At a glance

IBM Db2® on Cloud Bring Your Own License (BYOL) gives clients with existing IBM Db2 entitlements access to Db2 on Cloud. This access provides robust online transaction processing (OLTP) capabilities, delivering:

- Accelerated and simplified deployment. Take advantage of Db2 without the need for an on-premises infrastructure.
- Native encryption to improve control of data. Leverage the benefits of infrastructure as a service with the confidence of knowing your data is encrypted in flight, while in use, and at rest.
- A solution sized to meet your business demands and help reduce infrastructure costs.

IBM Db2 Warehouse on Cloud BYOL offers data warehousing and analytics services that help you focus on your business, not on the business of data warehousing:

- Fully-managed and secure data warehouse in the cloud
- Fast analytics with IBM BLU Acceleration™ for delivery of actionable insights
- A design that includes in-database analytics and R support

Overview

Bring Your Own License (BYOL) options for broader access to robust cloud toolset

The BYOL options for IBM Db2 on Cloud and IBM Db2 Warehouse on Cloud offerings provide you with access to selected Db2 on Cloud and Db2 Warehouse on Cloud services at a reduced cost if you already hold entitlements for Db2 Developer, Db2 Advanced Edition, and Db2 Workgroup Edition.

These BYOL products enable you to deploy your Db2 entitlements in the cloud or in your data center as your business requires, providing true hybrid capabilities for your Db2 entitlements.

Db2 on Cloud
Db2 on Cloud provides database as a service on the IBM Cloud. It offers the rich features of an on-premises Db2 deployment without the cost, complexity, and risk of managing your own infrastructure. Based on Db2 software, it comes with a preconfigured instance that is optimized for online transaction processing applications.

Key features and benefits of Db2 on Cloud include:

- Accelerates and simplifies deployment, enabling you to take advantage of Db2 without the need for an on-premises infrastructure
- Offers optional high availability with a 99.99% uptime SLA
- Provides Oracle database compatibility

**Db2 Warehouse on Cloud**

Db2 Warehouse on Cloud is the IBM data warehousing and analytics service in the cloud. This innovation leverages IBM BLU Acceleration and advanced, in-database, predictive analytics capabilities.

- A fully managed service. By eliminating the need to maintain a data warehousing infrastructure, Db2 Warehouse on Cloud enables you to focus on your business, not the business of data warehousing. A fully managed solution in the cloud, it provides users with the capability to build more with rapid provisioning and no infrastructure investment. Built-in performance, no tuning requirements, and embedded simplicity give your organization the potential to grow more, without the need to scale infrastructure and staff. Also, database analytic capabilities help your organization gain better insights into your business and data.
- Robust partner ecosystem. Db2 Warehouse on Cloud is compatible with advanced tooling such as IBM Watson Analytics™, the R language, and with a wide range of third-party business intelligence and extract, transform, and load tools.
- Quick access to your data and insights. Db2 Warehouse on Cloud is designed to help you unlock the potential of your data by providing a solution that delivers on the promise of speed, simplicity, and agility, without sacrificing security and reliability.

**Key prerequisites**

An internet connection is required.

**Planned availability date**

March 6, 2018

**Accessibility by people with disabilities**

A US Section 508 Accessibility Compliance Report containing details on accessibility compliance can be found on the Product accessibility information website.

**Reference information**

For additional information about IBM Db2 on Cloud and IBM Db2 Warehouse on Cloud, see Software Announcement 217-363, dated July 18, 2017.

### Offering Information

Product information is available on the [IBM Offering Information](#) website.

More information is also available on the [Passport Advantage(R)](#) and [Passport Advantage Express(R)](#) website.

### Publications

Technical documentation can be found in [IBM Knowledge Center](#).

### Services

**Software Services**

IBM Software Services has the breadth, depth, and reach to manage your services needs. You can leverage the deep technical skills of our lab-based, software services team and the business consulting, project management, and infrastructure expertise of our IBM Global Services team. Together, we provide the global reach, intellectual capital, industry insight, and technology leadership to support a wide range of critical business needs.

To learn more about IBM Software Services, contact your Lab Services Sales or Delivery Leader.

### Technical information

**Specified operating environment**

**Software requirements**

An internet connection is required.

The program’s specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a readme file, or other information published by IBM, such as an announcement letter. Documentation and other program content may be supplied only in the English language.

**Planning information**

**Packaging**

This offering is accessed through the internet. There is no physical media or electronic deliverable.

**Instance**

Instance is a unit of measure by which the Cloud Service can be obtained. An Instance is access to a specific configuration of the Cloud Service. Sufficient entitlements must be obtained for each Instance of the Cloud Service made available to access and use during the measurement period specified in Client's PoE or Transaction Document.

**Terms and conditions**

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction for the acquisition of Cloud Services from IBM consist of either the IBM Cloud Services Agreement and the applicable offering Service Description or the IBM International Passport Advantage Agreement or the International Passport Advantage Express Agreement and the IBM Terms of Use -- General Terms for Cloud Offerings and the applicable offering Service Description.
**Technical support**

Technical support is provided for Cloud Services and enabling software, as applicable, during the subscription period. Any enhancements, updates, and other materials provided by IBM as part of any such technical support are considered to be part of the Cloud Service, as applicable, and therefore governed by the applicable agreement as defined in Client's quote or transaction document. Technical support is included with the Cloud Service and is not available as a separate offering.

Additional technical support information for this Cloud Service offering may be found in the IBM Support Handbook or in service-specific documentation.

**Terms of Use**

Cloud Service offering-specific terms are available on the Cloud Service terms website.

**Limited warranty**

See the warranty defined in the applicable agreement governing client's acquisition for this offering.

**Money-back guarantee**

No

**Volume orders (IVO)**

No

**Passport Advantage applies**

Yes, information is available on the Passport Advantage and Passport Advantage Express website.

**Software Subscription and Support applies**

No

**Variable charges apply**

No

**Educational allowance available**

Not applicable.

**Statement of good security practices**

IT system security involves protecting systems and information through intrusion prevention, detection, and response to improper access from within and outside your enterprise. Improper access can result in information being altered, destroyed, or misappropriated or can result in misuse of your systems to attack others. Without a comprehensive approach to security, no IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems and products are designed to be part of a regulatory compliant, comprehensive security approach, which
will necessarily involve additional operational procedures, and may require other systems, products, or services to be most effective.

**Important:** IBM does not warrant that any systems, products, or services are immune from, or will make your enterprise immune from, the malicious or illegal conduct of any party.
