At a glance

Updates to IBM® Security QRadar products provide a security intelligence platform that enhances data management, visualization, and role-based access control for improved threat detection and compliance. It provides actionable, real-time intelligence into security and compliance risks across the enterprise using advanced capabilities such as:

- Real-time correlation of event, flow, vulnerability, and threat data
- Anomaly detection and network behavioral analysis
- Network flow analysis for deep visibility and insight
- Report templates and dashboards
- Security configuration monitoring

New capabilities:

- Reference Set API and management
- Enhanced interactive graphing
- Security profile enhancements

Overview

IBM Security QRadar products provide a security intelligence platform that integrates disparate functions including SIEM, Log Management, Configuration Monitoring, and Network Behavior Analytics into a comprehensive security intelligence solution. Its one-console approach helps you:

- Detect advanced threats
- Address regulatory compliance mandates
- Detect insider threats and fraud
- Predict risks against the business
- Consolidate data silos

The IBM Security QRadar family of products includes:

- IBM Security QRadar SIEM V7.1
- IBM Security QRadar Log Manager V7.1
- IBM Security QRadar Risk Manager V7.1
- IBM Security QRadar Network Anomaly Detection V7.1

Updates to IBM Security QRadar SIEM, IBM Security QRadar Log Manager, and IBM Security QRadar Network Anomaly Detection provide new capabilities in data management, visualization, and role-based access control. They include:

- *Reference Set API and management* - New GUI-based functions allow the user to add, view, delete, and set properties for individual entries in a reference set. This helps enhance the usability and management of reference sets to improve custom rule correlation.
- *Enhanced interactive graphing* - Visualization capabilities are enhanced with new activity graphing and charting using an improved graphing engine. Graphs are now more interactive than in previous versions, and include the ability to instantly hide data in charts.
- *Security profile enhancements* - A new access control mechanism defines security profiles for users' data access by network and log source. This helps improve the product's security, manageability, and performance.

Updates to IBM Security QRadar Risk Manager help provide expanded support for multicontext security devices and additional networking technologies, enabling more comprehensive assessment and monitoring of large corporate networks.

Key prerequisites

For details, refer to the [Hardware requirements](#) and [Software requirements](#) sections.

Planned availability date

January 11, 2013: For electronic and appliance availability

January 18, 2013: For media availability

Description

The IBM Security QRadar family provides actionable, real-time intelligence for security and compliance risks across the enterprise using advanced capabilities such as:

- *Real-time correlation of event, network flow, threat, vulnerability, and identity data* - Ability to correlate an extensive set of data, including security device events, operating system and application logs, network flow data, system and application vulnerabilities, user identity and activity data, and threat intelligence to help identify and prioritize threats and compliance risks.
- *Anomaly detection and network behavioral analysis* - Ability to analyze network flows and event and log data (including user activity) in real-time, monitoring for and alerting on observed activity that falls outside of normal behavior. They determine baseline levels of activity and then trigger alerts as appropriate, helping to detect advanced threats.
- *Network flow analysis for deep visibility and insight* - Provides network flow analysis of NetFlow and other data, including QFlow data collected by QRadar QFlow and VFlow Collectors. QFlow data includes Layer 7 application content captured via deep packet inspection, for detection and forensic purposes. This provides a more complete and accurate view of threats.

- *Report templates and dashboards* - Offers more than 1,000 report templates and dashboards, for a variety of security and operational needs, plus the ability to easily create custom reports or modify existing templates.
- *Comprehensive device and resource integrations* - Includes integration support for hundreds of data sources, including security devices, operating system, mainframe, enterprise database, database activity monitoring, file integrity and activity monitoring, data loss prevention, commercial and proprietary applications, identity and access management, directory, network flow, network management, network infrastructure, network vulnerability, application vulnerability, and others products.
- *Device configuration monitoring* - Provides automated collection, monitoring, and audit of configuration of switches, routers, firewalls, and intrusion detection system (IDS) and intrusion prevention system (IPS). It assesses when a configuration allows traffic that is out of policy by a regulation, corporate mandate, or industry best practice, thus helping to reduce the risk of vulnerabilities that lead to breaches.

The IBM Security QRadar family includes powerful *new* advances in data management, visualization, and role-based access control:

- *Reference set API and management* - New GUI-based functions allow the user to add, view, delete, and set properties for individual entries in a reference set. This enhances the usability and management of reference sets to improve custom rule correlation.
- *Enhanced interactive graphing* - Visualization capabilities are enhanced with new activity graphing and charting using an improved graphing engine. Graphs are now much more interactive, including the ability to instantly hide data in charts.
- *Security profile enhancements* - A new access control mechanism defines security profiles for users' data access by network and log source. This improves the product's security, manageability, and performance.

