At a glance

IBM® Lotus Notes® and Domino® 8.5 provides greater scalability and functionality, ease of administration, and additional application capabilities.

Some of the key features and improvements of IBM Lotus Notes and Domino 8.5 include:

- Identity management features such as Shared Logon and ID Vault
- Storage reduction that is required for file attachments through Domino Attachment and Object Service (DAOS)
- XPages and Eclipse-based Domino Designer features
- Calendar federation and flexibility
- Nokia S60 device platform support for IBM Lotus Notes Traveler

Overview

IBM Lotus Notes and Domino 8.5 provides greater messaging and application scalability and functionality coupled with ease of administration. The new features in IBM Lotus Notes and Domino 8.5 further reduce the total cost of ownership by leveraging existing investments in Notes® and Domino and its applications.

New features

Simplified identity management through Shared Logon and ID Vault. Shared Logon provides a secure way of accessing Notes and Domino applications while maintaining only a single password. The new ID Vault feature allows administrators to securely automate tasks such as recovering lost IDs and password resets, allowing administrators to focus on other important tasks.

Reduce storage costs using the new Domino Attachment and Object Service (DAOS). DAOS reduces redundant storage of attachments and I/O use, resulting in significantly reduced storage costs, backup efforts, and optimized workflow operations.

Improved quality of service features, such as Domino Configuration Tuner and dynamic group, policies provide administrators the ability to detect misconfigurations before problems arise and maintain consistent policies as members of organizations change.

Create better looking Web 2.0 applications. The Eclipse based Domino Designer provides a flexible and integrated framework for application development. The new XPages design element feature provides application developers an efficient way to easily update information across multiple applications, saving time and money.

Calendar federation and flexibility allows end users the ability to incorporate public calendars (such as Google calendars) and view their complete schedule.

Expanded platform support provides additional options for users who want the flexibility to choose the operating system and hardware that fits their needs in terms of factors such as cost, organizational expertise, physical size, scalability, and energy consumption.

Lotus Enterprise Integrator® adds support for MySQL database, enhanced control for replication activities, and 64-bit editions for AIX® which improves the efficiency of data transfer between systems.

IBM Lotus Notes and Domino 8.5 provides administrators, designers, and end users with the secure framework and infrastructure they've come to depend on while reducing the cost of ownership and increasing the tools and flexibility available to them. Lotus Notes and Domino 8.5 continues to offer integrated features such as Lotus® Sametime® instant messaging and office productivity tools via Lotus Symphony, providing a complete set of readily available solutions for businesses.

New in IBM Lotus Notes Traveler 8.5 are security-rich features such as encrypted mail support, and remote security management (including multi-level wipe, local device lock, and policy compliance monitoring). This release also includes improved text formatting support with the ability to view rich text e-mail on Microsoft® Windows® Mobile 6 devices.

IBM Lotus Notes Traveler adds client support for the Nokia S60 platform (third edition, or later) that builds on the existing Microsoft Windows Mobile support.

Lotus Notes Traveler continues to provide real-time wireless delivery of the following Lotus Domino data with no additional server or third-party solution required:

- E-mail (including attachments and folder support)
- Calendar
- Address book
- Journal
- To do lists
- Folder support
- Lotus Notes-style addressing

Key prerequisites

Refer to the [Hardware requirements](#) and [Software requirements](#) sections.

Planned availability dates

Electronic software delivery:

- January 6, 2009 : English
- January 15, 2009: Catalan, Chinese-Traditional and Simplified, French, German, Japanese, Korean, Italian, Portuguese-Brazilian, Spanish, Danish, Swedish, Norwegian, Dutch, Finnish
- January 15, 2009: Macintosh for French, German, and Japanese
- February 11, 2009: Macintosh for Catalan, Chinese-Traditional and Simplified, Korean, Italian, Portuguese-Brazilian, Spanish, Danish, Swedish, Norwegian, Dutch, Finnish
- March 10, 2009: Arabic, Czech, Greek, Hebrew, Hungarian, Polish, Portuguese, Russian, Slovenian, Slovakian, Turkish, Thai

Physical media and documentation:

- January 23, 2009: English
- March 13, 2009: Catalan, Chinese-Traditional and Simplified, French, German, Japanese, Korean, Italian, Portuguese-Brazilian, Spanish, Danish, Swedish, Norwegian, Dutch, Finnish
- April 10, 2009: Arabic, Czech, Greek, Hebrew, Hungarian, Polish, Portuguese, Russian, Slovenian, Slovakian, Turkish, Thai

Specific national language version details for physical media included in this announcement and are listed in the [Availability of national languages](#) section of the announcement letter.

Refer to the complete letter for globalization details.

Description

Continuing with Notes and Domino's commitment to being a leader in the messaging and application arena by providing valuable features and functionality for its customers, IBM Lotus Notes and Domino 8.5 provides businesses with the flexibility and tools needed to communicate and collaborate. IBM Lotus Notes and Domino 8.5 incorporates additional features that businesses have asked for to ensure that you can maximize your value while decreasing operation costs. You have requested greater application development capabilities, ways to reduce storage costs, improved quality of service, ease of administration, and greater functionality and flexibility for client activities such as calendaring. We listened. Using an extensive design partner program to actively solicit feedback both prior to the planning process and during the development process, IBM Lotus Notes and Domino 8.5 provides features that you have requested.

