At a glance

IBM® InfoSphere™ Information Server Workgroup Edition V8.5 and IBM InfoSphere Information Server for Data Warehousing V8.5 offer comprehensive data integration platforms designed to flexibly address specific client requirements while helping clients achieve new, enhanced levels of integration. IBM InfoSphere Information Server Workgroup Edition V8.5 helps:

- Deliver sophisticated data integration capabilities with a solution specifically geared to the needs of small deployments at a representative price point
- Enable clients who start with InfoSphere Information Server Workgroup Edition to scale up to a corresponding product offering within IBM InfoSphere Information Server V8.5 at any time

IBM InfoSphere Information Server for Data Warehousing V8.5 helps:

- Deliver faster time-to-value
- Promote line-of-business confidence in the warehouse data
- Lower total cost of ownership

For ordering, contact your IBM representative, an IBM Business Partner, or IBM Americas Call Centers at 800-IBM-CALL (Reference: YE001).

Overview

Business leaders are turning to robust, information-centric solutions such as data warehousing and business analytics to generate insight from their operations and uncover market opportunities. Many such initiatives often require understanding, consolidating, and migrating data spread across multiple heterogeneous sources and applications to drive a consistent view into their business. Investing in these information-centric solutions is critical, but the quality of insights that can be gained from these solutions can only be as good as the quality of data that resides within the data warehouse or within the business intelligence environment.

Organizations of all sizes require a sound, scalable data integration platform to tap into the power of their data and enable their strategic business initiatives. InfoSphere Information Server offers a world-class information integration and governance platform that helps clients understand, cleanse, transform, and deliver

more trustworthy data in a timely fashion to run their businesses and support their strategic business initiatives.

InfoSphere Information Server Workgroup Edition V8.5 and InfoSphere Information Server for Data Warehousing V8.5 offer data integration capabilities to help clients address their specific requirements in more flexible and innovative ways.

InfoSphere Information Server Workgroup Edition V8.5 is designed to help clients with more focused data integration requirements. These clients may include mid-market or general business customers, or even large organizations embarking on small information-centric departmental initiatives. InfoSphere Information Server Workgroup Edition V8.5 enables clients to flexibly purchase key data integration capabilities to address the needs of small information integration projects at a more representative price point and scale up to corresponding components within InfoSphere Information Server at any time as their needs evolve.

The following product components are available as part of InfoSphere Information Server Workgroup Edition V8.5 to help clients understand, transform, cleanse, and deliver information within their unique environments:

- IBM InfoSphere DataStage™ Workgroup Edition
- IBM InfoSphere QualityStage™ Workgroup Edition
- IBM InfoSphere DataStage and QualityStage Designer Workgroup Edition
- IBM InfoSphere Information Analyzer Workgroup Edition
- IBM InfoSphere Information Analyzer Workbench Workgroup Edition
- IBM InfoSphere Metadata Workbench Workgroup Edition
- IBM InfoSphere FastTrack Workgroup Edition
- IBM InfoSphere Discovery Workgroup Edition

InfoSphere Information Server for Data Warehousing V8.5 offers key data integration capabilities for organizations deploying IBM warehouse solutions such as IBM Smart Analytics System to help enable the success of their data warehouse implementations. These information integration capabilities help clients:

- Optimize return on investment and accelerate time-to-value on data warehouse projects
- Promote line-of-business confidence in warehouse data
- Lower total cost of ownership on an ongoing basis

InfoSphere Information Server for Data Warehousing V8.5 supports accelerated deployment and time-to-value via highly productive, user-friendly tools, automated source data analysis, exhaustive prebuilt connectivity, and ability to easily integrate best practices and reference architectures within the platform. It helps clients promote line-of-business confidence in warehouse data via comprehensive data cleansing and quality monitoring capabilities, an accurate understanding of business context associated with data, and a comprehensive understanding of end-to-end data lineage that enables better governance and trust in data. It helps lower the total cost of ownership and reduce ongoing development costs by enabling clients to build the warehouse right the first time by leveraging built-in best practices, data cleansing capabilities, and user-centric tooling that promotes line-of-business self-service.

