At a glance

IBM® Security AppScan® V8.7 updates:

- **IBM Security AppScan Source**
 - Federal Information Processing Standards (FIPS) 140-2 support
 - Internet Protocol version 6 support
 - IBM Security AppScan Source ported to Mac OS X
 - iOS security research capability
 - Objective-C, enhanced JavaScript™, and Java™ analysis capability on Mac OS X support
 - Xcode interoperability
 - Installation improvements
 - Enhanced filter options
- **IBM Security AppScan Enterprise**
 - FIPS 140-2 support
 - Enterprise database encryption enhancements
 - Dynamic Analysis Scanner scalability enhancements
 - Web Service Generic Services components improvements
 - Activity log enhancements
 - Installation workflow enhancements
- **IBM Security AppScan Standard**
 - FIPS 140-2 support
 - Web Service Generic Services components improvements
 - Accessibility with high contrast support

For ordering, contact Your IBM representative or an IBM Business Partner.

Overview

IBM Security AppScan V8.7 application security portfolio continues to deliver on static, dynamic, and interactive application security testing. IBM Security AppScan portfolio provides a platform for centrally managing application security testing and risk management as critical elements of application lifecycle management.

What is new

IBM Security AppScan Source

- Security analysis of mobile applications running on Apple iOS, for example, iPhone and iPad applications
- Extensive iOS security research and additions to the Security AppScan Source security knowledgebase to identify iOS mobile application security risks
- Xcode Integrated Development Environment (IDE) interoperability (Xcode is the primary Apple development IDE and provides the ability to read and understand Xcode projects.)
- Objective-C, enhanced JavaScript , and Java analysis support for iOS applications
- Use of a Federal Information Processing Standards (FIPS) 140-2 validated cryptographic module and approved algorithms for all cryptographic operations, in support of US Federal Government standards
- Internet Protocol version 6 (IPv6) support
- Installation improvements to ensure application binaries and data are separated for better compliance with operating systems standards
- New filter options, which provide finer and more granular control of analysis results

IBM Security AppScan Standard

- Use of a FIPS 140-2 validated cryptographic module and approved algorithms for all cryptographic operations, in support of US Federal Government standards
- Support of Web Service security policies, cookies, and Raw Transaction Data view
- Improved usability and serviceability enhancements for Web Service security policies and security algorithms
- Includes accessibility enhancement that provides high contrast support
- Improved performance and stability

IBM Security AppScan Enterprise

- Use of a FIPS 140-2 validated cryptographic module and approved algorithms for all cryptographic operations, in support of US Federal Government standards.
- Includes database encryption enhancements that allow users to enable Microsoft™ SQL Server's (2008, or later) built-in mechanism for data encryption (Transparent Data Encryption), which helps provide better security and performance. Old mechanism for protecting data at-rest has been deprecated.
- Has Dynamic Analysis Scanner scalability enhancements that allow you to run more scans in parallel on a single scan server machine.
- Support of Web Services security policies, cookies, and Raw Transaction Data view.
- Has usability and serviceability enhancements for Web Services security policies and security algorithms.
- Delivers activity log enhancements allowing you to view target server and duration of scan jobs.
- Includes installation workflow enhancements that allow automatic installation of .Net framework components and automatic configuration of Internet Information Services settings on Windows™ 2008 R2 platform.

Key prerequisites

For details, refer to the [Hardware requirements](#) and the [Software requirements](#) sections.

Planned availability date

March 25, 2013: For electronic availability

April 12, 2013: For media availability

Description

The most efficient way to stay ahead of application security vulnerabilities is to build software securely, from the ground up. The challenge is that the majority of developers are not security experts, and secure coding is historically not identified as a priority. As a result, web-based and nonweb-based applications alike continue to be deployed with vulnerabilities ready for exploitation, putting sensitive data at risk of a breach.

The onerous task of vulnerability identification and remediation cannot be successfully addressed by limited IT security resources. The best way to engage development in the process of application security is to provide tools that fit into the existing environment and workflow, and that generate results in an understandable language. The IBM Security AppScan portfolio provides a number of offerings that enable application security testing across the full application lifecycle.

IBM Security AppScan V8.7 is a leading application security test suite designed to help manageability testing throughout the software development lifecycle. Security AppScan offers a time-saving solution for all types of security testing: outsourced, individual, and enterprise-wide analysis, and for all types of users including application developers, build managers, quality assurance (QA) teams, penetration testers, security auditors, and senior management.