IBM Lotus Notes and Domino understands that business needs vary by organization and industry, and that a one size infrastructure doesn't fit all. Holding strong to our customer value commitment, IBM Lotus Notes and Domino customers can choose the operating system and hardware that fits their needs based on factors such as cost, organizational expertise, physical size, scalability, and energy consumption. IBM Lotus Notes and Domino 8.5 expands platform capabilities with the addition of support for platforms such as AIX 64 bit, Windows 2008 64 bit, Citrix 64 bit, Ubuntu 8.0.4, and Macintosh OS X 10.5 (Leopard). Further, the deployment of Notes and Domino can accommodate business requirements such as physical location and high availability.

Administrators, managers, and end users can take advantage of the flexibility while enjoying the peace of mind that comes with the Notes and Domino security model. IBM Lotus Notes and Domino 8.5 expands security capabilities through new features such as ID Vault and Shared Logon. The new ID Vault feature allows administrators to securely automate tasks such as recovering lost IDs and password resets, allowing administrators to focus on other important tasks. Shared Logon provides a secure way of accessing Notes and Domino applications while maintaining only a single password that end users are familiar with, the Windows password.

IBM Lotus Notes and Domino 8.5 reduces the cost of ownership through new features and functionality such as Domino Attachment and Object Service (DAOS), further optimization of information handling (I/O), and streamlined administrative based tasks such as Schedule and Design.

DAOS provides a way to reduce redundancy of stored information, resulting in reduced storage costs, backup efforts, and optimized workflow operations. This service allows organizations to store only one instance of an attachment as opposed to having multiple copies stored and written to disk. For an example, when a large attachment such as a spreadsheet is sent via e-mail to many recipients, Domino can be configured to store only one copy of the spreadsheet. This can result in significant disk space savings, and is further compounded for cases when an individual performs a "reply to all", and the spreadsheet is resent, as DAOS will utilize the already stored version. Of course, if the spreadsheet or attachment is modified, DAOS will store the newly modified copy as a separate version. The service is transparent to users and applications.

New quality of service features available in IBM Lotus Notes and Domino 8.5 include Domino Configuration Tuner (may change to Domino Configuration Advisor) and Dynamic group policies.

Domino Configuration Tuner is a utility that provides administrators the ability to detect misconfigurations before problems arise. Common use cases may be for mistaken configuration settings, and for best practice information. Domino Configuration Tuner allows administrators to detect possible configuration problems before the problems become costly in an organization.

Dynamic group policies allow administration to maintain consistent policies as members of organizations change, allowing administrators to focus on other value added tasks.

IBM Lotus Notes and Domino 8.5 continues to offer new functionality and features while maintaining the investment that you make in Notes and Domino. Notes and Domino applications, written in prior releases of Notes and Domino, continue to function and provide value, allowing you to realize the value of investing in Notes and Domino. To further leverage the investment and increase the value proposition, Notes and Domino 8.5 builds on existing capabilities to allow greater flexibility with application development. Some of the new application development features in IBM Lotus Notes and Domino 8.5 are:

- XPages
- Themes
- Domino Designer based on Eclipse
- Support for Dojo

Lotus Domino Designer 8.5 not only provides significant enhancements to the way developers build applications today but also delivers powerful new capabilities for building Web 2.0 applications. It all starts with basing Domino Designer on Eclipse. Similar to what basing Lotus Notes 8 on Eclipse did for end users, developers will benefit from usability and productivity enhancements that make their job easier than ever. Domino Designer 8.5 is able to leverage various Eclipse features like working sets, search and compare, as well as editors for HTML, XML, cascading style sheets (CSS), and JavaScript[™].

For Web developers, Domino Designer 8.5 introduces a new design element called an XPage, which revolutionizes the way Domino Web applications are built. It allows existing Domino developers to put a modern interface on their existing applications or allows Web developers with HTML, XML, CSS, and JavaScript skills to build applications for the Lotus Domino platform. Themes provide developers a means to quickly change the look and feel of their Web application allowing them to tailor application instances for a particular audience.

For the Notes client, IBM Lotus Notes 8.5 offers new enhancements such as:

- Calendar federation
- Roaming user enhancements
- Viewers for Microsoft Office 2007
- Usability enhancements such as new drag and drop capabilities

These features provide functionality that customers have requested, such as the ability to view Notes calendar entries along with personal and public calendars, such as Google calendars. To allow for maximum flexibility, calendar availability can be online or offline, allowing individuals the capability to view their entire schedule of events while disconnected.