InfoSphere Information Server for Data Warehousing V8.5 is currently packaged for the following data warehouse appliance:

- IBM InfoSphere Information Server for Smart Analytics System 7700

In addition, the optional add-on InfoSphere Information Server Data Quality Pack offers an array of capabilities to help clients understand and improve the quality of information, and monitor the quality of information over time. These capabilities work with the base InfoSphere Information Server for Data Warehousing offering and are similarly packaged for the following data warehouse appliance:

- IBM InfoSphere Information Server Data Quality Pack for Smart Analytics System 7700

InfoSphere DataStage Pack for Data Masking Linux® on System z® part numbers are now available as chargeable components to help clients purchase specific entitlements to Linux on System z for IBM InfoSphere DataStage Pack for Data Masking.

For detailed information on InfoSphere DataStage Pack for Data Masking, refer to Software Announcement [211-035](#), dated March 01, 2011.

Key prerequisites

For details, refer to the [Hardware requirements](#) and [Software requirements](#) sections.

Planned availability date

April 5, 2011: Electronic availability

April 8, 2011: Media availability

Education support

Available training offerings include client on-site training, public training at IBM facilities, and remote learning via FlexLearning. Through client on-site training, IBM delivers standard or customized training to meet the requirements of its clients.

IBM can also provide mobile academies for a rental fee to minimize clients' setup activities.

IBM public training simplifies the process by providing the complete environment for standard course deliveries and giving students the ability to learn without the distractions of everyday responsibilities. Public training is offered on a regular schedule worldwide. For more information on public instructor-led training, visit

<http://www.ibm.com/software/data/ips/services/learning.html>

The newly enhanced FlexLearning program enables clients to attend training on their own schedule at their own location. This program offers state-of-the-art technology to deliver highly valuable training at minimum cost. All current courses are approximately three hours in length and offer a valuable learn-by-doing, self-paced format.

For more information on any of the training offerings, contact

iiseduc@us.ibm.com

Offering Information

Product information is available via the Offering Information website

<http://www.ibm.com/common/ssi>

Also, visit the Passport Advantage® website

<http://www.ibm.com/software/passportadvantage>

Publications

Documentation provided with the product

Documentation for IBM InfoSphere Information Server Workgroup Edition and IBM InfoSphere Information Server for Data Warehousing is provided for each product module part of the acquired offering. No hardcopy publications are shipped with these offerings. However, Quick Start Guides are provided on [ibm.com](http://www.ibm.com)® at

<http://www.ibm.com/support/docview.wss?uid=swg27020975>

The Information Center

When you install the product module parts of the acquired offering, the documentation is installed in the IBM InfoSphere Information Server Information Center. The Information Center is also available at

<http://publib.boulder.ibm.com/infocenter/iisinfsv/v8r5/index.jsp>

The IBM Publications Center

In addition to the documentation provided with the product module parts of the acquired offering, you can also obtain publications from the IBM Publications Center at

<http://www.ibm.com/shop/publications/order>

The Publications Center is a worldwide central repository for IBM product publications and marketing material, with a catalog of 70,000 items. Extensive search facilities are provided. Printed publications can be ordered from the IBM Publications Center. Payment options for orders are via credit card (in the U.S.) or customer number for 20 countries. A large number of publications are available online in various file formats. Those with order numbers that begin with SC or GC can be downloaded by all countries free of charge, and those with order numbers

that begin with LC can be purchased by customers with an active product license for the related product.

