At a glance

EntropySoft Content Hub V5.2 for IBM® Enterprise Content Management is a third-party product from EntropySoft that provides content integration and synchronization to popular content repositories.

Overview

It is common for organizations to have more than one content management system in place. With EntropySoft Content Hub V5.2 for IBM Enterprise Content Management, you can synchronize or migrate content into a master content repository.

EntropySoft Content Hub V5.2 for IBM Enterprise Content Management:

- Connects applications to content repositories providing information exchange
- Supports over 40 connectors to the most popular content repositories enabling IBM Enterprise Content Manager customers to synchronize, cross index, migrate, or access content stored in multiple repositories
- Delivers robust support for accessing and synchronizing unstructured data between an IBM Enterprise Content Manager master content repository and other content repositories such as Microsoft™ SharePoint

Key prerequisites

Refer to the [Hardware requirements](#) and [Software requirements](#) sections.

Planned availability date

July 24, 2012: Electronic availability

July 24, 2012: Media availability

Description

EntropySoft Content Hub V5.2 for IBM Enterprise Content Management, built on more than 40 content connectors, is a central point of access to all company documents whether they are onsite or in the cloud. These content connectors include many of the IBM Enterprise Content Management (ECM) solutions as well as Alfresco, Box.net, EMC Documentum, ENOVIA MatrixOne, File Systems NTLM, FTP connector, HP Trim Context, Interwoven TeamSite, Iron Mountain Digital Safe, JCR, IBM Connections, IBM Lotus® QuickPlace® , and IBM Lotus Quickr® , Microsoft Exchange, Microsoft SharePoint, Open Text Vignette, Oracle Stellent Universal CM, SAP KM, Symantec Enterprise Vault, WebDAV server, and Xerox DocuShare.

Automation Content Hub provides process automation, which allows you to synchronize, cross index, migrate, or just access content between multiple repositories whether they are onsite or in the cloud.

EntropySoft Content Hub Enterprise for IBM FileNet® Content Manager:

- Can be deployed in application servers such as IBM WebSphere or Oracle WebLogic Server. In a matter of hours, you can be ready to synchronize silos, integrate SharePoint with current ECM or legacy ECM applications, as well as leverage the newer cloud-based environments.
- Four primary components:
 - EntropySoft Content Hub V5.2 for IBM Enterprise Content Management allows users and administrators to configure the process automation to synchronize, cross index, migrate, or just search and access content between multiple repositories.
 - EntropySoft Content Hub Webtop Enterprise for IBM Content Manager allows users and administrators to search, access, and update content from any connected repository via a central user interface.
 - EntropySoft Content Hub SharePoint Web parts for IBM Content Manager allows users and administrators to search access and update content from any connected repository via a central user interface running as a SharePoint Web parts.
 - EntropySoft Content Hub ETL Studio is a designer studio based on Eclipse and is simple to use as well as powerful with a vast set of features designed to extract, transfer, and load documents. You can design, debug, and manage a variety of jobs with a palette of more than 100 predefined tasks.

EntropySoft Content Hub V5.2 for IBM Enterprise Content Management provides the connectors for any of the supported repositories. These connectors are sold as a single unit or in packs of 5, 10, 20, or complete sets. You will need at least two connectors but can combine packs to match the number of systems you wish to connect.

Product positioning

EntropySoft Content Hub V5.2 for IBM Enterprise Content Management extends the capabilities found in IBM Content Integrator. Its primary purpose is to help connect multiple content repositories particularly Microsoft SharePoint in order to synchronize content with a IBM master content repository.

Publications

No publications are shipped with this product.

The IBM Publications Center

<http://www.ibm.com/shop/publications/order>

The Publications Center is a worldwide central repository for IBM product publications and marketing material with a catalog of 70,000 items. Extensive search facilities are provided. Payment options for orders are via credit card (in the U.S.) or customer number for 20 countries. A large number of publications are available online in various file formats, and they can all be downloaded by all countries.

Technical information

Specified operating environment

Hardware requirements

For a detailed description of hardware requirements, refer to the product information center at

<http://www.entropysoft.net/cms/op/preview/home/products>

Software requirements

For a detailed description of software requirements, refer to the product information center at

<http://www.entropysoft.net/cms/op/preview/home/products>

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a readme file, or other information published by IBM , such as an announcement letter. Documentation and other program content may be supplied only in the English language.

Planning information

Customer responsibilities

This product is not supported by IBM . All software license terms and technical support is provided by EntropySoft. This is a third-party reseller offering and only supplier's support terms apply. For more information, refer to the EntropySoft website at

<http://www.entropysoft.net>

Packaging

For a detailed description of packaging, refer to the product information center at

<http://www.entropysoft.net/cms/op/preview/home/products>

Security, auditability, and control

EntropySoft Content Hub for IBM Content Manager uses the security and auditability features of the host software.

The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

Ordering information

This product is only available via Passport Advantage . It is not available as shrinkwrap.

These products may only be sold directly by IBM or by authorized IBM Business Partners for Software Value Plus.

Charge metrics definitions

Authorized User

Authorized User is a unit of measure by which the program can be licensed. An Authorized User is a unique person who is given access to the program. The program may be installed on any number of computers or servers and each Authorized User may have simultaneous access to any number of instances of the program at one time. Licensee must obtain separate, dedicated entitlements for each Authorized User accessing the program in any manner directly or indirectly (for example, via a multiplexing program, device, or application server) through any means. An entitlement for an Authorized User is unique to that Authorized User and may not be shared, nor may it be reassigned other than for the permanent transfer of the Authorized User entitlement to another person.

Note: Some programs may be licensed where devices are considered users. In that case, the following applies. Any computing device that requests the execution of or receives for execution a set of commands, procedures, or applications from the program or that is otherwise managed by the program is considered a separate user of the program and requires an entitlement as if that device were a person.

Server

Server is the unit of measure by which this program is licensed. A server is a computer system that executes requested procedures, commands, or applications to one or more user or client devices. A Proof of Entitlement (PoE) must be obtained for each server regardless of the number of processor cores or partitions in the server on which the program runs or each server managed by the program. Where blade technology is employed, each blade is considered a separate server.

No. Special education prices are available through Passport Advantage .

Statement of good security practices

IT system security involves protecting systems and information through prevention, detection, and response to improper access from within and outside your enterprise. Improper access can result in information being altered destroyed or misappropriated or can result in misuse of your systems to attack others. Without a comprehensive approach to security, no IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems and products are designed to be part of a comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products, or services to be most effective. IBM does not warrant that systems and products are immune from the malicious or illegal conduct of any party.