The IBM Security AppScan portfolio includes offerings used to test live applications or source code, validate findings, and prioritize and report results. Reports include issuing advisories and advanced fix recommendations designed to educate and help developers and security auditors remediate the identified vulnerabilities.

IBM Security AppScan offerings

IBM Security AppScan Standard is a desktop solution that utilizes Interactive Application Security Testing (IAST) and Dynamic Application Security Testing (DAST). The patent-pending glass box feature in IBM Security AppScan Standard provides IAST through run-time analysis - an automated method of combining static and dynamic techniques in real time to improve the accuracy of test results. Interactive testing is a new type of testing that combines some features of static and some of dynamic testing, and makes them interact in real time.

With glass box testing, technology interactions work by combining the detection of a potential vulnerability with verification through a real-time exploit attempt. Benefits of glass box, or Interactive testing include more accurate test results, identification of new threat categories, and the ability to pinpoint specific lines of code and details that facilitate remediation.

IBM Security AppScan Enterprise is an enterprise-class solution for application security testing and risk management. IBM Security AppScan Enterprise provides robust capabilities for governance and facilitates collaboration between development, quality assurance, and security teams across the organization. It centrally manages dynamic, static, and interactive security assessments. It

provides enterprise metrics and trending for monitoring application security program progress. It also integrates with IBM Security QRadar to incorporate application vulnerability data into overall security intelligence.

IBM Security AppScan Source analyzes source code during the early stages of the application lifecycle to identify security vulnerabilities with Static Application Security Testing (SAST), while integrating security testing with software development processes and systems. IBM Security AppScan Source addresses mobile application security by providing the ability to test mobile applications built for the Android and Apple platforms.

Accessibility by people with disabilities

A US Section 508 Voluntary Product Accessibility Template (VPAT) containing details on accessibility compliance can be requested at

http://www.ibm.com/able/product_accessibility/index.html

Program number

Program number	VRM	Program name
5724-T59	8.7.0	IBM Security AppScan Standard
5724-T52	8.7.0	IBM Security AppScan Enterprise
5724-Z34	8.7.0	IBM Security AppScan Source for Automation
5724-Z35	8.7.0	IBM Security AppScan Source for Analysis
5724-Z36	8.7.0	IBM Security AppScan Source for Development
5724-Z37	8.7.0	IBM Security AppScan Source for Remediation

Education support

IBM training provides education to support many IBM offerings. Descriptions of courses for IT professionals and managers are on the IBM training website

<http://www.ibm.com/services/learning/>

Call IBM training at 800-IBM-TEACH (426-8322) for catalogs, schedules, and enrollments.

Offering Information

Product information is available via the Offering Information website

<http://www.ibm.com/common/ssi>

Also, visit the Passport Advantage® website

<http://www.ibm.com/software/passportadvantage>

Publications

AppScan Enterprise V8.7 Planning and Installation Guide is shipped with IBM Security AppScan Enterprise V8.7.

The following publications are shipped with IBM Security AppScan Standard V8.7:

- AppScan Standard 8.7 Getting Started Guide
- AppScan Standard 8.7 Glass Box User Guide

The following publications can be found at the below IBM Publication Center:

- AppScan Enterprise 8.7 Planning and Installation Guide (GC14-7268-10)
- AppScan Standard 8.7 Getting Started Guide (SC27-5431-00)
- AppScan Standard 8.7 User Guide (SC27-5432-00)
- AppScan Standard 8.7 Glass Box User Guide (SC27-5433-00)

The IBM Publications Center is available at

<http://www.ibm.com/shop/publications/order>

The Publications Center is a worldwide central repository for IBM product publications and marketing material with a catalog of 70,000 items. Extensive search facilities are provided. Payment options for orders are via credit card (in the US) or customer number for 20 countries. A large number of publications are available online in various file formats, and they can all be downloaded by all countries, free of charge.

Technical information

Specified operating environment

Hardware requirements

IBM Security AppScan Source V8.7

- Disk space: Approximately 1.5 GB of available hard disk space (2 GB required for installation)
- Media drive: CD-ROM or DVD-ROM drive
- Memory: 2 GB of RAM (minimum); 8G of RAM or more recommended
- Processor: 2 CPU

For current information on IBM Security AppScan Source V8.7 hardware requirements, at electronic availability, refer to

<http://www-01.ibm.com/support/docview.wss?&uid=swg27027486>

IBM Security AppScan Enterprise V8.7

This configuration supports an average size deployment of three to four Dynamic Analysis Scanners (two concurrent scan jobs per scanner). Larger deployments or loads may require more resources.