IBM Lotus Notes and Domino 8.5 is for businesses that desire top line growth through innovation and productivity solutions. IBM Lotus Notes and Domino 8.5 provides high quality messaging and application solutions that can evolve as business needs change, providing the necessary flexibility to change as business needs dictate. With integrated features such as Lotus Sametime and Lotus Symphony, organizations have a complete messaging and application system, without having to purchase office productivity tools. As part of the IBM Lotus software offering, IBM Lotus Notes and Domino 8.5 offers the ability to integrate with other IBM offerings such as Lotus Quickr[™] and Lotus Connections.

IBM Lotus Enterprise Integrator 8.5 allows businesses to leverage investments they have made in disparate systems by allowing them to integrate data and services between applications. Release 8.5 adds the ability integrate data from MySQL into Lotus Notes applications or into any of the other systems supported such as SAP. There are a number of other enhancements

including the ability to run a 64-bit edition of Lotus Enterprise Integrator on AIX which improves the efficiency of data transfer between systems.

Education support

IBM training provides education to support many IBM offerings. Descriptions of courses for IT professionals and managers are on the IBM training Web site

http://www.ibm.com/services/learning/ites.wss/tp/en?pageType=tp_search

Contact your IBM representative for course information.

IBM Software Services for Lotus - Education offers Lotus Notes and Domino training solutions designed to support your technology investment. Training technical and end users on the latest

features and functionality helps to increase productivity and lower your total cost of ownership. For a complete list of offerings visit the Lotus Education Web site at:

<http://www.ibm.com/software/lotus/training>

Technical Skills Software Workshop

No-fee technical skills training workshops (English only) for this product are offered to customers and business partners to gain hands-on skills for installing, configuring, operating, and supporting this product. The workshops are ideal for customers and business partners who are in the process of evaluating, or have already purchased it. Workshops are modeled to be 50 to 70% hands-on labs and are continually updated to current product release.

Workshops are delivered in multiple formats, traditional classroom, self-paced (self-study) and instructor led e-learning, all formats have the same content.

Traditional classroom workshops are scheduled and delivered in-person worldwide at IBM and non-IBM locations throughout the year.

Self-paced/self-study workshops enable the student to view the workshop presentations and execute the labs on their own schedule with no travel required. The presentations have speaker notes and allow the student full control to navigate the information. Students reserve a one week period to run the labs on a remote, supported, live environment. Support is provided through a monitored forum.

Note: A fast Internet connection is required.

Offering Information

Product information is available via the Offering Information Web site

<http://www.ibm.com/common/ssi>

Also, visit the Passport Advantage® Web site

<http://www.ibm.com/software/passportadvantage>

Publications

No publications are shipped with these products.

The IBM Publications Center

<http://www.ibm.com/shop/publications/order>

The Publications Center is a worldwide central repository for IBM product publications and marketing material with a catalog of 70,000 items. Extensive search facilities are provided. Payment options for orders are via credit card (in the U.S.) or customer number for 20 countries. A large number of publications are available online in various file formats, and they can all be downloaded by all countries.

Notes 8.5 - Detailed system requirements

Notes Client (standard configuration)

Microsoft Windows

- Supported versions
 - Microsoft Windows XP Professional, Service Pack 3
 - Microsoft Windows XP for Tablet PC
 - Microsoft Windows Vista: Enterprise, Ultimate, and Business Editions:
 - Microsoft Windows Vista for Tablet PC
- Processors
 - Intel® Pentium® or higher and compatibles, or equivalents
 - Windows XP - Pentium 4, 1.2 GHz, or higher
 - Windows Vista - Pentium 4, 1.2 GHz, or higher
- RAM
 - Windows XP - 512 MB minimum; 1 GB, or more strongly recommended
 - Windows Vista - 1 GB minimum; 1.5 GB, or more strongly recommended
- Disk space
 - Install directory (C:\) - 900 MB, or more recommended
- Video
 - Hardware support for OpenGL
- Monitor
 - Color monitor required
 - 1024x768 screen resolution minimum
- Protocols
 - NetBIOS over IP (Only Microsoft TCP/IP is supported.)
 - NetBIOS over IPX (Both Novell NetBIOS and Microsoft NetBIOS over IPX are supported.)
 - TCP/IP (includes IPv6)
 - X.PC

Linux®

- Supported versions
 - SUSE Linux Enterprise Desktop (SLED) 10 XGL.
 - Red Hat Enterprise Linux (RHEL) 5.2 Desktop.
 - **Note:** AIGLX is not supported, and must be disabled.
 - Ubuntu 8.04 LTS Desktop Edition.
- Processors
 - Intel Pentium, or higher and compatibles, or equivalents
 - Intel Pentium 4, 1.2 GHz, or higher
- RAM
 - 512 MB minimum
 - 1 GB, or more strongly recommended
- Disk space
 - Install directory (/opt) - 1.5 GB minimum
- Video

- 128 MB video RAM (with XGL-compatible video driver from hardware OEM for SLED 10)
- /etc/X11/xgl-hardware-list
- Monitors
 - Color monitor required
 - 1024x768 screen resolution minimum
- Protocols
 - TCP/IP (includes IPv6)