Accessibility by people with disabilities

A US Section 508 Voluntary Product Accessibility Template (VPAT) containing details on accessibility compliance can be requested at

http://www.ibm.com/able/product_accessibility/index.html

Product positioning

IBM Security QRadar products help provide a security intelligence platform that uses intelligence, integration, and automation to provide 360-degree security insight across the entire network. Using advanced security analytics including real-time correlation and behavioral anomaly detection, IBM Security QRadar helps detect and prioritize threats and compliance risks that might otherwise be missed.

The IBM Security QRadar family of products can help businesses and government agencies reduce the risk of data loss and reputational damage, achieve faster time-to-value, reduce total cost of ownership, and gain unified network visibility.

Program number

Following are the IBM Security QRadar V7.1 PIDs:

| PID number | Program name |
|------------|--|
| 5725-I50 | IBM Security QRadar Core Appliance XX05 |
| 5725-I51 | IBM Security QRadar Core Appliance XX24 |

Education support

IBM training provides education to support many IBM offerings. Descriptions of courses for IT professionals and managers are on the IBM training website

<http://www.ibm.com/services/learning/>

Call IBM training at 800-IBM-TEACH (426-8322) for catalogs, schedules, and enrollments.

Offering Information

Product information is available via the Offering Information website

<http://www.ibm.com/common/ssi>

Also, visit the Passport Advantage® website

<http://www.ibm.com/software/passportadvantage>

Publications

The IBM Security QRadar publications, in PDF format, can be downloaded at electronic availability from the following website

<http://www-01.ibm.com/software/howtobuy/passportadvantage/>

Technical information

Specified operating environment

Hardware requirements

IBM Security QRadar appliances ship on the following hardware configurations:

- IBM Security QRadar Core Appliances 4378 (X3550) M3
- IBM Security QRadar Core Appliances 4379 (X3630) M3

The following software and virtual software offerings require an equivalent of one of the above hardware configurations:

- 5725-I76 IBM Security QRadar SIEM All-in-One Software 21XX
- 5725-I77 IBM Security QRadar SIEM All-in-One Software 31XX
- 5725-I78 IBM Security QRadar SIEM Console Software 31XX
- 5725-I79 IBM Security QRadar SIEM Event Processor Software 16XX
- 5725-I80 IBM Security QRadar SIEM Flow Processor Software 17XX
- 5725-I81 IBM Security QRadar SIEM Event/Flow Processor Software 18XX
- 5725-I82 IBM Security QRadar QFlow Collector Software 12XX
- 5725-I93 IBM Security QRadar Software Tradeup Options
- 5725-I83 IBM Security QRadar SIEM All-in-One Virtual 3190
- 5725-I84 IBM Security QRadar SIEM Console Virtual 3190
- 5725-I85 IBM Security QRadar SIEM Event Processor Virtual 1690
- 5725-I86 IBM Security QRadar SIEM Flow Processor Virtual 1790
- 5725-I87 IBM Security QRadar Log Manager All-in-One Virtual 3190
- 5725-I88 IBM Security QRadar Log Manager Console Virtual 3190
- 5725-I90 IBM Security QRadar Event Virtual Capacity Pack Increase
- 5725-J93 IBM Security QRadar Log Manager Event Processor Virtual 3190
- 5725-J95 IBM Security QRadar Event Collector Virtual 1590

Software requirements

IBM Security QRadar appliances ship with Red Hat Enterprise Linux™ 6.3 preinstalled.

The following are software only offerings and require that Red Hat Enterprise Linux 6.3 be provided by the client and installed as a prerequisite.

- 5725-I76 IBM Security QRadar SIEM All-in-One Software 21XX
- 5725-I77 IBM Security QRadar SIEM All-in-One Software 31XX
- 5725-I78 IBM Security QRadar SIEM Console Software 31XX
- 5725-I79 IBM Security QRadar SIEM Event Processor Software 16XX
- 5725-I80 IBM Security QRadar SIEM Flow Processor Software 17XX
- 5725-I81 IBM Security QRadar SIEM Event/Flow Processor Software 18XX
- 5725-I82 IBM Security QRadar QFlow Collector Software 12XX

- 5725-I93 IBM Security QRadar Software Tradeup Options

The following are virtual software offerings and require that VMware ESXi 4.1 be provided by the client and installed as a prerequisite. You must have a VMware client installed on your desktop. VMware Server applications are bundled with client software. For example, ESXi 4.1 is bundled with VMware vSphere client 4.1.

- 5725-I83 IBM Security QRadar SIEM All-in-One Virtual 3190
- 5725-I84 IBM Security QRadar SIEM Console Virtual 3190
- 5725-I85 IBM Security QRadar SIEM Event Processor Virtual 1690
- 5725-I86 IBM Security QRadar SIEM Flow Processor Virtual 1790
- 5725-I87 IBM Security QRadar Log Manager All-in-One Virtual 3190
- 5725-I88 IBM Security QRadar Log Manager Console Virtual 3190
- 5725-I90 IBM Security QRadar Event Virtual Capacity Pack Increase
- 5725-J93 IBM Security QRadar Log Manager Event Processor Virtual 3190
- 5725-J95 IBM Security QRadar Event Collector Virtual 1590

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a readme file, or other information published by IBM, such as an announcement letter. Documentation and other program content may be supplied only in the English language.

