of Rational Team Concert into existing tool infrastructures.

For ordering, contact your IBM representative, an IBM Business Partner, or IBM Americas Call Centers at 800-IBM-CALL (Reference: AE001).

Overview

Rational Team Concert assists organizations of all sizes and complexity to automate, advise, and enforce process, information flow, and interactions throughout the systems and software development lifecycle. Rational Team Concert integrates planning, software configuration management, change management, and build management into a single application.

Version 4.0 addresses key areas that include improved performance when rendering large plans, expanded platform support for Mac OS X clients, new Chrome browser support, and an updated Rational Team Concert client for Microsoft Visual Studio

2012. In addition, better visibility to code changes to make code reviews even easier and more flexible support for z/OS-based dependency builds.

It is also easier for enterprise teams to share process across projects while allowing some local process customization. And if you need to get going quickly, a new zip install for Rational Team Concert is available. Finally, when Rational Team Concert is used together with the new Rational LifeCycle Adaptors, you can now easily link and integrate with HP ALM, HP Quality Center, Git, Jira and Visual Studio Team System enabling incremental adoption of Rational Team Concert into existing tool infrastructures.

Key prerequisites

For details, refer to the [Hardware requirements](#) and the [Software requirements](#) sections.

Planned availability date

- November 27, 2012: Electronic availability
- December 14, 2012: Media availability

Description

Organizations face growing pressures to quickly deliver high-quality software that is aligned with business objectives. Some of the pressures include:

- Delivering more with same or even fewer resources
- Working in teams that are becoming even more geographically distributed
- Adhering to organizational standards without having the processes defined or documented

Rational Team Concert drives software innovation through collaboration, to transform how people, especially those who have project-distributed teams, work together to develop and deliver software in an increasingly rapid manner. Rational Team Concert provides unique capability that allows teams to collaborate in the context of their work, perform real time planning, steer, and correct the course with constant visibility to project status and learn and adapt with continuous process improvement.

What are the benefits of the new capabilities in Rational Team Concert V4.0.1?

Up to 25% faster performance when rendering large plans:

When compared to the previous Version 4.0 release, Rational Team Concert V4.0.1 now renders large plans in the web up to 25% faster. In addition, it now supports auto-scrolling, which makes it easier and faster to move plan items within large plans.

Expanded platform support for Mac OS X, Chrome, and Visual Studio 2012

Rational Team Concert is keeping pace with the latest development trends such as adding support for the popular and fast Chrome browser. In addition, Eclipse developers and extended team members now have the freedom of choice to use Mac OS X Lion or Mac OS X Snow Leopard as their development desktop. And teams who need to use the newest Microsoft Visual Studio 2012 IDE now have immediate support with the Rational Team Concert V4.0.1 Client for Microsoft Visual Studio IDE. Get coding with your favorite desktop client, IDE, or browser.

Use of Git, Jira, HP ALM, or HP Quality Center

When Rational Team Concert is used with the new Rational LifeCycle Adaptors, you can now easily link and integrate with HP ALM, HP Quality Center, Git, Jira, Visual Studio Team System, and more. This enables incremental adoption of Rational Team Concert into existing tool infrastructures. Rational Team Concert V4.0 and V4.0.1 both work with the add on Rational LifeCycle Adaptors.

More flexible process sharing and customization across projects

This release with initial support for delta configurations of XML process allows some local, project-work-item-attribute customization, without breaking inheritance of the parent process:

- Manage many projects but try to maintain a common process for agile teams and perhaps another for waterfall development.
- Modify certain work item attributes or values but retain a common process across all agile projects.

Easier code reviews for better code

Usability improvements to make code reviews easier were made:

- A new Change Summary view aggregates all the change sets to present a single view of all the resources modified.
- Drill down further using the details summary pane to view the cumulative file changes next to a visual dependency graph. New developer on the project can use it to quickly come up to speed on how things are done around here.

Get up and running faster

You can get started with just Rational Team Concert . A new stand-alone zip install gets you going and out of the starting gate faster. Download faster, install faster. It is just what you need and no more.

Enhanced SCM command line support

Automate more SCM operations with new support for viewing and updating workspace, component, snapshot, or baseline properties. Show the differences between a snapshot or baseline and other streams or workspaces.

More flexible dependency build output on z/OS (1)

You can now define an output pattern to apply to builds on z/OS to give you more control over your dependency based builds to adhere to your build naming conventions.

(1) Denotes new capabilities found in IBM Rational Team Concert Developer for IBM Enterprise Platforms.

Program number

Program number	VRM	Program name

Publications

No publications are shipped with this product.

The IBM Publications Center

<http://www.ibm.com/shop/publications/order>

The Publications Center is a worldwide central repository for IBM product publications and marketing material with a catalog of 70,000 items. Extensive search facilities are provided. Payment options for orders are via credit card (in the U.S.) or customer number for 20 countries. A large number of publications are available online in various file formats, and they can all be downloaded by all countries.

Technical information

Specified operating environment

Hardware requirements

- Disk space: 1 GB minimum
- Display: Minimum of 1024 X 768 resolution
- Memory: 2 GB minimum; 4 GB recommended

- Other hardware: 10/100 Mbps wired connectivity or 802.11b

When running two or more Jazz applications on a single Jazz Team Server, a 64-bit operating system and a minimum of 4 GB of memory are recommended.