Macintosh

- Supported versions
 - Macintosh OS 10.5.x
- Processors
 - Intel only
- RAM
 - 1 GB minimum
- Disk space
 - Install directory (/Applications) - 2 GB, or more recommended
- Video
 - 32 MB video RAM, or more recommended
- Monitors
 - Color monitor required, 256 colors, or greater
 - 1024x768 screen resolution minimum
- Protocols
 - TCP/IP (includes IPv6)
 - X.PC

Notes client (basic configuration)

Microsoft Windows

- Supported versions
 - Microsoft Windows XP Professional, Service Pack 3
 - Microsoft Windows XP for Tablet PC
 - Microsoft Windows Vista: Enterprise, Ultimate, and Business Editions
 - Microsoft Windows Vista for Tablet PC
- Processors
 - Intel Pentium, or higher and compatibles, or equivalents
 - Windows XP - Pentium 4, 1.2 GHz, or higher
 - Windows Vista - Pentium 4, 1.2 GHz, or higher
- RAM
 - Windows XP - 512 MB minimum; 1 GB, or more strongly recommended
 - Windows Vista - 1 GB minimum; 1.5 GB, or more strongly recommended
- Disk space
 - Install directory (C:\) - 900 MB or more recommended
- Video
 - Hardware support for OpenGL

- Monitors
 - Color monitor required
 - 1024x768 screen resolution minimum
- Protocols
 - NetBIOS over IP (Only Microsoft TCP/IP is supported.)
 - NetBIOS over IPX (Both Novell NetBIOS and Microsoft NetBIOS over IPX are supported.)
- TCP/IP (includes IPv6)
 - X.PC

Macintosh

- Supported versions
 - Macintosh OS 10.5.x
- Processors
 - Intel, PPC
- RAM
 - 512 MB minimum
 - 1 GB, or more strongly recommended
- Disk space
 - Install directory (/Applications) - 1 GB, or more recommended
- Video
 - 32 MB video RAM, or more recommended
- Monitors
 - Color monitor required, 256 colors, or greater
 - 1024x768 screen resolution minimum
- Protocols
 - TCP/IP (includes IPv6)
 - X.PC

Citrix support statement - The Notes client is supported on Citrix Presentation Server 4.5, on Windows 2003 server (32 bit and 64 bit), using Citrix ICA (Independent Computing Architecture) clients.

Domino Administrator client, Domino Designer

Microsoft Windows

- Supported versions
 - Microsoft Windows XP Professional, Service Pack 3
 - Microsoft Windows Vista; Enterprise, Ultimate, and Business Editions
- Processors
 - Intel Pentium, or higher and compatibles, or equivalents
 - 1.5 GHz, or higher recommended
- RAM
 - Windows XP - 512 MB minimum; 1 GB, or more strongly recommended
 - Windows Vista - 1 GB minimum; 1.5 GB, or more strongly recommended
- Disk space
 - Install directory (C:\) - 960 MB, or more recommended

- Video
 - Hardware support for OpenGL
- Monitors
 - Color monitor required
- Protocols
 - NetBIOS over IP (only Microsoft TCP/IP is supported.)
 - NetBIOS over IPX (Both Novell NetBIOS and Microsoft NetBIOS over IPX are supported.)
 - TCP/IP (includes IPv6)
 - X.PC

Lotus iNotes™ 8.5 - Detailed system requirements

Client hardware requirements

- Recommended for better performance
 - Windows - Pentium 4, 2.0 GHz with 512 MB of memory
 - Linux - Pentium 4, 2.0 GHz with 512 MB of memory
 - Macintosh - Intel 2.0 GHz with 512 MB of memory
- Minimum requirements
 - Windows - Pentium 3, 1 GHz with 256 MB of memory
 - Linux - Pentium 3, 1 GHz with 256 MB of memory
 - Macintosh - G4 1 GHz 256 MB of memory

Client operating systems and supported browsers

IBM Lotus iNotes runs on the following client operating systems:

- Microsoft Windows XP Professional and Microsoft Windows Vista Enterprise Edition using the following browsers:
 - Internet Explorer 6 and 7
 - Mozilla Firefox 2.0.0.13, or later
- Novell SUSE Linux Enterprise Desktop (SLED) 10 using the following browsers:
 - Mozilla Firefox 2.0.0.13, or later
- Red Hat Enterprise Linux (RHEL) Desktop 5.2 using the following browsers:
 - Mozilla Firefox 2.0, or later
- Macintosh OS X 10.5 using the following browsers:
 - Mozilla Firefox 2.0.0.13 - Note: Does not support Domino Off-Line Services (DOLS), local archiving, and Lotus Sametime awareness.
 - Safari 3.1.x - Note: Does not support Domino Off-Line Services (DOLS), local archiving, and Lotus Sametime awareness.

Apple iPhone and iPod Touch firmware version 1.1.4 (for the Ultralite mode)

Citrix Presentation Server 4.5 on Windows 2003

- The Notes Client is supported on Citrix Presentation Server 4.5, on Windows 2003 server, using Independent Computing Architecture (ICA) clients. For additional information, refer to the "Citrix support statement" release note.