- Disk space:
 - Approximately 200 GB for the AppScan Enterprise Server and Jazz™ Team Server
 - Approximately 500 GB of free space for scan logs on the Dynamic Analysis Scanner
 - Approximately 1 TB of free space on the system hosting the SQL Server database
 - Approximately 330 MB for the Web Services Explorer - Generic Service Client tool (GSC) version 8.1 used to test Web Services for security vulnerabilities
- Memory:
 - 16 GB of RAM (minimum) or more recommended for SQLServer database and Dynamic Analysis Scanner
 - 8 GB of RAM or more recommended AppScan Enterprise Server and Jazz Team Server
- Processor:
 - 4 CPU recommended for SQL Server database and Dynamic Analysis Scanner

- 2 CPU recommended for AppScan Enterprise Server and Jazz Team Server

For current information on IBM Security AppScan Enterprise V8.7 hardware requirements, at electronic availability, refer to

<http://www-01.ibm.com/support/docview.wss?uid=swg27027541>

IBM Security AppScan Standard V8.7

- Disk space: Approximately 30 GB of available hard disk space
- Memory: 3 GB of RAM or more recommended
- NIC network driver: 1 NIC 100 Mbps for network communication with configured TCP/IP
- Processor: Core 2 Duo 2 GHz (or equivalent)

For current information on IBM Security AppScan Standard V8.7 hardware requirements, at electronic availability, refer to

<http://www-01.ibm.com/support/docview.wss?uid=swg27024155>

Software requirements

IBM Security AppScan Source V8.7

IBM Security AppScan Source V8.7 is dropping support for Solaris 10, Windows Vista (Business, Enterprise, and Ultimate), and Oracle 10g.

Operating systems

Mac OS

- Mac OS X 10.7 (64 bit)
- OS X 10.8

Linux™ (On 64-bit Linux , Security AppScan Source runs in 32-bit mode.)

- Red Hat Enterprise Linux (RHEL) 5, 6, 6.2, and 6.3

Windows (On 64-bit Windows , Security AppScan Source runs in 32-bit mode.)

- Windows 7 Enterprise, Professional, and Ultimate
- Windows Server 2003 R2 SP2 Enterprise and Standard 32-bit x86
- Windows Server 2003 Enterprise and Standard 32-bit x86
- Windows Server 2008 Enterprise and Standard 32-bit x86
- Windows Server 2008 R2 Enterprise and Standard
- Windows XP Professional SP3

Prerequisite system requirements

License use management

- IBM Rational® License Key Server V8.1.1, V8.1.2, V8.1.3, and future fix packs

Other system requirements

Compilers

- Microsoft Visual Studio 2005, 2008, 2010
- gcc for Linux
- Jasper Version 1 (Tomcat Version 3)
- Jasper Version 3 (Tomcat Version 5)

- WebLogic Version 8 and 9
- WebSphere® Application Server V6.1 and V7.0
- XCode 4.4-4.6 for Objective-C (for iOS applications only)

Databases

- Oracle Database 11g

Integration - For integration scenarios with various AppScan Source products, refer to AppScan Source product help.

- IBM Rational Application Developer for WebSphere Software V7.0, V7.5, V7.5.1, V7.5.2, V7.5.3, V7.5.4, V7.5.5, V8.0, V8.0.1, V8.0.2, V8.0.3, V8.0.4, V8.5, V8.5.1, and future fix packs
- Eclipse 3.3.0, 3.4.0, 3.5, 3.6, 3.7, 3.8, and future modification levels and fix packs
- Security AppScan Enterprise V8.7, and future modification levels and fix packs
- Microsoft .NET Framework 2.0, 3.0, 3.5, 4.0
- Microsoft Visual Studio 2005, 2008, 2010

Defect tracking systems

- Microsoft Team Foundation Server 2008, 2010, and future fix packs
- IBM Rational Team Concert™ V2.0.0.2, V3.0, V3.0.1, V4.0, V4.0.1, and future fix packs
- IBM Rational ClearQuest® V7.0, V7.1.2, V7.1.1, V8.0, and future fix packs
- HP Quality Center 9.2, 10.0, 11.0, and future fix packs

Reports

- Adobe™ Reader Version 6.0, or later (Windows)
- Adobe Reader Version 5.0 (Linux)

For current information on IBM Security AppScan Source V8.7 software requirements, at electronic availability, refer to

<http://www-01.ibm.com/support/docview.wss?&uid=swg27027486>

IBM Security AppScan Enterprise V8.7

IBM Security AppScan Enterprise 8.7 is dropping support for Microsoft SQL Server (Enterprise and Standard) 2005 and IBM Security SiteProtector™ V2.0.

