At a glance

IBM® Rational® Policy Tester® V8.0.1 transitions from a page-based Resource Value Unit (RVU) model to a more traditional Server-User model for the purpose of automating website compliance scanning for issues and risks that affect end-user accessibility and privacy, as well as website quality.

For ordering, contact your IBM representative, an IBM Business Partner, or IBM Americas Call Centers at 800-IBM-CALL (Reference: AE001).

Overview

IBM Rational Policy Tester delivers:

- Automated scanning and testing to assess web content for compliance issues regarding user privacy, website accessibility, and internal quality standards, and intelligent fix recommendations to ease remediation
- Over 80 out-of-the box privacy, accessibility, quality, inventory, and compliance reports to assist in achieving and maintaining compliance with government regulations including Sarbanes-Oxley, GLBA, HIPAA, COPPA, PCI Data Security Standard, Section 508, WCAG, and AccessiWeb
- Privacy Policy Management, PII Discovery, Leak Prevention, and Privacy Compliance assessments
- Ability to uncover issues that impact site usability and quality such as spelling errors, broken links, and accessibility issues
- Scalable, enterprise architecture that enables scanning of multiple applications simultaneously
- Sophisticated dashboards and flexible reporting views to provide enterprise-wide visibility of risks and remediation progress
- Role-based reporting access and scan permissions to help enforce test policies and to centralize vulnerability scanning
- Significant cost savings from online operations by automating manual processes, and identifying and prioritizing issues for immediate remediation

Key prerequisites

For details, refer to the [Hardware requirements](#) and the [Software requirements](#) sections.

Planned availability date

July 12, 2011: Electronic availability

July 15, 2011: Media availability

Description

IBM Rational Policy Tester is an industry-leading Compliance Management solution used to assess websites for user privacy, accessibility, and website quality issues that impact compliance and site effectiveness. Policy Tester drives significant cost out of the online operation by automating manual processes and by identifying and prioritizing issues for immediate remediation.

Policy Tester is a web-based application that provides high-speed, web content scanning, database storage, administration, and reporting. Policy Tester automates website reviews and manual tracking by scanning website content, storing the findings in a relational database (MS SQL Server)¹ and generating actionable reports.

Its flexible, thin-client architecture supports multiple enterprise user roles and access permissions. A key feature of Policy Tester, Issue Management, prioritizes critical issues. Policy Tester's executive dashboards track online metrics across the enterprise, including privacy, accessibility, quality, and compliance issues.

Policy Tester utilizes an open architecture that enables ebusiness and compliance executives to incorporate data from other management tools, providing an enterprise view into their online channel, enabling faster remediation of issues, more informed decision-making, and process improvements. Policy Tester generates actionable reports for all levels of the organization, from high-level summary dashboard views for executives to detailed reports for Quality Assurance teams and web developers.

Policy Tester editions include:

- IBM Rational Policy Tester, Privacy Edition - Used to uncover and report oversights that may expose the organization to undue risk - issues including missing privacy statements, pages collecting personally identifiable information, insecure data collection forms, and cookie presence - critical if you need to comply with privacy regulations such as COPPA, GLBA, HIPAA and California SB1386, and AB1950.
- IBM Rational Policy Tester, Accessibility Edition - Helps ensure the accessibility of the website for all users, including those accessing the site with the help of assistive technologies such as screen readers and Braille keyboards. It does so by monitoring for over 170 comprehensive accessibility checks such as appropriate text and background color contrast or the presence of text equivalent "alt" tags on images. It helps determine the site's level of compliance with government standards, including the U.S. government's Section 508 and guidelines such as the W3C's Web Content Accessibility Guidelines (WCAG) and France's AccessiWeb.
- IBM Rational Policy Tester, Quality Edition - Generates reports on issues that impact website quality and effectiveness - issues such as spelling errors, broken links and outdated content - to enhance site usability and employee productivity by making information accurate and easier to find. Quality Edition assists organizations in maintaining their internal quality and web development standards while improving the customer experience. Website usability directly impacts e-commerce and revenue attainment

Section 508 of the US Rehabilitation Act

IBM Rational Policy Tester is capable as of July 15, 2011, when used in accordance with IBM's associated documentation, of satisfying the applicable requirements of Section 508 of the Rehabilitation Act, provided that any assistive technology used with the product properly interoperates with it. A US Section 508 Voluntary Product Accessibility Template (VPAT), containing details on the products accessibility compliance, can be requested on the following website

Publications

No publications are shipped with this product.

The IBM Publications Center

<http://www.ibm.com/shop/publications/order>

The Publications Center is a worldwide central repository for IBM product publications and marketing material with a catalog of 70,000 items. Extensive search facilities are provided. Payment options for orders are via credit card (in the US) or customer number for 20 countries. A large number of publications are available online in various file formats, and they can all be downloaded by all countries.

Technical information

Specified operating environment

Hardware requirements

Processor -- 3.0 GHz Pentium™ IV-compatible processor; faster processor or multiple processors recommended.