Browser support notes

- Attempting to access Domino Web Access through unsupported browsers results in the display of an unsupported browser notice. Netscape 4.x users may see hangs and/or crashes when encountering the Lotus iNotes unsupported browser page. If you are a Netscape 4.x

user and you encounter these problems, you should open your mail file using the WebMail UI directly through the &ui=webmail switch. This is documented in the topic "Switching to WebMail" in the Lotus iNotes help.

- Lotus iNotes will not work if JavaScript is disabled or if session cookies are disabled.

Server requirements

For a complete list of server operating systems and requirements, refer to "IBM Lotus Domino 8.5 - Detailed system requirements".

Certified proxy servers

- SunOne Portal Server 6.2
- IBM WebSphere® Edge Server 2.0.2 efix 49
- Tivoli® Access Manager 6.0

Adobe® Acrobat

- Adobe Acrobat Reader, Version 4.0, or higher to print calendars

Domino 8.5 - Detailed system requirements

32-bit Domino Server

Microsoft Windows

- Supported versions
 - Microsoft Windows 2003 Server Standard Edition
 - Microsoft Windows 2003 Server Enterprise Edition, Service Pack 2
 - Microsoft Windows 2003 Server x64 Edition
- Processors
 - Intel Pentium, or higher and compatibles (32-bit and 64-bit chips as appropriate), or equivalents
- RAM
 - 512 MB minimum
 - 512 MB or more recommended per CPU
- Disk space
 - 1.5 GB minimum per partition
- Disk swap space
 - 2 times the physical RAM installed
- Monitors
 - Color monitor required
- Protocols
 - NetBIOS over IP (32-bit processor only; only Microsoft IP is supported)
 - NetBIOS over IPX (32-bit processor only)
 - TCP/IP (includes IPv6)

Linux

- Supported versions
 - Novell SUSE Linux Enterprise Server (SLES) 10 x86 (32 bit)
 - Novell SUSE Linux Enterprise Server (SLES) 10 x86_64 (64 bit)
 - Red Hat Enterprise Linux (RHEL) 5.0 and 5.1 (32 bit)

Note: XGL and SELinux must be disabled.

- Red Hat Enterprise Linux (RHEL) 5.0 and 5.1 (64 bit)

Note: XGL and SELinux must be disabled.

- Processors
 - Intel Pentium, or higher and compatibles (32-bit and 64-bit chips as appropriate), or equivalents
- RAM
 - 512 MB minimum
 - 512 MB, or more recommended per CPU
- Disk space
 - 1.5 GB minimum
 - 1.5 GB, or more recommended
- Disk swap space
 - 2 times the physical RAM installed recommended
- Monitors
 - Any standard display (local or remote)
- Protocols
 - TCP/IP (includes IPv6)

Sun Solaris

- Supported versions
 - Sun Solaris 10 (64-bit kernel), March 2006 patch cluster, or higher

Note: The 64-bit kernel must be installed and in use, even though the OS is 32 bit. The use of the 32-bit kernel is no longer supported. Refer to the OS vendor documentation for questions on enabling/using the 64-bit kernel. On Solaris, the 64-bit kernel is used by default on supported hardware.
- Processors
 - UltraSPARC III, or higher
- RAM
 - 512 MB minimum
 - 512 MB, or more recommended per CPU
- Disk space
 - 1.5 GB minimum
 - 1.5 GB, or more recommended
- Disk swap space
 - 3 times the physical RAM recommended
- Monitors
 - Any standard display (local or remote)
- Protocols
 - TCP/IP (includes IPv6)

IBM AIX

- Supported versions
 - IBM AIX V5.3 (64-bit kernel), minimum patch level of TL7, 0815 (5300-07-04-0815)
 - IBM AIX V6.1 (64-bit kernel), Service Pack 4, APAR IZ10223, APAR IZ09961, APAR IZ10284, APAR IZ08022

Note: The 64-bit kernel must be installed and in use, even though the OS is 32 bit. The use of the 32-bit kernel is no longer supported. Refer to the OS vendor documentation for questions on enabling/using the 64-bit kernel.

- Processors
 - PowerPC®
- RAM
 - 512 MB minimum
 - 512 MB, or more recommended per CPU
- Disk space
 - 1.5 GB minimum
 - 1.5 GB or more recommended
- Disk swap space
 - 2 times the physical RAM recommended
- Monitors
 - Any standard display (local or remote)
- Protocols
 - TCP/IP (includes IPv6)

64-bit Domino Server

Microsoft Windows

- Supported versions
 - Microsoft Windows 2003 Server x64 Edition, Service Pack 2
- Processors
 - Intel EMT64, or higher and compatibles, or equivalents
- RAM
 - 512 MB minimum
 - 512 MB, or more recommended per CPU
- Disk space
 - 1.5 GB minimum per partition
- Disk swap space
 - 2 times the physical RAM recommended
- Monitors
 - Color monitor required
- Protocols
 - TCP/IP (includes IPv6)