Operating systems

Linux (On Linux , Security AppScan Enterprise is used only with Security AppScan Source.)

- Red Hat Enterprise Linux (RHEL) 6 and 6.2

Windows

- Windows Server 2003 R2 Enterprise and Standard
- Windows Server 2003 Enterprise and Standard (also install .NET Framework 4.0)
- Windows Server 2008 and 2008 R2 Standard and Enterprise

Windows (The following Windows operating systems are only for the client side of Enterprise Server and Dynamic Analysis Scanner.)

- Windows 7 Enterprise, Professional, and Ultimate
- Windows Vista Business, Enterprise, and Ultimate

- Windows XP Professional SP3

Prerequisite system requirements

.NET

- Microsoft .NET Framework 4.0, and future fix packs

Browsers

- Microsoft Internet Explorer 7.0, 8.0, 9.0, 10, and future modification levels and fix packs
- Mozilla Firefox 17.0, and future fix packs (used for both Manual Explore and Dynamic Assessment Plugins)
- Google Chrome (only for Manual Explore Desktop Tool)

Databases

- Microsoft SQL Server Standard and Enterprise 2008 SP3, 2012, and future fix packs
- Microsoft SQL Server 2008 R2 SP2, and future fix packs

License use management

- IBM Rational License Key Server V8.1.1, V8.1.2, V8.1.3, and future fix packs (required for floating user licenses)

Web servers

- IBM WebSphere Application Server V6.1.0.27, and future fix packs
- IBM WebSphere Application Server V7.0.0.9, V8.0.0.3, and future fix packs
- Apache Tomcat 7.0.32, and future fix packs
- Microsoft Internet Information Services 6.0, and future fix packs (IIS6 must be enabled on the Windows 2003 Server for installs.)
- Microsoft Internet Information Services 7.0, and future fix packs (IIS7 must be enabled on the Windows 2008 Server for installs.)

Other system requirements

Integration

- IBM Security SiteProtector System V2.9, and future fix packs
- IBM WebSphere Portal Server V6.0.1.4, and future fix packs
- IBM Rational AppScan Source V7.0, and future releases, modification levels, and fix packs
- IBM Rational AppScan Standard V7.7, and future releases, modification levels, and fix packs
- IBM Rational Team Concert V2.0.0.2, V3.0, V3.0.1, V4.0, V4.0.1, and future fix packs
- IBM Rational Quality Manager
- QRadar SIEM 7.0 Modification Release 5
- IBM Security QRadar V7.1

For current information on IBM Security AppScan Enterprise V8.7 software requirements, at electronic availability, refer to

<http://www-01.ibm.com/support/docview.wss?uid=swg27027541>

IBM Security AppScan Standard V8.7

IBM Security AppScan Standard 8.7 is dropping support for Windows Vista. Microsoft .NET Framework Version 4.0 is a prerequisite and Microsoft .NET Framework Versions 2.0, 3.0 or 3.5 are no longer prerequisites.

Operating systems (both 32-bit and 64-bit editions)

Windows

- Windows XP: Professional, SP3
 - Windows 2003: Standard and Enterprise, SP1 and SP2
 - Windows 2003 R2: Standard and Enterprise, SP2
 - Windows Server 2008: Standard and Enterprise, SP1 and SP2
 - Windows Server 2008 R2: Standard and Enterprise, with or without SP1
 - Windows 7: Enterprise, Professional, and Ultimate, with or without SP1
- Note: Security AppScan smart tags, used when creating custom reports, are not supported for Windows Server 2008.

Browser

- Microsoft Internet Explorer Versions 7, 8, and 9

License key server

- Rational License Key Server V8.1.1, V8.1.2, and V8.1.3

Defect Tracking Systems

- Rational ClearQuest V7.0, V7.1.1, V7.1.2, and V8.0
- HP Quality Center 9.2 and 10.0

Other

- Microsoft .NET Framework Version 4.0 is required.
- Optional: Adobe Flash Player for Internet Explorer, Version 10.1.102.64, or later
- Optional: Word 2003, 2007, or 2010 for using Security AppScan smart tags to insert fields for custom report templates.