Software requirements

Application servers

- WebSphere® Application Server for z/OS V8.0 and future fix packs
- WebSphere Application Server V8.0.0.3 and future fix packs
- WebSphere Application Server Network Deployment V8.0 and future fix packs
- WebSphere Application Server V7.0.0.15 and future fix packs
- WebSphere Application Server OEM Edition for z/OS , V7.0 and future fix packs
- WebSphere Application Server for z/OS , V7.0 and future fix packs
- WebSphere eXtreme Scale V8.5 and future fix packs
- Apache Tomcat 7.0 and future fix packs

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a README file, or other information published by IBM, such as an announcement letter. Documentation and other program content may be supplied only in the English language.

Planning information

Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and technical support are provided by the Software Subscription and Support (also referred to as Software Maintenance) offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software, and technical support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with each program license acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available.

Packaging

Rational Team Concert

Security, auditability, and control

The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

Charge metrics definitions

Authorized User Single Install

Authorized User Single Install is a unit of measure by which the Program can be licensed. An Authorized User is a unique person who is given access to the Program. An Install is an installed copy of the Program on a physical or virtual disk made available to be executed on a computer. The Program may be installed on any number of computers or servers, but if the Authorized User has accessed or has access to more than one Install of the Program, the Authorized User requires a separate entitlement for each such Install. Licensee must obtain separate, dedicated entitlements for each Authorized User given access to the Program on each Install in any manner directly or indirectly (for example: via a multiplexing program, device, or application server) through any means. An entitlement for an Authorized User is unique to that Authorized User and may not be shared, nor may it be reassigned other than for the permanent transfer of the Authorized User entitlement to another person.

Note: Some programs may be licensed where devices are considered users. In that case the following applies: Any computing device that requests the execution of or receives for execution a set of commands, procedures, or applications from the Program or that is otherwise managed by the Program is considered a separate User of the Program and requires an entitlement as if that device were a person.

Floating User Single Install

Floating User Single Install is a unit of measure by which the Program can be licensed. A Floating User is a person who is accessing the Program at any particular point in time. An Install is an installed copy of the Program on a physical or virtual disk made available to be executed on a computer. The Program may be installed on any number of computers or servers, but if the Floating User simultaneously accesses more than one Install of the Program, the Floating User requires a separate entitlement for each such Install. Licensee must obtain separate entitlements for each Floating User simultaneously accessing the Program on each Install in any manner directly or indirectly (for example: via a multiplexing program, device, or application server) through any means.

Note: Some programs may be licensed where devices are considered users. In that case the following applies: Any computing device that requests the execution of or receives for execution a set of commands, procedures, or applications from the Program or that is otherwise managed by the Program is considered a separate User of the Program and requires an entitlement as if that device were a person.

Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

Licensing

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use.

Part number products only, offered outside of Passport Advantage , where applicable, are license only and do not include Software Maintenance.

This software license includes Software Subscription and Support (also referred to as Software Maintenance).

License Information form number

Program name	Program number	Form number
IBM Rational Team Concert	5724-V04	L-DNGN-8YFUPN

The program's License Information will be available for review on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

Limited warranty applies

Yes

Limited warranty

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional charge. For further information, consult the IBM Software Support Handbook found at

<http://www.ibm.com/support/handbook>

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

Program technical support

Technical support of a program product version or release will be available for a minimum of five years from the general availability date, as long as your Software Maintenance is in effect. This technical support allows you to obtain assistance (via telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Maintenance also provides you with access to updates (modifications or fixes), releases, and versions of the program. You will be notified, via announcement letter, of discontinuance of support with 12 months' notice. If you require additional technical support from IBM, including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

Money-back guarantee

For clarification, note that if for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

- For clarification, note that for programs acquired under the IBM International Passport Advantage Agreement, this term applies only to your first acquisition of the program.

Volume orders (IVO)

No

Passport Advantage applies

Yes, and through the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

This product is only available via Passport Advantage. It is not available as shrinkwrap.

Software Subscription and Support (Software Maintenance)

Software Subscription and Support applies

Yes. Software Subscription and Support is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and technical support are provided by the Software Subscription and Support offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software and Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support with each program license acquired. The initial period of Software Subscription and Support can be extended by the purchase of a renewal option, if available.

While your Software Subscription and Support is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance via telephone and, if available, electronic access, to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, consult your IBM Software Support Handbook at

<http://www.ibm.com/support/handbook>

Software Subscription and Support does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.

For additional information about the International Passport Advantage Agreement and the IBM International Passport Advantage Express Agreement, visit the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

Other terms

System i Software Maintenance applies

No

Educational allowance available

Not applicable.

IT system security involves protecting systems and information through prevention, detection, and response to improper access from within and outside your enterprise. Improper access can result in information being altered destroyed or misappropriated or can result in misuse of your systems to attack others. Without a comprehensive approach to security, no IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems and products are designed to be part of a comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products, or services to be most effective. IBM does not warrant that systems and products are immune from the malicious or illegal conduct of any party.

Prices

Passport Advantage

For Passport Advantage information and charges, contact your IBM representative or authorized IBM Business Partner for Software Value Plus, Additional information is also available at

<http://www.ibm.com/software/passportadvantage>

Business Partner information

If you are an IBM Business Partner -- Distributor for Workstation Software acquiring products from IBM , you may link to Passport Advantage Online for resellers where you can obtain Business Partner pricing information. An IBM ID and password are required.
