## At a glance

---

IBM<sup>(R)</sup> Resiliency Orchestration can simplify disaster recovery (DR) automation with real-time DR readiness validation and increase situational awareness that can reduce test times and RTO, resulting in a more cost-effective DR experience that is smarter, more tailored, and more agile than ever before.

IBM Resiliency Orchestration offers a single dashboard which combines automation and analytics to help keep daily business operations running and to proactively avoid disruptions that lead to lost revenue, brand damage, and dissatisfied customers.

When purchasing IBM Resiliency Orchestration, clients can take advantage of Implementation Services, designed to enable disaster recovery monitoring, reporting, testing, and workflow automation capabilities of complex hybrid cloud environments in a scalable solution built on industry standards.

---

## Overview

---

IBM Resiliency Orchestration aligns disaster recovery (DR) infrastructure with recovery time and recovery point objectives for faster, more cost-effective disaster recovery. It provides disaster recovery monitoring, reporting, testing, and workflow automation of complex hybrid environments in a scalable, easier-to-use solution built on industry standards.

This offering combines automation and analytics along with DR response communications capabilities to keep daily business operations running and proactively avoid disruptions that lead to lost revenue, brand damage, and dissatisfied customers. The Implementation Services combine technical expertise with state-of-the-art software, into a scalable, easy-to-use solution built on industry standards.
