Overview

In Software Announcement 217-265, dated July 25, 2017, a statement regarding the capabilities of IBM\textsuperscript{\textregistered} DataPower\textsuperscript{\textregistered} firmware V7.6 was incorrect and is removed:

DataPower Gateway policy includes a switch action that evaluates a list of GatewayScript expressions and execute a processing rule against the first match.

In addition, the following bullets in the Software requirements section are incorrect:

- VMware vSphere V5.0, V5.1, V5.5, or V6.0 editions:
  - Standard
  - Enterprise
  - Enterprise Plus
- VMware Workstation V10, or V11
- VMware Player V6, or V7
- VMware Fusion V6, or V7

The bullets are now revised to read:

- VMware vSphere V6.5 editions:
  - Standard
  - Enterprise
  - Enterprise Plus
- VMware Workstation V12
- VMware Player V8
- VMware Fusion V8

Note: Support for VMWare platforms are dependent upon the VMWare vendor individual product support lifecycle.
For additional details, refer to the Hardware requirements section.

Key prerequisites

Not applicable.

Planned availability date

August 29, 2017
Program number