For information regarding publication titles and publication numbers, refer to

- IBM InfoSphere Information Server, Software Announcement [210-177](#), dated October 12, 2010
- IBM InfoSphere Discovery, Software Announcement [210-413](#), dated December 07, 2010
- IBM InfoSphere DataStage Pack for Data Masking, Software Announcement [211-035](#), dated March 01, 2011

Technical information

Specified operating environment

Hardware requirements

InfoSphere Information Server Workgroup Edition V8.5 and InfoSphere Information Server for Data Warehousing V8.5

Refer to the information and system requirements website, listed below for each product module part of the acquired offering, for information regarding hardware requirements:

- InfoSphere Information Server V8.5
<http://www-01.ibm.com/common/ssi/cgi-bin/ssialias?subtype=ca&infotype=an&appname=iSource&supplier=897&letternum=ENUS210-177#h2-techinfo>

Note: The IBM InfoSphere Information Server for Data Warehousing programs may only load to certain hardware targets, which are specified in the Program license. Refer to the Program license, Program Unique Terms for details.

- InfoSphere Discovery
http://www-01.ibm.com/software/data/infosphere/discovery/requirements.html?S_CMP=rnav

InfoSphere DataStage Pack for Data Masking Linux on System z

For information regarding hardware requirements, refer to Software Announcement [211-035](#), dated March 01, 2011.

Software requirements

InfoSphere Information Server Workgroup Edition V8.5 and InfoSphere Information Server for Data Warehousing V8.5

Refer to the information and system requirements website, listed below for each product module part of the acquired offering, for information regarding software requirements:

- InfoSphere Information Server V8.5
<http://www-01.ibm.com/common/ssi/cgi-bin/ssialias?subtype=ca&infotype=an&appname=iSource&supplier=897&letternum=ENUS210-177#h2-techinfo>

Note: Refer to the Program license limited use program terms for details. The following programs have software requirements restrictions, which are specified in the Program license:

- IBM InfoSphere Information Server Data Quality Pack for Smart Analytics System 7700
- IBM InfoSphere DataStage and QualityStage Designer Workgroup Edition

- IBM InfoSphere Information Analyzer Workbench Workgroup Edition
- InfoSphere Discovery
http://www-01.ibm.com/software/data/infosphere/discovery/requirements.html?S_CMP=rnav

InfoSphere DataStage Pack for Data Masking Linux on System z

For information regarding software requirements, refer to Software Announcement [211-035](#), dated March 01, 2011.

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a readme file, or other information published by IBM, such as an announcement letter. Documentation and other program content may be supplied only in the English language.

Limitations

For additional information, refer to **Usage restrictions** in the [Terms and conditions](#) section, or to the License Information document that is available on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

Planning information

Installability

Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and technical support are provided by the Software Subscription and Support offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software, and technical support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support with each program license acquired. The initial period of Software Subscription and Support can be extended by the purchase of a renewal option, if available.

Security, auditability, and control

These products use the security and auditability features of the host hardware or software.

The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

Software Services

Services from IBM InfoSphere Professional Services complement the IBM Information Server platform. You can leverage the extensive technical skills and proven methodologies based on years of accumulated knowledge and experience, gained through hundreds of successful implementations. The IBM InfoSphere Professional Services team offers a wide range of services-related packages that are designed to help you achieve success in the design, implementation, and rollout of your information integration projects.

To learn more about IBM InfoSphere Professional Services or to contact a services representative, visit

<http://www-306.ibm.com/software/data/ips/services/professional.html>

We also extend our IBM Software Services reach through IBM Business Partners to provide an unmatched portfolio of capabilities. Together, we provide the global reach, intellectual capital, industry insight, and technology leadership to support any critical business need.

To locate an IBM Business Partner, visit

<http://www-304.ibm.com/partnerworld/gsd/homepage.do>

Ordering information

These products are only available via Passport Advantage. They are not available as shrinkwrap.

These products may only be sold directly by IBM or by authorized IBM Business Partners for Software ValueNet®.

For more information about IBM Software ValueNet, visit

http://www-01.ibm.com/software/lotus/passportadvantage/IBM_SW_ValueNet.html

To locate IBM Business Partners for a specific Software ValueNet portfolio, contact your IBM representative.

