Overview

If you are currently paying maintenance for IBM® Document Manager running on top of IBM Content Manager Enterprise Edition V8.4.3, you now have the ability to leverage the selected IBM Content Manager Enterprise Edition clients below:

- IBM Content Navigator
- IBM Content Manager Enterprise Edition eClient
- IBM Content Manager Enterprise Edition Windows™ Client
- IBM Web Interface (WEBI) for IBM Content Management

You can use the above clients in conjunction with, or in lieu of, the IBM Document Manager client at no additional license cost.

For ordering, contact your IBM representative, an IBM Business Partner, or IBM Americas Call Centers at 800-IBM-CALL.

Reference: YE001

Key prerequisites

Refer to the [Technical information](#) section for information about hardware and software requirements.

Planned availability date

March 1, 2013: Electronic availability

March 8, 2013: Media availability

Description

Accessibility by people with disabilities

A US Section 508 Voluntary Product Accessibility Template (VPAT) can be requested via the IBM website

http://www.ibm.com/able/product_accessibility/index.html

Section 508 of the US Rehabilitation Act

IBM Document Manager is capable as of March 8, 2013, when used in accordance with IBM's associated documentation, of satisfying the applicable requirements of Section 508 of the Rehabilitation Act, provided that any assistive technology used with the product properly interoperates with it. A US Section 508 Voluntary Product Accessibility Template (VPAT), containing details on the products accessibility compliance, can be requested on the following website

http://www.ibm.com/able/product_accessibility/index.html

Offering Information

Product information is available via the Offering Information website

<http://www.ibm.com/common/ssi>

Also, visit the Passport Advantage® website

<http://www.ibm.com/software/passportadvantage>

Publications

No publications are shipped with this product.

IBM Redbooks®

<http://www.redbooks.ibm.com/>

IBM Redbooks publications are developed and published by the IBM International Technical Support Organization (ITSO). The ITSO develops and delivers skills, technical know-how, and materials to IBM technical professionals, Business Partners, clients, and the marketplace in general.

IBM Redbooks provide positioning and value guidance, installation and implementation experiences, typical solution scenarios, and step-by-step how-to guidelines. They often include sample code and other support materials that are also available as downloads. Redbooks are available as hardcopy books, in IBM Redbooks CD-ROM collections, and on the Internet in the site below. Refer to the How to order page for order details at

<http://www.redbooks.ibm.com/Redbooks.nsf/RedbookAbstracts/sg247623.html>

The IBM Publications Center

<http://www.ibm.com/shop/publications/order>

The Publications Center is a worldwide central repository for IBM product publications and marketing material with a catalog of 70,000 items. Extensive search facilities are provided. Payment options for orders are via credit card (in the U.S.) or customer number for 20 countries. A large number of publications are available online in various file formats, and they can all be downloaded by all countries.

Technical information

Specified operating environment

Hardware requirements

For IBM Document Manager V8.5 hardware requirements, visit

<http://www-01.ibm.com/support/docview.wss?rs=1067&context=SSDSNY?&uid=swg27019602>

Software requirements

For IBM Document Manager V8.5 software requirements, visit

<http://www-01.ibm.com/support/docview.wss?rs=1067&context=SSDSNY?&uid=swg27019602>

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a readme file, or other information published by IBM, such as an announcement letter. Documentation and other program content may be supplied only in the English language.

Security, auditability, and control

IBM Document Manager uses the security and auditability features of the host software.

The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

Ordering information

This product is only available via Passport Advantage. It is not available as shrinkwrap.

These products may only be sold directly by IBM or by authorized IBM Business Partners for Software Value Plus.

IBM Document Manager External	5724-H90	Per User Value Unit

Charge metrics definitions

User Value Unit (UVU)

UVU is the metric by which this program is licensed. UVU entitlements are based on the number of users for the given program. A Proof of Entitlement (PoE) must be obtained for the appropriate number of UVUs required for your environment as defined by the specific program terms. The UVU entitlements are specific to the program and may not be exchanged, interchanged, or aggregated with UVU entitlements of another software program. UVU licensing offers you price benefits for customers by enabling a lower cost of incremental growth of resources. To understand these benefits of UVU licensing, and to determine how many UVUs to obtain for the program, contact your IBM representative.

A Value Unit is a pricing charge metric for program license entitlements which is based upon the quantity of a specific designated measurement used for a given program. Each program has a designated measurement. The most commonly used designated measurement is a processor core. However, for select programs, there are other designated measurements such as users or resources which may include servers, client devices, and messages. The number of value unit entitlements required for a program depends on how the program is deployed in your environment and must be obtained from a Value Unit table. You must obtain a PoE for the calculated number of value unit entitlements for your implementation. The Value Unit entitlements are specific to a program and may not be exchanged, interchanged, or aggregated with Value Unit entitlements of another program.

At all times, the number of users accessing the program or any component of the program in any manner, directly or indirectly (for instance, via a multiplexing program, device, or application server) or through any other means must not exceed your entitlement to use the program, as indicated on the applicable PoEs.

Authorized UVU (AUVU): For selectively licensing internal users within your organization. The number of AUVUs you require is based on the number of authorized users within your organization that may access the program and/or whose user content may be analyzed using the program in any manner at set forth in the AUVU license conversion table.

An Infrequent User means an Authorized User who accesses the program no more than 120 times a year. Access is defined as any interaction between the Authorized User and the program, or any action performed on behalf of the Authorized User by the program, lasting no more than 15 consecutive minutes.

External UVU (XUVU): For licensing users who are external to your organization whose user content is analyzed using the program. The number of XUVUs you require is based on the number of external users whose user content may be analyzed using the program in any manner as set forth in the XUVU license conversion table.

Employee UVU (EUVU): For collectively licensing all of your internal users. The number of EUVUs you require will be based on the number of employees in your Enterprise as set forth in the EUVU license conversion table.

Enterprise: An Enterprise includes any legal entity that, by more than 50%, owns, is owned by, or is under common ownership with the licensee. The licensee is the legal entity that is authorized to execute and administer this agreement on behalf of an enterprise. The licensee need not be a 'company' and may be the entire enterprise.