IBM AIX

- Supported versions
 - 64-bit IBM AIX V5.3, TL7 0815 (5300-07-04-0815)
 - 64-bit IBM AIX V6.1, Service Pack 4, APAR IZ10223, APAR IZ09961, APAR IZ10284, APAR IZ08022
- Processors
 - PowerPC
- RAM

- 512 MB minimum
- 512 MB, or more recommended per CPU
- Disk space
 - 1.5 GB minimum
 - 1.5 GB, or more recommended
- Disk swap space
 - Same amount as physical RAM required; 2 times physical RAM recommended
- Monitors
 - Any standard display (local or remote)
- Protocols
 - TCP/IP (includes IPv6)

Linux on System z®

- Supported versions
 - Novell SUSE Linux Enterprise Server (SLES) 10 on System z (64 bit)
 - Red Hat Enterprise Linux (RHEL) 5 on System z (64 bit)

Note: XGL and SELinux must be disabled.
- Processors
 - Any that supports your release level of Linux on System z
- RAM
 - 1 GB minimum
 - 2 GB, or more recommended
- Disk space
 - 2.5 GB minimum
 - 2.5 GB, or more recommended
- Monitors
 - Any standard display (local or remote)
- Protocols
 - TCP/IP (includes IPv6)

128-bit Domino Server

IBM System i®

- Supported versions
 - IBM System i 5.4
 - IBM System i 6.1

Note: The IBM system i operating system only runs on 64-bit hardware, and has been enabled for 64-bit for a long time. It is a virtual machine architecture which supports both 128-bit and 64-bit pointers. All software products that run on IBM System i (i5/OS®) have 64-bit addressing capabilities. This includes Lotus Domino and all related software products, like Lotus Sametime, Lotus Quickr, and Lotus Enterprise Integrator.
- Processors
 - IBM iSeries® model 270 or 8xx servers, eServer™ i5 model 520, or above, System i 9405-520 Express models and 9406-520 Value models with accelerator processor feature, System i 9407-515, 9406-520, 9406-525, or above, IBM Power 520 Express, or above. For more details on specific models, refer to "System i Performance Capabilities Reference" at

<http://publib.boulder.ibm.com/infocenter/systems/scope/i5os/topic/books/sc410607.pdf>

- RAM
 - 512 MB minimum
 - 512 MB or more recommended per Domino server
- Disk space
 - 2 GB minimum
 - 4 or more drives recommended
- Monitors
 - Any standard display (local or remote)
- Protocols
 - TCP/IP (includes IPv6)

Software requirements

For the most up to date information regarding hardware and software requirements, visit

<http://www-01.ibm.com/software/support/>

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a README file, or other information published by IBM, such as an announcement letter. Documentation and other program content may be supplied only in the English language.

Planning information

Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and technical support are provided by the Software Subscription and Support (also referred to as Software Maintenance) offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software, and technical support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with each program license acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available.

Packaging

IBM Lotus Notes and Domino and Lotus Enterprise Integrator V8.5 will be distributed via a media package and electronic software distribution (ESD).

IBM Lotus Notes and Domino primary media is distributed in several specific packages based on language preference and include the following:

- Lotus Notes and or Domino product DVDs or electronic image files.
- Softcopy product documentation, including README files, which is included on the product DVDs or electronic image files.

IBM Lotus Domino associated products or secondary media is distributed separately via a media package and electronic software distribution (ESD), and may include the following based on license purchase:

- DB2® Enterprise Server, Tivoli Directory Integrator, WebSphere Application Server Network Deployment or Lotus Workflow[™].

The License Information form numbers are:

- L-GHUS-76ALZP for Lotus Domino

- L-GHUS-76ALYE for Lotus Notes

IBM Lotus Enterprise Integrator media is distributed in one media package with the following:

- Lotus Enterprise Integrator product DVD
- Softcopy product documentation, including README files, which is included on the product DVD or electronic image files.

The License Information form number is:

- L-GHUS-7JCNJ4 for Lotus Enterprise Integrator

Security, auditability, and control

The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

Global Technology Services

Contact your IBM representative for the list of selected services available in your country, either as standard or customized offerings for the efficient installation, implementation, or integration of this product.

Ordering information

For ordering information, consult your IBM representative or authorized IBM Business Partner, or visit

<http://www-306.ibm.com/software/support/pa.html>

This product is only available via Passport Advantage. It is not available as shrinkwrap.

Charge metrics definitions

Processor Value Unit (PVU)

PVU is the unit of measure by which this program is licensed. PVU entitlements are based on processor families (vendors and brands). A Proof of Entitlement (PoE) must be obtained for the appropriate number of PVUs based on the level or tier of all processor cores activated and available for use by the program on the server. Some programs allow licensing to less than the full capacity of the server's activated processor cores, sometimes referred to as sub-capacity licensing. For programs which offer sub-capacity licensing, if a server is partitioned utilizing eligible partitioning technologies, then a PoE must be obtained for the appropriate number of PVUs based on all activated processor cores available for use in each partition where the program runs or is managed by the program. Refer to the International Passport Advantage Agreement Attachment for Sub-Capacity Terms or the program's License Information to determine applicable sub-capacity terms. The PVU entitlements are specific to the program and may not be exchanged, interchanged, or aggregated with PVU entitlements of another program.