Charge metrics definitions

Authorized User

Authorized User is the unit of measure by which this program is licensed. An *Authorized User* is an individual (named or unnamed) within or outside of your enterprise. The program may be installed on one or more computers or servers and accessed by the number of users authorized by the Proof of Entitlement (PoE). You must have an entitlement for each Authorized User accessing the program or any program component in any manner directly or indirectly (for example, via a multiplexing program, device, or application server) through any means.

Concurrent User

Concurrent User is the unit of measure by which this program is licensed. A *Concurrent User* is a shared user access to the program within or outside of your enterprise. The program may be installed only on one computer or one server. The total number of Concurrent Users simultaneously accessing the program at any moment in time may not exceed the highest number of Concurrent Users authorized by the Proof of Entitlement (PoE). You must have an entitlement for each Concurrent User simultaneously accessing the program or any program component in any manner directly or indirectly (for example, via a multiplexing program, device, or application server) through any means.

Install

Install is a unit of measure by which the program can be licensed. An *Install* is an installed copy of the program on a physical or virtual disk made available to be executed on a computer. Licensee must obtain an entitlement for each Install of the program.

Processor Value Unit (PVU)

Processor Value Unit (PVU) is a unit of measure by which the program can be licensed. The number of PVU entitlements required is based on the processor technology (defined within the PVU Table by processor value, brand, type, and model number at) and the number of processors made available to the program.

http://www.ibm.com/software/lotus/passportadvantage/pvu_licensing_for_customers.html

IBM continues to define a processor, for the purpose of PVU-based licensing, to be each processor core on a chip. A dual-core processor chip, for example, has two processor cores.

Licensee can deploy the program using either Full Capacity licensing or Virtualization Capacity (Sub-Capacity) licensing according to the Passport Advantage Sub-Capacity Licensing Terms (see web page below). If using Full Capacity licensing, Licensee must obtain PVU entitlements sufficient to cover all activated processor cores¹ in the physical hardware environment made available to or managed by the program, except for those servers from which the program has been permanently removed. If using Virtualization Capacity licensing, Licensee must obtain entitlements sufficient to cover all activated processor cores made available to or managed by the program, as defined according to the Virtualization Capacity License Counting Rules at

http://www.ibm.com/software/lotus/passportadvantage/Counting_Software_licenses_using_specific_virtualization_technologies.html

¹ An Activated processor core is a processor core that is available for use in a physical or virtual server, regardless of whether the capacity of the processor core can be or is limited through virtualization technologies, operating system commands, BIOS settings, or similar restrictions.

Notes:

- Some programs may require licenses for the program and what is being managed. In that case, the following applies: In addition to the entitlements required for the program directly, Licensee must obtain PVU entitlements for this program sufficient to cover the processor cores managed by the program.
- Some programs may be licensed on a managed basis only. In that case, the following applies: Instead of the entitlements required for the program directly, Licensee must obtain PVU entitlements for this program sufficient to cover the processor cores managed by the program.
- A few programs on an exception basis may be licensed on a referenced basis. In that case, the following applies: Rather than obtaining entitlements for the activated processor cores available to the program, Licensee must obtain PVU entitlements for this program sufficient to cover the environment made available to the referenced program as if the program itself were executing everywhere the referenced program was executing, independent of the basis on which the referenced program is licensed.
- Express and Workgroup programs may be licensed with maximum use terms. In that case, the following applies: The maximum authorized use terms and conditions for PVU licensed IBM Express and Middleware Programs can be found in the IBM Express and Middleware Licensing Guide.

Cross-platform products

Cross-platform product for use on System z

Order the part numbers that follow when the product is used for either the development of code that will be deployed on System z servers or when the product will be communicating or transferring data between a distributed server and a System z server. Otherwise, order from the other set of part numbers in this announcement. This set of part numbers provides the identical supply and authorization as the other set in this announcement.