AppScan Standard glass box server requirements

- Java EE containers: JBoss 6, Tomcat 6.0 and 7.0, WebLogic 11, WebSphere V7.0 and V8.0

Glass box operating systems

Windows :

- Windows XP SP3
- Windows 7 SP1
- Windows 2008 Server R2 with and without SP1
- Linux RHEL 5 Updates 6, 6, 6.2, and 6.3
- Linux Ubuntu server LTS 10.04
- Linux SLES 10 SP4 and 11 SP2
- UNIX™ AIX® 6.1
- UNIX Solaris 10 (SPARC) and 11 Express®

For current information on IBM Security AppScan Standard V8.7 software requirements, at electronic availability, refer to

<http://www-01.ibm.com/support/docview.wss?uid=swg27024155>

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a readme file, or other information published by IBM, such as an announcement letter. Documentation and other program content may be supplied only in the English language.

IBM Electronic Support

The IBM Support Portal is your gateway to technical support. This includes IBM Electronic Support tools and resources, for software and hardware, to help save time and simplify support. The Electronic Support tools can help you find answers to questions, download fixes, troubleshoot, automate data collection, submit and track problems through the Service Request online tool, and build skills. All these tools are made available through your IBM support agreement, at no additional charge.

Read about the Electronic Support portfolio of tools

<http://ibm.com/electronicssupport>

Access the IBM Support Portal

<http://ibm.com/support>

Access the online Service Request tool

<http://ibm.com/support/servicerequest>

Planning information

Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and technical support are provided by the Software Subscription and Support (Software Maintenance) offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software, and technical support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with each program license acquired. The initial period of Software Subscription and Support (Software Maintenance) can be extended by the purchase of a renewal option, if available.

Packaging

IBM Security AppScan is distributed with:

- International Program License Agreement (Z125-3301)
- License Information document
- DVDs
- Publications (refer to the [Publications](#) section)

This program, when downloaded from a website, contains the applicable IBM license agreement and License Information, if appropriate, and will be presented for acceptance at the time of installation of the program. For future reference, the license and License Information will be stored in a directory such as LICENSE.TXT.

Security, auditability, and control

IBM Security AppScan V8.7 uses the security and auditability features of the operating system software. The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

Software Services

IBM Software Services has the breadth, depth, and reach to manage your services needs. You can leverage the deep technical skills of our lab-based, software services team and the business consulting, project management, and infrastructure expertise of our IBM Global Services team. Also, we extend our IBM Software Services reach through IBM Business Partners to provide an extensive portfolio of capabilities. Together, we provide the global reach, intellectual capital, industry insight, and technology leadership to support a wide range of critical business needs.

IBM Security AppScan 5724-T59 Authorized User Single Install
Standard V8.7 Floating User Single Install

Authorized User

Authorized User is a unit of measure by which the program can be licensed. An Authorized User is a unique person who is given access to the program. The program may be installed on any number of computers or servers and each Authorized User may have simultaneous access to any number of instances of the program at one time. Licensee must obtain separate, dedicated entitlements for each Authorized User accessing the program in any manner directly or indirectly (for example, via a multiplexing program, device, or application server) through any means. An entitlement for an Authorized User is unique to that Authorized User and may not be shared, nor may it be reassigned other than for the permanent transfer of the Authorized User entitlement to another person.

Note: Some programs may be licensed where devices are considered users. In that case, the following applies. Any computing device that requests the execution of or receives for execution a set of commands, procedures, or applications from the program or that is otherwise managed by the program is considered a separate user of the program and requires an entitlement as if that device were a person.

Floating User

Floating User is a unit of measure by which the program can be licensed. A Floating User is a person who is accessing the program at any particular point in time. An install is an installed copy of the program on a physical or virtual disk made available to be executed on a computer. The program may be installed on any number of computers or servers, but if the Floating User simultaneously accesses more than one install of the program, the Floating User requires a separate entitlements for each such install. Licensee must obtain separate entitlements for each Floating User simultaneously accessing the program on each install in any manner directly or indirectly (for example, via a multiplexing program, device, or application server) through any means.