For general overview of PVUs for processor families (vendors and brands), go to

http://www-306.ibm.com/software/lotus/passportadvantage/pvu_licensing_for_customers.html

To calculate the exact PVU entitlements required for the program, go to

<https://www-112.ibm.com/software/howtobuy/passportadvantage/valueunitcalculator/vucalc.wss>

Authorized User

Authorized User is the unit of measure by which this program is licensed. An Authorized User is an individual (named or unnamed) within or outside of your enterprise. The program may be installed on one or more computers or servers and accessed by the number of users authorized by the PoE. You must have an entitlement for each Authorized User accessing the program or any program component in any manner directly or indirectly (for example, via a multiplexing program, device, or application server) through any means.

Cross-platform product for use on System z

Order the part numbers that follow when there is an intention to acquire this cross-platform product for deployment on the System z or S/390® platform. This set of part numbers provides the identical supply and authorization as the other set in this announcement. The distinction is to identify the planned deployment platform.

IBM Lotus Notes/Domino

Part description	Part number
IBM Lotus Domino Messaging Server	
IBM Lotus Domino Messaging Processor VU Linux on z Annual SW S&S Rnw1	E020JLL
Lotus Domino Messaging Processor PVU for Linux on System z Lic+SW S&S 12 Mo	D55JBLL
Lotus Domino Messaging Processor VU Linux on System z SW S&S Reinstate 12Mo	D55JCLL

D61E9LL	Lotus Enterprise Integrator SubCapacity Processor PVU Lic + SW S&S 12 Mo
D61EALL	Lotus Enterprise Integrator SubCapacity Processor VU SW S&S Reinstate 12 Mo

Sub-capacity for selected middleware products

Sub-capacity licensing on a per processor or per Value Unit basis is available for selected middleware products. To offer sub-capacity licensing, IBM software products implement

IBM Tivoli License Compliance Manager within their offerings so that you can monitor and report quarterly to IBM on the use of the programs on a continuous basis.

More information can be found on the Passport Advantage Web site

<http://www.ibm.com/software/passportadvantage>

Eligibility requirements for sub-capacity licensing

To be eligible for sub-capacity licensing terms on this product, you must agree to install and configure IBM Tivoli License Manager for IBM Software, in accordance with the IBM Tivoli License Manager publications, and to enable the collection of program use data on all eligible machines subject to sub capacity terms.

For those machines running programs with sub-capacity licensing terms, you must use IBM Tivoli License Manager for IBM Software to monitor program use and submit to IBM an IBM Use Report each calendar quarter. Multiple copies of IBM Tivoli License Manager for IBM Software or IBM Tivoli License Manager are not required. You can use more copies if you need them to support your operational environment, but only one copy is required to monitor all your sub-capacity licensed products.

Additionally, if this is the first product you have licensed under sub capacity terms, you must agree to the terms of an attachment to your Passport Advantage or Passport Advantage Express contract and submit a new Passport Advantage enrollment form. First-time sub-capacity clients also have an opportunity to ensure a primary business contact is established for their contracts.

For more information on required and entitled license capacity, license requirements, and reporting, refer to Software Announcement [ZA05-0101](#), dated April 19, 2005.

If you order (this product) under sub-capacity terms, IBM Tivoli License Manager for IBM Software will be made available to you if you do not already have one. You must install and configure this tool for your sub-capacity products. Alternately, you can use Tivoli License Manager. Once the license manager software is installed, you will be required to register online. (IBM may need to contact you in order to finalize the registration process.) You must monitor program use on a continuous basis with an IBM Tivoli License Manager for IBM Software and submit IBM Use Reports to IBM on a calendar quarterly basis.

IBM Tivoli License Manager for IBM Software is documented in the following customer publications, which are available from IBM Publications Center at

<http://www.elink.ibm.com/public/applications/publications/cgibin/pbi.cgi?>

Publication	Form
Planning, Installation, and Configuration	SC32-1431
Administration	SC32-1430
Problem Determination	SC32-9102
Data Dictionary	SC32-1432
Release Notes	SC32-1429

For IBM Tivoli License Manager configuration guidance and instructions for specific products (including this product) acquired with sub capacity terms, refer to

<http://www.lotus.com/sub-capacity>

The Web site will give you information about how to set up the product for detection by IBM Tivoli License Manager, any required maintenance, and any required steps that are unique to this product.

Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

Licensing

IBM International Program License Agreement including the License Information document and PoE govern your use of the program. PoEs are required for all authorized use.

Part number products only, offered outside of Passport Advantage, where applicable, are license only and do not include Software Maintenance.

This software license includes Software Subscription and Support (also referred to as Software Maintenance).