Cross-platform product for use on System z IFL engines

Order the part numbers that follow when the product is intended to run on the Linux operating system on System z IFL engines. If the product is not intended to run on the Linux operating system on System z IFL engines, order from the other set of part numbers in this announcement. This set of part numbers provides the identical supply and authorization as the other set in this announcement.

Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

Licensing

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use.

Part number products only, offered outside of Passport Advantage, where applicable, are license only and do not include Software Maintenance.

This software license includes Software Subscription and Support (also referred to as Software Maintenance).

The program's License Information will be available for review on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

Limited warranty applies

Yes

Limited warranty

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional charge. For further information, consult the IBM Software Support Handbook found at

<http://www.ibm.com/support/handbook>

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

Program technical support

Technical support of a program product version or release will be available for a minimum of five years from the general availability date, as long as your Software Maintenance is in effect. This technical support allows you to obtain assistance (via telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Maintenance also provides you with access to updates (modifications or fixes), releases, and versions of the program. You will be notified, via announcement letter, of discontinuance of support with 12 months' notice. If you require additional technical support from IBM, including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

Money-back guarantee

For clarification, note that if for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

- For clarification, note that for programs acquired under the IBM International Passport Advantage Agreement, this term applies only to your first acquisition of the program.

Volume orders (IVO)

No

Passport Advantage applies

Yes, and through the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

These products are only available via Passport Advantage. They are not available as shrinkwrap.

These products may only be sold directly by IBM or by authorized IBM Business Partners for Software ValueNet.

For more information about IBM Software ValueNet, visit

http://www-01.ibm.com/software/lotus/passportadvantage/IBM_SW_ValueNet.html

To locate IBM Business Partners for a specific Software ValueNet portfolio, contact your IBM representative.

Software Subscription and Support

Yes. Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and technical support are provided by the Software Subscription and Support offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software and Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support with each program license acquired. The initial period of Software Subscription and Support can be extended by the purchase of a renewal option, if available.

While your Software Subscription and Support is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions,

and code-related questions. IBM provides assistance via telephone and, if available, electronic access, to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, consult your IBM Software Support Handbook at

<http://www.ibm.com/support/handbook>

Software Subscription and Support does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.

For additional information about the International Passport Advantage Agreement and the IBM International Passport Advantage Express Agreement, visit the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

System i Software Maintenance applies

No

Educational allowance available

Not applicable.

IBM Electronic Services

IBM has transformed its delivery of hardware and software support services to help you achieve higher system availability. Electronic Services is a Web-enabled solution that offers an exclusive, no-additional-charge enhancement to the service and support available for IBM servers. These services are designed to provide the opportunity for greater system availability with faster problem resolution and preemptive monitoring. Electronic Services comprises two separate, but complementary, elements: Electronic Services news page and Electronic Services Agent.

The Electronic Services news page is a single Internet entry point that replaces the multiple entry points traditionally used to access IBM Internet services and support. The news page enables you to gain easier access to IBM resources for assistance in resolving technical problems.

The Electronic Service Agent™ is no-additional-charge software that resides on your server. It monitors events and transmits system inventory information to IBM on a periodic, client-defined timetable. The Electronic Service Agent automatically reports hardware problems to IBM. Early knowledge about potential problems enables IBM to deliver proactive service that may result in higher system availability and performance. In addition, information collected through the Service Agent is made available to IBM service support representatives when they help answer your questions or diagnose problems. Installation and use of IBM Electronic Service Agent for problem reporting enables IBM to provide better support and service for your IBM server.

Prices

For additional information and current prices, contact your local IBM representative.

Passport Advantage

For Passport Advantage information and charges, contact your IBM representative, authorized IBM Business Partner, or authorized IBM Business Partner for Software ValueNet, if applicable. Additional information is also available at

<http://www.ibm.com/software/passportadvantage>

Business Partner information

If you are an IBM Business Partner -- Distributor for Workstation Software acquiring products from IBM, you may link to Passport Advantage Online for resellers where you can obtain Business Partner pricing information. An IBM ID and password are required.
