VMware Horizon Suite connects users to their data and applications on most devices

At a glance

IBM® offers three VMware Horizon Suite components for use on IBM System x® and BladeCenter® servers:

- VMware Horizon View
- VMware Horizon Mirage
- VMware Horizon Workspace

For ordering, contact your IBM representative, an IBM Business Partner, or IBM Americas Call Centers at 800-IBM-CALL (Reference: SE001).

Overview

VMware Horizon Suite, the platform for workforce mobility, connects users to their data and applications on most devices without sacrificing IT security and control. It can transform technology silos of desktops, data, and applications into centralized IT services - and improve operational efficiency, security, and agility through policy-based management of those services. Improve workforce productivity by empowering users with a consistent experience across devices - in the office, at home, or on the go.

Horizon Suite empowers both IT and users with advantages that move the business forward:

- Lower the total cost of ownership of existing Microsoft® Windows® PCs and applications
- Provide robust and reliable end-user computing on any desktop, tablet, or smartphone
- Gain centralized physical and virtual desktop management governed by business policies
- Securely deliver Microsoft Windows, software as a service (SaaS), and web applications on any desktop or mobile device

Simplify

Managing individual endpoints is inefficient and costly in a complex environment. Streamline and simplify operations by turning disparate operating systems, applications, and data into centralized services delivered on most devices.
Manage and secure

Once end-user assets are transformed into centralized services, they can be managed, secured, backed up, and kept current from one place. Policy-driven access and delivery protect vital data and ensure compliance.

Empower

Mobile users need the freedom to choose the right device for each task and setting. Galvanize workforce productivity by delivering a consistent, intuitive, and collaborative computing experience across all devices - anytime, anywhere.

VMware Horizon Suite components:

VMware Horizon View

Simplify desktop management, security, and control while delivering an optimum end-user computing experience across most devices and networks.

VMware Horizon Mirage

Gain centralized, zero-touch physical and virtual desktop management with full native performance and flexibility for end users.

VMware Horizon Workspace

Streamline the end-user experience and reduce costs with a single workspace for applications and data, delivered securely on most devices.

Horizon Suites is licensed on a number of VMs basis. VMware Horizon Suites will come with 1-year, 3-year, and 5-year subscription options. As with all VMware software, support must be sold at the time of purchase with the license and subscription. IBM has a full suite of ServicePacs that can be purchased to support your needs.

Key prerequisites

Refer to the Technical information section.

Planned availability date

October 11, 2013

Product positioning

- VMware vSphere Essentials: Provides an all-in-one solution for small offices to consolidate and manage many application workloads while reducing hardware and operating costs with a low up-front investment.
- VMware vSphere Essentials Plus: Adds high application availability and data protection for a complete server consolidation and business continuity solution for the small office IT environment.
- VMware vSphere Standard: Offers basic consolidation of applications to slash hardware costs while accelerating application deployment.
- VMware vSphere Enterprise: Minimizes downtime, protects data, and automates resource management.
- VMware vSphere Enterprise Plus: Delivers the benefits of VMware vSphere and transforms your IT infrastructure into the next generation of flexible, reliable IT services.
• VMware Horizon Suite for user computing virtualization: Delivers a rich, personalized virtual user experience. Designed and built specifically for a mobile and collaborative workforce.
• VMware View for Desktop Virtualization: Delivers rich, personalized virtual desktops as a managed service from a virtualization platform built to deliver the entire desktop, not just applications.
• VMware vCloud Suite: Provides a complete integrated cloud infrastructure that simplifies the deployment and management of the cloud.
• vCenter Operations Management Suites: Delivers operational insight into virtual environments for monitoring, performance, and capacity management.
• vSphere Operations Management: Bundles vSphere with vCenter Operations Standard Edition to provide management capabilities to virtualized environments with attractive licensing.

**Offering Information**

Product information is available via the Offering Information website

http://www.ibm.com/common/ssi

**Publications**

No publications are shipped with these programs.