Memory -- 4 GB of RAM, or more, recommended

Hard disk

- Approximately 800 MB of available hard-disk space for the recommended installation
- Approximately 10 GB of available hard-disk space for scan logs on Agent Server

- Approximately 200 GB of available hard-disk space on the system hosting the database (equals approximately 400,000 pages)
- Approximately 330 MB for the Web Services Explorer (to test Web Services for security vulnerabilities)

Software requirements

Operating systems

- Windows™ Server 2003 with Service Pack 2 (32/64-bit)
- Windows Server 2008/R2 with Service Pack 1 (32/64-bit)
- Windows 7 (32-bit) (client-side only)

Supported browsers

- Microsoft™ Internet Explorer 6.0, 7.0, and 8.0
- Mozilla Firefox 3.0, 3.5, and 3.6

Database

- SQL Server 2005 Service Pack 2
- SQL Server 2008 Service Pack 1
- SQL Server 2008 Express® Edition Service Pack 1 for demonstration purposes only

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a readme file, or other information published by IBM, such as an announcement letter. Documentation and other program content may be supplied only in the English language.

Planning information

Customer responsibilities

Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and technical support are provided by the Software Subscription and Support (also referred to as Software Maintenance) offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software, and technical support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with each program license acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available.

Packaging

IBM Rational Policy Tester

Security, auditability, and control

The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

Ordering information

This modification release changes the way Policy Tester is licensed. It is critical that you read and understand the "Managing licenses" topic before you install this modification. For details, visit

<http://publib.boulder.ibm.com/infocenter/asehelp/v8r0m0/index.jsp>

AppScan® Enterprise customers will not be affected by these licensing changes.

This product is only available via Passport Advantage. It is not available as shrinkwrap.

Charge metrics definitions

Authorized User Single Install

Authorized User Single Install is a unit of measure by which the program can be licensed. An Authorized User is a unique person who is given access to the program. An install is an installed copy of the program on a physical or virtual disk made

available to be executed on a computer. The program may be installed on any number of computers or servers, but if the Authorized User has accessed or has access to more than one install of the program, the Authorized User requires a separate entitlement for each such install. Licensee must obtain separate, dedicated entitlements for each Authorized User given access to the program on each Install in any manner directly or indirectly (for example: via a multiplexing program, device, or application server) through any means. An entitlement for an Authorized User is unique to that Authorized User and may not be shared, nor may it be reassigned other than for the permanent transfer of the Authorized User entitlement to another person.

Note: Some programs may be licensed where devices are considered users. In that case the following applies: Any computing device that requests the execution of or receives for execution a set of commands, procedures, or applications from the program or that is otherwise managed by the program is considered a separate user of the program and requires an entitlement as if that device were a person.

Floating User Single Install

Floating User Single Install is a unit of measure by which the program can be licensed. A Floating User is a person who is accessing the program at any particular point in time. An install is an installed copy of the program on a physical or virtual disk made available to be executed on a computer. The program may be installed on any number of computers or servers, but if the Floating User simultaneously accesses more than one install of the program, the Floating User requires a separate entitlement for each such install. Licensee must obtain separate entitlements for each Floating User simultaneously accessing the program on each install in any manner directly or indirectly (for example: via a multiplexing program, device, or application server) through any means.

Note: Some programs may be licensed where devices are considered users. In that case the following applies: Any computing device that requests the execution of or receives for execution a set of commands, procedures, or applications from the program or that is otherwise managed by the program is considered a separate user of the program and requires an entitlement as if that device were a person.

Install

Install is a unit of measure by which the program can be licensed. An install is an installed copy of the program on a physical or virtual disk made available to be executed on a computer. Licensee must obtain an entitlement for each install of the program.

Terms and conditions

This modification release changes the way Policy Tester is licensed. It is critical that you read and understand the "Managing licenses" topic before you install this modification. For details, visit

<http://publib.boulder.ibm.com/infocenter/asehelp/v8r0m0/index.jsp>

AppScan Enterprise customers will not be affected by these licensing changes.

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

Licensing

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use.

Part number products only, offered outside of Passport Advantage, where applicable, are license only and do not include Software Maintenance.

This software license includes Software Subscription and Support (also referred to as Software Maintenance).

License Information form number

Program name	Program number	Form number
IBM Rational Policy Tester	5725-E21	L-EK0A-8J9K4M

The program's License Information will be available for review on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/slabd.nsf>

Limited warranty applies

Yes

Limited warranty

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional charge. For further information, consult the *IBM Software Support Handbook* found at

<http://www.ibm.com/support/handbook>

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

Program technical support

Technical support of a program product version or release will be available for a minimum of five years from the general availability date, as long as your Software Maintenance is in effect. This technical support allows you to obtain assistance (via telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Maintenance also provides you with access to updates (modifications or fixes), releases, and versions of the program. You will be notified, via announcement letter, of discontinuance of support with 12 months' notice. If you require additional technical support from IBM, including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

Money-back guarantee

For clarification, note that if for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

- For clarification, note that for programs acquired under the IBM International Passport Advantage Agreement, this term applies only to your first acquisition of the program.

International Passport Agreement

Volume orders (IVO)

No

Passport Advantage applies

Yes, and through the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

This product is only available via Passport Advantage. It is not available as shrinkwrap.

Software Subscription and Support (Software Maintenance)

Yes. Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and technical support are provided by the Software Subscription and Support (also referred to as Software Maintenance) offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software and Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with each program license acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available.

While your Software Subscription and Support (also referred to as Software Maintenance) is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance via telephone and, if available, electronic access, to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, consult your *IBM Software Support Handbook* at

<http://www.ibm.com/support/handbook>

Software Subscription and Support (also referred to as Software Maintenance) does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.