IBM Electronic Support

The IBM Support Portal is your gateway to technical support. This includes IBM Electronic Support tools and resources, for software and hardware, to help save time and simplify support. The Electronic Support tools can help you find answers to questions, download fixes, troubleshoot, automate data collection, submit and track problems through the Service Request online tool, and build skills. All these tools are made available through your IBM support agreement, at no additional charge.

Planning information

Installability

Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express®. Product upgrades and technical support are provided by the Software Subscription and Support (Software Maintenance) offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software, and technical support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with each program license acquired. The initial period of Software Subscription and Support (Software Maintenance) can be extended by the purchase of a renewal option, if available.

Packaging

IBM Security QRadar V7.1 is distributed with:

- International Program License Agreement (Z125-3301)
- License Information document
- DVDs
- Publications (refer to the Publications section)

This program, when downloaded from a website, contains the applicable IBM license agreement and License Information, if appropriate, and will be presented for acceptance at the time of installation of the program. For future reference, the license and License Information will be stored in a directory such as LICENSE.TXT.

Security, auditability, and control

IBM Security QRadar uses the security and auditability features of the Red Hat operating system software. The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

Software Services

IBM Software Services has the breadth, depth, and reach to manage your services needs. You can leverage the deep technical skills of our lab-based, software services team and the business consulting, project management, and infrastructure expertise of our IBM Global Services team. Also, we extend our IBM Software Services reach through IBM Business Partners to provide an extensive portfolio of capabilities. Together, we provide the global reach, intellectual capital, industry insight, and technology leadership to support a wide range of critical business needs.

Install

Install is a unit of measure by which the program can be licensed. An install is an installed copy of the program on a physical or virtual disk made available to be executed on a computer. Licensee must obtain an entitlement for each install of the program.

Appliance install

Appliance install is a unit of measure by which the program can be licensed. An appliance install is an installed copy of the program that is included on a single unit of supporting hardware. Licensee must obtain an entitlement for each appliance install of the program.

Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

Reference to products in this announcement does not necessarily imply those products are available, or intend to be available, in your country.

This product is only available via Passport Advantage . It is not available as shrinkwrap.

Licensing

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use. Part number products only, offered outside of Passport Advantage , where applicable, are license only and do not include Software Maintenance.

This software license includes Software Subscription and Support (also referred to as Software Maintenance).

These programs are licensed under the IBM Program License Agreement (IPLA) and the associated Agreement for Acquisition of Software Maintenance, which provide for support with ongoing access to releases and versions of the program. IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with the initial license acquisition of each program acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available. These programs have a one-time license charge for use of the program and an annual renewable charge for the enhanced support that includes telephone assistance (voice support for defects during normal business hours), as well as access to updates, releases, and versions of the program as long as support is in effect.

License Information form number

L-CCHN-8ZMQCW

The program's License Information will be available for review on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

Limited warranty applies

Yes

Limited warranty

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional charge. For further information, consult the *IBM Software Support Handbook* found at

<http://www.ibm.com/support/handbook>

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

Program technical support

Technical support of a program product version or release will be available for a minimum of five years from the general availability date, as long as your Software Subscription and Support (also referred to as Software Maintenance) is in effect. This technical support allows you to obtain assistance (via telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Subscription and Support (Software Maintenance) also provides you with access to updates (modifications or fixes), releases, and versions of the program. You will be notified, via announcement letter, of discontinuance of support with 12 months' notice. If you require additional technical support from IBM, including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

Money-back guarantee

If for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

For clarification, note that (1) for programs acquired under the IBM International Passport Advantage offering, this term applies only to your first acquisition of the program and (2) for programs acquired under any of IBM's On/Off Capacity on Demand (On/Off CoD) software offerings, this term does not apply since these offerings apply to programs already acquired and in use by you.

Volume orders (IVO)

No

IBM International Passport Advantage Agreement

Passport Advantage applies

Yes, and through the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

Software Subscription and Support applies

Yes. Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express . Product upgrades and Technical Support are provided by the Software Subscription and Support offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software and Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support with each program license acquired. The initial period of Software Subscription and Support can be extended by the purchase of a renewal option, if available.

While your Software Subscription and Support is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance via telephone and, if available, electronic access, only to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, consult your *IBM Software Support Handbook* at

<http://www.ibm.com/support/handbook>

Software Subscription and Support does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.

No

Variable charges apply

No

Educational allowance available

Not applicable.