Note: Some programs may be licensed where devices are considered users. In that case, the following applies. Any computing device that requests the execution of or receives for execution a set of commands, procedures, or applications from the program or that is otherwise managed by the program is considered a separate user of the program and requires an entitlement as if that device were a person.

Install

Install is a unit of measure by which the program can be licensed. An install is an installed copy of the program on a physical or virtual disk made available to be executed on a computer. Licensee must obtain an entitlement for each install of the program.

IBM Security AppScan Enterprise Dynamic Analysis Scanner V8.7 Multilingual, DVD Media Pack	BT0IEML

Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

This product is only available via Passport Advantage . It is not available as shrinkwrap.

Licensing

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use. Part number products only, offered outside of Passport Advantage , where applicable, are license only and do not include Software Maintenance.

This software license includes Software Subscription and Support (also referred to as Software Maintenance).

These programs are licensed under the IBM Program License Agreement (IPLA) and the associated Agreement for Acquisition of Software Maintenance, which provide for support with ongoing access to releases and versions of the program. IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with the initial license acquisition of each program acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available. These programs have a one-time license charge for use of the program and an annual renewable charge for the enhanced support that includes telephone assistance (voice support for defects during normal business hours), as well as access to updates, releases, and versions of the program as long as support is in effect.

License Information form number

- IBM Security AppScan Enterprise (5724-T52): L-LARS-93FKBD, L-LARS-93FL6G

- IBM Security AppScan Source for Automation (5724-Z34): L-NLII-93KSGB
- IBM Security AppScan Source for Development (5724-Z36): L-NLII-93KSGB
- IBM Security AppScan Source for Remediation (5724-Z37): L-NLII-93KSGB
- IBM Security AppScan Source for Analysis (5724-Z35): L-NLII-93KSGB
- IBM Security AppScan Standard (5724-T59): L-LARS-93FLAB

The program's License Information will be available for review on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

Limited warranty applies

Yes

Limited warranty

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional charge. For further information, consult the IBM Software Support Handbook found at

<http://www.ibm.com/support/handbook>

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

Program technical support

Technical support of a program product version or release will be available for a minimum of five years from the general availability date, as long as your Software Subscription and Support (also referred to as Software Maintenance) is in effect. This technical support allows you to obtain assistance (via telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Subscription and Support (Software Maintenance) also provides you with access to updates (modifications or fixes), releases, and versions of the program. You will be notified, via announcement letter, of discontinuance of support with 12 months' notice. If you require additional technical support from IBM, including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

Money-back guarantee

If for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

For clarification, note that (1) for programs acquired under the IBM International Passport Advantage offering, this term applies only to your first acquisition of the program and (2) for programs acquired under any of IBM's On/Off Capacity on Demand (On/Off CoD) software offerings, this term does not apply since these offerings apply to programs already acquired and in use by you.

Other terms

Volume orders (IVO)

No

IBM International Passport Advantage Agreement

Passport Advantage applies

Yes, and through the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

Usage restriction

Yes. For information, refer to the License Information document that is available on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

Software Subscription and Support applies

Yes. Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express . Product upgrades and Technical Support are provided by the Software Subscription and Support offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software and Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support with each program license acquired. The initial period of Software Subscription and Support can be extended by the purchase of a renewal option, if available.

While your Software Subscription and Support is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance via telephone and, if available, electronic access, only to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, consult your IBM Software Support Handbook at

<http://www.ibm.com/support/handbook>

Software Subscription and Support does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.

For additional information about the International Passport Advantage Agreement and the IBM International Passport Advantage Express Agreement, visit the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

Not applicable.

Statement of good security practices

IT system security involves protecting systems and information through prevention, detection, and response to improper access from within and outside your enterprise. Improper access can result in information being altered destroyed or misappropriated or can result in misuse of your systems to attack others. Without a comprehensive approach to security, no IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems and products are designed to be part of a comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products, or services to be most effective. IBM does not warrant that systems and products are immune from the malicious or illegal conduct of any party.

IBM Electronic Services

Electronic Service Agent™ and the IBM Electronic Support web portal are dedicated to providing fast, exceptional support to IBM Systems customers. The IBM Electronic Service Agent tool is a no-additional-charge tool that proactively monitors and reports hardware events, such as system errors, performance issues, and inventory. The Electronic Service Agent tool can help you stay focused on your company's strategic business initiatives, save time, and spend less effort managing day-to-day IT maintenance issues. Servers enabled with this tool can be monitored remotely around the clock by IBM Support all at no additional cost to you.