The Publications Centre is a worldwide central repository for IBM product publications and marketing material with a catalogue of 70,000 items. Extensive search facilities are provided. Payment options for orders are via credit card (in the US) or customer number for 20 countries. A large number of publications are available on-line in various file formats, and they can all be downloaded by all countries, free of charge.

**Security, auditability, and control**
The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

Software Services

IBM Software Services has the breadth, depth, and reach to manage your services needs. You can leverage the deep technical skills of our lab-based, software services team and the business consulting, project management, and infrastructure expertise of our IBM Global Services team. Also, we extend our IBM Software Services reach through IBM Business Partners to provide an extensive portfolio of capabilities. Together, we provide the global reach, intellectual capital, industry insight, and technology leadership to support a wide range of critical business needs.

Ordering information

New licensees

Program delivery
To order the programs described in this announcement, specify the type model number, order type description, one-time charge (OTC) feature number with quantity, and supply feature as indicated and listed in the tables below.

Except where noted, configuration aid ECMPWR must be used for creation of valid software and hardware orders for the offerings in this announcement as well as other referenced and affiliated announcement offerings.

Billing for the operating systems will occur under the licensed program order number contained in this announcement.

The licenses below are available for stand-alone purchase. To order these programs, specify the type model number, order type description, one-time charge (OTC) feature number with quantity, and supply feature number as indicated and listed in the tables below.

**Named User**

Named User is a unit of measure by which the program can be licensed. A Named User is a unique person who is given access to the program. The program may be installed on any number of computers or servers and each Named User may have simultaneous access to any number of instances of the program at one time. Licensee must obtain separate, dedicated entitlements for each Named User given access to the program in any manner directly or indirectly (for example: via a multiplexing program, device, or application server) through any means. An entitlement for a Named User is unique to that Named User and may not be shared, nor may it be reassigned other than for the permanent transfer of the Named User entitlement to another person.

**Concurrent User**

Concurrent User is a unit of measure by which the program can be licensed. A Concurrent User is a person who is accessing the program at any particular point in time. Regardless of whether the person is simultaneously accessing the program multiple times, the person counts only as a single Concurrent User. The program may be installed on any number of computers or servers, but Licensee must obtain entitlements for the maximum number of Concurrent Users simultaneously accessing the program. Licensee must obtain an entitlement for each simultaneous Concurrent User accessing the program in any manner directly or indirectly (for example: via a multiplexing program, device, or application server) through any means.

**Note:** Some programs may be licensed where devices are considered users. In that case the following applies: Any computing device that requests the execution of or receives for execution a set of commands, procedures, or applications from the program or that is otherwise managed by the program is considered a separate user of the program and requires an entitlement as if that device were a person.

**Virtual machine**

A virtual machine is a virtual computer created by allocating a portion of the resources available to a physical server. Licensee must obtain virtual machine entitlements for each virtual machine managed by the program.

**Terms and conditions**

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage® Agreement, and the IBM Agreement for Acquisition of Software Maintenance.
**Licensing**
Supplier's license terms apply.

**Limited warranty**
Not warranted by IBM. Warranty, if any, provided by supplier.

**Volume orders**
Not applicable.

**Educational allowance**
Yes. 15% to qualified educational institutions.

---

**Statement of good security practices**

IT system security involves protecting systems and information through prevention, detection, and response to improper access from within and outside your enterprise. Improper access can result in information being altered destroyed or misappropriated or can result in misuse of your systems to attack others. Without a comprehensive approach to security, no IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems and products are designed to be part of a comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products, or services to be most effective. IBM does not warrant that systems and products are immune from the malicious or illegal conduct of any party.

---

**Prices**

Prices are subject to change without notice.

GST, QST, and sales taxes, where applicable, are extra.

For current prices, contact IBM at 888-Shop-IBM (746-7426) or visit

http://www-03.ibm.com/systems/ca/en/x/