Statement of good security practices

IT system security involves protecting systems and information through prevention, detection, and response to improper access from within and outside your enterprise. Improper access can result in information being altered destroyed or misappropriated or can result in misuse of your systems to attack others. Without a comprehensive approach to security, no IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems and products are designed to be part of a comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products, or services to be most effective. IBM does not warrant that systems and products are immune from the malicious or illegal conduct of any party.

Electronic Service Agent™ and the IBM Electronic Support web portal are dedicated to providing fast, exceptional support to IBM Systems customers. The IBM Electronic Service Agent tool is a no-additional-charge tool that proactively monitors and reports hardware events, such as system errors, performance issues, and inventory. The Electronic Service Agent tool can help you stay focused on your company's strategic business initiatives, save time, and spend less effort managing day-to-day IT maintenance issues. Servers enabled with this tool can be monitored remotely around the clock by IBM Support all at no additional cost to you.

Now integrated into the base operating system of AIX® 5.3, AIX 6.1, and AIX 7.1, Electronic Service Agent is designed to automatically and electronically report system failures and utilization issues to IBM, which can result in faster problem resolution and increased availability. System configuration and inventory information collected by the Electronic Service Agent tool also can be viewed on the secure Electronic Support web portal, and used to improve problem determination and resolution by you and the IBM support team. To access the tool main menu, simply type "smitty esa_main", and select "Configure Electronic Service Agent." In addition, ESA now includes a powerful web user interface, giving the administrator easy access to status, tool settings, problem information, and filters. For more information and documentation on how to configure and use Electronic Service Agent, refer to

<http://www.ibm.com/support/electronic>

The IBM Electronic Support portal is a single Internet entry point that replaces the multiple entry points traditionally used to access IBM Internet services and support. This portal enables you to gain easier access to IBM resources for assistance in resolving technical problems. The My Systems and Premium Search functions make it even easier for Electronic Service Agent tool-enabled customers to track system inventory and find pertinent fixes.

Benefits

Increased uptime: The Electronic Service Agent tool is designed to enhance the Warranty or Maintenance Agreement by providing faster hardware error reporting and uploading system information to IBM Support. This can translate to less wasted time monitoring the "symptoms," diagnosing the error, and manually calling IBM Support to open a problem record. Its 24 x 7 monitoring and reporting mean no more dependence on human intervention or off-hours customer personnel when errors are encountered in the middle of the night.

Security: The Electronic Service Agent tool is designed to be secure in monitoring, reporting, and storing the data at IBM. The Electronic Service Agent tool securely transmits either via the Internet (HTTPS or VPN) or modem, and can be configured to communicate securely through gateways to provide customers a single point of exit from their site. Communication is one way. Activating Electronic Service Agent does not enable IBM to call into a customer's system. System inventory information is stored in a secure database, which is protected behind IBM firewalls. It is viewable only by the customer and IBM. The customer's business applications or business data is never transmitted to IBM.

More accurate reporting: Since system information and error logs are automatically uploaded to the IBM Support center in conjunction with the service request, customers are not required to find and send system information, decreasing the risk of misreported or misdiagnosed errors. Once inside IBM, problem error data is run through a data knowledge management system and knowledge articles are appended to the problem record.

Customized support: Using the IBM ID entered during activation, customers can view system and support information in the "My Systems" and "Premium Search" sections of the Electronic Support website at

<http://www.ibm.com/support/electronic>

My Systems provides valuable reports of installed hardware and software using information collected from the systems by Electronic Service Agent . Reports are available for any system associated with the customer's IBM ID. Premium Search combines the function of search and the value of Electronic Service Agent information, providing advanced search of the technical support knowledgebase. Using Premium Search and the Electronic Service Agent information that has been collected from your system, customers are able to see search results that apply specifically to their systems.

IBM Global Financing

IBM Global Financing offers competitive financing to credit-qualified customers to assist them in acquiring IT solutions. Offerings include financing for IT acquisition, including hardware, software, and services, from both IBM and other manufacturers or vendors. Offerings (for all customer segments: small, medium, and large enterprise), rates, terms, and availability can vary by country. Contact your local IBM Global Financing organization or visit

<http://www.ibm.com/financing>

IBM Global Financing offerings are provided through IBM Credit LLC in the United States, and other IBM subsidiaries and divisions worldwide to qualified commercial and government customers. Rates are based on a customer's credit rating, financing terms, offering type, equipment type, and options, and may vary by country. Other

restrictions may apply. Rates and offerings are subject to change, extension, or withdrawal without notice.

Financing from IBM Global Financing helps you preserve cash and credit lines, enables more technology acquisition within current budget limits, permits accelerated implementation of economically attractive new technologies, offers payment and term flexibility, and can help match project costs to projected benefits. Financing is available worldwide for credit-qualified customers.

For more financing information, visit