Now integrated into the base operating system of AIX V5.3, AIX V6.1, and AIX V7.1, Electronic Service Agent is designed to automatically and electronically report system failures and utilization issues to IBM , which can result in faster problem resolution and increased availability. System configuration and inventory information collected by the Electronic Service Agent tool also can be viewed on the secure Electronic Support web portal, and used to improve problem determination and resolution by you and the IBM support team. To access the tool main menu, simply type `smitty esa_main`, and select `Configure Electronic Service Agent` . In addition, ESA now includes a powerful Web user interface, giving the administrator easy access to status, tool settings, problem information, and filters. For more information and documentation on how to configure and use Electronic Service Agent , refer to

<http://www.ibm.com/support/electronic>

The IBM Electronic Support portal is a single Internet entry point that replaces the multiple entry points traditionally used to access IBM Internet services and support. This portal enables you to gain easier access to IBM resources for assistance in resolving technical problems. The My Systems and Premium Search functions make it even easier for Electronic Service Agent tool-enabled customers to track system inventory and find pertinent fixes.

Benefits

Increased uptime: The Electronic Service Agent tool is designed to enhance the Warranty or Maintenance Agreement by providing faster hardware error reporting and uploading system information to IBM Support. This can translate to less wasted time monitoring the symptoms, diagnosing the error, and manually calling IBM Support to open a problem record. Its 24 x 7 monitoring and reporting mean no more dependence on human intervention or off-hours customer personnel when errors are encountered in the middle of the night.

Security: The Electronic Service Agent tool is designed to be secure in monitoring, reporting, and storing the data at IBM . The Electronic Service Agent tool securely transmits either via the Internet (HTTPS or VPN) or modem, and can be configured to communicate securely through gateways to provide customers a single point of exit from their site. Communication is one way. Activating Electronic Service Agent does not enable IBM to call into a customer's system. System inventory information is stored in a secure database, which is protected behind IBM firewalls. It is viewable only by the customer and IBM . The customer's business applications or business data is never transmitted to IBM .

More accurate reporting: Since system information and error logs are automatically uploaded to the IBM Support center in conjunction with the service request, customers are not required to find and send system information, decreasing the risk of misreported or misdiagnosed errors. Once inside IBM , problem error data is run through a data knowledge management system and knowledge articles are appended to the problem record.

Customized support: Using the IBM ID entered during activation, customers can view system and support information in the My Systems and Premium Search sections of the Electronic Support website at

<http://www.ibm.com/support/electronic>

My Systems provides valuable reports of installed hardware and software using information collected from the systems by Electronic Service Agent . Reports are available for any system associated with the customer's IBM ID. Premium Search combines the function of search and the value of Electronic Service Agent information, providing advanced search of the technical support knowledgebase. Using Premium Search and the Electronic Service Agent information that has been collected from your system, customers are able to see search results that apply specifically to their systems.

For more information on how to utilize the power of IBM Electronic Services, contact your IBM Systems Services Representative, or visit

<http://www.ibm.com/support/electronic>

Prices

Business Partner information

If you are an IBM Business Partner -- Distributor for Workstation Software acquiring products from IBM , you may link to Passport Advantage Online for resellers where you can obtain Business Partner pricing information. An IBM ID and password are required.

IBM Global Financing

IBM Global Financing offers competitive financing to credit-qualified customers to assist them in acquiring IT solutions. Offerings include financing for IT acquisition,

including hardware, software, and services, from both IBM and other manufacturers or vendors. Offerings (for all customer segments: small, medium, and large enterprise), rates, terms, and availability can vary by country. Contact your local IBM Global Financing organization or visit

<http://www.ibm.com/financing>

IBM Global Financing offerings are provided through IBM Credit LLC in the United States, and other IBM subsidiaries and divisions worldwide to qualified commercial and government customers. Rates are based on a customer's credit rating, financing terms, offering type, equipment type, and options, and may vary by country. Other restrictions may apply. Rates and offerings are subject to change, extension, or withdrawal without notice.

Financing from IBM Global Financing helps you preserve cash and credit lines, enables more technology acquisition within current budget limits, permits accelerated implementation of economically attractive new technologies, offers payment and term flexibility, and can help match project costs to projected benefits. Financing is available worldwide for credit-qualified customers.

For more financing information, visit