License Information form numbers

Program name	Program number	Form number
IBM Lotus Enterprise Integrator	5724-L76	L-GHUS-7JCNJ4
IBM Lotus Notes/Domino	5724-E62	L-GHUS-76ALYE and L-GHUS-76ALZP

The program's License Information will be available for review on the IBM Software License Agreement Web site

<http://www.ibm.com/software/sla/sladb.nsf>

Limited warranty applies

Yes

Warranty

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional charge. Consult the IBM Software Support Handbook for further information at

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

Program technical support

Technical support of a program product will be available for a minimum of five years from the general availability date, as long as your Software Maintenance is in effect. This technical support allows you to obtain assistance (via telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Maintenance also provides you with access to updates, releases, and versions of the program. You will be notified, via announcement letter, of discontinuance of support with 12 months' notice. If you require additional technical support from IBM, including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

Money-back guarantee

If for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

- For programs acquired under the IBM International Passport Advantage Agreement, this term applies only to your first acquisition of the program.
- For programs acquired under any of IBM's On/Off CoD software offerings, this term does not apply since these offerings apply to programs already acquired and in use by you.

Authorization for use on home/portable computer

The program may be stored on the primary machine and another machine, provided that the program is not in active use on both machines at the same time. You may not copy and use this program on another computer without paying additional license fees.

Product name

IBM Lotus Enterprise Integrator: Yes
IBM Lotus Notes/Domino: Yes

Volume orders (IVO)

No

Passport Advantage applies

Yes, and through the Passport Advantage Web site at

<http://www.ibm.com/software/passportadvantage>

This product is only available via Passport Advantage. It is not available as shrinkwrap.

Software Subscription and Support (also referred to as Software Maintenance) applies

Yes. Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and technical support are provided by the Software Subscription and Support (also referred to as Software Maintenance) offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software and Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with each program license acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available.

While your Software Subscription and Support (also referred to as Software Maintenance) is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance via telephone and, if available, electronic access, to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, consult your IBM Software Support Handbook at

<http://www.ibm.com/support/handbook>

Software Subscription and Support (also referred to as Software Maintenance) does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.

For additional information about the International Passport Advantage Agreement and the IBM International Passport Advantage Express Agreement, visit the Passport Advantage Web site at

<http://www.ibm.com/software/passportadvantage>

Other terms

System i Software Maintenance applies

No

Educational allowance available

Education allowance does not apply.

Education software allowance does not apply.

Special education prices are available for qualified customers through Passport Advantage.

On/Off CoD

To be eligible for On/Off CoD pricing, customers must be enabled for temporary capacity on the corresponding hardware, and the required contract - Z125-6907, Amendment for iSeries and pSeries® Temporary Capacity On Demand - Software - must be signed prior to use.

IBM Electronic Services

IBM has transformed its delivery of hardware and software support services to help you achieve higher system availability. Electronic Services is a Web-enabled solution that offers an exclusive, no-additional-charge enhancement to the service and support available for IBM servers. These services are designed to provide the opportunity for greater system availability with faster problem resolution and preemptive monitoring. Electronic Services comprises two separate, but complementary, elements: Electronic Services news page and Electronic Services Agent.

The Electronic Services news page is a single Internet entry point that replaces the multiple entry points traditionally used to access IBM Internet services and support. The news page enables you to gain easier access to IBM resources for assistance in resolving technical problems.

The Electronic Service Agent[™] is no-additional-charge software that resides on your server. It monitors events and transmits system inventory information to IBM on a periodic, client-defined timetable. The Electronic Service Agent automatically reports hardware problems to IBM. Early knowledge about potential problems enables IBM to deliver proactive service that may result in higher system availability and performance. In addition, information collected through the Service Agent is made available to IBM service support representatives when they help answer your questions or diagnose problems. Installation and use of IBM Electronic Service Agent for problem reporting enables IBM to provide better support and service for your IBM server.

Prices

For all local charges, contact your IBM representative.

Passport Advantage

For Passport Advantage information and charges, contact your IBM representative or authorized IBM Business Partner. Additional information is also available at

<http://www.ibm.com/software/passportadvantage>

Business Partner information

If you are an IBM Business Partner -- Distributor for Workstation Software acquiring products from IBM, you may link to Passport Advantage Online for resellers where you can obtain Business Partner pricing information. An IBM ID and password are required.

IBM Global Financing

IBM Global Financing offers competitive financing to credit-qualified customers to assist them in acquiring IT solutions. Offerings include financing for IT acquisition, including hardware, software, and services, both from IBM and other manufacturers or vendors. Offerings (for all customer segments: small, medium, and large enterprise), rates, terms, and availability can vary by country. Contact your local IBM Global Financing organization or visit

<http://www.ibm.com/financing>

IBM Global Financing offerings are provided through IBM Credit LLC in the United States, and other IBM subsidiaries and divisions worldwide to qualified commercial and government customers. Rates are based on a customer's credit rating, financing terms, offering type, equipment type, and options, and may vary by country. Other restrictions may apply. Rates and offerings are subject to change, extension, or withdrawal without notice.
